

MAVERICK COUNTY, TEXAS
RESPONSES TO 09/30/2012 SCHEDULE OF FINDINGS AND QUESTIONED COST
DELIVERED TO THE COUNTY AS OF 05/23/2014

These responses are based on the fact the September 30, 2012 *Schedule of Findings and Questioned Cost Report* was dated March 17, 2014 and delivered on or about **May 23, 2014** as stated on the report.

Finding 2012-01 - Monthly Financial Report

Monthly reports were not submitted in 2012 because a lack of time, personnel and normally the County Auditor would prepare and submit these reports, however, there was no County Auditor after January 2012. A new County Auditor was appointed on September 24, 2012. Subsequent to that time monthly reports commenced to be issued. We cannot respond to the time period before 2011.

Finding 2012-02 - County-wide Accounting, Internal Control and Financial Deficiencies

Accounting records and general ledger accounting has been updated in that a more diligent awareness of postings, entries and other items has been part of the 2013 information and a heightened sense of the financial records is now part of personnel awareness. General ledgers for all funds have been updated in 2013 to include governmental, proprietary and Agency (elected officials) accounts. Software updates have been purchased and/or in the process of being setup. We discovered that the County court software that generates reports for the courts, county clerk, justices of the peace and other departments was not functioning in that it is obsolete and the company that developed it was no longer providing support. A new system has been purchased and is currently being installed.

Receivables in 2013 have been reconciled. Currently in 2013 and subsequently we have been reviewing these accounts to determine if they are collectable and continue to do so in 2014. We will be reviewing all accounts during the 2013 year to eliminate accounts and funds that are no longer needed or used.

Accounts payable personnel has been changed and extensive work has been done on them during 2013. This includes current and past year payables. We continue to pay old payables but continue to have documentation problems with them. In 2013 we have attempted to maintain current all payables.

Interfund payables and receivables is still high because of the continued use by staff and the non-liquidation of the accounts. This is going to be a project in itself to review and liquidate the accounts between funds. Where we can we liquidate accounts if we can.

We have documented closing procedure.

Budget monitoring is performed once reports began to be issued and continue to be monitored.

Journal entries were not on a daily basis reviewed by supervisory personnel. However, in 2013 new procedures have been started that permits a monthly review of these entries.

MAVERICK COUNTY, TEXAS
RESPONSES TO 09/30/2012 SCHEDULE OF FINDINGS AND QUESTIONED COST
DELIVERED TO THE COUNTY AS OF 05/23/2014

Bank reconciliations have been done and continue to be current. In 2012 and 2013 the Auditor's office controlled bank reconciliations. In 2014 the Treasurer's office assumed its constitutional duties and began to reconcile the bank accounts. Software has been purchased to assist in the reconciliation process. Treasurer's personnel have been trained by our staff however lack of bookkeeping experience in their department continues to be a constant problem.

Finding 2012-03 - Expenditures and Accounts Payable

In 2012 no Interim County Auditor was appointed, however purchasing procedures were developed, by staff and presented to Commissioner's Court and adopted countywide. Workshops were presented to county staff on these procedures. All departments attended. Accounting staff have been using these procedures throughout 2012 and 2013. Accounts payable have been reconciled and separated between current and outstanding old payables.

Accrued Vacation and Compensated Time

This function does not fall under the County Auditor's office but is a Treasurer function.

Finding 2012-04 – Lack of Debt Monitoring and Compliance

A detail record of each issue's disbursement was maintain. Restriction on the tax notes was dictated by the issuing documents that limited disbursements to "current or operating expenses." The Auditor's received all information on these Tax Notes but insisted on reworking postings and journal entries made by the Treasurer's department. In 2013 we will need to go into these funds and undo and correct these items including some auditor adjustments.

Finding 2012-05 – Gas Cards

This has been changed and payments are made based on invoices that accompany the statements. This information was provided to the auditor's staff including written procedures.

Finding 2012-06 - Compliance and Other Matters

The continuing application of new procedures and heighten awareness of matters that happen in the past continues in the minds of current staff. They are constantly reminded to "keep an eye" open for any "funny" looking items, such as fraud items as they apply their daily duties. New issues have been encountered and proper authorities have been contacted. This finding is related to legal and law enforcement matters.

MAVERICK COUNTY, TEXAS
RESPONSES TO 09/30/2012 SCHEDULE OF FINDINGS AND QUESTIONED COST
DELIVERED TO THE COUNTY AS OF 05/23/2014

Finding 2012-07 - Equipment and Real Property Management

During 2013 a staff member was appointed to develop, record property inventory records and to update them to the present. The work was not performed as required and that staff person is not a member of this staff. For 2012 there is no accountability, however, we now have a full time person devoted to developing Equipment and Real Property Management records. This includes the use of our accounting software system module. We will be linking account numbers so that when certain accounts related to capital expenditures appears on a purchase order staff will be notified. New equipment is now tagged when purchased.

Finding 2012-08 - Allowable Costs

In 2012 the Sheriff's department handled this grant. We are reviewing these procedures for any modifications.

Finding 2012-09 - Financial Reporting and Accounting

Procedures during 2012 were slow to be implemented since a County Auditor was not in place after January 2012. No Interim County Auditor was appointed but during this time period the most concern was shortage of money and dealing with outside audit requirements, law enforcement inquiries and other more pressing issues that would come up. In addition overall county personnel were very unaware of county procedures that were in place but were not being followed. A learning curve was necessary for them to comprehend the procedures in place in which the County Auditor's department assisted or trained personnel. Late into 2012 and 2013 general procedure reviews have been slow to be implemented in that "catching up" with other pressing matters in the County took a priority. Financial reporting has been implemented and continues to improve. New personnel were hired throughout 2012 to the point that almost all personnel in the accounting department were replaced. These personnel have degrees in finance or accounting. We continued to encounter problems in 2012 and 2013.

Prior Year (2011) Finding 2011-01, 02, 03, 04, 05, 06, 07, 08, 09 and 10

Finding 2011-01 –This is a prior year finding and has been addressed previously in this report.

Finding 2011-02 –This is a prior year finding and has been addressed previously in this report.

Finding 2011-03 –This is a prior year finding and has been addressed previously in this report.

Finding 2011-04 – These calculations are performed by the Treasurer's department and has been cleared in 2012

Finding 2011-05 – This was related to accrual issues and has been cleared in 2012

Finding 2011-06 – This is a prior year finding and has been addressed previously in this report.

Finding 2011-07 – This is a prior year finding and has been cleared in 2012.

Finding 2011-08 – This is a prior year finding and has been cleared in 2012.

Finding 2011-09 – This is a prior year finding and has been addressed previously in this report.

Finding 2011-10 – This is a prior year finding and has been addressed previously in this report.

Accounting Standards and Procedures

January 1,
2013

***MAVERICK COUNTY, TEXAS
COUNTY AUDITOR'S OFFICE***

This page intentionally left blank

FOREWORD

The Governmental Accounting Standards Board (GASB), which was established as an arm of the Financial Accounting Foundation in April 1984, is the successor organization to the National Council on Governmental Accounting (NCGA). GASB was established to promulgate standards of financial accounting and reporting with respect to activities and transactions of state and local governments. Governmental accounting and reporting standards guidance is provided by GASB through the issuance of GASB Statements.

The task of revising the manual to reflect these changes is a cooperative effort in the Maverick County Auditor's Office and staff. The result of these efforts is a manual that provides current information to the County conforming to generally accepted accounting principles.

The manual details the uniform charts of accounts, fund structure, functions, and activities, and it includes specific accounting procedures for specialized fields. The intent is twofold:

- To ensure conformance to generally accepted accounting principles; and

- To facilitate comparison and analysis of county financial reports on a countywide basis by minimizing differences between counties' philosophies, methods, and terminologies.

The manual serves as a guide to aid county in the installation of accounting and financial systems, to ensure that the systems as conceived will continue through changes in personnel, to answer questions on procedure, to aid in the audits, and to aid in systems evaluations.

CHAPTER 1

SUMMARY STATEMENT OF ACCOUNTING PRINCIPLES

Basis

1.01 Basis

The National Council on Governmental Accounting (NCGA) has established twelve basic principles of accounting and reporting applicable to governmental units. These may be grouped logically into seven categories:

- Generally Accepted Accounting Principles and Legal Compliance
- Fund Accounting
- Capital Assets and Long-Term Liabilities
- Revenues, Expenditures/Expenses, and Transfers
- The Budget and Budgetary Accounting
- Classification and Terminology
- Financial Reporting

Generally Accepted Accounting Principles (GAAP) and Legal Compliance

1.02 Accounting and Reporting Capabilities

A governmental accounting system must make it possible both:

- To present fairly and with full disclosure the financial position and results of financial operations of the governmental unit in conformity with generally accepted accounting principles; and
- To determine and demonstrate compliance with finance-related legal and contractual provisions.

1.03 Purpose

Compliance with GAAP assures uniformity of financial reporting and, hence, a reasonable degree of comparability between local government financial reports.

1.04 Conflicts Between Legal Provisions and GAAP

Where legal requirements conflict with GAAP, the basic financial statements should be prepared in conformity with GAAP. To conform with legal requirements, additional schedules and narrative explanations should be included in the Comprehensive Annual Financial Report (CAFR) if one is prepared. The accounting system may be maintained on a legal compliance basis if sufficient records are included to permit reporting in accordance with GAAP.

1.05 Bringing Legal Provisions Into Conformance With GAAP

Every effort should be made to bring applicable laws into conformance with GAAP. The laws should limit the accounting, auditing, and reporting requirements to conformance with GAAP and Generally Accepted Auditing Standards (GAAS). The establishment and implementation of the details of accounting principles, systems, and practice should be the responsibility of qualified county auditors. This is particularly important in view of the advances being made in the accounting profession.

Fund Accounting

1.06 Fund Definition

In governmental accounting the term “fund” is used to mean different things in differing situations. As used in this section, it indicates only an accounting entity.

Government resources are allocated to and accounted for in separate entities, called funds, based upon purposes for which they are to be spent and controlled.

1.07 Fund Accounting Systems

Governmental accounting systems should be organized and operated on a fund basis. A fund is defined as a fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities and equities, and changes therein, which are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions, or limitations.

Unlike private business, which is accounted for as a single entity, a governmental unit is accounted for through several separate funds. Each of these entities accounts for assets, liabilities, and equities within each fund.

Fund accounting systems not only need to be capable of recording the day-to-day transactions in the appropriate funds, but also must facilitate preparation of the basic financial statements. These basic financial statements require both government-wide and fund reporting for most counties.

1.08 Types of Funds

The following types of funds should be used:

Governmental Funds - Those in which most governmental functions are reported.

- General Fund - Used to account for and report all financial resources except those required to be accounted for in another fund.
- Special Revenue Funds - Used to account for and report the proceeds of specific revenue sources (other than debt service or capital projects) that are legally restricted or committed to expenditure for specified purposes.
- Capital Projects Funds - Used to account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays, including the acquisition or construction of major capital facilities and other capital assets (other than those financed by Proprietary Funds and Trust Funds).

- Debt Service Funds - Used to account for and report financial resources that are restricted, committed, or assigned to expenditure for principal and interest (other than those financed by Proprietary Funds and Trust Funds).
- Permanent Governmental Funds - Used to account for and report financial resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that support the reporting government's programs - that is, for the benefit of the government or its citizenry.

Proprietary Funds - Used to account for a government's ongoing organizations and activities that are similar to those found in the private sector.

- Enterprise Funds - Used to account for an activity for which a fee is charged to external users for goods or services.
- Internal Service Funds - Used to account for the financing of goods or services provided by one department or agency to other departments or agencies of the governmental unit, or to other governmental units, on a cost-reimbursement basis.

Fiduciary Funds - Used to account for assets held by a government in a trustee capacity or as an agent that therefore cannot be used by the government to support its own programs.

- Pension (and Other Employee Benefit) Trust Funds - Used to report resources that are required to be held in trust for the members and beneficiaries of defined benefit pension plans, defined contribution plans, other post-employment benefit plans, or other employee benefit plans.
- Investment Trust Funds - Used to report governmental external investment pools in separately issued reports and the external portion of these same pools when reported by the sponsoring government.
- Private-Purpose Trust Funds - Used to report all trust arrangements, other than those properly reported in pension trust funds or investment trust funds, under which principal and income benefit individuals, private organizations, or other governments.
- Agency Funds - Used to report resources held by the reporting government in a purely custodial capacity (assets equal liabilities) that thus do not involve measurement of results of operations.

1.09 Number of Funds

Governmental units should establish and maintain those funds required by law and sound financial administration. Only the minimum number of funds consistent with legal and operating requirements should be established.

Using too many funds causes inflexibility and undue complexity in financial management. It should be avoided in the interest of efficient and economical financial administration.

Capital Assets and Long-Term Liabilities

1.10 Capital Assets

Capital assets are major assets that benefit more than a single fiscal period. Typical examples are land, improvements to land, buildings and improvements, vehicles, machinery, equipment, historical treasures and infrastructure.

Capital assets owned by proprietary or fiduciary funds are accounted for through those funds and are included in the fund financial statements. Capital assets owned by proprietary funds are also included in the government-wide financial statements. Other capital assets should be maintained within a capital assets accounting system and included in the government-wide financial statements but not in the fund financial statements.

1.11 Valuation of Capital Assets

Capital assets are valued at original cost or at their estimated cost at the time of acquisition. Gifts are recorded at their estimated fair value at the time received.

1.12 Depreciation Expense

Depreciation expense and accumulated depreciation are reported in the government-wide financial statement. Depreciation of capital assets is not reported in the fund financial statements for governmental funds. Depreciation is recorded in proprietary funds and fiduciary funds where expenses, net income, and/or capital maintenance are measured.

1.13 Long-Term Liabilities

Long-term liabilities expected to be financed from governmental funds are reported in the government-wide statement but not in the fund financial statement for governmental funds. Long-term liabilities of proprietary or fiduciary funds are accounted for through those funds and reported in the fund financial statements. General long-term liabilities must be maintained in sufficient detail in the debt accounting records to provide sufficient information for financial reporting.

Revenues, Expenditures/Expenses, and Transfers

1.14 Measurement Focus and Basis of Accounting

The modified accrual or accrual basis of accounting, as appropriate, should be used in measuring financial position and operating results.

Government-wide revenues and expenses should be recognized on the accrual basis and economic resources measurement focus. Revenues should be recognized in the accounting period in which they are earned and become measurable. Expenses should be recognized in the period incurred, if measurable.

Governmental fund revenues and expenditures should be recognized on the modified accrual basis and financial resources measurement focus. Revenues should be recognized in the accounting period in which they become available and measurable. Expenditures should be recognized in the period that the fund liability is incurred, if measurable.

Proprietary fund revenues and expenses should be recognized on the accrual basis and economic resources measurement focus. Revenues should be recognized in the accounting period in which they are earned and become measurable; expenses should be recognized in the period incurred, if measurable.

Fiduciary fund revenues and expenses should be recognized on the accrual basis and economic resources measurement focus.

Transfers should be recognized in the accounting period in which the interfund activity arises.

The Budget and Budgetary Accounting

1.15 Budgeting, Budgetary Control, and Budgetary Reporting

An annual budget(s) should be adopted by every governmental unit.

The accounting system should provide the basis for appropriate budgetary control.

Local Government Code Sections 29000 through 29144 and Section 30200, commonly referred to as the County Budget Act (see Appendix B), require annual operating budgets. Budgets adopted to comply with these provisions provide the legal authorization and basis for control of financial operations for the fiscal year.

Budgetary comparisons, at a minimum, should be included in the appropriate financial statements and schedules for governmental funds for which an annual budget has been legally adopted by the governing body. For reporting purposes, the comparison should include the original adopted budget and the final revised budget compared with the actual data on a budgetary basis. If the legally prescribed budgetary basis differs materially from GAAP, budgetary data should present a comparison of the legally adopted budget with actual data on the budgetary basis. This comparison should be done at the level of control used by the entity.

The manner in which budgetary control should be achieved and reported may differ significantly between proprietary and governmental funds, and to a lesser extent among the several types of governmental funds.

1.16 Types of Budgets

A budget is a plan of financial operation embodying an estimate of proposed expenditures for a given period and the proposed means of financing them.

The Annual Budget - required by the County Budget Act, authorizes and provides the basis for control of financial operations during the fiscal year.

Long-Term Budgets - may be prepared to present estimates of available financing and financing requirements (as appropriate) for several fiscal periods. These are planning documents typically emphasizing major programs and capital outlay plans. This type of budget is strongly recommended as a necessary tool for efficient financial management.

Capital Budgets - may be prepared to present proposed capital outlays and the proposed means of financing them. They usually:

- Cover a period of four to six years;
- Are revised annually; and
- Are extended for one year to keep their length constant over time

This budget provides for long-range projections usually required for capital projects planning and financing.

Classification and Terminology

1.17 Transfer, Revenue, Expenditure, and Expense Account Classification

Interfund and intrafund transfers and proceeds of long-term debt issues should be classified separately from fund revenues and expenditures or expenses.

Governmental fund revenues should be classified by fund, function, activity, budget unit, and source. Expenditures should be classified by fund, function, activity, budget unit, objects, and subobjects.

Proprietary fund revenues and expenses should be classified in essentially the same manner as those of similar business organizations, functions, or activities.

1.18 Interfund Activity

Interfund activity is activity between funds of the primary government, including blended component units. Interfund activities are divided into two broad categories: reciprocal and nonreciprocal.

Reciprocal interfund activity comprises interfund loans and interfund services provided and used.

- Interfund loans represent amounts provided between funds and blended component units of the primary government with a requirement for repayment.
- Interfund services provided and used represent sales and purchases of goods and services between funds and blended component units of the primary government for a price approximating their external exchange value.

Nonreciprocal interfund activity comprises interfund transfers and interfund reimbursements.

- Interfund transfers represent flows of assets (such as cash or goods) between funds and blended component units of the primary government without equivalent flows of assets in return and without a requirement for repayment.
- Interfund reimbursements represent repayments from the funds or blended component units of the primary government responsible for particular expenditures or expenses to the funds or blended component units of the primary government that initially paid for them.

1.19 Intrafund Transfers

Intrafund transfers are transfers of costs between budget units in the same governmental type fund.

1.20 Governmental Funds and Terminology

Common language and uniform classification can enhance effective management control and accountability. The established terminology and classifications should be used consistently in all phases of budgeting, accounting, and reporting.

1.21 Proprietary Funds Terminology

The accounts and financial reports of proprietary funds should be maintained and prepared in essentially the same manner as those of similar business enterprises. The terminology and classifications of the flexible budgets (operating plans) should be consistent with those used in financial reports.

Financial Reporting

1.22 Interim and Annual Financial Reports

Appropriate interim financial statements and reports of financial position, operating results, and other pertinent information should be prepared to facilitate management control of financial operations, legislative oversight, and, where necessary or desired, for external reporting purposes.

At a minimum, basic financial statements, as defined by GAAP, must be issued. It is recommended, but not required, that a Comprehensive Annual Financial Report be prepared and published that covers: all funds of the governmental unit including government-wide as well as appropriate combined, combining and individual fund statements; notes to the financial statements; schedules; narrative explanations; and statistical tables.

Basic Financial Statements

- The Combined Balance Sheet - all fund types, account groups and component(s) units,
- The Combined Statement of Revenues, Expenditures and Changes in Fund Balances - governmental funds, similar trust funds and component units,
- The Combined Statement of Revenues, Expenditures and Changes in Fund Balances - budget and actual
- The Combined Statement of Revenues, Expenditures and Changes in Fund/Equity/Retained Earnings - proprietary funds, similar trust funds, and component units, and
- The Combined Statement of Cash Flows - proprietary funds, nonexpendable trust funds, and similar component units.

Comprehensive Annual Financial Report

- Government-Wide Statement of Activities
- Government-Wide Statement of Net Assets
- Governmental Fund Statement of Revenues, Expenditures, and Fund Balance
- Governmental Fund Balance Sheet
- Proprietary Fund Statement of Net Assets
- Proprietary Fund Statement of Revenues, Expenses, and Changes in Fund Net Assets
- Proprietary Statement of Cash Flows
- Fiduciary Fund Statement of Fiduciary Net Assets
- Fiduciary Fund Statement of Changes in Fiduciary Net Assets

1.23 Financial Statements and Schedules

Financial statements and schedules are derived from the accounts and related records. Interim financial statements (optional) cover periods of less than one year (monthly, quarterly, etc.) and are primarily for internal use. Annual financial statements (mandatory) are prepared for each fiscal year to serve the needs of both internal and external users. The financial statements and schedules should adhere to any applicable GASB Standards.

1.24 Inclusion of Component Units in Financial Statements

Annual financial statements must include financial data for the county as well as financial data for all “component units.” Together, the county and the component units make up the “reporting entity.”

Component units to be included in the reporting entity include legally separate organizations for which the county is financially accountable or which have a relationship with the county which is of such a nature and significance that omission would result in incomplete or misleading financial statements.

A county is financially accountable if:

- It appoints a majority of the members of the organizations’ governing body;

and is

- Able to impose its will on that organization; or
- There is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the county; or
- The organization is fiscally dependent on the county.

or

Organizations identified as component units must be included in financial statements in one of two methods:

- Blended - Financial data is reported as if the component unit is a separate fund of the county.
- Discrete - Financial data is reported in separate columns in the basic financial statements.

Refer to applicable GASB publications for additional information for determining whether an organization is a component unit, whether a component unit’s financial data should be reported using the blended or the discrete method, and what footnote disclosures regarding the reporting entity are required.

1.25 Component Unit Use of Not-For-Profit Accounting and Financial Reporting Principles

GASB allows component units that, prior to June 30, 1999, used not-for-profit accounting and financial reporting principles to continue to do so. Not-for-profit accounting and financial reporting principles are generally defined as those contained in the American Institute of Certified Public Accountants’ Statement of Position 78-10, Accounting Principles and Reporting Practices for Certain Nonprofit Organizations, or Industry Audit Guide, Audits of Voluntary Health and Welfare Organizations, except for the provisions relating to the joint costs of information materials and activities that include a fund-raising appeal. The standard specifically requires that certain GASB pronouncements be applied if the basic not-for-profit model is being used. Counties with component units using the not-for-profit model should refer applicable GASB publications for additional information.

