

12.6 VALID DRIVER'S LICENSE

All operators of county vehicles are required to have the valid State of Texas driver's license necessary for legal operation of that vehicle, and are required to keep the Department Head or Elected Official informed of any changes in status of the license. The county's insurance carrier may periodically check the driving records of all employees who operate county vehicles or are required to use their personal vehicle to conduct county business. Failure to maintain a safe driving record may result in dismissal or reassignment. An employee may be required to participate in a defensive driving course if the employee is cited with a moving violation.
