I. INVESTMENT AUTHORITY AND SCOPE OF POLICY

General Statement

This investment policy serves to satisfy the statutory requirements of Local Government Code 116.112 and Government Code Subchapter A, Chapter 2256 of the Public Funds Investment Act ("PFIA") to define and adopt a formal investment policy. This policy will be reviewed and adopted by the Medina County Commissioners' Court at least annually in accordance with the Government Code Section, 2256.005 (e).

Funds Included

This investment policy applies to all financial assets of all funds of the County of Medina, Texas at the present time, any funds to be created in the future, any other funds held in custody by the County Treasurer, unless expressly prohibited by law or unless it is in contravention of any depository contract between Medina County and any depository bank.

County Investment Officer

In accordance with Section 116.112 (a), Local Government Code and /or Government Code Chapter 2256, Section 2256.005 (f) and (g), the County Treasurer, under the direction of the Medina County Commissioners' Court, may invest County funds that are not immediately required to pay obligations of the County. The Commissioners' Court shall designate by resolution one or more officers or employees as Investment Officer(s).

If the Investment Officer has a personal business relationship as defined by the PFIA with Medina County, or is related within the second degree by affinity or consanguinity to an individual seeking to sell an investment to the County, the Investment Officer must file a statement disclosing that personal business interest, or relationship, with the Texas Ethics Commission and the Medina County Commissioners' Court in accordance with Government Code 2256.005 (I) (1-3).

II. INVESTMENT OBJECTIVES

General Statement

Funds of the County will be invested in accordance with federal and state laws and within the boundaries of this investment policy. Investments shall be made with judgment and care - under circumstances then prevailing - which persons of prudence, discretion, and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the probable safety of their capital as well as the probable income to be derived. The first and foremost consideration of all Medina County investment transactions is the suitability of the investment to the financial requirements of the County. The County will invest according to investment strategies for each fund as they are adopted by Commissioners' Court resolution in accordance with the PFIA, Chapter 2256 of the Texas Government Code.

Safety of Principal

Medina County is concerned about the return of its principal; therefore, **safety of principal is a primary objective in any investment transaction.** To attain this objective, diversification will be required to reduce risk resulting from over concentration of assets in a specific security or maturity.

Liquidity

The Medina County investment portfolio will remain sufficiently liquid to enable Medina County to meet all operating requirements that might be reasonably anticipated. In the consideration of liquidity is the marketability of the investment if the need arises to liquidate the investment before maturity.

Diversification

It will be the policy of Medina County to diversify its portfolio to eliminate the risk of loss resulting from over concentration of assets in a specific maturity, a specific issuer or a specific class of investments. Investments of Medina County shall always be selected that provide for safety of principal, stability of income and reasonable liquidity prior to maturity. Medina County will diversify its investments by security type and institution with the exception of U.S. Treasury securities, authorized pools and depository bank. The County's investment portfolio shall be diversified to reduce the risk of loss resulting from the concentration of assets in a specific maturity, a specific issuer, or a specific class of investments.

Yield

It will be the objective of Medina County to earn the maximum rate of return allowed on its investments within the policies imposed by its safety and liquidity objectives and investment strategies for each fund, and state and federal law governing investment of public funds.

Maturity

Portfolio maturities will be structured to meet the obligations of Medina County first and then to achieve the highest return of interest. When the County has funds that will not be needed to meet current year obligations, maturity restraints will be imposed based upon the investment strategy for each fund. The maximum allowable stated maturity of any individual investment owned by the County may be invested up to thirty-six (36) months.

Quality and Capability of Investment Management

It is Medina County's policy to provide training as required by the Public Funds Investment Act, Sec. 2256.008 and periodic training in investments for the County Treasurer, who is also named County Investment Officer, through courses and seminars offered by professional organizations and associations in order to insure the quality and capability of the County's Investment Officer in making investment decisions.