1.26 County Use of Not-For-Profit Accounting and Financial Reporting Principles

With the exception of proprietary activities accounted for in proprietary funds of the component unit financial data, county financial statements may not reflect the use of not-for-profit accounting or financial reporting principles.

CHAPTER 2 POLICIES

General

2.01 **Recognized Authorities**

This manual represents the official interpretation of Generally Accepted Accounting Principles (GAAP) and accounting procedures for use by Texas counties. It is issued in compliance with Government Code Section 30200, which requires the State Controller to prescribe uniform accounting procedures for counties.

The Governmental Accounting Standards Board (GASB) is the accepted authority on the establishment of accounting principles and practices. The standards established by GASB provide guidance primarily for accounting and reporting for governmental operations. Accounting and reporting for government operations that are similar to business enterprises closely parallel commercial accounting and reporting. In these instances, applicable business accounting practices and professional pronouncements are to be followed.

Governmental accounting and reporting guidance is provided through the issuance of GASB Statements. Listed below are the current GASB statements and their effective dates.

Statement Number	GASB Statement	Effective Date:
Statement No. 1	<i>Authoritative Status of NCGA Pronouncements and AICPA Industry Audit Guide</i>	On issuance in July 1984
Statement No. 2	<i>Financial Reporting of Deferred Compensation Plans Adopted under the Provisions of Internal Revenue Code Section 457</i>	Financial statements for periods ending after December 15, 1986 Superseded by GASBS 32
Statement No. 3	<i>Deposits with Financial Institutions, Investments (including Repurchase Agreements), and Reverse Repurchase Agreements</i>	Financial statements for periods ending after December 15, 1986
Statement No. 4	<i>Applicability of FASB Statement No. 87, "Employers' Accounting for Pensions," to State and Local Governmental Employers</i>	On issuance in September 1986 Superseded by GASBS 27
Statement No. 5	<i>Disclosure of Pension Information by Public Employee Retirement Systems and State and Local Governmental Employers</i>	Financial reports issued for fiscal years beginning after December 15, 1986. Earlier application is encouraged.
Statement No. 6	<i>Disclosure of Pension Information by Public Employee Retirement Systems and State and Local Governmental Employers</i>	Financial statements for periods beginning after June 15, 1987. Earlier application is encouraged.
Statement No. 7	<i>Advance Refundings Resulting in Defeasance of Debt</i>	Fiscal periods beginning after December 15, 1986.
Statement No. 8	<i>Applicability of FASB Statement No. 93, "Recognition of Depreciation by Not-for-Profit Organizations," to Certain State and Local Governmental Entities</i>	On issuance in January 1988 Superseded by GASBS 35

Statement Number	GASB Statement	Effective Date:
Statement No. 9	<i>Reporting Cash Flows of Proprietary and Nonexpendable Trust Funds and Governmental Entities That Use Proprietary Fund Accounting</i>	Financial statements for fiscal years beginning after December 15, 1989. Earlier application is encouraged.
Statement No. 10	<i>Accounting and Financial Reporting for Risk Financing and Related Insurance Issues</i>	Public entity risk pools—after June 15, 1990 Entities other than pools—after June 15, 1994 subject to the modified accrual basis of accounting for governmental funds. Earlier application is encouraged.
Statement No. 11	<i>Measurement Focus and Basis of Accounting—Governmental Fund Operating Statements</i>	Deferred by GASB Statement 17 to periods beginning approximately two years after an implementation standard is issued (early application not permitted) If effective, would have superseded the measurement focus and basis of accounting—governmental funds aspects of several NCGA pronouncements
Statement No. 12	<i>Disclosure of Information on Postemployment Benefits Other Than Pension Benefits by State and Local Governmental Employers</i>	Financial statements for fiscal years beginning after June 15, 1990. Earlier application is encouraged.
Statement No. 13	<i>Accounting for Operating Leases with Scheduled Rent Increases</i>	Proprietary and similar trust funds: prospectively for leases with terms beginning after June 30, 1990 Governmental and similar trust funds: Measurement criteria—prospectively for leases with terms beginning after June 30, 1990 Recognition criteria—two changes: one for financial statements for periods ending after June 30, 1990; the other for financial statements for periods approximately two years after an implementation standard is issued (early application not permitted)
Statement No. 14	<i>The Financial Reporting Entity</i>	Financial statements for periods beginning after December 15, 1992.
Statement No. 15	<i>Governmental College and University Accounting and Financial Reporting Models</i>	Financial statements for periods beginning after June 15, 1992. Superseded by GASBS 35
Statement No. 16	<i>Accounting for Compensated Absences</i>	Financial statements for periods beginning after June 15, 1993.

Statement Number	GASB Statement	Effective Date:
Statement No. 17	<i>Measurement Focus and Basis of Accounting-Governmental Fund Operating Statements: Amendment of the Effective Dates of GASB Statement No. 11 and Related Statements—an amendment of GASB Statements No. 10, 11, and 13</i>	On issuance in June 1993
Statement No. 18	<i>Accounting for Municipal Solid Waste Landfill Closure and Postclosure Care Costs</i>	Financial statements for periods beginning after June 15, 1993. Earlier application is encouraged.
Statement No. 19	<i>Governmental College and University Omnibus Statement—an amendment of GASB Statements No. 10 and 15</i>	Pell grants—financial statements for periods beginning after June 15, 1993 Risk financing activities—financial statements for periods beginning after June 15, 1994 Superseded by GASBS 35
Statement No. 20	<i>Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting</i>	For periods beginning after December 15, 1993. Earlier application is encouraged. Will be superseded by GASBS 62
Statement No. 21	<i>Accounting for Escheat Property</i>	For periods beginning after June 15, 1994.
Statement No. 22	<i>Accounting for Taxpayer-Assessed Tax Revenues in Governmental Funds</i>	For periods beginning after June 15, 1994 Superseded by GASBS 33
Statement No. 23	<i>Accounting and Financial Reporting for Refundings of Debt Reported by Proprietary Activities</i>	For periods beginning after June 15, 1994
Statement No. 24	<i>Accounting and Financial Reporting for Certain Grants and Other Financial Assistance</i>	For periods beginning after June 15, 1995.
Statement No. 25	<i>Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans</i>	For periods beginning after June 15, 1996.
Statement No. 26	<i>Financial Reporting for Postemployment Healthcare Plans Administered by Defined Benefit Pension Plans</i>	For periods beginning after June 15, 1996. Superseded by GASBS 43
Statement No. 27	<i>Accounting for Pensions by State and Local Governmental Employers</i>	For periods beginning after June 15, 1997.
Statement No. 28	<i>Accounting and Financial Reporting for Securities Lending Transactions</i>	For periods beginning after December 15, 1995. Earlier application is encouraged.
Statement No. 29	<i>The Use of Not-for-Profit Accounting and Financial Reporting Principles by Governmental Entities</i>	For periods beginning after December 15, 1994 (earlier application encouraged; however, the modification of the AICPA Not-for-Profit model for certain GASB pronouncements is effective for entities that previously have not applied those pronouncements for periods beginning after December 15, 1995)
Statement No. 30	<i>Risk Financing Omnibus—an amendment of GASB Statement No. 10</i>	For periods beginning after June 15, 1996. Earlier application is encouraged.

Statement Number	GASB Statement	Effective Date:
Statement No. 31	<i>Accounting and Financial Reporting for Certain Investments and for External Investment Pools</i>	□□□□periods beginning after June 15, 1997. Earlier application is encouraged.
Statement No. 32	<i>Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans—a rescission of GASB Statement No. 2 and an amendment of GASB Statement No. 31</i>	For periods beginning after December 31, 1998 or when plan assets are held in trust under the requirements of IRC Section 457, subsection (g), if sooner
Statement No. 33	<i>Accounting and Financial Reporting for Nonexchange Transactions</i>	For periods beginning after June 15, 2000. Earlier application is encouraged.
Statement No. 34	<i>Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments</i>	In three phases based on a government's total annual revenues, beginning with periods beginning after June 15, 2001 and continuing through periods beginning after June 15, 2003
Statement No. 35	<i>Basic Financial Statements—and Management's Discussion and Analysis—for Public Colleges and Universities—an amendment of GASB Statement No. 34</i>	In three phases based on a public institution's total annual revenues, beginning with periods beginning after June 15, 2001 and continuing through periods beginning after June 15, 2003. Public institutions that are component units of a primary government should implement this standard at the same time as that primary government.
Statement No. 36	<i>Recipient Reporting for Certain Shared Nonexchange Revenues—an amendment of GASB Statement No. 33</i>	Simultaneously with Statement 33, for periods beginning after June 15, 2000
Statement No. 37	<i>Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments: Omnibus—an amendment of GASB Statements No. 21 and No. 34</i>	Implemented simultaneously with Statement 34. Three phases based on a government's total annual revenues in the first fiscal year ending after June 15, 1999: Phase 1 governments—revenues of \$100 million or more—after June 15, 2001. Phase 2 governments—revenues of \$10 million or more but less than \$100 million—after June 15, 2002. Phase 3 governments—revenues of less than \$10 million—after June 15, 2003. For governments that implemented Statement 34 prior-after June 15, 2000.

Statement Number	GASB Statement	Effective Date:
Statement No. 38	<i>Certain Financial Statement Note Disclosures</i>	Implemented simultaneously with Statement 34. Three phases based on a government's total annual revenues in the first fiscal year ending after June 15, 1999: Phase 1 governments—revenues of \$100 million or more—paragraphs 6 through 11 after June 15, 2001. Paragraphs 12 through 15 after June 15, 2002. Phase 2 governments—revenues of \$10 million or more but less than \$100 million—after June 15, 2002. Phase 3 governments—revenues of less than \$10 million—after June 15, 2003. Earlier application is encouraged. However, paragraphs 6, 14, and 15 should be implemented only if Statement 34 has also been implemented.
Statement No. 39	<i>Determining Whether Certain Organizations Are Component Units—an amendment of GASB Statement No. 14</i>	For periods beginning after June 15, 2003. Earlier application is encouraged.
Statement No. 40	<i>Deposit and Investment Risk Disclosures—an amendment of GASB Statement No. 3</i>	For periods beginning after June 15, 2004. Earlier application is encouraged.
Statement No. 41	<i>Budgetary Comparison Schedules—Perspective Differences—an amendment of GASB Statement No. 34</i>	Implemented simultaneously with Statement 34. For governments that have implemented Statement 34 prior to the issuance of this Statement - after June 15, 2002.
Statement No. 42	<i>Accounting and Financial Reporting for Impairment of Capital Assets and for Insurance Recoveries</i>	For periods beginning after December 15, 2004. Earlier application is encouraged.
Statement No. 43	<i>Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans</i>	One year prior to effective date of GASB No. 45. Revenues of \$100 million or more—after December 15, 2005. Revenues of \$10 million or more but less than \$100 million—after December 15, 2006. Revenues of less than \$10 million—after December 15, 2007. If comparative financial statements are presented, restatement of prior-period financial statements is required. Earlier application is encouraged.
Statement No. 44	<i>Economic Condition Reporting: The Statistical Section—an amendment of NCGA Statement 1</i>	Statistical sections prepared for periods beginning after June 15, 2005. Earlier application is encouraged.

Statement Number	GASB Statement	Effective Date:
Statement No. 45	<i>Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions</i>	Revenues of \$100 million or more—after December 15, 2006. Revenues of \$10 million or more but less than \$100 million—after December 15, 2007. Revenues of less than \$10 million—after December 15, 2008. Earlier application is encouraged. All component units should implement the requirements of this Statement no later than the same year as their primary government.
Statement No. 46	<i>Net Assets Restricted by Enabling Legislation—an amendment of GASB Statement No.</i>	For periods beginning after June 15, 2005. Earlier application is encouraged.
Statement No. 47	<i>Accounting for Termination Benefits</i>	For periods beginning after June 15, 2005. Earlier application is encouraged.
Statement No. 48	<i>Sales and Pledges of Receivables and Future Revenues and Intra-Entity Transfers of Assets and Future Revenues</i>	For periods beginning after December 15, 2006. Earlier application is encouraged.
Statement No. 49	<i>Accounting and Financial Reporting for Pollution Remediation Obligations</i>	For periods beginning after December 15, 2007. Earlier application is encouraged.
Statement No. 50	<i>Pension Disclosures—an amendment of GASB Statements No. 25 and No. 27</i>	For periods beginning after June 15, 2007, except for requirements related to the use of the entry age actuarial cost method for the purpose of reporting surrogate funded status and funding progress information for plans that use the aggregate actuarial cost method, which are effective for periods for which the financial statements and required supplementary information contain information resulting from actuarial valuations as of June 15, 2007, or later.
Statement No. 51	<i>Accounting and Reporting for Intangible Assets</i>	For periods beginning after June 15, 2009. Earlier application is encouraged.
Statement No. 52	<i>Land and Other Real Estate Held as Investments by Endowments</i>	For periods beginning after June 15, 2008. Earlier application is encouraged.
Statement No. 53	<i>Accounting and Financial Reporting for Derivative Instruments</i>	For periods beginning after June 15, 2009. Earlier application is encouraged.
Statement No. 54	<i>Fund Balance Reporting and Governmental Fund Type Definitions</i>	For periods beginning after June 15, 2010. Earlier application is encouraged.

Statement Number	GASB Statement	Effective Date:
Statement No. 55	<i>The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments</i>	On issuance in March 2009
Statement No. 56	<i>Codification of the Accounting and Financial Reporting Guidance Contained in the AICPA Statements on Auditing Standards</i>	On issuance in March 2009
Statement No. 57	<i>OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans</i>	The provisions related to the use and reporting of the alternative measurement method—on issuance The provisions related to the frequency and timing of measurements—for actuarial valuations first used to report funded status information in OPEB plan financial statements for periods beginning after June 15, 2011
Statement No. 58	<i>Accounting and Financial Reporting for Chapter 9 Bankruptcies</i>	For periods beginning after June 15, 2009. Earlier application is encouraged.
Statement No. 59	<i>Financial Instruments Omnibus</i>	For periods beginning after June 15, 2009. Earlier application is encouraged.
Statement No. 60	<i>Accounting and Financial Reporting for Service Concession Arrangements</i>	For periods beginning after December 15, 2011. Earlier application is encouraged.
Statement No. 61	<i>The Financial Reporting Entity: Omnibus—an amendment of GASB Statements No. 14 and No. 34</i>	Effective date: For periods beginning after June 15, 2012. Earlier application is encouraged.
Statement No. 62	<i>Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements</i>	For periods beginning after December 15, 2011. Earlier application is encouraged.
Statement No. 63	<i>Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position</i>	For periods beginning after December 15, 2011. Earlier application is encouraged.
Statement No. 64	<i>Derivative Instruments: Application of Hedge Accounting Termination Provisions - an amendment of GASB Statement No. 53</i>	For periods beginning after June 15, 2011. Earlier application is encouraged.
Statement No. 65	<i>Items Previously Reported as Assets and Liabilities</i>	For periods beginning after December 15, 2012. Earlier application is encouraged.
Statement No. 66	<i>Technical Corrections</i>	For periods beginning after December 15, 2012. Earlier application is encouraged.

GASB also issues Technical Bulletins and Interpretations to clarify or interpret GASB statements, and these should be used by Maverick county as authoritative guidance.

In addition, pertinent pronouncements of the American Institute of Certified Public Accountants (AICPA), as recognized by the FASB, are authoritative documents. Particularly significant is the AICPA Industry Audit Guide, Audits of State and Local Governmental Units.

The Government Finance Officers Association (GFOA) has issued a revised, 2005 edition of Governmental Accounting Auditing and Financial Reporting (GAAFR). The 2005 GAAFR provides detailed professional guidance on the practical applications of GAAP for governments.

2.02 Objective

Accountability is the paramount objective of governmental financial reporting, the objective from which all other financial reporting objectives flow. Financial information should be useful for economic, social, and political decisions. To meet this objective, financial reports should contain information useful for:

- Comparing actual financial results with the legally adopted budget
- Assessing financial condition and the results of operations
- Assisting in determining compliance with finance-related laws, rules and regulations
- Assisting in evaluating efficiency and effectiveness

2.03 Internal Controls

All accounting systems must contain appropriate internal controls. Both manual and automated financial systems development should provide for review by qualified accounting personnel to verify the adequacy of the accounting procedures, internal controls, and audit trails. The systems covered include not only purely financial/accounting systems but also those with financial/accounting elements.

2.04 Documentation and Retention

All financial transactions and records are subject to audit. Therefore, there should be complete documentation on all of these matters and the records should be retained as required by the laws and regulations.

2.05 Legal and Contractual Restrictions

The entire pattern of governmental organizational structure, operations, accounting, auditing, and financial reporting is dictated by a combination of federal, state, and local laws and other legislative, administrative, and judicial determinations. A thorough working knowledge of the legal requirements to which a government is subject is a prerequisite for understanding its operation and financial affairs.

2.06 Manual Review and Update

The Maverick County Auditor's office should periodically review this manual to ensure that it reflects current GAAP and meets the needs of county governments. When required, recommendations for changes should be made to the appropriate bodies.

Funds

2.07 Fund Overview

Fund financial statements should be used to report additional and detailed information about the primary government. Governments should report governmental, proprietary, and fiduciary funds to the extent that they have activities that meet the criteria for using those funds.

Governmental Funds

- General Fund
- Special Revenue Funds
- Capital Projects Funds
- Debt Service Funds
- Permanent Funds

Proprietary Funds

- Enterprise Funds
- Internal Service Funds

Fiduciary Funds

- Pension (and Other Employee Benefit) Trust Funds
- Investment Trust Funds
- Private-Purpose Trust Funds
- Agency Funds

Capital Assets and Long-Term Liabilities

2.08 Capital Assets

Capital assets other than those accounted for in proprietary funds or fiduciary funds are included in the government-wide financial statements but are excluded from the fund financial statements. The term "capital assets" includes land, buildings, improvements, infrastructure, equipment etc.

2.09 Basis for Capital Assets

Capital assets should be accounted for at original cost or at their estimated cost at the time of acquisition if the original cost is not available. Gifts are valued at their estimated fair value at the time received.

2.10 Depreciation Expense

Depreciation of capital assets is not reported in the fund financial statements for governmental funds. However, depreciation expense and accumulated depreciation are reported in the government-wide financial statements. Depreciation is recorded in proprietary funds and fiduciary funds, e.g., pension (and other employee benefit) trust funds, where expenses, net income, and/or capital maintenance are measured.

2.11 Lease-Purchase Agreements

Contractual agreements extending beyond the current accounting period which are termed leases but which are in substance purchases are treated as long-term liabilities and the assets are capitalized.

2.12 Long-Term Liabilities

Long-term liabilities expected to be financed from governmental funds are reported in the government-wide statements, not in the fund financial statements for governmental funds. Long-term liabilities associated with proprietary funds and fiduciary funds are accounted for in those funds.

Classification and Terminology

2.13 Common Terminology and Classifications

Common terminology and classifications are to be used throughout the budgeting, accounting, and financial reporting activities.

2.14 Use of Terms

The term “expenditure” should be used only in connection with governmental funds.

The term “fund balance” should be used only in connection with governmental funds and should not be used in government-wide financial statements.

The term “expense” applies only to proprietary funds and to the government-wide financial statements.

The term “net assets” is the difference between a government’s assets and its liabilities. Net assets should be displayed in three components: invested in capital assets, net of related debt; restricted (distinguishing between major categories of restrictions); and unrestricted.

The terms “receipts” and “disbursements” imply cash basis accounting and are not used in connection with accrual or modified accrual basis financial statement reporting.

2.15 Minimum Number of Accounts

The minimum number of accounts necessary for efficient management and compliance with legal requirements should be used.

2.16 Revenue Classification

Revenues are classified by fund and source. Where additional detail is desired, an additional breakdown by subaccount may be made. When possible, revenues are also classified by organizational unit.

2.17 Expenditure Classification

Expenditures are classified by fund, function, activity, organizational unit, and object. A sub-object (account) and a subaccount may be established for each object.

2.18 Organizational Units

The basic organizational units are classified by function and activity. Because of difference in size and organizational structure, specific budget units are not mandated. Uniformity is achieved through the function and activity classification.

2.19 Fund Balance Classifications

Fund balance classifications are maintained in all funds as required to properly reflect the financial position of each fund. There are five components of fund balance: Nonspendable, Restricted, Committed, Assigned, and Unassigned. Fund balance classifications are reported in the fund level financial statements.

2.20 Nonspendable Fund Balance

The nonspendable fund balance classification includes amounts that cannot be spent because they are either not spendable in form or are legally or contractually required to be maintained intact. The not in spendable form includes items that are not expected to be converted to cash, for example, inventories and prepaid amounts. This also includes long-term loans and notes receivables, as well as property held for resale. If the use of the proceeds from the collection of the receivables or from the sale of the properties is restricted, committed, or assigned, then they should be included in the appropriate fund balance classification rather than the nonspendable fund balance. The corpus (or principal) of a permanent fund is an example of an amount that is legally or contractually required to be maintained intact.

2.21 Restricted Fund Balance

Restricted fund balance should be used when constraints placed on the use of resources are either imposed by external parties, constitutional provisions or enabling legislation.

2.22 Committed Fund Balance

Amounts that are constrained for a specific purpose by a government using its highest level of decision-making authority should be classified as committed fund balance. The formal action of the government's highest level of decision-making authority that commits fund balance should occur prior to the end of the reporting period, but the amount, if any, which will be subject to the constraint, may be determined in the subsequent period.

2.23 Assigned Fund Balance

Amounts that are constrained by the government's intent to be used for specific purposes, but are neither restricted nor committed, should be reported as assigned fund balance, except for stabilization arrangements. Assigned fund balance includes, for all governmental funds other than the general fund, any remaining positive amounts not classified as nonspendable, restricted or committed.

