The Public Investment Act, Chapter 2256.023 of the Texas Government Code requires the Investment Officer of each local government to submit to its governing body a quarterly report of investment transactions. The Lamar County Treasurer has compiled information to comply with the reporting requirements. Attached is the detailed Investment Report for the period of January 1 – March 31, 2025.

The investment strategy for all funds for the 1st quarter of the 2025 calendar year is that of the investment pool in TexPool and CDs invested with Farmers Bank & Trust.

I Camey Boyer, Lamar County Treasurer and Investment Officer have prepared the attached Investment Report for the Lamar County Commissioners' Court and state that the report is true and correct.

Lamar County Treasurer Common

We the undersigned County Judge and Commissioners for Lamar County Texas hereby certify that we have this date made an examination of the County Treasurer's Quarterly Investment Report and have found the same to be correct and in due order.

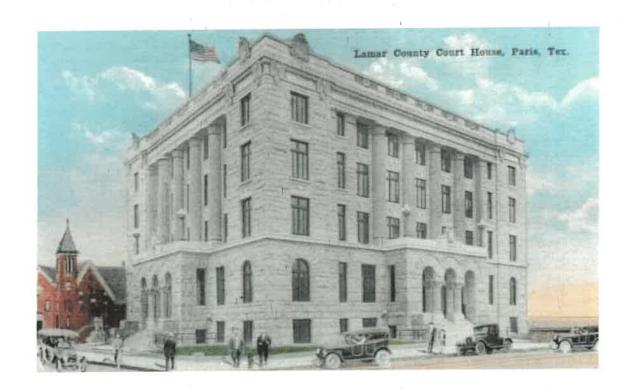

Witness our hands officially this the 12th Day of May 2025

LAMAR COUNTY

INVESTMENT REPORT

January 1 – March 31, 2025

Commissioners Court May 12, 2025

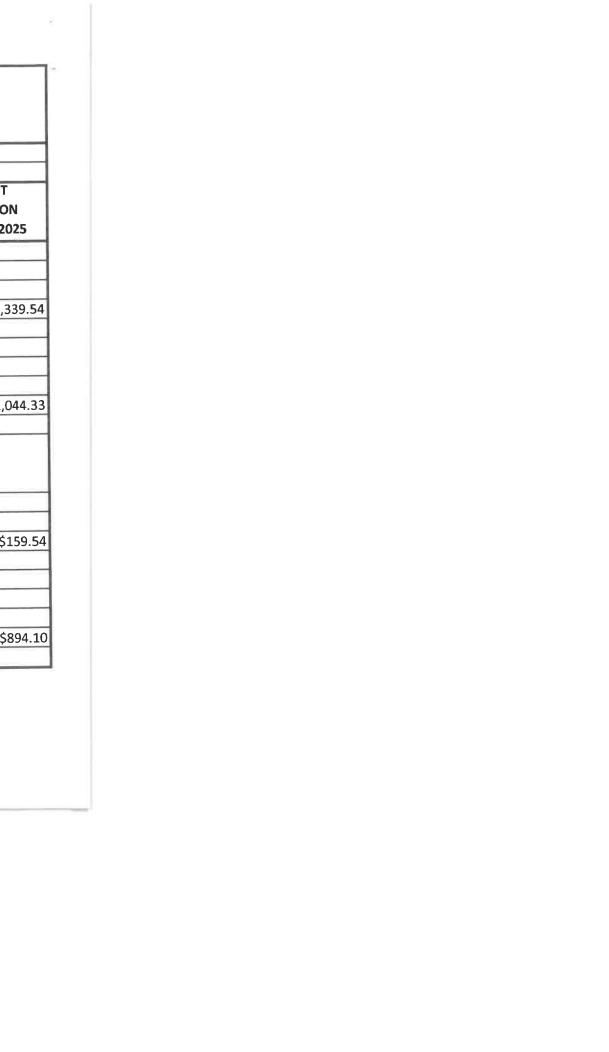

Lamar County Treasurer Camey Boyer

**Definition of Weighted Average Maturity and Weighted Average Life

WAM is the mean average of the periods of time remaining until the securities held in the fund's portfolio (a) are scheduled to be repaid, (b) would be repaid upon a demand by the fund or (c) are scheduled to have their interest rate readjusted to reflect current market rates. For government variable rate securities, if the interest rate is readjusted no less frequently than every 397 calendar days, the security shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate. For non-government variable rate securities, if the security has a scheduled maturity of 397 days or less the security is treated as maturing on the earlier of the date the security is scheduled to be repaid through demand or the period remaining until the next readjustment of the interest rate. If the variable rate security has a scheduled maturity that is more than 397 days it is the later of those two dates. The mean is weighted based on the percentage of the market value of the portfolio invested in each period.

WAL is calculated in the same manner as WAM, but is based solely on the periods of time remaining until the securities held in TexPool (a) are scheduled to be repaid or (b) would be repaid upon a demand by TexPool, without reference to when interest rates of securities within TexPool.