As per Sec. 2256.008. INVESTMENT TRAINING; LOCAL GOVERNMENTS. (a) Except as provided by Subsections (a-1), (b), (b-1), (e), and (f), the treasurer, the chief financial officer if the treasurer is not the chief financial officer, and the investment officer of a local government shall:

- (1) attend at least one training session from an independent source approved by the governing body of the local government or a designated investment committee advising the investment officer as provided for in the investment policy of the local government and containing at

- Preservation and safety of principal;
- Liquidity;
- Marketability of the investment if the need arises to liquidate the investment before maturity;
- Diversification of the investment portfolio; and
- Yield

Each major fund type has varying cash flow requirements and liquidity needs. Therefore, specific strategies shall be implemented considering the fund's unique requirements. County funds shall be analyzed and invested according to the following major fund types.

In order to minimize risk of loss due to interest rate fluctuations, investment maturities will not exceed the anticipated cash flow requirements of the funds. Investment guidelines by fund type are as follows:

- A. General Operating
- B. Building & Improvements
- C. Debt Service
- D. Special Revenue

Our strategy is as follows:

- A. Safety of principal is the foremost objective of the County, followed by liquidity and yield. Each investment transactions shall seek to first ensure that capital losses are avoided; whether they are from securities defaults or erosion of market value.
- B. Investment decisions should not incur unreasonable investment risks in order to obtain current investment income.
- C. The County's investment portfolio will remain sufficiently liquid to enable the County to meet all operating requirements which might be reasonably anticipated. This strategy is achieved by utilizing highly liquid short term Treasury Bills, Agency Discount Notes, Certificate of Deposit with a stated maturity of thirty-six (36) months or less, and pooled funds in LOGIC, Texas CLASS, and TexPool/TexPool Prime. The dollar weighted

average maturity of 365 days or less will be calculated using the stated final maturity dates of each security.

- D. The investment portfolio shall be designed to attain a market-average rate of return throughout budgeting and economic cycles, taking into account the County's investment risk constraints, the cash flow characteristics of the portfolio, and state law that restricts the replacement of the County funds.
- E. The County will attempt to diversify its investments to avoid incurring unreasonable and avoidable risks regarding specific types or individual financial institutions.
- F. The County will not make investments for the purpose of trading or speculation as the dominant criteria, such as anticipating an appreciation of capital through changes in market interest rate.
- G. The County adheres to the guidance provided by the "prudent person rule", which obligates a fiduciary to ensure that "... investments shall be made with exercise of that degree of judgment and care, under circumstances then prevailing, which persons of prudence, discretion and intelligence exercise in the management of their own affairs, not for speculation but for investment, considering the probable safety of their capital as well as the probable income to be derived."
- H. In managing its investment portfolio, the County will specifically avoid any purchase of investments, or any investment practice or procedures not specifically authorized by the investment policy as approved by Commissioners Court.
- I. All participants in the investment process shall seek to act responsibly as custodian of the public trust. Investment officials shall avoid any transaction that might impair public confidence in the County's ability to govern effectively. Investment officials shall recognize that the investment portfolio is subject to public review and evaluation. The overall program shall be designed and managed with a degree of professionalism that is worthy of the public trust.

Each fund type has varying cash flow requirements and liquidity needs. Therefore, specific strategies shall be implemented considering the fund's unique requirements. All funds will be pooled for investment purposes.

Pooled fund mean an internally created fund of an investing entity in which one or more institutional accounts of the investing entity are invested.

All funds of Medina County that are invested are invested by matching the maturity of investments with liabilities. Investments are made with the intention of holding to maturity, but with the ability to liquidate should funds be needed at any time.

This strategy is achieved by utilizing highly liquid short term Treasury Bills, Agency Discount Notes, Certificates of Deposit with a stated maturity of thirty-six (36) months or less and pooled funds in LOGIC, Texas CLASS, and TexPool/TexPool Prime. The dollar weighted average maturity of 365 days or less will be calculated using the stated final maturity dates of each security.
