**COUNTY JUDGE'S OFFICE
9-1-1 ADDRESSING**

9-1-1 ADDRESS NUMBER SIGNS

Displaying a 9-1-1 address number sign enhances safety and promotes effective emergency response. You may display a number sign of your own choosing or you may purchase an address number sign from Fayette County. The County signs are 6"x12" blue metal signs with 4" white reflective vinyl numbers.

Fayette County Address signs are available at the following locations:

- Fayette County Judge's Office - 151 N Washington St, Rm 302, La Grange, Texas 78945 979/968-6469
- County Building, Schulenburg - 312 Paulus St, Schulenburg, Texas 78956 979/743-4041
- County Building, Flatonia - 216 N Market St, Flatonia, Texas 78941 361/865-3500 or 361/865-3524

The cost per sign is \$15.00. Sign(s) can be mailed to you for an additional \$7.00 per sign. If you would like a sign mailed to you, please mail a check made to Fayette County in the amount of \$22.00 to the County Judge's Office address listed above. Please include in your request the address number to appear on the sign as well as the address where the sign is to be mailed.

You are asked to follow these guidelines when posting an address number sign:

- Sign should NOT be mounted on mailbox as mailboxes are not always located adjacent to the driveway to your property
- Sign may be mounted on either side of driveway entrance
- Mounting should be four to five feet high
- Sign should be visible from public roadway
- Make sure no brush, tree limbs, or other items block view of sign

DRIVEWAY ACCESS FOR EMERGENCY VEHICLES

Planning for access by emergency vehicles improves safety for property owners by providing for a more efficient response by emergency services arriving on the scene. In order to allow for the passage of large fire apparatuses and ambulances, driveways should be clear of low hanging tree limbs and encroaching brush. It is suggested that driveways and gates have an unobstructed vertical clearance of 13'6" and a 12' wide drivable surface with a 4' clear zone on each side of the driveway (suggested 20' feet overall). Emergency vehicles are also very heavy so load limits for any driveway bridges need to be posted at both ends of any bridge. In addition, if you subscribe to an alarm service, property access information (gate codes, etc) should be registered with the alarm service provider.
