USDA Offers Disaster Recovery Assistance to Agricultural Producers in Texas Impacted by Recent Flooding

TEMPLE/COLLEGE STATION, Texas, May 28, 2024 – The U.S. Department of Agriculture (USDA) has technical and financial assistance available to help farmers and livestock producers across Texas recover from recent flooding. Impacted producers should contact their local [USDA Service Center](#) to report losses and learn more about program options available to assist in their recovery from crop, land, infrastructure, and livestock losses and damages.

USDA Disaster Recovery Assistance

Producers who experience livestock deaths in excess of normal mortality may be eligible for the [Livestock Indemnity Program](#) (LIP). To participate in LIP, producers will have to provide acceptable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to the USDA Farm Service Agency (FSA) no later than the annual program payment application date, which is 60 calendar days following the calendar year in which the loss occurred. The LIP payment application and notice of loss deadline is March 3, 2025, for 2024 calendar year losses.

Meanwhile, the [Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program](#) (ELAP) provides eligible producers with compensation for feed and grazing losses. For ELAP, producers are required to complete a notice of loss and a payment application to their local FSA office no later than Jan. 30, 2025, for 2024 calendar year losses.

Additionally, eligible orchardists, vintners and nursery tree growers may be eligible for cost-share assistance through the [Tree Assistance Program](#) (TAP) to replant or rehabilitate eligible trees, bushes or vines. TAP complements the [Noninsured Crop Disaster Assistance Program](#) (NAP) or crop insurance coverage, which covers the crop but not the plants or trees in all cases. For TAP, a program application must be filed within 90 days of the disaster event or the date when the loss of the trees, bushes or vines is apparent.

“Staff at your local FSA county office will connect you with the programs best suited to meet your needs based on your reported losses or damages,” said Kelly Adkins, State Executive Director for FSA in Texas. “To help us assist you, please be prepared to provide documents, such as farm records, herd inventory, receipts and pictures of damages or losses, and report damages and losses as soon as you are able to evaluate disaster impacts on your operation.”

FSA also offers a variety of direct and guaranteed [farm loans](#), including operating and emergency farm loans, to producers unable to secure commercial financing. Depending on program funding availability, producers in counties with a primary or contiguous disaster designation may be eligible for low-interest [emergency loans](#) to help them recover from production and physical losses. Loans can help producers replace essential property, purchase inputs like livestock, equipment, feed and seed, cover family living expenses or refinance farm-related debts and other needs. Additionally, FSA offers several loan servicing options available for borrowers who are unable to make scheduled payments on their farm loan programs debt to the agency because of reasons beyond their control.

Risk Management

Producers who have risk protection through [federal crop insurance](#) or FSA's [NAP](#) should report crop damage to their crop insurance agent or FSA office, respectively. If they have crop insurance, producers should provide a notice of loss to their agent within 72 hours of initial discovery of damage and follow up in writing within 15 days.

For NAP covered crops, a [Notice of Loss \(CCC-576\) form](#) must be filed within 15 days of the loss becoming apparent, except for hand-harvested crops, which should be reported within 72 hours.

“Because there is always the possibility of losses from floods and other natural disasters, USDA offers crop insurance and risk management to help producers mitigate the financial impact of losses resulting from disaster events, like these, that are beyond their control,” said James Bellmon, Director of RMA’s Regional Office that covers Texas. “Our agents, loss adjusters, and Approved Insurance Providers are prepared to support you through the challenging disaster recovery process.”

Conservation

FSA's [Emergency Conservation Program](#) (ECP) can assist landowners with financial and technical assistance to remove debris from farmland such as woody material, sand, rock and materials from collapsed hoop houses/high tunnels on cropland or pastureland. Through the program, FSA can provide assistance toward the restoration or replacement of fences including livestock cross fences, boundary fences, cattle gates or wildlife exclusion fences on agricultural land.

USDA's Natural Resources Conservation Service (NRCS) is always available to provide technical assistance during the recovery process by assisting producers to plan and implement conservation practices on farms, ranches and working forests impacted by natural disasters. The [Environmental Quality Incentives Program](#) (EQIP) can help producers plan and implement conservation practices on land impacted by natural disasters.

Assistance for Communities

NRCS also administers the [Emergency Watershed Protection](#) (EWP) program, which provides assistance to local government sponsors with the cost of addressing watershed impairments or hazards such as debris removal and streambank stabilization.

The EWP Program is a recovery effort aimed at relieving imminent hazards to life and property caused by floods, fires, windstorms and other natural disasters. All projects must have an eligible project sponsor. NRCS may bear up to 75% of the eligible construction cost of emergency measures (90% within county-wide limited-

resource areas as identified by the U.S. Census data). The remaining costs must come from local sources and can be in the form of cash or in-kind services.

EWP is designed for installation of recovery measures to safeguard life and property as a result of a natural disaster. Threats that the EWP Program addresses are termed watershed impairments. These include, but are not limited to:

- Debris-clogged waterways.
- Unstable streambanks.
- Severe erosion jeopardizing public infrastructure.
- Wind-borne debris removal.

Eligible sponsors include cities, counties, towns or any federally recognized Native American tribe or tribal organizations. Sponsors must be able to provide the local construction share, obtain permits and site access and agree to perform operations and maintenance of the constructed projects. Willing sponsors must submit a formal request (by mail or email) to the state conservationist for assistance within 60 days of the natural disaster occurrence or 60 days from the date when access to the sites become available. For more information, potential sponsors should [contact their local NRCS office](#).

“NRCS can be a very valuable partner to help communities with their recovery efforts,” said Kristy Oates, NRCS State Conservationist in Texas. “Emergency Watershed Protection helps protect communities from further damage and threats to life and property caused by the effects of flooding in watersheds. We can work with a local sponsor to help cover the costs of debris removal and other disaster mitigation. Our staff will work with communities to make assessments of the damages and develop approaches that focus on effective recovery of the land.”

More Information

Additional USDA disaster assistance information can be found on [farmers.gov](#), including USDA resources specifically for producers impacted by flooding. Those resources include the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#) and [Loan Assistance Tool](#). For FSA and NRCS programs, producers should contact their local [USDA Service Center](#). For assistance with a crop insurance claim, producers and landowners should contact their [crop insurance agent](#).

USDA touches the lives of all Americans each day in so many positive ways. In the Biden-Harris administration, USDA is transforming America’s food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate-smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