2.24 Unassigned Fund Balance

Unassigned fund balance is the residual classification of amounts not classified as nonspendable, restricted, committed or assigned in the general fund. The general fund is the only fund that would report a positive amount in the unassigned fund balance. In other governmental funds, unassigned fund balance is the amount expended in excess of resources that are nonspendable, restricted, committed or assigned (a residual deficit). In determining a residual deficit, no amount should be reported as assigned.

2.25 Contingency Appropriation

A contingency appropriation is an appropriation established for unforeseen requirements. No specific purpose is designated for this appropriation. No expenditures may be made against a contingency appropriation. They are only available for transfer to a specific purpose appropriation by the governing body. This must be accomplished through the legally specified process.

2.26 Interfund Transfers and Transactions

In the handling of transactions and transfers between funds, care must be exercised to see that the proper financing sources and uses are reflected in each fund.

Accounting Process

2.27 Uniformity

In order to provide comparability from year to year and between counties, the systems and procedures prescribed in the manual are applicable to the County.

2.28 Basis of Accounting

In fund financial statements, governmental funds should be accounted for on the modified accrual basis. Proprietary and fiduciary funds should be accounted for on the accrual basis. Accruals need not be recorded on a daily basis. They may be recorded at the close of the accounting period. In government-wide financial statements, all fund types are reported on the accrual basis.

2.29 Account Adjustments

Adjustments to revenue and expenditures are made only to state the correct account balance. Transactions that are applicable to a prior year are recorded as current charges or credits, but are segregated in special accounts such as Prior Period Adjustments.

2.30 General Reserves

It is recommended that a general reserve be established in whatever fund might require such a reserve. For financial reporting purposes, general reserves should be reclassified to either assigned or committed fund balance if the general reserve represents amounts that have been constrained for specific purposes. Reclassifying general reserves to restricted fund balance is appropriate when the amounts are restricted to specific purposes and when constraints placed on those resources are either imposed by others external to the government or imposed by law through constitutional provisions or enabling legislation, including ordinances. General reserves established in a general fund without specific purpose constraints should be reclassified as unassigned fund balance.

2.31 Stabilization Arrangements

These represent arrangements by governments to set aside amounts for use in emergency situations or when revenue shortages or budgetary imbalances arise. Stabilization amounts should be reported in the general fund as restricted or committed fund balance if they meet the criteria based on the constraint on their use. Stabilization arrangements that do not meet the criteria to be reported within the restricted or committed fund balance should be reported as unassigned fund balance in the general fund.

2.32 Materiality

The test of materiality may be applied to transactions, classifications, and recommended procedures, to determine if the result would be a possible distortion of the financial conditions and operations.

2.33 Consistency

Not only should there be consistency in the application of accounting procedures, but care should be exercised in the changes of organizational structure and accounts. Material changes should be explained in statement footnotes.

2.34 Cash Management

Since control of cash is an essential element of sound financial operations, an adequate cash management system is required.

2.35 Interest on Bond Proceeds

When bond proceeds are invested prior to their use for the purpose for which the bonds were issued, the earnings are applied toward debt service, unless some other disposition was prescribed in the bond indenture or the proposition approved by the electorate.

2.36 Uncollectibles

Allowances for uncollectible should be established as appropriate. For all fund types, the offsetting entry is a reduction in the appropriate revenue account.

2.37 Balanced Budget and Fund Balances

A balanced budget is required. If conditions change so that the estimated revenues will not be realized, both estimated revenues and appropriations should be reduced by the amount of under-realization.

CHAPTER 3

THE ACCOUNTING PROCESS

3.01 Accounting Equation

All double-entry accounting systems are based on the following relationship:

$$\text{ASSETS} = \text{LIABILITIES} + \text{EQUITY}$$

3.02 The Accounting Cycle

The recording and processing of accounting data follows the pattern indicated in the following diagram:

3.03 Source Documents

Transactions are first evidenced by a source document, such as a deposit permit, purchase order, invoice, warrant, or journal voucher. Source documents are the first record of a financial transaction; they serve to initiate the accounting cycle.

3.04 Journals

A journal (or register) is a book or form in which financial transactions are recorded. A single journal is usually limited to recording the transactions represented by a specific type of source document:

- A warrant register records all warrants drawn
- A deposit permit register records all deposit permits
- A general journal records all journal entries

Journals are more useful if the source documents journalized are recorded in numerical order. Accordingly, to ensure completeness of the record and to assist its audit, source documents are either pre-numbered or numbered as prepared.

Some journals may also serve as a means of classification. For example, a warrant register may classify warrants according to the fund or fund group against which they are drawn.

3.05 General Ledgers

A general ledger receives postings from the journals. It contains accounts in which all the recognized transactions of a fund are classified in detail or in summary.

3.06 Subsidiary Ledgers

A subsidiary ledger is any group of accounts, the sum of the balances of which is equal to the balance of the related control account. Ledgers may be subsidiary to a general ledger control account or they may be subsidiary to an account in another subsidiary ledger.

Control Account	Subsidiary Ledger
Expenditures	Expenditure ledger
Revenues	Revenue ledger
Taxes receivable - current - secured	Current secured tax roll
Construction	Road project ledger

3.07 Trial Balance

A trial balance is a comparison of a listing of the debit balances in a general ledger with a similar listing of the credit balances. If the two are equal, the accounts are “in balance.” This process proves that both the debit and the credit effects of all recorded transactions have been posted to the general ledger.

The term “trial balance” is also used to designate the act of adding all balances in a subsidiary ledger and comparing it with the balance of the related control account.

3.08 Adjusting Entries

Adjusting entries are those that are necessary to bring the balance of an account to the correct amount at a given date. They are made preparatory to closing the books. The number of such entries usually increases in proportion to the degree to which the accrual basis of accounting is used, particularly if the daily accounting has been performed on a cash basis. Entries recording accounts and taxes receivable, physical inventories and accounts payable as of the date of closing are examples of adjusting entries.

3.09 Closing Entries

Closing entries transfer the balances in the operating accounts to the fund balance. After closing, only the real accounts (balance sheet accounts) have balances. Budgetary accounts, though separately classified because of their specialized purposes, are also operating accounts in the sense that they pertain only to a given fiscal period and are closed, along with revenues and expenditures. An exception occurs in the case of capital project funds, where the accounting period is the period of construction rather than the fiscal year.

3.10 Reversing Entries

If the daily bookkeeping is on a cash basis, it is evident that adjusting entries can have the effect of recording certain revenues and expenditures before they would have been normally entered in the books. This situation requires that, at the beginning of the new period, cash transactions be analyzed to determine whether or not they represent items already recorded in the previous period. To avoid this disruption of the normal posting routines, adjusting entries may be reversed at the beginning of the new period. Amounts recorded as part of the operations of the prior period are thereby automatically excluded from the current totals and postings may continue as though no adjustments had been made.

3.11 Journal Entries

The journal entry is a concise method of expressing the accounting effect of a transaction. Account names and amounts to be posted are shown to be either debits or credits by their relative position rather than by a written designation. The standard journal entry form used in this manual is shown below.

Account Names	Debits	Credits	Debits	Credits
	<i>Subsidiary Ledger</i>		<i>General Ledger</i>	
General ledger accounts debited			X	
General ledger accounts credited				X
Subsidiary ledger accounts debited	X			
Subsidiary ledger accounts credited		X		

Brief explanation:

If subsidiary accounts are involved, the total of their debit or credit postings agrees with that of the related general ledger control account. This entry infers that the general ledger Cash account is debited \$40,000 and the Revenues control account is credited \$40,000.

In the subsidiary revenue ledger, the accounts Property Taxes - Prior Year - Secured and Property Taxes - Prior Year - Unsecured are credited \$39,000 and \$1,000, respectively.

Account Names	Debits	Credits	Debits	Credits
	<i>Subsidiary Ledger</i>		<i>General Ledger</i>	
Cash			\$ 40,000	
Revenues				\$ 40,000
Property Taxes - prior year - secured		\$ 39,000		
Property Taxes - prior year - unsecured		1,000		
(Receipt of apportioned taxes)				

The following entry infers that the general ledger Expenditures control account is debited \$470 and Cash is credited \$470. In the subsidiary ledger, the Treasurer's Office Supplies account is debited \$150 and the Surveyor's Minor Equipment account is debited \$320. In actual practice, the journal entry will probably be used in this form only in the general journal.

Account Names	Debits	Credits	Debits	Credits
	<i>Subsidiary Ledger</i>		<i>General Ledger</i>	
Expenditures			\$ 470	
Cash				\$ 470
Treasurer - office supplies	\$ 150			
Surveyor - minor equipment	320			
(Purchases by Treasurer and Surveyor)				

3.12 Electronic Methods

The accounting cycle is not altered by electronic methods of data processing, although the formal journals and ledgers associated with hand or accounting machine-posted records are often bypassed. The journalizing and summarizing of transactions are performed by the machine and the results are produced directly in statement or schedule form.

Transactions are stored on media other than books of entry. Physically, the data may progress from source documents to storage media to statements. The accounting cycle, however, is not changed. In effect, transactions are still journalized and summarized, accounts adjusted, operating accounts closed, and statements prepared.

CHAPTER 4 FUNDS

4.01 Purpose and Concepts

Governmental accounting and financial reporting are intended to provide assurance that available governmental resources are controlled and spent in accordance with the organizational spending, product and service delivery decisions, and a variety of finance related legal and contractual provisions.

The governmental fund concept means that:

- The fund is an independent fiscal and accounting entity
- The fund consists of a self-balancing group of accounts
- All interfund receivables and payables are included on its balance sheet

4.02 Governmental Funds

Governmental funds account for the current operating expenditures of the county. General and special revenue funds are used to account for most of these expenditures and, in certain instances, for capital outlay and debt service.

4.03 General Fund

(G)	
Category	Governmental
Purpose	To account for and report all financial resources not accounted for and reported in another fund.
Basis of Accounting	Modified accrual
Primary Means of Spending Control	Annual budget appropriation limitations.
Usual Financing Sources	All sources except bonds.
Measurement Focus	Flow of current financial resources.
Specific Accounting Treatment	Capital asset purchases are expenditures. Capital assets and long-term liabilities are not recorded in the fund.

4.04 Special Revenue Funds

(SR)	
Category	Governmental
Purpose	To account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects. Special revenue funds should not be used to account for resources held in trust for individuals, private organizations, or other governments.
Basis of Accounting	Modified accrual
Primary Means of Spending Control	Annual budget appropriation limitations.
Usual Financing Sources	Legally or contractually identified revenues.
Measurement Focus	Flow of current financial resources.
Specific Accounting Treatment	Capital asset purchases are expenditures. Capital assets and long-term liabilities are not recorded in the fund. Special revenue funds are not required unless legally or contractually mandated. Accounting for funds of insignificant amounts may be consolidated as long as the expenditures, revenues, and balance sheet accounts can be identified with the specific revenues, respectively

4.05 Capital Projects Funds

(CP)	
Category	Governmental
Purpose	To account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets. Capital projects funds exclude those types of capital-related outflows financed by proprietary funds or for assets that will be held in trust for individuals, private organizations, or other governments.
Basis of Accounting	Modified accrual
Primary Means of Spending Control	Grant provisions and/or annual budget appropriation limitations and/or bond indentures.
Usual Financing Sources	Grants, contributions from other funds, bonds.
Measurement Focus	Flow of current financial resources.
Specific Accounting Treatment	While the accounting and reporting is oriented to the annual period, accounting records must contain sufficient data to provide supplementary information and/or special purpose reporting on a project length basis.

4.06 Debt Service Funds

(DS)	
Category	Governmental
Purpose	To account for and report financial resources that are restricted, committed or assigned to expenditure for principal and interest. Debt service funds should be used to report resources if legally mandated. Financial resources that are being accumulated for principal and interest maturing in future years also should be reported in debt service funds.
Basis of Accounting	Modified accrual
Primary Means of Spending Control	Bond indenture provisions.
Usual Financing Sources	Special taxes or contributions from the general fund.
Measurement Focus	Flow of current financial resources.
Specific Accounting Treatment	Debt service funds are required only if they are legally or contractually mandated and/or if the financial resources are being accumulated for principal and interest payments maturing in future years.

4.07 Permanent Funds

(PF)	
Category	Governmental
Purpose	To account for and report resources that are restricted to the extent that only earnings, and not principal, may be used for purposes that support the reporting government's programs—that is, for the benefit of the government or its citizenry.
Basis of Accounting	Modified accrual
Primary Means of Spending Control	Trust agreement and laws.
Usual Financing Sources	Donations
Measurement Focus	Flow of current financial resources.
Specific Accounting Treatment	Permanent funds do not include private-purpose trust funds, which should be used to report situations in which the government is required to use the principal or earnings for the benefit of individuals, private organizations, or other governments.

4.08 Enterprise Funds

(EF)	
Category	Proprietary
Purpose	To account for the provision of supplies and/or tangible services to the general public that are similar to service provided by business enterprises. They include not only services financed primarily by user charges but also any activity which has significant potential for user-charge financing and which the governing body decides should be treated as a commercial enterprise.
Basis of Accounting	Accrual
Primary Means of Spending Control	For supplies and/or services provided, matching the total cost (including non-cash expense and overhead) with the service-charge revenues generated; if competition is feasible, the market place; if bonds are issued, the bond indenture; the annual budget (operating plan), to the extent that it is required by the governing body.
Usual Financing Sources	User charges, capital contributions, and operating subsidies.
Measurement Focus	Flow of economic resources.
Specific Accounting Treatment	Accounting practices of similar commercial enterprises are followed. Long-term liabilities directly related to and expected to be paid by the fund, as well as its capital assets, are included in its accounts. All expenses (including non-cash and overhead) are charged to the fund.
<i>Rates:</i>	Service charges should recover the full cost (including non-cash expenses and overhead), less any authorized subsidy.

4.09 Internal Service Funds

(IS)	
Category	Proprietary
Purpose	To account for supplies and tangible services provided to other units of the same government or different governments on a cost reimbursement basis.
Basis of Accounting	Accrual
Primary Means of Spending Control	The total cost for the supplies and/or services provided (including non-cash expenses and overhead) must be matched with the service-charge revenues generated. If purchases from competing commercial operations are not prohibited, the market place will also exercise control. Other controls include the annual budget, to the extent required by the governing body, and indirectly through the annual budgets of the units receiving the product and/or service.
Usual Financing Sources	User charges and capital contributions.
Measurement Focus	Flow of economic resources.
Specific Accounting Treatment	Accounting practices of similar commercial enterprises are followed. Long-term liabilities directly related to and expected to be paid by the fund, as well as its capital assets, are included in the accounts. All expenses (including non-cash and overhead) are charged to the fund.
<i>Rates:</i>	Service charges should recover the full cost (including non-cash expenses and overhead). Subsidizing internal service fund activities should not be required.

4.10 Pension (and Other Employee Benefit) Trust Funds

(PT)	
Category	Fiduciary
Purpose	To account for assets held by a government in a trustee capacity for public employee retirement systems.
Basis of Accounting	Accrual
Primary Means of Spending Control	Flow of economic resources.
Usual Financing Sources	Retirement provisions and laws.
Measurement Focus	Employee and employer contributions and investment earnings.
Specific Accounting Treatment	<ul style="list-style-type: none"> Capital assets and long-term liabilities are included in the funds' accounts. Plan assets used in plan operations (for example, buildings, equipment, furniture and fixtures, and leasehold improvements) should be reported at historical cost less accumulated depreciation or amortization.

4.11 Investment Trust Funds

(IT)	
Category	Fiduciary
Purpose	To account for cash held in the county's external reporting pool. This is cash in the county treasury that belongs to other governments, other private organizations, and individuals.
Basis of Accounting	Accrual
Primary Means of Spending Control	Cash receipts and disbursements at the direction of other entities with cash in the county treasury.
Usual Financing Sources	Deposits from external pool participants and investment earnings.
Measurement Focus	Flow of economic resources.
Specific Accounting Treatment	<ul style="list-style-type: none"> School Funds - School funds are those funds maintained by a school district (including those which service all school districts) to account for its activities. Special District Funds - Special district funds are those funds maintained by an independently governed special district to account for its activities.

4.12 Private-Purpose Trust Funds

(PPT)	
Category	Fiduciary
Purpose	To account for assets held by a government in a trustee capacity for specified purposes, where the principal and interest may be expended during the operations for the benefit of individuals, private organizations, and other governments.
Basis of Accounting	Accrual
Primary Means of Spending Control	Trust agreements and laws.
Usual Financing Sources	Donations and earnings of private-purpose trust funds.
Measurement Focus	Flow of economic resources.
Specific Accounting Treatment	Private-purpose trust funds generally should be used only when legally mandated or a formal trust agreement exists. Capital assets and long-term liabilities are included in the funds' accounts.

4.13 Agency Funds

(AF)	
Category	Fiduciary
Purpose	To account for assets held by a government in an agency capacity for individuals, private organization, and other governments.
Basis of Accounting	Accrual
Primary Means of Spending Control	Fiduciary agreements and laws.
Usual Financing Sources	Receipt, temporary investment, and remittance of fiduciary resources to individuals, private organizations, or other governments.
Measurement Focus	Flow of economic resources.
Specific Accounting Treatment	Agency funds are custodial in nature, merely clearing accounts (assets equal liabilities). At all times, total agency fund assets are offset by related liabilities, including "due to." Where cash is the only asset, agency funds may be combined, showing one cash account and the individual liabilities.

CHAPTER 5

GENERAL LEDGER AND BUDGETARY ACCOUNTS

5.01 Chart of Accounts Terminology

Common terminology and classifications should be used throughout the budgeting, accounting, and financial reporting activities for Maverick County.

The list of account titles in this chart of accounts is not exhaustive. Where deemed appropriate, counties should supplement these classifications with additional ones in light of local circumstances. For example, this chart of accounts does not include detailed revenue and expense classifications for the varied operations of the internal services and enterprise funds used in many counties.

In addition to the accounts listed, other accounts may be required in the preparation of financial statements.

Some counties will not need all of the accounts included in this list. Only those accounts needed should be used. Similar classifications enhance the comparability of governmental financial statements and hence their potential usefulness for comparative analysis purposes.

The accounts in the Illustrative Chart of Accounts (Section 5.09) are numbered consecutively. The 100 series is for asset accounts. The 200 series is for liabilities and fund balance/net assets. The 300 series is for the operating accounts for revenues and other financing sources and for expenditures (expenses) and other financing uses. The 400 series is for budgetary accounts, those accounts necessary to record and control the budget during the fiscal year.

The numbering system used is intended primarily for reference purposes. Each county should devise an account coding system consistent with its accounting needs. A coding system permits the identification of individual accounts without resorting on every occasion to their full titles. It also facilitates the referencing of entries on documents and records and aids in reflecting account relationships.

The "Xs" included in the list of accounts at the end of this chapter indicate the fund types in which the individual accounts are most frequently used.

Abbreviations are used in the columnar headings on the Chart of Accounts to indicate the various funds and fund types. These include the General Fund (G), Special Revenue Funds (SR), Debt Service Funds (DS), Capital Projects Funds (CP), Permanent Funds (PF), Enterprise Funds (EF), Internal Service Funds (IS), Pension (and Other Employee Benefit) Trust Funds (PT), Investment Trust Funds (IT), Private-Purpose Trust Funds (PPT), and Agency Funds (AF).

5.02 Current Assets, Long-Term Receivables, Deferred Charges, and Valuation Accounts

Code	Accounts	Definition
100	Cash	Currency, coin, checks, checking accounts, savings accounts, money orders, and bankers' drafts on hand or on deposit with the County Treasurer.
101	Certificate of Deposit	A receipt given by a bank for the deposit of funds for a specific time. Certificates of deposit are usually negotiable and bear an interest rate greater than that for ordinary bank savings accounts.
102	Imprest Cash	A sum of money set aside for making change or paying small obligations for which the issuance of a voucher or warrant would be too expensive and time consuming.
103	Cash With Fiscal Agent	Deposits with fiscal agents, such as commercial banks, for the payment of matured bonds and interest.
105	Taxes Receivable	The uncollected portion of taxes that a government has levied.
106	Allowance for Uncollectible Taxes	That portion of taxes receivable which it is estimated will never be collected. The balance in this account is reported as a deduction from Taxes Receivable to indicate net taxes receivable.
107	Accounts Receivable	The uncollected portion of earned revenues and reimbursed projects for which a receivable account has not otherwise been provided.
108	Allowance for Uncollectible Accounts Receivable	That portion of accounts receivable which it is estimated will never be collected. The balance in this account is reported as a deduction from Accounts Receivable to indicate net accounts receivable.
109	Other Receivables	The current portion of other receivables not otherwise accounted for.
110	Deposits With Others	Amounts placed with others as a condition precedent to a contractual offer, a legal processing, or performance by a second party.
123	Inventory of Materials and Supplies	Materials and supplies on hand for future consumption.
131	Due From Other Funds	Amounts of cash receivable from other funds. This account includes only short-term obligations and the current portions of long-term loans.
132	Due From Other Governments	Amounts owed to the reporting county by another government.
133	Advances to __ Fund(s)	Amounts owed to a particular fund by another fund in the same government that are not due within one year.
141	Investments	Securities and real estate held for the production of income in the form of interest, dividends, rentals, or lease payments. This account does not include, however, real estate used in governmental operations.
143	Prepaid Expenses	Charges entered in the accounts for benefits not yet received. Prepaid items differ from deferred charges in that they are spread over a shorter period of time than deferred charges and are regularly recurring costs of operations. Examples of prepaid items are prepaid rent, prepaid interest, and unexpired insurance premiums.
145	Restricted Assets	Moneys or other resources, the use of which is restricted by legal or contractual requirements

5.03 Capital Assets

Capital assets owned by proprietary or fiduciary funds are accounted for through those funds. Other fund capital assets should be maintained in a capital assets accounting system and maintained in sufficient detail to provide for the following:

Code	Accounts	Definition
161	Land	The cost of land purchased or, if acquired by gift, the appraised value at the date received. Land which is part of the county road system or flood control districts is not included.
162	Buildings and Improvements	The cost or, if acquired by gift, the appraised value of all permanent buildings, structures, monuments, fences, retaining walls, pavement, sidewalks, bridges (not part of the county road system), grading and landscaping, docks and waterfront improvements, tunnels, viaducts, canals, and anything else that adds value to property. This includes the cost of fixtures attached to and forming a permanent part of buildings and improvements. It also includes the cost of improvements made by the county to leased property.
163	Accumulated Depreciation	Buildings and Improvements. The accumulation of periodic credits made to record the expiration of the estimated service life of buildings or improvements
164	Equipment	The cost or, if acquired by gift, the appraised value at the date received, of all physical property of a permanent nature, other than land, buildings, and improvements
165	Accumulated Depreciation—Equipment	The accumulation of periodic credits made to record the expiration of the estimated service life of equipment.
166	Construction in Progress	The cost of construction work undertaken but not yet completed.
167	Infrastructure	The cost or estimated historical costs of roads, bridges, tunnels, drainage systems, water and sewer systems, dams, lighting systems, sidewalks, etc.
168	Accumulated Depreciation—Infrastructure	The accumulation of periodic credits that record the expiration of the estimated useful life of infrastructure.
169	Intangible Assets	The cost or historical cost of easements, land use rights (water rights, timber rights), computer software, patents, and trademarks.
170	Accumulated Amortization	The accumulation of periodic credits that record the expiration of the estimated useful life of intangible assets.

5.04 Current Liabilities and Deferred Charges

Code	Accounts	Definition
201	Warrants Payable (Optional)	The amount of warrants issued that have not yet been paid.
202	Vouchers Payable	Liabilities for goods and services evidenced by vouchers that have been pre-audited and approved for payment but have not been paid.
203	Accounts Payable	Amounts owed on open account to private persons or organizations for goods and services furnished to the county (but not including amounts owed to other funds or to other governments).
204	Due to Other Funds	Amounts owed to another fund in the county that are due within one year.

5.04 Current Liabilities and Deferred Charges (continued)

Code	Accounts	Definition
205	Due to Other Governments	Amounts owed by the reporting county to another government.
206	Tax Anticipation Notes Payable	Amounts owed on notes issued in anticipation of the collection of taxes
207	Salaries and Benefits Payable	Amounts owed because of accrued salaries and benefits.
208	Compensated Absences Payable	Amounts owed to employees for unpaid vacation and sick leave liabilities.
209	Securities Sold Under Agreement to Repurchase	Amounts that have been added to Investments for “reverse repos” of the investment pool.
220	Deposits From Others	Amounts received from others as a condition precedent to a contractual offer, a legal proceeding, or performance by the county
220a	Deferred Credits	Credit balances that will be spread over following accounting periods, either as additions to revenue or as reductions to expenses/expenditures. Examples are taxes collected in advance and premiums on bonds and notes issued.
221	Deferred Revenues	Amounts for which asset recognition criteria have been met but revenue recognition criteria have not yet been met. Under the modified accrual basis of accounting, such amounts are measurable but not available for expenditure.
222	Matured Bonds Payable	Unpaid bonds that have reached or passed their maturity date
223	Interest Payable	Unpaid interest on bonds that have reached or passed their maturity date.
224	Capitalized Lease Obligations	Current portions of the discounted present value of total future stipulated principal payments on lease-purchase agreements. <i>See account number 233 for the long-term portion.</i>
226	Other Current Liabilities	Current liabilities not included in the above categories.

5.05 Long-Term Liabilities

Long-term liabilities of proprietary and fiduciary funds are accounted for through those funds. Other fund long-term liabilities must be maintained in sufficient detail in the debt accounting records to provide sufficient information for financial reporting for the following:

Code	Accounts	Definition
230	Advances From __ Fund	The non-current portion of amounts due to other funds.
231	Bonds Outstanding	The unmatured portion of bonds sold.
232	Capitalized Lease Obligations	The non-current unpaid principal on capital leases.
233	Other Long-Term Liabilities	There are a number of other long-term liabilities that should be recorded, if appropriate. Included are: <ul style="list-style-type: none"> • Pension liabilities • Worker’s Compensation liability • Other self-insurance liabilities • Compensated absences

5.06 Fund Balance and Net Assets

Code	Accounts	Definition
241	Nonspendable Fund Balance —__	Fund balance amounts that are segregated and cannot be spent because they are (a) not in spendable form (not expected to be converted to cash) or (b) legally or contractually required to be maintained intact for specific purposes and not available for financing the budget requirements.
242	Restricted Fund Balance —____	The amount of fund balance that is segregated for specific purposes due to constraints placed by external creditors, grantors, contributors, or laws or regulations of other governments, or imposed by law through constitutional provisions or enabling legislation and is not available for financing the budget requirements.
243	Committed Fund Balance—____	The amount of fund balance that can only be used for specific purposes pursuant to constraints imposed by formal action of the government's highest level of decision-making authority and is not available for financing the budget requirements.
244	Assigned Fund Balance—____	Purpose. Segregation of a portion of fund balance to indicate the government's tentative plans for financial resource utilization in a future period, such as for equipment replacement. The tentative managerial plans or intent should be clearly distinguished from nonspendable, restricted, or committed fund balances.
245	Unassigned Fund Balance	That portion of the fund balance that has not been restricted, committed, or assigned to specific purposes and is available to finance the budgetary requirements.
246	Net Assets—Invested in Capital Assets, Net of Related Debt	Segregation of net assets representing equity in capitalized assets, net of accumulated depreciation, and reduced by the outstanding balances of any debt attributable to those assets.
247	Net Assets—Restricted For ____	Segregation of that portion of net assets which is restricted by law through constitutional provisions, enabling legislation, or because of external constraints imposed by creditors or other governments.
248	Net Assets—Unrestricted	The remaining portion of net assets which is not "restricted" or "invested in capital assets, net of related debt."
The following account is optional and may be used by counties to facilitate the accounting for encumbrances. However, for financial reporting purposes, this account must be reclassified to restricted, committed, or assigned fund balance depending on the county's spending prioritization policy.		
249	Fund Balance—Reserved for Encumbrances	The amount of actual fund balance reserved for outstanding contractual obligations for which goods and services have not yet been received.

5.07 Operating Accounts

Code	Accounts	Definition
301	Revenues and Other Financing Sources	Amounts received or receivable, which increase the governmental unit's fund balance or net assets.
305	Expenditures (Expenses) and Other Financing Uses	Amounts paid or payable which decrease the governmental unit's fund balance or net assets.

5.08 Budgetary Accounts

Code	Accounts	Definition
401	Estimated Revenues and Estimated Other Financing Sources	The amount of revenues estimated to accrue or be collected (depending on accounting basis) during a fiscal period.
403	Unanticipated Revenues and Other Financing Sources	The amount of revenues which had not been estimated in the budget and which are appropriated for expenditure or applied to the increase of specific fund balance classifications during the current fiscal period.
404	Unrealized Estimated Revenues and Estimated Other Financing Sources	The amount of appropriations and segregated fund balance provisions which are cancelled because of failure to realize budgeted estimated revenues.
405	Appropriations and Estimated Other Financing Uses	The authorizations by the board of supervisors to make expenditures and incur obligations for specific purposes.
406	Budgetary Nonspendable Fund Balance - ____	The use of this account simplifies the integration of budgetary accounts into the general ledger and permits the periodic testing of budgetary account balances with a budgetary trial balance.
407	Budgetary Restricted Fund Balance - ____	The use of this account simplifies the integration of budgetary accounts into the general ledger and permits the periodic testing of budgetary account balances with a budgetary trial balance.
408	Budgetary Committed Fund Balance - ____	The use of this account simplifies the integration of budgetary accounts into the general ledger and permits the periodic testing of budgetary account balances with a budgetary trial balance.
409	Budgetary Assigned Fund Balance— ____	The use of this account simplifies the integration of budgetary accounts into the general ledger and permits the periodic testing of budgetary account balances with a budgetary trial balance.
410	Budgetary Unassigned Fund Balance—__	The use of this account simplifies the integration of budgetary accounts into the general ledger and permits the periodic testing of budgetary account balances with a budgetary trial balance.
411	Encumbrances	Obligations in the form of purchase orders, contracts or other commitments which are chargeable to an appropriation and for which a part of an appropriation is to be segregated as an appropriate fund balance classification.
412	Budgetary Fund Balance—Reserved for Encumbrances	The segregation of a portion of the budgetary fund balance for expenditure upon satisfactory performance by the supplier.

CHAPTER 6

EXTERNAL FINANCING SOURCES

(Revenues, Other Financing Sources, and Transfers)

6.01 Use of Accounts

The Revenue Chart of Accounts has been designed as a complete instrument for accounting for the revenues of the County, and it provides all the data necessary for preparation of the County Financial Transactions Report to the Commissioner's Court.

However, it is recognized that financial statement requirements and local situations or customs may make a further breakdown of certain revenues desirable. In this event, the accounts listed on the chart may be broken down to the desired subaccounts. For example, "Franchises" might be set up in the accounts as:

- Franchises - "X" Gas Company
- Franchises - "Y" Electric Company
- Franchises - "Z" Telephone Company

Used in this manner, the chart allows a county to accumulate all the detail desired to meet local needs, while still facilitating consolidation into the prescribed account form for state reporting purposes if needed.

For interfund transactions between governmental fund types which result in revenues and expenditures, it is recommended that interfund accounts or subaccounts be used to identify and control these transactions. When preparing consolidated statements such as the Annual Report of Financial Transactions of Counties and financial statements in accordance with GAAP, adjustments will be necessary to remove the effects of these transactions. The use of interfund sub-object accounts is acceptable and will aid in making the appropriate adjustment.

For interfund revenues, either of the following methods is acceptable:

- Interfund revenues may be accounted for within account numbers 107, 122, and 132 - Interfund Revenues and Transfers; or
- Interfund revenues may be accounted for within a subaccount of an appropriate existing revenue account. If method b is used, the subaccount must be clearly identified as an interfund account.

For example: Under account number 96, Road and Street Services, a subaccount 96, Road and Street Services - Interfund would be established for work performed by the road fund for the general fund.

6.02 Chart of Accounts

Accounts are numbered in sequence for reference purposes only.

6.03 Explanation of Accounts

Following are the account titles and the recommended usage of each account. Usage is indicated by either explanation, example, or both. In a few cases, the title alone is considered self-explanatory and indicative of usage.

Examples of the two types are grouped as follows:

- Under Include are examples of the types of revenue that should be posted to this account.
- Under Do Not Include are examples of the types of revenue that should not be posted to this account. This category also notes the type of account to which they should be posted.

Explanation of Accounts	
Taxes	
1	Property Taxes - Current Secured. Includes all taxes apportioned as a result of levies made against the secured roll of the county for the current fiscal year.
2	Property Taxes - Current Unsecured. Includes all taxes apportioned as a result of levies made against the unsecured roll of the county for the current fiscal year

CHAPTER 7

FINANCING USES

(Expenditures/Expenses, Other Financing Uses, Transfers, Contingency, Appropriations)

Organization

7.01 Classification by Function and Activity

Each budget unit shall be classified at a minimum as to County function and activity. The costs of combined statutory offices that engage in more than one activity shall be allocated among the activities performed. In the absence of more refined allocation methods, an estimate may be used. With respect to other budget units that perform more than one activity, allocation is recommended and is required for reports of expenditures to the County. If not allocated, such units are classified according to the activity of greatest expenditure.

7.02 Definitions

Classification terms are defined as follows:

- Function - A group of services aimed at accomplishing a certain purpose or end.
- Activity - A specific line of work carried on by a county in order to perform its functions.
- Budget Unit - That classification of the expenditure requirements of the budget into appropriately identified accounting or cost centers deemed necessary or desirable for control of the financial operation. Except as otherwise provided by law, such units may be devised at the discretion of the board of supervisors.

7.03 Function/Activity/Budget Unit Classification Chart

The minimum level for function is provided below. Examples of activity and budget units are also provided. (Numbers assigned to functions and activities are for reference purposes only.)

Function		Activity	Example of Budget Units

7.04 Alphabetical Index of Budget Units (Not Included)

7.05 Use of Subobject Accounts

The use of subobject accounts in budgeting and accounting is left to local choice. In the event subobject accounts are used, those listed in Section 7.06 are required where appropriate.

However, it is recognized that cost analyses, statistical comparisons, and other reporting requirements may make a further segregation of certain subobjects desirable in any particular county. In this event, the account listed on the chart may be segregated to the desired subaccount. For example "Insurance" might be set up in the accounts as:

- Insurance - Public Liability
- Insurance - Fire and Burglary
- Insurance - Other

Used in this manner, the chart allows a county to accumulate all the detail desired for informational or statistical purposes, and it still permits ready consolidation into the prescribed account form for reporting purposes to the State Controller.

For interfund transactions between governmental fund types that result in revenues and expenditures, it is recommended that interfund accounts or subaccounts be used to identify and control these transactions. When preparing consolidated statements such as the State Controller's Counties Financial Transactions Report, adjustments will be necessary to remove the effects of these transactions. The use of interfund subobject accounts is acceptable and will aid in making the appropriate adjustments.

For interfund expenditures, either of the following methods are acceptable:

- Interfund expenditures may be accounted for within subaccounts within the subobject account number 53 - Interfund Expenditure

Example: 53 - Interfund Expenditure - Professional and Specialized Services

- Interfund expenditures may be accounted for within subaccounts within existing subobjects. The use of this method requires the identification of the subaccount as an interfund subaccount.

Example: Subobject - Professional and Specialized Services

Subaccount - Professional and Specialized Services – Interfund

AND SUPPLIES (continued)		
28	Special Departmental Expense (continued)	
	Include (continued) <ul style="list-style-type: none"> • Disposal of animal carcasses • Educational training, including related expenses • Election officers • Election expenses • Film development supplies and expenses • Fingerprinting supplies • Fireworks • Games and puzzles • Handcuffs • Hoses, nozzles • Photograph records • Pound supplies • Printing and binding lists of registered votes • Printing ballots • Road materials • Service pins • Shipping supplies • Unclassified expenditures from district attorney's and sheriff's special funds 	Do not include (continued)
29	Transportation and Travel	
	Includes the transportation of persons and things, except where other services furnished in conjunction with transportation comprise the major portion of the charge, or where the transportation is more appropriately included under subobject titles indicating purposes.	
	Include <ul style="list-style-type: none"> • Central garage services • Delivery services • Freight, express, and other transportation charges not chargeable to a commodity purchased • Gasoline, diesel fuel, except when purchased for central garage • Leased or hired vehicles • Reimbursement for Private car use • Reimbursement for: meals, lodging, conference expenses, bridge tolls, train fares, bus fares, air fares, any other authorized travel expense • Transportation of prisoners and court wards 	Do not include <ul style="list-style-type: none"> • Ambulance service—Post to “SERVICES AND SUPPLIES, Professional and Specialized Services” • Armored car service—Post to “SERVICES AND SUPPLIES, Professional and Specialized Services” • Packing supplies—Post to “SERVICES AND SUPPLIES, Office Expense • Transportation of indigents—Post to “OTHER CHARGES, Support and Care of Persons” • Purchases for central garage vehicles—Post to “SERVICES AND SUPPLIES, Maintenance-Equipment” • Gasoline, diesel fuel, etc., used for off-highway purposes by road department or central garage—Post to “SERVICES AND SUPPLIES, Maintenance-Equipment” • Natural gas, butane, fuel oil, etc. used for heating/cooling purposes—Post to “SERVICES AND SUPPLIES, Utilities”

AND SUPPLIES (continued)		
30	Utilities	
	<p>Include</p> <ul style="list-style-type: none"> • Coal, wood • Electricity • Heating and cooling supplies for county buildings • Natural gas, butane, fuel oil • Sewage disposal • Street lighting on county grounds • Water 	<p>Do not include</p> <ul style="list-style-type: none"> • Refuse disposal—Post to “SERVICES AND SUPPLIES, Household Expense” • Telephone service—Post to “SERVICES AND SUPPLIES, Communications” • Gasoline, fuel for central garage vehicles—Post to “SERVICES AND SUPPLIES, Maintenance-Equipment” • Fuel for department vehicles—Post to “SERVICES AND SUPPLIES, Transportation and Travel”
OTHER CHARGES		
40	Support and Care of Persons	
	Includes cash or necessities furnished indigents or others for whom the county has assumed the burden of support.	
	<p>Include</p> <ul style="list-style-type: none"> • Allowances for incidentals to prisoners and court wards • Contract nursing and housekeeping services for welfare cases • Groceries, clothing, and supplies for indigents • Meals and lodging for indigents • Medical and dental supplies furnished public assistance recipients • Payment for care in foster homes and private institutions • Payment of rents and utilities for indigents • Public assistance payments • Reimbursement to other governmental agencies for care and transportation of prisoners • Reimbursement to the state for care of county inmates in state institutions • Transportation of indigents • Maternity and adoption expense 	<p>Do not include</p> <ul style="list-style-type: none"> • Support and care in county institutions—Post to applicable subobjects
41	Redemption	
	Includes Redemption of matured and called bonds.	
42	Retirement of Other Long-Term Debt	
	Includes Liquidation of long-term debt principal, other than bonds, including capitalized lease payments.	
43	Interest on Bonds	
	Includes Interest and call premium payments on bonded debt.	
44	on Other Long-Term Debt	
	Includes Interest on long-term debt, other than bonds.	

	CHARGES (continued)	
45	Interest on Notes and Warrants	
	Includes Interest payments on short-term debt, such as tax anticipation notes and registered warrants.	
46	Judgments and Damages	
	Includes expenditures in settlement of claims against the county for injury to persons and property.	
	Include	Do not include <ul style="list-style-type: none"> • Damages paid in connection with rights of way acquisition—Post to “OTHER CHARGES, Rights of Way” • Damages paid in connection with land acquisition—Post to “CAPITAL ASSETS, Land”
47	Rights of Way	
	Includes Amounts paid for the acquisition of easements where title is not acquired by the county, and for land acquired in fee title for road purposes.	
48	Taxes and Assessments	
	Includes Taxes and assessments levied against the county by another governmental agency.	
49	Depreciation	
	Includes The recording of expiration in the service life of capital assets, other than wasting assets attributable to wear and tear, deterioration, action of the physical elements, inadequacy, and obsolescence.	
50	Bad Debts	
	Includes amounts incurred in the current year because of the failure to collect receivables.	
	Include	Do not include <ul style="list-style-type: none"> • Hospital contractual allowances—Post to a contra-revenue account
51	Income Allocation	
	Includes Allocation of net earnings to Deferred Compensation liability account (Deferred Compensation Fund only).	
52	Contributions to Non-County Governmental Agencies	
	Includes contributions, grants, subventions, etc., to non-county governmental agencies.	
	Include <ul style="list-style-type: none"> • Grants to recreation, soil, conservation, air pollution control, and other types of districts • Grants to state agencies for fish and game propagation and predatory animal control • Contributions to cities for lifeguard services • Contributions to the U.S. Forest Service • Disproportionate share 	Do not include <ul style="list-style-type: none"> • Grants to other county agencies such as internal service, enterprise funds—Post to “TRANSFERS-OUT” • Contributions to non-governmental agencies such as museums and zoos, local celebrations and chambers of commerce, blood banks, PTA milk subsidies—Post to “PROFESSIONAL AND SPECIALIZED SERVICES”

OTHER CHARGES (continued)	
53	Interfund Expenditure Include expenditures resulting from interfund transactions between governmental fund types. May include, but not limited to <ul style="list-style-type: none"> • Communication • Data processing • Insurance • Maintenance • Professional and specialized services Do not include
CAPITAL ASSETS	
60	Land Includes expenditures for the acquisition of land, except land acquired for infrastructure is optional. Include <ul style="list-style-type: none"> • Appraisal, negotiation, title search, and surveying fees • Cost of obtaining consents and payment for condemnation costs • Filing costs • Clearing land for use • Cost of demolishing or relocating structures Do not include <ul style="list-style-type: none"> • Purchase of right of way where title is not acquired by the county—Post to “OTHER CHARGES, Rights of Way” • Land acquired in fee title for infrastructure purposes if not treated as a capital asset—Post to “OTHER CHARGES, Rights of Way”
61	Buildings and Improvements Includes expenditures for the acquisition of structures and improvements. Include <ul style="list-style-type: none"> • Architect fees • Costs of permits and licenses • Condemnation costs • Insurance during construction • Costs of fixtures attached to and forming a permanent part of structures • Major alterations or improvements of existing structures • Non-removable leasehold improvements • Landscaping • Pipelines • Wells • Pavement • Sewers • Drains • Fences • Dams Do not include
62	Equipment Includes expenditures for the acquisition of physical property of a permanent nature, other than land, buildings and improvements, and infrastructure. Include <ul style="list-style-type: none"> • Computer software (optional) • Freight or other carriage charges Do not include

CAPITAL ASSETS (continued)		
62	Equipment (continued)	
	Include (continued) <ul style="list-style-type: none">• Sales, use, and transportation taxes• Installation costs	Do not include (continued)
63	Infrastructure	
	Includes expenditures for land and structures for networks and subsystems not classified as buildings or building improvements.	
	Include <ul style="list-style-type: none">• Roads• Bridges• Tunnels• Drainage systems• Water and sewer systems• Dams• Lighting systems• Sidewalks, etc.	Do not include
OTHER FINANCING USES		
70	Transfers-Out	
	Includes flows of assets (such as cash or goods) without equivalent flows of assets in return and without a requirement for repayment. It is recommended that interfund accounts or subaccounts be used to identify and control interfund activity. Having such activity identified separately will be useful when preparing consolidated financial reports that require interfund eliminations (e.g. the State Controller’s Office Annual Report of Financial Transactions, concerning counties and governmental GAAP compliant financial statements).	
SPECIAL ITEMS		
80	Special Items	
	Includes Significant transactions or other events within the control of management that are either unusual in nature or infrequent in occurrence.	
81	Extraordinary Items	
	Includes Transactions or other events that are both unusual in nature and infrequent in occurrence.	
90	Intrafund Transfers	
	Intrafund transfers are included as appropriate increases/decreases to revenues or expenditure accounts. These are optional transfers of costs between budget units in the same governmental type fund. The account is used to distribute central staff costs to operating departments for budgetary and internal operating statement purposes. In all cases: a. The amounts should be supported by justifiable cost allocations or cost accounting calculations. b. This transfer may be shown as a single amount under (an increase for the receiving budget unit, a decrease for the servicing unit) or as a decrease of a single amount in expenditures for the servicing unit and an increase in each appropriate expenditure account of the receiving unit.	
APPROPRIATION FOR CONTINGENCIES		
100	Appropriation for Contingencies	
	A budgetary provision representing that portion of the financing requirements set aside to meet unforeseen expenditure requirements.	

7.08 Alphabetical Index of Expenditures With Subobject Classification

Many of the items of expenditures shown in the following index are coded with more than one subobject. The proper classification for each of these items is dependent upon its use. For example, an air filter pad purchased for use on a portable air conditioning unit should be posted to Maintenance-Equipment (Account No. 17); an air filter pad used in a built-in air conditioner should be posted to Maintenance-Buildings and Improvements (Account No. 18).

When an item is purchased in quantity and will be used for more than one purpose, the expenditure should be posted to the account that properly reflects the major purpose for which the item is to be used. For example, a cylinder of acetylene gas may be purchased primarily for use in maintaining buildings. Although some of the gas may be used in the maintenance of equipment, the entry amount of the expenditures should be charged to Maintenance-Buildings and Improvements (Account No. 18).

Food, clothing, and related items purchased for indigents or other persons for whom the county has assumed the burden of support and who are not housed in county facilities should be charged to Support and Care of Persons (Account No. 40), rather than the subobject indicating the purpose of the expenditure, as shown in this index.

Many items are coded as both Services and Supplies and Capital Assets. The determination as to the proper account classification should be made by applying the capital asset policy.

Expenditures for any item not included in this index should, where possible, be posted to one of the subobject accounts other than Special Departmental Expense (Account No. 28) or Miscellaneous Expense (Account No. 21).

CHAPTER 8

SPECIFIC ACCOUNTING PROCEDURES

Policy Applications

8.01 Investments

Investments should generally be reported on the balance sheet at fair value. Exceptions to this general requirement are set forth in GASB Statement No. 31. The exceptions include, but are not limited to, investments in non-participating investment contracts (reported at cost) and certain short-term money market investments (reported at amortized cost). Investment income includes interest (at stated rates), dividends, and the change in the fair value of investments. Components of the change in fair value computation include amortization of premiums and discounts, gains and losses on the sale of investments, and changes in the fair value of items held at the balance sheet maturity date.

Example:

Computation of Change in Fair Value - Specific Identification Method

Computation of Change in Fair Value - Specific Identification Method							
		Fair Value					
		A	B	C	D	E	F
Security	Cost	Beginning Fair Value 7/1/x2	Purchases	Sales	Subtotal	Ending Fair Value 6/30/x3	Change in Fair Value
1	\$ 100	\$ 120	-	\$ 110	\$ 10	\$ 0	\$ (10)
2	520	510	-	-	510	550	40
3	330	315	-	330	(15)	0	15
4	310	-	\$ 310	-	310	300	(10)
Total		\$ 945	\$ 310	\$ 440	\$ 815	\$ 850	\$ 35

Computation of Change in Fair Value - Aggregate Method

Computation of Change in Fair Value - Aggregate Method	
Fair value at June 30, 20X3	\$ 850
Add: Proceeds of investments sold or maturing	440
Less: Cost of investments purchased	(310)
Less: Fair value at July 1, 20X2	(945)
Change in fair value of investments	\$ 35

Although presentation at fair value is required for financial statement purposes, GASB Statement No. 31 does not require treasurers to actually compute and distribute investment earnings using the same approach. Accordingly, care must be taken to properly account for the differences between the treasurer's distribution approach and the approach required by GASB Statement No. 31. In some years, GASB Statement No. 31 revenue recognition standards will include investment income, which will not be

available in the form of cash unless the treasurer liquidates the investment portfolio. In other years, the standards will reduce investment income even though cash availability is not decreased in a like manner.

Because of differences between the treasurer's investment earnings computation and distribution methods and the investment earnings computed pursuant to GASB Statement No. 31, and because the GASB Statement No. 31 method can introduce significant year-to-year volatility in earnings which cannot be reasonably estimated in advance, counties should carefully consider the fiscal impacts of changes in fair value when adopting budgets and in related budgetary accounting. Budgeting in accordance with GASB Statement No. 31 is not required.

8.02 Premium/Discount and Accrued Interest on Notes and Bonds Issued

For governmental fund types, premiums from the issuance of notes and bonds should be accounted for as an "other financing source" and should not be amortized. Accrued interest received upon the sale of notes or bonds is not considered an "other financing source," but should be recorded as "accrued interest payable." Premiums should be recorded in the governmental fund as determined by the governing body if there is no legal requirement that mandates how the premium is to be treated. Accrued interest should be recorded in the governmental fund that is responsible for servicing the long-term debt. Also, all long-term notes and bonds should be recorded in the debt accounting records, including premiums and discounts.

Example:

Bonds are issued for capital projects with a face value of \$100,000 and were sold at a premium for \$105,000 and with accrued interest of \$2,000. It is assumed that a Debt Service Fund will make the principal and interest payments over the life of the debt and there is no legal requirement that mandates how the premium is to be treated. The governing body has decided to make the premium available to the Debt Service Fund.

Account	Debit	Credit
<i>Capital Projects Fund</i>		
Cash	100,000	
Other Financing Source - bond proceeds		100,000
Account	Debit	Credit
<i>Debt Service Fund</i>		
Cash	7,000	
Other Financing Source - premium on bonds sold		5,000
Accrued Interest Payable		2,000

Discounts should be accounted for using the net method. Under this method, the discount is recognized in the year of debt issuance by recording only the net proceeds (face value less discount). As with premiums, discounts should not be amortized.

Example:

Bonds are issued for capital projects with a face value of \$100,000 and were sold at a discount for \$98,000.

Account	Debit	Credit
<i>Capital Project Fund</i>		
Cash	98,000	
Other Financing Source - bond proceeds		98,000

8.03 Reverse Repurchase Agreement

Reverse Repurchase Agreement - an agreement in which a broker-dealer or financial institution (buyer-lender) transfers cash to a governmental entity (seller-borrower); the entity transfers securities to the broker-dealer or financial institution and promises to repay the cash plus interest in exchange for the same securities.

The assets and liabilities arising from reverse repurchase agreements should not be netted on the balance sheet.

- Cash received under these transactions is reported as an asset.
- Securities transferred to the broker-dealer or financial institution is reported as an asset.
- Liabilities are reported under the caption "Obligations under reverse repurchase agreements."
- Interest costs of reverse repurchase agreements are reported as interest expenditures.

The interest costs should not be netted with interest earned on any related investments.

If the county pools money from several funds for investment purposes and the pool rather than the individual funds has reverse repurchase agreements, the county should report the assets and liabilities arising from the agreements in the balance sheets of the funds that have the risk of loss on those assets. In many cases, this will involve a pro-rata allocation to the various funds based on their equity in the pool. Similarly, the income and costs arising from pooled reverse repurchase agreements should be reported in the operating statements of the funds.

For additional information, refer to GASB Statement No. 3: Deposits with Financial Institutions, Investments (including Repurchase Agreements), and Reverse Repurchase Agreements and GASB Interpretation No. 3: Financial Reporting for Reverse Repurchase Agreements—an interpretation of GASB Statement No. 3.

8.04 Securities Lending Transactions

Securities Lending Transactions - transfers of securities to broker-dealers and other entities are made for collateral—which may be cash, securities, or letters of credit—with a simultaneous agreement to return the collateral for the same securities in the future.

- Cash received as collateral on securities lending transactions and investments made with this cash is reported as an asset if the county has the ability to pledge or sell them without a borrower default.
- Liabilities resulting from these transactions should be reported in the balance sheet.
- Securities transferred to broker-dealers and other entities should be reported as assets in the balance sheet.
- Securities lending transactions collateralized by letters of credit or by securities that the county does not have the ability to pledge or sell unless the borrower defaults should not be reported as assets and liabilities.
- Costs of securities lending transactions, such as borrower rebates (interest costs) and agent fees should be reported as expenditures or expenses.

These costs should not be netted with interest revenue or income from the investment of cash collateral, any other related investments, or loan premiums or fees.

If the county pools money from several funds for investment purposes and the pool, rather than the individual funds, has securities lending transactions, the county should report the assets and liabilities

arising from the securities lending transactions in the balance sheets of the funds that have the risk of loss on the collateral assets. In many cases, this will involve a pro-rata allocation to the various funds based on their equity in the pool. Similarly, the income and costs arising from pooled securities lending transactions should be reported in the operating statements of the funds.

For additional information, refer to GASB Statement No. 28: Accounting and Financial Reporting for Securities Lending Transactions.

8.05 Derivative Instruments

Derivative Instruments - financial arrangements with values or cash payments that are based on what happens in separate transactions or agreements and have all of the following characteristics:

- **Settlement factors** - the financial arrangement is able to be settled early with a cash payment or transfer of an equivalent asset. The settlement factors can be based on various interest rate indexes, security index benchmarks, or other specific events.
- **Leverage** - the financial arrangement requires minimal or no initial investment or cash payment on the part of the governmental entity but the agreement achieves changes in fair value that would have required a far larger initial investment.
- **Net Settlement** - its terms require or permit net settlement; it can readily be settled net by a means outside the contract, or it provides for delivery of an asset that puts the recipient in a position not substantially different from net settlement.

The most common examples of derivatives for governmental entities are interest rate swaps, interest rate lock agreements, or futures contracts. Some governments may restrict investment in these derivatives; refer to the government entity's investment policy for eligible derivative investments.

- **Interest Rate Swaps** - contracts or agreements that have a variable payment based on the price of an underlying interest rate or index.
- **Interest Rate Locks** - contracts that allow one party to fix an interest rate for the specified period of time. This instrument is typically used when a governmental entity is worried about increases in interest rates before long term bonds can be sold to finance a project.
- **Future Contracts** - exchange-traded securities to buy or sell a security, commodity, foreign currency, or other financial instrument at a certain future date for a specific price. A futures contract obligates a buyer to purchase the commodity or financial instrument and a seller to sell it, unless an offsetting contract is entered to offset one's obligation.

Other less common derivatives for governmental entities include commodity swaps, forward contracts, and options.

The fair value of derivatives should be reported in the statement of net assets of the government-wide, proprietary fund, and fiduciary fund statements.

The changes in the fair value of the hedging derivative instruments are deferred in the statement of net assets, and will not affect current investment revenue. Fair market value of derivative can be derived from market price if there is an active market for the derivative instrument, or discount of expected future cash flows.

If the derivative fails to effectively hedge the identified risk, then the change in fair value of the derivative instrument is reported immediately as investment income or loss in the statement of activities, the statement of revenues, expenses, and changes in fund net assets and the statement of changes in fiduciary net assets.

GASB Statement No.53 outlines four methods for evaluating hedge effectiveness:

1. Consistent Critical Terms Method
2. Synthetic Instrument Method
3. Dollar Offset Method
4. Regression Analysis Method

Other methods that are based on established principles of financial economic theory are also allowed.

For additional information, refer to GASB Statement No. 53: Accounting and Financial Reporting for Derivative Instruments.

8.06 Inventories – Consumption Method

In the consumption method of inventory accounting, expenditures are recorded when the supplies are used. This method has particular application in stores where a physical control is maintained over the storage and there is issuance of a significant quantity of supplies. This is often the case with the purchasing agents, agricultural commissioners, and hospitals. Ordinarily, supplies to be used by departments in their normal operations are charged directly to the appropriate account at the time of purchase (purchase method). The consumption method is recommended when:

- a. Supplies are purchased primarily for resale or reissue to other departments.
- b. Differences between the purchase and usage of supplies could be sufficiently material to distort the operating picture.
- c. The inventory on hand represents a significant investment.

Purchases for inventory are charged to the asset account Inventory, and also to subsidiary accounts if several inventories are maintained. When supplies are withdrawn from inventory for use, the Inventory account is credited and the proper expenditure account is charged in the budget unit receiving the supplies. After each posting cycle the Inventory account reflects the “book balance” of supplies on hand. This balance should be adjusted to the actual balance whenever a physical inventory discloses a difference. Physical inventories should be taken at least annually and preferably more often.

Normal operating shortages and overages are credited and debited, respectively, to the Inventory account. The offsetting entry is to the Miscellaneous Expense account of the budget unit controlling the inventory. Write-downs because of obsolescence are accounted for in the same manner as shortages.

Example:

The purchasing agent maintains a stores account for office supplies in the General Fund. As of July 1, the inventory is \$5,000.

- a) \$15,000 of supplies are purchased for inventory.

Account	Debit	Credit
Inventory	15,000	
Cash		15,000

b) Supplies are issued to General Fund departments, including the purchasing agent.

Account	Sub	Debit	Credit
Expenditures		14,500	
Inventory			14,500
Tax Collector Office Expense	3,500		
Assessor Office Expense	6,500		
Treasurer Office Expense	4,000		
Purchasing Agent Office Expense	500		

c) Supplies are issued to the Library, a separate fund.

Account	Sub	Debit	Credit
<i>General Fund</i>			
Cash		1,500	
Inventory			1,500
<i>Library Fund</i>			
Expenditures		1,500	
Cash			1,500
Library Office Expense	1,500		

d) At June 30, the physical inventory was \$3,900. The book inventory was \$4,000 (5,000 + 15,000 - 16,000).

Account	Sub	Debit	Credit
Expenditures		100	
Inventory			100
Purchasing Agent Miscellaneous Expense	100		

8.07 Inventories – Purchases Method

Using the purchases method of accounting, purchases are recorded as expenditures when acquired, regardless of when they are used. The expenditure account must clearly indicate the nature of the inventory (i.e., Office Equipment, Agriculture, etc.) used. All material inventories must be reported, regardless of whether the purchases or consumption method is used.

With the purchases method, reported inventories must be offset by the Nonspendable Fund Balance-Inventory account. The amounts involved were charged as expenditures when they were acquired and cannot be expended again. This account indicates that the inventories reported under the purchases method do not represent “available spendable resources” even though they are a component of the net current assets.

Example:

a) Purchases of office supplies totaling \$3,000 are made.

Account	Debit	Credit
Office Supplies	3,000	
Cash		3,000

- b) Inventories of office supplies are \$5,000 at the beginning of the year and offset by Nonspendable Fund Balance, \$2,500 at year-end.

Account	Debit	Credit
Nonspendable Fund Balance-Inventory	2,500	
Inventory of Office Supplies		2,500

8.08 Fund Balance

For governmental fund types, the fund balance is the equity section of the balance sheet. The fund balance is classified into five segments: nonspendable, restricted, committed, assigned and unassigned. These classifications provide a hierarchy based primarily on the extent to which the government is bound to honor constraints on the specific purposes for which amounts can be spent. Depending on the type of fund, each organization must choose the appropriate fund balance classification that meets its needs.

Example:

Fund Balance Section	
Fund Balance:	
Nonspendable Fund Balance - Receivables	\$ 20,000
Nonspendable Fund Balance - Due From Others	10,000
Nonspendable Fund Balance - Advances to Other Funds	15,000
Nonspendable Fund Balance - Inventory	5,000
Nonspendable Fund Balance - Prepaid Items	3,000
Committed Fund Balance - Encumbrances	30,000
Committed Fund Balance - Acquisition Of Vehicles	7,000
Unassigned Fund Balance	100,000
TOTAL FUND BALANCE	\$ 190,000

8.09 Provisions

Not all governmental-type fund budget requirements are classified as financing uses. Amounts may be classified for certain purposes without an accompanying authority to expend. Examples are amounts budgeted to create, increase, or decrease balances in nonspendable, restricted, committed or assigned fund balance. The term provision is used in reference to this type of budget requirement to distinguish it from an appropriation. All provisions must be separately set forth in the budget document.

Example:

Budgetary provisions are required in the general fund:

- To finance an increase in receivables of \$25,000
- To establish a fund balance assignment for litigation of \$40,000
- To make a long-term loan of \$30,000 to the Printing Internal Service Fund

The estimated revenues are \$985,000 and the appropriations are \$1,000,000.

a. Recommended Method:

A balanced set of budgetary accounts is maintained:		
Estimated Revenues	985,000	
Budgetary Unassigned Fund Balance	110,000	
Appropriations		1,000,000
Budgetary Nonspendable Fund Balance - Accounts Receivable		25,000
Budgetary Nonspendable Fund Balance - Advances to ISF		30,000
Budgetary Assigned Fund Balance - Litigation		40,000
<i>(To record the budget adopted for the fiscal year ending June 30, 20X1)</i>		

Concurrent entries to the actual accounts are:		
Unassigned Fund Balance	95,000	
Nonspendable Fund Balance - Accounts Receivable		25,000
Nonspendable Fund Balance - Advances to ISF		30,000
Assigned Fund Balance - Litigation		40,000
<i>(To record the changes to the fund balances approved in the budget adoption)</i>		

- NOTE:
1. The unassigned fund balances are equal at the beginning of the fiscal year; however, with the initial entry to the actual accounts, the budgetary account remains \$110,000 while the actual account is reduced to \$15,000
 2. The total fund balances are not equal
 3. The budgetary unassigned fund balance accounts may not equal the actual accounts
 4. The actual unassigned fund balance in the general ledger could be negative

b. Alternate Method:

The budgetary accounts are integrated with the actual accounts:		
Estimated Revenues	985,000	
Unassigned Fund Balance	110,000	
Appropriations		1,000,000
Nonspendable Fund Balance - Accounts Receivable		25,000
Nonspendable Fund Balance - Advances To ISF		30,000
Assigned Fund Balance - Litigation		40,000
<i>(To record the budget adopted for the fiscal year ending June 30, 20X1)</i>		

The fund balance section as of June 30, 20X1, showed:	
Fund Balance	
Nonspendable Fund Balance - Accounts Receivable	\$ 40,000
Nonspendable Fund Balance - Inventory	30,000
Restricted Fund Balance - Encumbrances	10,000
Committed Fund Balance - Acquisition Of Vehicles	20,000
Assigned Fund Balance - Litigation	40,000
Assigned Fund Balance - Long-Term Allowance	30,000
Unassigned Fund Balance	15,000
TOTAL FUND BALANCE	\$ 185,000

8.10 General Reserves

The General Reserve is also not appropriable. It usually represents a resource restriction to provide for dry period financing.

- **Establishment**—The general reserve is established during the budget process primarily to provide dry period financing.
- **Adjustment**—It may only be adjusted during the annual budget adoption process except as provided for in Government Code Section 29086.
- **Use**—It is not available for estimated financing requirements except during a legally declared emergency.
- **Accounting**—The “reserve” portion should be accounted for in the fund balance section.

For financial reporting purposes, the general reserves should be reclassified as restricted, committed, or assigned fund balance dependent upon the constraints placed on those resources. General reserves established in a general fund without specific purpose constraints should be reclassified as unassigned fund balance.

Example:

a) To record a budgeted increase in the reserve:

Account	Debit	Credit
Budgetary Restricted/Committed Fund Balance - General Reserve	200,000	
Budgetary Unassigned Fund Balance		200,000
Unassigned Fund Balance	200,000	
Restricted/Committed Fund Balance - General Reserve		200,000

b) To make available for emergency expenditures:

Account	Debit	Credit
Restricted/Committed fund balance - General Reserve	50,000	
Unassigned fund balance		50,000
Budgetary Unassigned fund balance	50,000	
Appropriations		50,000

8.11 Stabilization Arrangements

These represent formal arrangements to maintain amounts for budget or revenue stabilization, working capital needs, contingencies or emergencies, and other similarly titled purposes. The authority to set aside these amounts generally comes from statute, ordinance, resolution, charter, or constitution. Stabilization amounts may be expended only when certain specific circumstances exist and those circumstances should be such that they would not be expected to occur routinely. Stabilization funds can be classified as either restricted or committed fund balance if they meet the criteria; if the criteria are not met, then stabilization arrangements should be reported as unassigned. A special revenue fund may be used for stabilization arrangements when the special revenue fund criteria is met.

- Establishment—Stabilization arrangements are established and adjusted by the County Board of Supervisors.

Example:

a) To record a budgeted increase in the stabilization arrangement:

Account	Debit	Credit
Budgetary Restricted/Committed Fund Balance - Stabilization Arrangement	100,000	
Budgetary Unassigned Fund Balance		100,000
Budgetary Unassigned Fund Balance	100,000	
Restricted/Committed Fund Balance - Stabilization Arrangement		100,000

b) To make available for expenditures:

Account	Debit	Credit
Restricted/Committed fund balance - Stabilization Arrangement	30,000	
Unassigned fund balance		30,000
Unassigned fund balance	30,000	
Appropriations		30,000

8.12 Nonspendable, Restricted, and Committed Fund Balance

This section covers only governmental-type funds. Proprietary-type funds follow commercial practice. Nonspendable, Restricted, and Committed Fund Balance indicate that portion of the fund balance which is not available for appropriation until some action has occurred internally or externally and as defined below.

Nonspendable Fund Balance

This area includes nonspendable fund balance established to offset those balance sheet assets which are not available to meet expenditure requirements during the year. They include imprest cash accounts, loans and notes receivables (long-term), inventories, deposits with others, prepaid expenses, and advances to other funds.

- Entries - Budgetary accounts are recorded when the budget is adopted and the budgeted changes to the actual accounts are recorded at the same time. During the year, adjustments are made to both budgetary and actual accounts when they are officially recognized.
- Adjustments - The various actual nonspendable fund balance accounts and the available fund balance should be reflected on the interim financial statements. However, these adjustments should be performed on work papers. The general ledger is adjusted only at year-end.

Budgetary fund balance may be inadequate to meet the anticipated actual nonspendable fund balance requirements. In such cases, the budgetary fund balance must be increased by transfers from other financing requirements or, if possible, be augmented by the unanticipated financing provisions.

Example:

A five-year \$10,000 loan is to be made to a county service area. The budget contains no provision for this item.

a) To provide for the loan:

Account	0	Debit	Credit
Budgetary Committed Fund Balance - Contingencies		10,000	
Budgetary Nonspendable Fund Balance - Advances to CSA			10,000
Unassigned Fund Balance		10,000	
Nonspendable Fund Balance - Advances to CSA			10,000
<i>(To record provisions for loaning \$10,000 to CSA XYZ)</i>			

b) To make the loan

Account	Debit	Credit
Advances Receivable	10,000	
Cash		10,000
<i>(To record a loan to CSA XYZ)</i>		

Future budgets then release "Budgetary Nonspendable Fund Balance" by such amounts as will be repaid during the fiscal year covered by the budget.

Restricted Fund Balance

Restricted fund balance should be used when constraints placed on the use of resources are either imposed by external parties, constitutional provisions or enabling legislation.

Restricted fund balance classifications are established to offset those balance sheet assets which are not available to meet expenditure requirements during the year. They include limitations imposed externally by creditors, grantors, contributors, or laws or regulations of other governments.

- Entries - Budgetary accounts are recorded when the budget is adopted and the budgeted changes to the actual accounts are recorded at the same time. During the year, adjustments are made to both budgetary and actual accounts when they are officially recognized.
- Adjustments - The various actual restricted accounts and the available fund balance should be reflected on the interim financial statements. However, these adjustments should be performed on work papers. The general ledger is adjusted only at year end.

Budgetary fund balance may be inadequate to meet the anticipated actual restricted requirements. In such cases, the budgetary fund balance must be increased by transfers from other financing requirements or, if possible, be augmented by the unanticipated financing provisions.

Example:

a) To record a budgeted increase in the Debt Service Fund:

Account	Debit	Credit
Budgetary Restricted fund balance - Debt Service	100,000	
Budgetary Assigned fund balance		100,000
Assigned fund balance	100,000	
Restricted fund balance - Debt Service		100,000
<i>(To record an increase to Debt Service Fund)</i>		

Committed Fund Balance

Amounts that are constrained for a specific purpose by a government using its highest level of decision-making authority should be classified as committed fund balance. The formal action of the government's highest level of decision-making authority that commits fund balance should occur prior to the end of the reporting period, but the amount, if any, which will be subject to the constraint, may be determined in the subsequent period.

Committed fund balance classifications are established to offset those balance sheet assets which are not available to meet expenditure requirements during the year. They include limitations imposed internally like enabling legislation approved by the Board of Supervisors.

- Entries - Budgetary accounts are recorded when the budget is adopted and the budgeted changes to the actual accounts are recorded at the same time. During the year, adjustments are made to both budgetary and actual accounts when they are officially recognized.
- Adjustments - The various actual committed accounts and the available fund balance should be reflected on the interim financial statements. However, these adjustments should be performed on work papers. The general ledger is adjusted only at year-end.

Budgetary fund balance may be inadequate to meet the anticipated actual committed requirements. In such cases, the budgetary fund balance must be increased by transfers from other financing requirements or, if possible, be augmented by the unanticipated financing provisions.

Nonspendable, Restricted, and Committed Fund Balance should not be accounted for as liabilities, reductions of assets, or in a separate section between liabilities and fund balance. Where part of the fund balance is nonspendable, restricted or committed, the remainder should be reported as assigned or unassigned.

8.13 Assigned Fund Balance

Assigned fund balance are restrictions on the unassigned fund balance and are established to indicate tentative plans for financial resource utilization in future periods. These include aggregation of resources for equipment replacement, capital projects, and capital asset acquisition not subject to accrual, which are expected to develop in future periods.

- **Entries** - Budgetary accounts are recorded upon adoption of the budget. Budgeted changes to the actual accounts are made at the same time (see Section 8.37). Adjustments are made to both budgetary and actual accounts when they are officially recognized.
- **Adjustments** - As a general rule, assigned fund balance is available to be committed for financing uses during the current fiscal year or transfers may be re-assigned. These may be changed during the budget process.

When there is no longer a need for a specific assigned fund balance, the government may make all or a portion of the assigned fund balance available for other financing requirements which may require a four-fifths vote.

Restricted or committed fund balance may also be made available for emergency financing uses (see Section 8.12, Nonspendable, Restricted, and Committed Fund Balance)

8.14 Unassigned Fund Balance

Unassigned fund balance is the residual classification of amounts not classified as nonspendable, restricted, committed or assigned in the general fund. The general fund is the only fund that would report a positive amount in the unassigned fund balance.

- **Entries** - The budgetary unassigned fund balance is initially set up when recording the adopted budget. The actual accounts are changed at the same time to reflect the board's action.
- **Adjustments** - Changes in actual fund balance classifications can result from variations between estimates and actual, mid-year audit adjustments, etc. These result in changes to the prior-year actual accounts involved, including the available fund balance. When this occurs, the budgetary available fund balance must be adjusted. The contra entry would be a reduction in the budgetary available financing.

Example:

As a result of an audit, it was determined that the expenses for 20X1 were understated by \$100,000. The actual accounts for 20X1 are adjusted and the correction is reflected in the financial statement.

The entry in the 20X2 books would be:

Account	Debit	Credit
Assigned Fund Balance - Contingencies	100,000	
Unassigned Fund Balance		100,000
<i>(To record 20X1 audit adjustments affecting the available fund balance)</i>		

If the changes resulted in a material increase in the available fund balance, the estimated financing requirements could be increased using the provisions for unanticipated available financing.

8.15 Appropriation for Contingencies

Budgetary provisions for financing requirements to meet unforeseen expenditure requirements may be included with the individual funds.

Each fund may include within its total financing requirements an appropriation for contingencies. Subject to legal restrictions, this account may be utilized to increase specific appropriations as the need arises. Similarly, the appropriation for contingencies may be increased by transfers from specific appropriations or from unanticipated financing sources.

As do specific appropriations, the appropriation for contingencies expires at fiscal year-end. Appropriations for contingencies are limited in amount by the County Budget Act (see Appendix B).

Examples:

- 1) To record establishment of the appropriation in the budget:

General fund appropriations of \$2,000,000 include a \$100,000 appropriation for contingencies, to be financed by an available fund balance of \$250,000 and estimated revenues of \$1,750,000.

Account	Debit	Credit
Estimated Revenues	1,750,000	
Unassigned Fund Balance	250,000	
Appropriations (specific)		1,900,000
Appropriation for Contingencies		100,000

- 2) To finance a new appropriation:

\$4,000 is transferred from the Appropriation for Contingencies for the purchase of surplus equipment for the Sheriff.

Account	Debit	Credit
Appropriation for Contingencies	4,000	
Appropriations: Sheriff – Equipment		4,000

- 3) To cancel another appropriation within the fund:

The appropriation for a position, never filled, in the Probation Department is cancelled.

Account	Debit	Credit
Appropriations: Probation Department - Salaries and Wages	6,000	
Appropriation for Contingencies		6,000

- 4) To increase the Appropriation for Contingencies from expendable unanticipated revenue sources:

\$1,500 has been received from services provided under contract which have not been specifically set forth in the budget. This was recorded as revenue when received. The supervisors have voted to increase the contingencies appropriation.

Account	Debit	Credit
Unanticipated Revenue	1,500	
Appropriation for Contingencies		1,500

8.16 Restricted Assets

There are occasions where restriction of assets, primarily cash, is required or prudent. Such action ensures that the resources are available when needed. This could be mandated, as in the case of loan requirements, or optional, as in the case of a capital asset replacement reserve. Restricted assets differ from restricted fund balance in that there is an actual segregation of the asset (the cash is set aside). Restricted fund balance represents external enforceable limitations on fund balance and are not backed by a specific asset.

That portion of the restricted assets that represents non-current commitments should be matched by liabilities or restricted, committed, and/or assigned fund balance as appropriate.

Examples include:

- Cash with fiscal agent
- Customer deposits
- Revenue bond construction account
- Capital asset replacement

8.17 Accrual Basis

The accrual method of accounting recognizes transactions when they occur, regardless of the timing of the related cash flow. Revenues are recognized when earned and expenses when incurred.

8.18 Modified Accrual Basis

The modified accrual basis differs from the accrual basis in that revenues are recognized when they become both measurable and available to finance expenditures of the current period. Expenditures are recognized when incurred, except:

- Inventories may be expenditures when either purchased or used; however, significant inventories should be reported.
- Principal and interest on long-term debt are usually recognized when due.
- Prepaid expenditures extending over more than one accounting period may be accounted for as expenditures when acquired instead of being allocated between accounting periods.

Revenues and other financial resources (e.g., bond issue proceeds) are recognized in the accounting period in which they become both measurable and available to finance expenditures of the fiscal period. Available means collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period. Revenues and other increases in governmental fund financial resources that usually can and should be recorded on the accrual basis include property taxes, regularly billed charges for inspection or other routinely provided services, most grants from other governments and interfund transfers and other transactions. Fines and forfeitures, golf and swimming fees, inspection charges, parking fees and parking meter receipts, and the vast multitude of miscellaneous revenues are best recognized when cash is received.

Property taxes or other revenues may be collected in advance of the fiscal year to which they apply. Such prepayments should be recorded as deferred revenues and recognized as revenue of the period to which they apply.

In governmental funds, when a county is the lessor in a lease situation, leases receivable should be accounted for through the use of lease receivables and deferred revenues (see Chapter 5, General Ledger and Budgetary Accounts). Only that portion of the receivable which represents revenues/other financing sources that are measurable and available should be recognized as such in governmental funds. The remainder of the receivable should be deferred.

8.19 Accrual of Revenues and Expenditures

Revenues and expenditures are accrued in order that the balance sheet may show an accurate picture of financial position and the operating statement a correct accounting of the changes applicable to a given period. This accrual may be performed as often as desired or only at the end of the year. The cost of goods and services received, but for which payment has not been made, is charged to the proper expenditure accounts and the liability recorded.

Judgment should be exercised in performing this step. The blanket accrual of all obligations is unnecessary. Minor regular monthly costs showing little variation in amount, such as most utilities, need not be accrued. An arbitrary dollar limit below which obligations are not accrued, may be set. The policy adopted should be followed consistently from year to year.

Example:

At June 30, expenditures are accrued in the General Fund as indicated in the following entry:

Account	Sub	Debit	Credit
Expenditures		730	
Accounts Payable			730
Auditor Office Expense	150		
Board of Supervisors - Professional and Specialized Services	300		
Assessor Special Departmental Expense	280		

An encumbrance is not the equivalent of an accrued expenditure. The former merely classifies as part of an appropriation so that it will be available when the expenditure materializes. Expenditures are increased by accruals but are unaffected by encumbrances.

8.20 Interfund Activity

Interfund activity within and among the three fund categories (governmental, proprietary, and fiduciary) should be classified and accounted for by the appropriate characters of revenue and expenditures/expenses. Below are examples of the different types of interfund activity.

- a. Reciprocal interfund activity is the internal counterpart to exchange and exchange-like transactions. It includes (1) loans (including activity previously termed “advances”) and (2) interfund services provided and used (that is, interfund sales and purchases, previously described as quasi-external transactions).

(1) Interfund Loans

Definition	Amounts provided with a requirement for repayment.
Recording and Reporting	Interfund loans should be accounted for as interfund receivables in the lender funds and interfund payables in the borrow funds. The activity should not be reported as other financing sources or uses in the fund financial statements. If repayment is not expected within a reasonable time, the interfund balances should be reduced and the amount that is not expected to be repaid should be reported as a transfer from the fund that made the loan.
Example	The General Fund loans \$100,000 to a special revenue fund.

(2) Interfund services provided and used

Definition	Interfund services are sales and purchases of goods and services between funds for a price approximating their external exchange value.
Recording and Reporting	Interfund services should be accounted for as revenues in seller funds and expenditures or expenses in purchaser funds. Unpaid amounts should be reported as interfund receivables and payables in the fund balance sheets or the statement of net assets.
Budgetary Treatment	□□□□□□ed amounts of these transactions will be established in the budget process under appropriations and estimated revenues. Midyear budget adjustment procedures are the same as for other estimated revenues and expenditures/expenses.
Control	Control is exercised through comparison of the budgeted amounts with the actual amounts, in the same manner as estimated revenues and estimated expenditures/expenses.
Example	An internal service fund (Insurance) sells to a General Fund customer.

NOTE: Transactions must involve at least two separate funds, not general fund to general fund, etc.

- b. Nonreciprocal interfund activity is the internal counterpart to nonexchange transactions. It includes (1) transfers (redefined to include activities previously known as operating transfers and residual equity transfers) and (2) reimbursements.

(1) Interfund Transfers	
Definition	Interfund transfers are flows of assets (such as cash or goods) without equivalent flows of assets in return and without a requirement for repayment. This category includes payments in lieu of taxes that are not payments for, and are not reasonably equivalent in value to, services provided.
Recording and Reporting	In governmental funds, transfers should be accounted for as other financing uses in the funds making the transfers and as other financing sources in the funds receiving the transfers. In proprietary funds, transfers should be reported after nonoperating revenues and expenses. It is recommended that interfund accounts or subaccounts be used to identify and control interfund activity. Having such activity identified separately will be useful when preparing consolidated financial reports that require interfund eliminations (e.g. The State Controller's Office Annual Report of Financial Transactions Concerning Counties and governmental GAAP compliant financial statements.)
Budget Treatment	This activity is reflected in the budget under appropriations and estimated other financing uses and estimated other financing sources. Midyear adjustments should follow the same procedures established for estimated revenue and expenditures/expenses.
Control	Exercised through comparison of actual amounts with those budgeted.
Examples	<ul style="list-style-type: none"> One governmental fund gives money to another governmental fund. The remaining balance in a capital project fund flows to the General Fund. The General Fund subsidizes the hospital.

(2) Interfund Reimbursements	
Definition	Interfund reimbursements are repayments from the funds responsible for particular expenditures or expenses to the funds that initially paid for them.
Recording and Reporting	Reimbursements should not be displayed in the financial statements.
Examples	<ul style="list-style-type: none"> The enterprise fund (Hospital) purchases drugs and the General Fund (Health Services) reimburses the enterprise fund (Hospital) for its portion. These are reimbursements within a single fund (Intrafund Transfers).

8.21 Long-Term Debt Proceeds

Long-Term Debt Proceeds	
Definition	Long-term debt proceeds are receipts resulting from the sale of long-term notes or bonds.
Recording and Reporting	Long-term debt proceeds for proprietary and trust funds are recorded as fund liabilities. Governmental funds are recorded as Other Financing Sources under captions such as <i>Bond Issue Proceeds</i> or <i>Proceeds of Long-Term Notes</i> in the operating statement.
Control	Control is exercised through the bond indenture, note restrictions, or budget.

8.22 Short-Term Debt Proceeds

Short-Term Debt Proceeds	
Definition	Short-term debt proceeds are receipts resulting from the sale of short-term notes.
Recording and Reporting	Short-term debt proceeds are recorded as “due to” in the liability section of the balance sheet.
Example	An advance payable in six months made to an enterprise fund.

8.23 Depreciation

In governmental-type funds, depreciation of capital assets is not recognized as a cost of the county operation. Since the entire cost of the asset must be regarded as an expenditure of the period in which acquired, it cannot also be treated as an expenditure of subsequent periods. However, where billings to outside parties contain charges for equipment use, depreciation equivalents should be included. Even though depreciation of capital assets is not properly chargeable as an operating expenditure, a replacement designation may be provided for through annual accumulations.

8.24 Unrealized Estimated Revenues

During the year, it may be determined that certain revenue estimates may have been overstated. When such conditions could have a significant effect on the operations, the estimated revenues should be reduced to reflect the anticipated actual revenues for the account(s) involved. At the same time, a corresponding appropriation reduction should be effected.

Where a close program revenue/expenditure correlation is maintained, management may require that the appropriation reductions be in the same organizational unit as the estimated revenue loss.

Example:

Charges by the Sheriff's Department for contractual police services to the cities will be \$100,000 under the budgeted amount.

Account	Debit	Credit
Appropriations	100,000	
Unrealized Estimated Revenues		100,000
Salaries and Employee Benefits – Sheriff	100,000	
Law Enforcement Services		100,000

8.25 Hospital Accounting

Hospitals are to be accounted for as enterprise funds. County hospitals are required to use the accounting system prescribed by the Office of Statewide Health Planning and Development (OHSPD). Copies of the accounting system may be obtained from:

Office of Statewide Health Planning and Development
Accounting & Reporting Systems Section (ARSS)
400 R Street, Suite 250
Sacramento, CA 95811-6213

Other Procedures

8.26 Summary of Accounts

The following accounts are used for budgeting and for the financial statements.

Account Terminology		
	Terms Commonly Used	Formal Account Title
		Fund Balance (Budgetary Fund Balance)
	Fund Balance Classifications (Budgetary Accounts)	Nonspendable Fund Balance - _____ (Budgetary Nonspendable Fund Balance - _____)
	Fund Balance Classifications (Budgetary Accounts)	Restricted Fund Balance (Budgetary Restricted Fund Balance)
	Fund Balance Classifications (Budgetary Accounts)	Committed Fund Balance-_____ (Budgetary Committed Fund Balance-_____)
Available Financing (Estimated Available Financing)	Fund Balance Classification (Budgetary Accounts)	Assigned Fund Balance-_____ (Budgetary Assigned Fund Balance-_____)
	Available Fund Balance (Budgetary Available Financing)	Unassigned Fund Balance-_____ (Budgetary Unassigned Fund Balance-_____)
	(Provision Decreases)	Decreases in restricted, committed, and assigned fund balance ¹
	External Financing Sources (Estimated Financing Sources)	Revenues (Estimated Revenues)
		Other Financing Sources (Estimated Other Financing Sources)
		Transfers-In (Estimated Transfers-In)
Financing Requirements (Estimated Financing Requirements)	(Provision Increases)	Increases in restricted, committed, and assigned fund balance ¹ (Increases in budgetary restricted, committed, and assigned fund balance) ¹
	Financing Uses (Estimated Financing Uses)	Expenditures (Appropriations)
		Other Financing Uses (Appropriations)
		Transfers—Out (Appropriations)
NOTES: Actual (Budgetary)		

¹ Not accounts. These are the results of implementing the actions approved in the adopted budget.

8.26 Summary of Accounts (continued)

Fund Balance	
Titles	Budgetary account: Budgetary Assigned Fund Balance or Budgetary Unassigned Fund Balance (General Fund only) Actual account: Fund Balance
Definition	The fund balance section of governmental-type funds
Control	Available fund balance position
Adjustments	Variations between estimated and actual, midyear audit adjustments, etc., can produce material fund balance changes. Decreases require the board to reduce the budgetary available fund balance and make a corresponding decrease in the available estimated financing requirements. Using the unanticipated available financing procedure increase justifies augmenting the budgetary available fund balance and making a corresponding adjustment in any of the estimated financing requirements components (⁴ / ₅ vote)

Available Financing	
<p>Available Financing is the sum of those components that are available to meet the county's financing requirements for the fiscal period involved. The term usually refers to the actual accounts. When it is necessary to differentiate between budgetary and actual accounts, Estimated Available Financing is used to denote the budgetary process. Available Financing is used to specify the amount that actually was available to support the county's requirements.</p> <p>This term is not to be used in financial statement presentation</p>	

Unassigned Fund Balance	
Titles	Budgetary account: Budgetary Unassigned Fund Balance Actual account: Unassigned Fund Balance Common terminology: Available Fund Balance
Definition	The portion of fund equity that is available for financing the budget requirements for the fiscal period involved
Calculation	Unassigned Fund balance less restricted, committed, and assigned equals available fund balance
Control	Maintaining a positive balance
Adjustments	See Fund Balance, Adjustments

8.26 Summary of Accounts (continued)

External Financing Sources	
Titles	Budgetary account: None Actual account: None Common terminology: External Financing Sources
Definition	Increases in net current assets, excluding expenditure refunds. It is the portion of available financing represented by revenues, other financing sources, and transfers-in
Control	Control of actual vs. estimated component accounts by funding source
Entries	Entries are not made at this level

Revenues	
Titles	Budgetary account: Estimated Revenues Actual account: Revenues
Definition	Increases in net current assets from sources other than expenditure refunds, other financing sources, and transfers-in
Control	Comparison of actual vs. estimated by funding source
Entries	The actual accounts follow the modified accrual basis. The budgetary accounts are recorded upon budget adoption and adjusting budgetary entries when they are officially recognized
Recording Level	Account or subaccount
<p>Anticipated or actual material decreases in other financing sources require the board to reduce the budgetary accounts involved and make a corresponding reduction in the available estimated financing requirements. (see Nonspendable, Restricted, Committed, and Assigned Fund Balance)</p> <p>If the legal requirements are met, anticipated or actual material increases may be treated as unanticipated available financing. This permits augmenting the accounts involved and corresponding increases in any of the estimated financing requirements (4/5ths vote).</p>	

Other Financing Sources	
Titles	Budgetary accounts: Estimated Other Financing Sources. Actual accounts: Other Financing Sources.
Definition	Income resulting from long-term debt proceeds, Transfers In, and material proceeds of capital asset dispositions.
Control	Comparison of actual vs. estimated by funding source.
Entries	The actual accounts follow the modified accrual basis. The budgetary accounts are recorded upon budget adoption and adjusted budgetary entries when they are officially recognized.
Recording Level	Account or subaccount.

8.26 Summary of Accounts (continued)

Other Financing Sources (continued)	
	Anticipated or actual material decreases in other financing sources require the board to reduce the budgetary accounts involved and make a corresponding reduction in the available estimated financing requirements. (Also see Nonspendable, Restricted, Committed and Assigned Fund Balance.)
	If the legal requirements are met, anticipated or actual material increases may be treated as unanticipated available financing. This permits augmenting the accounts involved and corresponding increases in any of the estimated financing requirements (4/5ths vote).

Financing Requirements	
	Financing Requirements is the sum of those components that constitute the dollar cost of implementing the county's operating plan. The term usually refers to the actual accounts. When it is necessary to differentiate between budgetary and actual accounts, "Estimated Financing Requirements" is used to denote the budgetary process and "Financing Requirements" is used to specify the amount actually used.
	This term is not used in financial statement presentation.

Financing Uses	
Titles	Budgetary account: None. Actual account: None. Common terminology: Financing Uses.
Definition	Decreases in net current assets, excluding expenditure refunds; the portion of financing requirements represented by expenditures, other financing uses, and transfers out.
Control	Control at the component level of actual vs. estimated.
Entries	Entries are not made at this level.

Expenditures	
Titles	Budgetary accounts: Appropriations (estimated expenditures). Actual accounts: Expenditures.
Definition	Decreases in net current assets, except expenditure transfers, other financing uses, and transfers-out.
Control	By object level within each budget unit.
Entries	Actual accounts follow the modified accrual basis. Budgetary accounts are recorded upon adoption of the budget and adjusted budgetary entries when they are officially recognized.
Recording Level	Account or subaccount within a budget unit.
With board approval and within a fund, transfers may be made among the various object levels. Estimated other financing uses may be increased based on unanticipated available financing (4/5ths vote). (Also see Nonspendable, Restricted, Committed, and Assigned Fund Balance).	

8.26 Summary of Accounts (continued)

Other Financing Uses	
Titles	Budgetary account: Appropriations (estimated other financing uses) Actual account: Other Financing Uses
Definition	Transfers-out
Control	Transfers-out within each budget unit
Recording level	Account or subaccount within a budget unit
Entries	Actual accounts follow the modified accrual basis. Budgetary accounts are recorded upon adoption of the budget and adjusting budgetary entries when they are officially recognized
With board approval and within a fund, transfers may be made among the various object levels. Estimated other financing uses may be increased based on unanticipated available financing (4/5 vote). (Also see Nonspendable, Restricted, Committed, and Assigned Fund Balance).	

Appropriation for Contingencies	
Titles	Budgetary account: Appropriations (Appropriation for Contingencies) Actual account: None
Definition	A budgetary provision representing that portion of the financing requirements set aside to meet unforeseen expenditure requirements
Control	The object level within each budget unit
Recording level	Account or subaccount within a budget unit
Entries	Accounts are recorded upon adoption of the budget and adjustments when they are officially recognized
With board approval and within a fund, transfers may be made to other object levels. Increases in contingency appropriations may be made based on unanticipated available financing (4/5ths vote). (Also see Nonspendable, Restricted, Committed, and Assigned Fund Balance).	

8.26 Summary of Accounts (continued)

Budgetary and Actual Accounts Procedures Chart

The available financing (financing sources) account represents amounts available to meet financing requirements. To differentiate between budgetary and actual accounts, use Estimated Available Financing and Actual Available Financing.

Budgetary and Actual Accounts Procedures Chart				
Common Terminology	Fund Balance		Available Fund Balance	
Budgetary Account Title	Budgetary Fund Balance		Budgetary Fund Balance Unassigned	
Common Terminology	Fund Balance		Fund Balance Unassigned	
Definition	Equity Portion		Equity portion available to finance requirements	
Control	Available Fund Balance		Maintain Positive Balance	
Adjustments	Adjust to reflect difference between estimated and actual, audit adjustments, etc. Decreases require reductions to/increase may permit addition to certain sources and requirements accounts			
External Financing Sources				
Common Terminology	Revenues	Other Financing Sources	Transfers-In	Fund Balance Classifications
Budgetary Account Title	Estimated Revenues	Estimated Other Financing Sources	Estimated Transfers-In	See Financing Requirements and Fund Balance Classification Requirements
Actual Account Title	Revenues	Other Financing Sources	Transfers-In	These are balance sheet accounts that reduce the available fund balance
Definition	Increases in net current assets, excluding expenditure refunds, other financing sources and residual equity transfers-In	Proceeds of long-term debt, operating transfers in, and fixed asset dispositions	The internal counterpart to nonexchange transactions. Includes interfund transfers and reimbursements	Planned increases are budgetary requirements; planned decreases are available financing
Control	Comparison of actual vs. estimate by funding source			
Entries	Budgetary accounts – On budget adoption, adjustments when recognized. Actual accounts – Follow modified accrual basis			
Adjustments	Anticipated or actual – Reductions require decreasing appropriate sources accounts and an equal reduction in certain requirement accounts; increases may justify appropriate sources and requirements augmentation (4/5 vote)			

Financing Requirements represents the dollar cost of implementing the operating plan. To differentiate between budgetary and real accounts, use Estimated Requirements and Actual Financial Requirements.

Actual Account Title	Expenditure	Other Financing Uses	Transfers-Out	
Definition	Decreases in net current assets from S&EB, S&S other charges, F.A.	Transfers-Out	The internal counterpart to nonexchange transactions. Includes interfund transfers and reimbursements	
Control	By the object level in each budget unit			
Entries	Budgetary accounts – On budget adoption, adjustments when recognized. Actual Accounts – Follow modified accrual basis.			
Adjustments	Within a fund, and with exceptions noted for certain fund balance classifications: 1) Transfers may be made with other financing requirements 2) Actual or anticipated reductions in available financing require decreases in financing requirements 3) Useable unanticipated available financing permits increases in financing requirements. Certain fund balance classifications are legally or contractually restricted and may be used only for their specified purposes, except for legally declared emergencies <i>(stabilization arrangements)</i> or where the specific assignment of fund balance is no longer required. All transactions require board approval, 4/5ths vote for contingency appropriation decreases, unanticipated available financing uses, and emergencies			
Financing Requirements				
Common Terminology	Transfers	Appropriation for Contingencies	Fund Balance Classifications	Fund Balance Classifications
Budgetary Account Title	Appropriations <i>(estimated transfers)</i>	Appropriations <i>(appropriation for contingencies)</i>	Budgetary Nonspendable Fund Balance - _____	Budgetary Assigned Fund Balance - _____
Actual Account Title	Transfers	None <i>(Budgetary Account)</i>	Fund Balance	Unassigned Fund Balance or Assigned - _____
Definition	The internal counterpart to exchange and exchange-like transactions. Includes interfund loans and services provided and used	Budgetary provision for unforeseen requirements	Part of fund balance not available for requirements or legally or contractually restricted	Part of Fund Balance earmarked for tentative future plans
Control	N/A		By total fund balance components	By individual account
Entries	N/A		Budgetary and actual accounts - On budget	

8.27 Unanticipated Revenues

Subject to legal restrictions, revenues not anticipated in the budget may be used to increase estimated revenues and increase appropriations, restricted, committed and assigned fund balance.

Example:

\$1,500 has been received from services provided under contract which have not been specifically set forth in the budget. This was recorded as revenue when received. The supervisors have voted to increase the Sheriff services and supplies appropriation.

To increase the appropriation for the Sheriff from expendable unanticipated revenue sources:

Account	Sub	Debit	Credit
Unanticipated Revenues		1,500	
Appropriations			1,500
Law Enforcement Services	1,500		
Sheriff -Transportation and Travel	1,500		

8.28 Other Appropriation Transfers

Subject to legal restrictions, appropriations may be transferred from one budget unit to another in the same fund.

To transfer appropriations within the same fund

The following transfers are approved:

Decrease Board of Supervisors		Increase Assessor	
Professional and Specialized Services	\$ 4,000	Office Expense	\$ 4,500
Special Departmental Expense`	<u>1,000</u>	Minor Equipment	<u>500</u>
	<u>\$ 5,000</u>		<u>\$ 5,000</u>

(Subsidiary ledger entries, only, required)

Appropriations:	
Supervisors	
Professional and Specialized Services	\$ 4,000
Special Departmental Expense	1,000
Assessor	
Office Expense	4,500
Minor Equipment	500

If the transfer is between funds, the increased revenue in the recipient fund is unanticipated revenue and the restrictions governing such revenues apply.

To transfer appropriations between funds

Approval is given for the transfer of \$50,000 from the General Fund, Public Works services and supplies, to the road fund services and supplies.

Account	Debit	Credit
<i>General Fund</i>		
Appropriations	50,000	
Estimated Other Financing Uses		50,000
Transfers-Out	50,000	
Cash		50,000
<i>Road Fund</i>		
Cash	50,000	
Transfers-In		50,000
Estimated Other Financing Sources	50,000	
Appropriations		50,000
Transfers-In		50,000
Services and Supplies Appropriations	50,000	

8.29 Year-End Revenue Accrual

Even though the reporting must be on the accrual or modified accrual basis, the daily accounting may be on a cash basis. Under such circumstances, accrual basis for statement purpose is achieved by adjusting the accounts at the close of each year for earned but uncollected revenues. Accounts Receivable is charged, with offsetting credits posted to Revenues and to the Allowance for Uncollectible Accounts, if applicable.

At the beginning of the following year, one of two options may be exercised:

- The accruing entry is reversed. Accounts Receivable is reduced and Revenue is also reduced. Collections are then credited to this account.
- The accruing entry is not reversed, but collections of accrued amounts are credited to Accounts Receivable. At the end of the year, any differences between amounts accrued and collected, plus any balance in the Allowance for Uncollectible Accounts, are closed to Revenues.

The following illustrates a year-end accrual of revenues and the alternative methods of accounting in the next year.

At June 30, revenues are accrued in the General Fund, (see Uncollectible Accounts). All items are considered fully collectible except planning and engineering services, for which a 2% uncollectible allowance is provided.

Uncollectible Accounts

Account	Sub	Debit	Credit
Accounts Receivable		12,900	
Allowance for Uncollectible Accounts			15
Revenues			12,885
State Aid for Disaster	10,000		
Auditing and Accounting Fees	150		
Law Enforcement Services	2,000		
Planning and Engineering Services	735		

Method 1 - Revising Procedure

- a) Revenue accruals are reversed:

Account	Debit	Credit
Revenues	12,885	
Allowance for Uncollectible Accounts	15	
Accounts Receivable		12,900

- b) \$100 was disallowed on the claim upon which the state subvention accrual was based. Otherwise, all amounts accrued were collected in full during the following year:

Account	Debit	Credit
Cash	12,800	
Revenues		12,800

Method 2 - Standard Procedure

- a) Collections of \$12,800 are credited to accounts receivable:

Account	Debit	Credit
Cash	12,800	
Accounts Receivable		12,800

- b) At June 30, the \$100 debit balance in accounts receivable and the \$15 credit balance in allowance for uncollectible accounts are closed to revenues:

Account	Debit	Credit
Revenues	85	
Allowance for Uncollectible Accounts Expense	15	
Accounts Receivable		100

Under both methods, the final result is the same. The \$85 debit balance in the Revenues account represents the error in total revenues of the preceding year (the overstatement of beginning available surplus attributable to revenue).

For the optional accrual of taxes, see Chapter 18, Property Taxes.

8.30 Year-End Expenditure Accrual

As with revenues, expenditures/expenses must be reported on the accrual or modified accrual basis. When accrual is accomplished only at year-end, the same alternatives are available as with Revenues.

- The accruing entry is reversed. Accounts Payable is reduced and the appropriate expenditures accounts are also reduced. Payments are then charged to this account.
- The accruing entry is not reversed, but payments of accrued amounts are charged to Accounts Payable. At the end of the year, any differences between amounts accrued and paid are closed to the proper expenditures.

A year-end accrual of expenditures and the alternative methods of subsequent accounting are shown below.

At June 30, expenditures are accrued in the General Fund as detailed in the following entry:

Account	Sub	Debit	Credit
Expenditures		730	
Accounts Payable			730
Auditor - Office Expense	150		
Board of Supervisors - Professional and Specialized Services	300		
Assessor - Special Departmental Expense	280		

Method 1- Reversing Procedure

a) Expenditure accruals are reversed:

Account	Sub	Debit	Credit
Accounts Payable		730	
Expenditures			730
Auditor - Services and Supplies Expenditures	150		
Board of Supervisors - Expenditures	300		
Assessor - Expenditures	280		

b) During the year payments against the liabilities accrued were \$750:

Account	Sub	Debit	Credit
Expenditures		750	
Cash			750
Auditor - Services and Supplies Expenditures	150		
Board of Supervisors - Expenditures	295		
Assessor - Expenditures	305		

Method 2 - Non-Reversing Procedure

- a) Payments of \$750 are charged to Accounts Payable:

Account	Debit	Credit
Accounts Payable	750	
Cash		750

- b) At June 30, the \$20 debit balance in Accounts Payable is closed to the proper expenditure accounts:

Account	Sub	Debit	Credit
Expenditures		20	
Accounts Payable			20
Board of Supervisors - Services and Supplies Expenditures	5		
Assessor	15		

8.31 Other Cash Accounts and Funds

Imprest - a term applied to a system of replenishment on the basis of disbursement. The disbursement becomes an automatic claim against the beneficiary, so that the claims so created plus unexpended resources are always equal to original assets.

Funds may have as one of their assets imprest cash accounts. When established, they consist of cash on hand or in a special bank account. Disbursements from the account are not recorded as expenditures until the account is replenished. This is done as necessary, and always at the end of a fiscal period.

Example:

- a) An imprest account of \$100 is established for a General Fund department:

Account	Debit	Credit
Imprest Cash	100	
Cash		100
Unassigned Fund Balance	100	
Nonspendable Fund Balance - Imprest Cash		100

- b) Supplies are purchased, as evidenced by the following vouchers:

Voucher #1	Office Supplies	\$ 25
Voucher #2	Professional And Specialized Services	10
Voucher #3	Special Department Expense	40
<i>(No entries are made)</i>		

c) A warrant is drawn on the road fund to replenish the account:

Account	Sub	Debit	Credit
Expenditures		75	
Cash			75
Office Supplies	25		
Professional And Special Services	10		
Special Departmental Expense	40		

Change accounts are also imprest accounts, but require no replenishment. The amount of each account remains constant, and that amount is simply withheld at the close of each day from the cash register or drawer for use the following day. Differences between ending cash on hand and recorded receipts plus the change account represent overages or shortages, which are treated in the same manner as expenditures shown above.

Clearing funds may be used to facilitate certain operations. Expenditures are recorded in operating funds and cash transferred to the clearing fund, which then disburses to the proper party at the proper time. This method is convenient if several operating funds are involved in an expenditure that can be remitted on a single warrant. Common examples are the Payroll Clearing Fund, the Categorical Aid Clearing Fund, and the Sales Tax Clearing Fund.

Counties may use any of the above accounts and funds that are found useful. The use of accounts is preferable unless special circumstances or legal restrictions dictate otherwise.

8.32 Warrants Payable

A Warrants Payable account may be used. If so, warrants drawn are credited to this account rather than to cash. Warrants paid by the treasurer are charged to Warrants Payable and credited to Cash. Under this arrangement, the balance of Warrants Payable is the amount of outstanding warrants and the auditor's cash is equal to the treasurer's, with the exception of any possible deposits in transit.

Example:

a) Warrants are drawn:

Account	Debit	Credit
Expenditures	100	
Warrants Payable		100

b) Warrants are Paid by the Treasurer:

Account	Debit	Credit
Warrants Payable	50	
Cash		50

8.33 Activity Allocations

It is required that combined statutory offices which engage in more than one of the expenditure activities (see Chapter 5, General Ledger and Budgetary Accounts) and all other budget units which engage in more than one activity allocate their appropriations and final total expenditures among the activities performed. Possible methods of arriving at reasonable estimates include:

- Using cost accounting to calculate the allocation
- Allocating all expenses for a test period and using the resulting proportion as long as operating conditions are substantially unchanged. This method is suitable if seasonal and cyclical fluctuations are not significant
- Dividing salary and wage costs among the activities performed; dividing total appropriations in the same proportion as salaries and wages
- Using the results of the Cost Allocation Plan

8.34 Encumbrances

Encumbrances are a reservation of specific appropriations. It is recommended that all purchase orders, contracts, and written commitments be encumbered. (see Chapter 16, Budgetary), for detailed explanations.

8.35 Work Authorizations

Work authorizations perform the same function for intra-governmental purchases as purchase orders placed with outside suppliers. When used, it is recommended that they be encumbered, as purchase orders are. However, at year-end all work authorization encumbrances should be examined to verify their appropriateness. Failure to do this could result in establishing next year's appropriations at too high a level.

8.36 Compensated Absences

Compensated absences are absences for which employees are paid, such as vacation, sick leave, and sabbatical leave. A liability for compensated absences that are attributable to services already rendered and that are not contingent on a specific event that is outside the control of the employer and the employee should be accrued as employees earn the rights to the benefits. Compensated absences that relate to future services or that are contingent on a specific event that is outside the control of the employer and the employee should be accounted for in the period that those services are rendered or take place.

Vacation leave and other compensated absences with similar characteristics should be accrued as a liability as the benefits are earned by the employees if both of these conditions are met:

- a. The employees' rights to receive compensation are attributable to services already rendered.
- b. It is probable that the employer will compensate the employees for the benefits through paid time off or some other means, such as cash payments at termination or retirement.

A liability for sick leave and other compensated absences with similar characteristics should be accrued using one of the following termination approaches.

- a. A liability should be accrued as the benefits are earned by the employees if it is probable that the employer will compensate the employees for the benefits through cash payments conditioned on the employees' termination or retirement. Sick leave balances should not be accrued for employees who receive only additional service time for pension benefit purposes or who take the leave due to illness.
- b. Alternatively, a governmental entity should estimate its accrued sick leave liability based on the sick leave accumulated at the balance sheet date by those employees who currently are eligible to receive termination payments, as well as by other employees who are expected to become eligible in the future to receive such payments. Sick leave balances should not be accrued for employees who receive only additional service time for pension benefit purposes or who take the leave due to illness.

A liability for sabbatical leave should be accrued during the period the employees earn the right to the leave if it is probable that, for past service, the employer will compensate the employees for the benefits through paid time off or some other means.

The compensated absence liability should be calculated based on the pay or salary rates in effect at the balance sheet date. However, if the employer pays employees for their compensated absences at other than their pay or salary rates (for example: at a lower amount as established by contract, regulation, or policy) the other rate as of the balance sheet date should be used to calculate the liability. An additional amount should be accrued as a liability for salary-related payments (i.e., the employer's share of Social Security and Medicare taxes, pension plans, etc.) associated with the payment of compensated absences, using the rates in effect at the balance sheet date.

Compensated absences in proprietary and fiduciary funds should be reported as a fund liability. Compensated absences in governmental funds should be recognized as expenditures each period using the modified accrual basis of accounting. Because the balance sheets of these funds report current liabilities, only the portion of the liability that will be liquidated with available current financial resources should be reported in the fund. When the liquidated amount is known, the remainder of the liability should be accounted for in the debt accounting records.

Example:

The following is the status for compensated balances as of June 30, 20X1:

	General	Enterprise
Current Value of Compensated Absences	100,000	10,000
Short-term portion	5,000 ¹	4,000
Long-term portion	95,000	6,000
Amount currently in debt accounting records	80,000	
Amount currently in long-term liability		3,000

Account	Debit	Credit
General Fund		
Expenditure - Salaries and Employee Benefits	5,000	
Short-Term Liabilities - Salaries and Benefits Payable		5,000
Debt Accounting Records Amount to be Provided	15,000	
Employee Salaries and Benefits Payable		15,000
Proprietary Fund		
Expenses - Salaries and Employee Benefits	7,000	
Short-Term Liabilities - Salaries and Benefits Payable		4,000
Long-Term Liabilities - Salaries and Benefits Payable		3,000

¹ The full amount for fiscal year 20X1-20X2 compensated leave balances is included in the budget. The \$5,000 represents the estimated terminal payments resulting from these accrued balances.

8.37 Budgeting and Fund Balances

The basic premise for county budgeting is that the total requirements must equal the available means of financing. This is true even when the available means of financing is excessive. In such circumstances, the property tax or service charges must be reduced.

This condition applies not only to the adopted budget but also to the actual operating results. The exception is that the actual available financing may exceed the actual requirements. This results in an available fund balance for the next fiscal year.

Another way of expressing it is to say that negative ending fund balances are not permitted during the budget process. Adjustments must be made to avoid such a condition.

The one assurance any manager has is that his/her estimates will rarely exactly match the actual results. The process accommodates this condition by providing for changes in the estimated available financing and estimated financing requirements. A failure to realize the estimated available financing requires a corresponding reduction in estimated financing requirements (excluding restricted, committed, or assigned fund balance). On the other hand, unanticipated available financing, if legally authorized, may permit an increase in estimated financing requirements.

Compliance is shown in the required reports comparing actual total expenditures and income with the approved budget. However, these are not the only components. The beginning figures for fund balances are subject to change.

Examples:

a) Budget adoption. For budget purposes, the fund balance accounts were estimated to be:

Account	Balance
Nonspendable Fund Balance - Inventory	\$ 50,000
Assigned Fund Balance - Jail Construction	100,000
Assigned/Unassigned Fund Balance	200,000

The adopted budget included the following estimates:

Account	Estimates
Revenues	\$ 700,000
Other Financing Sources	200,000
Transfers-In	100,000
Decrease in Nonspendable Fund Balance - Inventory	20,000
Appropriations	1,000,000
Other Financing Uses	150,000
Transfers-Out	40,000
Jail Construction Increase	30,000

To record the adopted budget:

Account	Debit	Credit
Budgetary Unassigned Fund Balance	200,000	
Estimated Revenues	700,000	
Estimated Other Financing Sources	200,000	
Estimated Transfers-In	100,000	
Budgetary Nonspendable Fund Balance - Inventory	20,000	
Appropriations		1,000,000
Estimated Other Financing Uses		150,000
Estimated Transfers-Out		40,000
Budgetary Assigned Fund Balance - Jail Construction		30,000
<i>(To record the budget adoption)</i>		

Adjustments to nonspendable, restricted, committed, and assigned fund balance:

Account	Debit	Credit
Assigned/Unassigned Fund Balance	10,000	
Nonspendable Fund Balance - Inventory	20,000	
Assigned Fund Balance - Jail Construction		30,000
<i>(To record changes to nonspendable, restricted, committed, and assigned fund balance approved in the adopted budget)</i>		

- b) The fund balance decreases. On November 16, 20XX, the audited financial statement shows the available fund balance to be \$50,000 instead of the estimated \$200,000. The board approves a corresponding reduction in appropriations.

To reflect the decreased fund balance:

NOTE: The audit adjustment should be made to the actual accounts.

Account	Debit	Credit
Appropriations	150,000	
Budgetary Unassigned Fund Balance		150,000
<i>(To adjust the budget to reflect the decrease in the fund balance)</i>		

- c) The fund balance increases. On November 15, 20XX, the audited financial statement shows the fund balance to be \$275,000 instead of the estimated \$200,000.

With board approval, this additional available financing may be used to increase the current year's budgeted requirements.

To reflect the increased fund balance:

Account	Debit	Credit
Budgetary Unassigned Fund Balance	75,000	
Appropriations		75,000
<i>(To reflect the board-approved increase in appropriations because of an increase in the fund balance)</i>		

- d) The nonspendable fund balance requirement increases. On March 30, 20XX, it is determined that the inventory at year-end will be \$100,000 instead of the estimated \$30,000. The board approves a transfer from the appropriation for contingencies to cover this increase. (Other fund balance accounts may be available for appropriation.)

To provide for the increased nonspendable requirement:

Account	Debit	Credit
Appropriation for Contingencies	70,000	
Budgetary Nonspendable Fund Balance - Inventory		70,000
Nonspendable Fund Balance - Inventory	70,000	
Appropriation for Contingencies		70,000
<i>(To record anticipated changes to nonspendable fund balance requirements)</i>		

8.38 Contingent Liabilities, Claims, and Judgments

The Statement of Financial Accounting Standards (SFAS) No. 5: Accounting for Contingencies, requires that a liability be recorded when it is probable that a loss contingency will occur and when the amount of such loss can be reasonably estimated. NCGAS No. 4 requires that the full amount of such liability be recorded in a proprietary-type fund. For a governmental-type fund, the current portion is recorded in the fund and the long-term portion is recorded in the debt accounting records. The current portion is defined to be that amount which is expected to be liquidated with expendable available financial resources.

8.39 Restricted-Purpose Revenue

Certain sources of revenues by law are required to be expended only for specified purposes. Depending upon the circumstances, these restricted-purpose revenues may be accounted for in the following ways:

Special Revenue Funds—Special revenue funds are to be used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects. The foundation for the fund should be from a revenue source that is either restricted or committed. The revenue source should be expected to continue to represent a substantial portion of the inflows reported in the fund. At any point the government does not expect that a substantial portion of the inflows will be from restricted or committed resources, the government should stop using a special revenue fund and report the remaining resources in the general fund. If however, all inflows have ceased, the special revenue fund can continue to be reported until the restricted or committed resources have been used for their specific purposes.

General Fund Nonspendable, Restricted, Committed, and Assigned Fund Balance—Under this approach, the restricted revenue is accounted for entirely in the general fund. Revenue is recognized upon receipt, and any accumulated excess of revenue over qualified expenditures is earmarked in a fund balance classification.

Choice of the foregoing devices requires the application of judgment to the existing circumstances. However, the following basic caveats should always be observed:

1. The recognition of material amounts of revenue should not be delayed beyond the period in which they would otherwise be recognized.
2. The established accounting system should provide a sufficient audit trail to properly track the expenditure of special-purpose revenue.

8.40 Accounting for Municipal Solid Waste Landfill Closure and Postclosure Care Costs

GASB Statement No. 18: Accounting for Municipal Solid Waste Landfill Closure and Postclosure Care Costs, sets standards of accounting and financial reporting for the cost of Municipal Solid Waste Landfill (MSWLF) closure and postclosure care. The county's financial statements should reflect the impact of all closure and postclosure care costs during the life of a MSWLF rather than after its closing. Costs that result in disbursements near or after the date that the MSWLF stops accepting solid waste and during the postclosure period, should be included in the estimated total current cost of MSWLF closure and postclosure care, regardless of their capital or operating nature. The estimated total current cost should include:

- The cost of equipment expected to be installed and facilities expected to be constructed near or after the date that the MSWLF stops accepting solid waste and during the postclosure period.
- The cost of final cover (capping) expected to be applied near or after the date that the MSWLF stops accepting solid waste.
- The cost of monitoring and maintaining the expected usable MSWLF area during the postclosure period.

The estimated total current cost is the amount that would be paid if all equipment, facilities, and services included in the estimate were acquired during the current period. These costs should be adjusted annually for the effects of inflation and/or changes in technology, expected usable landfill area, or regulations.

Allocation of Costs

The estimated total current cost should be allocated over the life of the MSWLF using the following formula:

Estimated Total Cumulative Current Cost x Capacity Used	–	Amount Previously Recognized	=	Annual Allocation
Total Estimated Capacity				

It should be noted that costs are allocated based on usage rather than the passage of time.

Assets Placed in Trusts

Some counties may be required by the Texas Commission on Environmental Quality to provide financial assurances for closure and postclosure care by placing assets in a trust or providing for a bond. These amounts should be reported as an asset on the balance sheet and identified as amounts held by trustee.

Proprietary Funds

Counties reporting MSWLF using proprietary funds should recognize the amount computed through the formula as an expense and as a liability for each period that the MSWLF accepts solid waste.

Example:

Assume that the calculation of the formula resulted in an annual allocation of \$50,000 in the first year (20X1) of operation. In the final year (20XX) of operation, the county purchases \$200,000 of equipment for landfill closure. Also, assume that the Texas Commission on Environmental Quality requires \$40,000 to be placed in a trust account with a trustee or a separate trust fund. The following journal entries should be recorded:

Account	Debit	Credit
20X1 - Proprietary Fund		
Expenditure - Service and Supplies - MSWLF Closure and Postclosure Care Costs	50,000	
Liability - MSWLF Closure and Postclosure Care Cost		50,000
<i>(To recognize the annual allocation of a portion of the estimated total current cost of landfill closure and postclosure care)</i>		

Account	Debit	Credit
20X1 - Proprietary Fund		
Amounts Held by Trustee	40,000	
Cash		40,000
<i>(To record cash transferred to the trustee or trust fund for financial assurance of closure and postclosure care costs)</i>		

When the landfill nears closure, purchases for closure and postclosure care costs will be incurred. Equipment and facilities included in the estimated total current cost should not be reported as capital assets. Instead, equipment and facilities should be reported as a reduction of the accrued liability when they are acquired:

Account	Debit	Credit
20X1 - Proprietary Fund		
Cash	200,000	
Amounts Held by Trustee		200,000
<i>(To record the return of cash by the trustee for payment of closure and postclosure care costs)</i>		

Account	Debit	Credit
20X1 - Proprietary Fund		
Liability - MSWLF closure and Postclosure Care Cost	200,000	
Cash		200,000
<i>(To record purchases of equipment for MSWLF closure)</i>		

All other capital assets which are not part of the estimated total current cost should be fully depreciated by the date that the MSWLF stops accepting solid waste.

Governmental Funds

Counties reporting MSWLF using governmental funds should recognize the amount computed through the formula as expenditures and fund liabilities using the modified accrual basis of accounting. The remainder of the liability should be reported in the debt accounting records. Counties may use a variety of methods to recognize this liability. One approach is to recognize expenditures and fund liabilities only if they will be liquidated with expendable available financial resources (i.e., the county is currently funding the liability with available assets). On the other hand, if the county expects to fund the liability with amounts to be provided in future periods rather than from resources currently available, the liability should be accounted for in the debt accounting records.

Example:

Assuming the same facts as the example under the proprietary fund, the appropriate journal entries are as follows:

Account	Debit	Credit
20X1 - Governmental Fund		
Expenditure - Service And Supplies - MSWLF closure and Postclosure Care Costs	40,000	
Liability - MSWLF Closure and Postclosure Care Costs		40,000
<i>(To recognize the annual allocation of a portion of the estimated total current cost of landfill closure and postclosure care)</i>		

Account	Debit	Credit
20X1 - Governmental Fund		
Amount Held by Trustee	40,000	
Cash		40,000
<i>(To record cash transferred to the trustee or trust fund for financial assurance of closure and postclosure care costs)</i>		

Account	Debit	Credit
20X1 - Debt Accounting Records		
Amount to be Provided for Payment of Landfill Closure and Postclosure Care Costs	10,000	
Liability - MSWLF Closure and Postclosure Care Costs		10,000
<i>(To recognize the difference between the annual allocation of landfill closure and postclosure care costs and the amounts transferred to the trustee as general long-term debt.)</i>		

When the landfill nears closure, purchases for closure and postclosure care costs will be incurred:

Account	Debit	Credit
20X1 - Governmental Fund		
Cash	200,000	
Amounts Held by Trustee		200,000
<i>(To record the return of cash by the trustee for payment of closure and postclosure care costs)</i>		

Account	Debit	Credit
20X1 - Governmental Fund		
Liability - MSWLF Closure and Postclosure Care Cost	200,000	
Cash		200,000
<i>(To record equipment purchases of landfill closure and postclosure care costs)</i>		

Account	Debit	Credit
20X1 - Capital Assets Accounting System		
Equipment	200,000	
Investment in Capital Assets		200,000
<i>(To record purchases of capital assets)</i>		

8.41 On-Behalf Payments for Fringe Benefits and Salaries

GASB Statement No. 24: Accounting and Financial Reporting for Certain Grants and Other Financial Assistance, establishes the standards for accounting and reporting for on-behalf payments for fringe benefits and salaries. On-behalf payments for fringe benefits and salaries are direct payments made by one entity (the paying entity or paying government) to a third-party recipient for the employees of another, legally separate entity (the employer entity or employer government). On-behalf payments include pension contributions, employee health and life insurance premiums, and salary supplements or stipends. On-behalf payments also include payments made by governmental entities on behalf of nongovernmental entities, and vice versa. They also may be made for volunteers, such as governmental pension contributions for firefighters who work within a city fire department.

In accordance with GASB Statement No. 24: Accounting and Financial Reporting for Certain Grants and Other Financial Assistance, an employer government should recognize revenue and expenditures or expenses for on-behalf payments for fringe benefits and salaries. The employer government should recognize revenue equal to the amounts that third-party recipients of the payments received and that are receivable at year-end for the current fiscal year. Employer governments should obtain information about the amount of on-behalf payments for fringe benefits and salaries from the paying entity or third-party recipient. These amounts should also be disclosed in the notes to the financial statements.

8.42 Long-Term Loans to Other Entities

When authorized by law, counties may provide long-term loans from the County General Fund or other governmental funds to other entities outside the county government. For GAAP financial statement reporting, the balance of a long-term loan to another entity should be recorded as a Loans Receivable. The Loans Receivable shall be offset with an equal amount of Nonspendable Fund Balance - Loans Receivable, to indicate that the asset is not available to finance current obligations.

In the financial statements, the interest earnings received should be recorded on the Operating Statement as Interest Revenue. The balance sheet approach, except for Interest Revenue, records only the balance sheet entries. The principal advanced for new loans issued or repayments received for existing loans should be reflected as an increase or decrease to the Loans Receivable. The Nonspendable Fund Balance - Loans Receivable is adjusted as an increase or decrease of the assigned or unassigned fund balance (depending on fund type).

An alternative operating statement approach includes budgetary and accounting operating account entries during the year, with year-end adjustments required to prepare the GAAP financial statements. The budgetary entries provide visibility in the budget process.

The operating account entries include, in addition to Interest Revenue, Other Financing Uses - Loans Advanced when new loans are issued and Loan Principal Revenue for repayments received on existing loans.

The year-end adjustments close the loan advances and/or loan principal revenue as increases or decreases to the Loans Receivable account and corresponding adjustments are recorded, as needed, to the Nonspendable Fund Balance - For Loans Receivable.

Examples of the budget and accounting entries are provided below.

Budgetary		
Budget Entries	Balance Sheet Approach	Operating Statement Approach
New Loans	Dr. Budgetary Fund Balance (or a revenue or an appropriation)	Dr. Budgetary Fund Balance (or a revenue or an appropriation)
	Cr. Nonspendable Fund Balance— Loans Receivable	Cr. Appropriation—Other Financing Uses— Loan Advances
Loan Repayments	Dr. Nonspendable Fund Balance— Loans Receivable	Dr. Estimated Revenue —Principal
	Cr. Budgetary Fund Balance (or a revenue or an appropriation)	Cr. Budget Fund Balance (or an appropriation)

Accounting		
Accounting Entries	Balance Sheet Approach	Operating Statement Approach
Loan Proceeds Disbursed	Dr. Loans Receivable	Dr. Other Financing Uses— Loan Advances
	Cr. Cash	Cr. Cash
	Dr. Assigned/unassigned Fund Balance	None
	Cr. Nonspendable Fund— Loans Receivable	
Loan Principal Repayments	Dr. Cash	Dr. Loans Receivable
	Cr. Loans Receivable	Cr. Loan Principal Revenue
	Dr. Nonspendable Fund Balance— Loans Receivable	None
	Cr. Assigned/Unassigned Fund Balance	
Year-End Adjustment	None	Dr. Loans Receivable
		Dr. Loan Principal Revenue
		Dr. Assigned/Unassigned Fund Balance
		Cr. Other Financing Uses— Loan Advances
		Cr. Nonspendable Fund Balance— Loans Receivable

8.43 Revenue Recognition for Non-Exchange Transactions

Effective fiscal year 2000-2001, GASB Statements No. 33: Accounting and Financial Reporting for Nonexchange Transactions and GASB Statements No. 36: Recipient Reporting for Certain Shared Nonexchange Revenues—an amendment of GASB Statement No. 33, define non-exchange transactions and address the issue of revenue recognition for non-exchange transactions (GASB Statements No. 33 and GASB Statements No. 36 set the parameters for determining when governments recognize non-exchange transactions in the financial statements). For practical purposes, accountants should be cognizant of the definition and types of non-exchange transactions, and should review the relevant recognition criteria for these transactions during year-end transaction processing.

The following charts outlines the different types of non-exchange transactions, as defined by GASB Statements No. 33 and GASB Statements No. 36, and the related revenue recognition criteria. In applying the criteria and determining the type of non-exchange transaction under consideration, the practitioner is encouraged to review GASB Statements No. 33 and GASB Statements No. 36 for more specific guidance when it is needed.

Also note that GASB Statements No. 33 and GASB Statements No. 36 require that providers recognize liabilities (or a decrease in assets) and expenses from government-mandated or voluntary non-exchange transactions, and recipients recognize receivables (or a decrease in liabilities) and revenues (net of uncollectible amounts), when all applicable eligibility requirements, including time requirements, are met. Resources transmitted before the eligibility requirements are met should be reported as advances by the provider and as deferred revenues by recipients.

Governmental fund revenues should be recognized in the period when they become both measurable and available. The application of these accrual criteria requires judgment, consideration of the materiality of the item in question, and due regard for the practicality of accrual, as well as consistency in application.

The county auditor-controller's select and consistently apply an availability period that reflects the underlying nature of their transactions. Normal availability periods range from 60 to 365 days.

Classes and Timing of Recognition of Non-Exchange Transactions	
Class	Recognition
Derived Tax Revenues Examples of: sales taxes, personal and corporate income taxes, motor fuel taxes, and similar taxes on earnings or consumption	Assets Period when underlying exchange has occurred or when resources are received, whichever is first Revenues Period when underlying exchange has occurred. (Report advance receipts as deferred revenues) When modified accrual accounting is used, resources also should be <i>available</i> See paragraphs 16 and 30a of GASB Statement No. 33
Imposed Non-Exchange Revenues Examples of: property taxes, most fines, and forfeitures	Assets Period when an enforceable legal claim has arisen or when resources are received, whichever is first Revenues Period when resources are required to be used or first period that use is permitted. (for example, for property taxes, the period for which they are levied) When modified accrual accounting is used, resources also should be <i>available</i> (For property taxes, apply NCGA Interpretation 3, as amended) See paragraphs 17, 18, 30b, and 30c of GASB Statement No. 33

Classes and Timing of Recognition of Non-Exchange Transactions (continued)

Class	Recognition
Government-Mandated Non-Exchange Transactions Examples of: federal government mandates on state and local governments Voluntary Non-Exchange Transactions Examples of: certain grants and entitlements, most donations	Assets and Liabilities Period when all eligibility requirements have been met or (<i>for asset recognition</i>) when resources are received, whichever is first Revenues and Expenses or Expenditures Period when all eligibility requirements have been met. (Report advance receipts or payments for use in the following period as deferred revenues or advances, respectively. However, when a provider precludes the sale, disbursement, or consumption of resources for a specified number of years, until a specified event has occurred, or permanently [for example, permanent and term endowments], report revenues and expenses or expenditures when the resources are received or paid, respectively, and report resulting net assets, equity, or fund balance as restricted) When modified accrual accounting is used for revenue recognition, resources also should be <i>available</i> See paragraphs 19 through 25 and 30d of GASB Statement No. 33

CHAPTER 9

GENERAL AND SPECIAL REVENUE FUNDS

9.01 Nature and Purpose

The General Fund and special revenue funds are used to account for most of the current operating financial requirements of a county, certain capital outlays, and certain debt service amounts. The General Fund is usually the largest and most important of a county's funds, and most programs are generally financed wholly or partially from it.

The General Fund should be used to account for and report all financial resources not accounted for and reported in another fund. This fund typically has a greater number and variety of revenue sources than any other fund, and its resources normally finance a wider range of activities. It is established at a county's inception and may be expected to exist throughout the county's life. The resources of the General Fund are generally expended and replenished on an annual basis. The General Fund is always considered a major fund.

Special revenue funds are used to account for and report the proceeds of specific revenue resources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects. These funds may include general funds of governmental units or agencies included in the county reporting entity as a result of the county's oversight responsibility.

Restricted or committed proceeds should be expected to comprise a substantial portion of the inflows reported in the fund. Transfers already recognized as revenue in another fund do not qualify as revenue in a special revenue fund. A special revenue fund may be used for stabilization arrangements when the special revenue fund criteria is met.

Accounting requirements for the general and the special revenue funds are identical.

9.02 Use

The use of special revenue funds is not required unless legally mandated. Furthermore, the general fund may be used to account for relatively minor amounts of legally restricted funds set aside for current operating purposes or the acquisition of comparatively short-lived capital assets. Also, a single special revenue fund may be used for relatively small amounts of moneys that are legally restricted for different purposes.

If Legally Restricted:

- Resources may be accounted for in the general fund, or,
- Resources for different purposes may be accounted for in one or more Special Revenue Funds

Appropriate fund balance classification account(s) should be used to indicate:

- The excess of legally restricted assets over related liabilities, and
- The nature of the expenditure purpose to which they are restricted

The primary factors in determining which fund structure is appropriate are:

- The length of time the mandate is expected to exist;
- The total dollar value involved; and
- The ability to show compliance with the legal requirements.

The general fund may also be used to finance capital outlays for long-lived improvements, as long as the resources in such cases are derived exclusively from unassigned revenues. Resources externally restricted to the purchase or construction of major capital facilities should be accounted for in capital projects funds.

General obligation debt service expenditures financed by direct appropriations of unassigned resources may be accounted for in the General Fund. However, if resources are being accumulated for principal and interest payments maturing in future years, they should be accounted for in debt service funds.

9.03 Relationship to Budget

Estimated current general and special revenue fund financing requirements and the proposed financing available to finance them are set forth in the annual operating budgets. When the annual operating budget is adopted, it provides legal authorization for general and special revenue fund spending.

Budgetary accounts are formally integrated into general and special revenue fund general ledgers. Comparisons of approved budgeted amounts with actual results of operations on the budgetary basis actually used to control general and special revenue fund operations are included in governmental financial reports, or as required supplementary information.

It is recommended that a balanced set of budgetary accounts be used. This permits the testing of the integrated general ledger trial balances with three distinct and separate trial balances. At all times during the year:

1. Total general ledger budgetary account debits and credits must be equal
2. Total general ledger actual account debits and credits must be equal
3. Total integrated general ledger debits and credits (including both budgetary and actual account balances) must be equal

The equality of these relationships should be tested periodically.

9.04 General and Special Revenue Fund Accounting

As with all governmental fund types, the focus of general and special revenue fund accounting is on sources and uses of available spendable resources rather than on costs of services. They are, therefore, accounted for on a spending measurement focus using the modified accrual basis of accounting.

9.05 Recording the Adopted Budget

The adopted budget must be balanced, i.e., the available financing should equal the total requirements. Requirements should be reduced to meet financing deficiencies. Reduce property taxes or service charges if there is an excess of available financing.

Example:

At June 30, the General fund has a fund balance of \$60,000. The adopted budget has estimated revenues of \$1,000,000 and appropriations of \$1,060,000.

The entry would be:

Account	Debit	Credit
Estimated revenues	1,000,000	
Budgetary unassigned fund balance	60,000	
Appropriations		1,060,000
<i>(To record the 20X1-X2 budget adopted by the board 7-25-XX)</i>		

If the legally adopted budget is not amended, the budgetary account balances will remain unchanged until the end of the accounting period. If the budget is amended, appropriate revisions are posted to the affected budgetary accounts.

9.06 Accounting for External Financing Sources

External financing sources are classified by fund and source and are recorded in the period when they become measurable and available as net current assets. Allowances for estimated uncollectibles should be established as appropriate, based on historical collection experience and other relevant circumstances.

Certain special revenue fund revenues, such as grants, are accounted for on a modified accrual basis. Entries recording such revenues and related cash collections are:

Account	Debit	Credit
Due from state government	128,000	
Due from federal government	58,500	
Revenues		186,500
<i>(To record intergovernmental grants, entitlements, and shared revenues receivable)</i>		

Account	Debit	Credit
Cash	192,000	
Due from state government		123,500
Due from federal government		58,500
Accounts receivable		10,000
<i>(To record collections of various receivables)</i>		

The first entry is based upon the assumption that the collectability of the recorded intergovernmental receivables is virtually assured. If, on the other hand, relevant circumstances cast significant doubt on such collectability, an appropriate allowance for the estimated uncollectible portion would be required.

Fines and forfeitures, golf and swimming fees, inspection charges, parking meter receipts, and similar revenues are ordinarily not measurable until received in cash.

Such revenues are therefore generally recognized when cash is received, as follows:

Account	Debit	Credit
Cash	229,529	
Revenues		229,529
<i>(To record collection of revenues not previously accrued)</i>		

Collections of short-term receivables do not constitute revenues or other financing sources.

The entry to record, for example, the General fund receipt of a \$2,000 partial payment on its \$4,000 short-term interfund receivable from the Parks Fund is:

Account	Debit	Credit
Cash	2,000	
Due from Parks Fund		2,000
<i>(To record receipt of partial payment on short-term loan receivable from Parks Fund)</i>		

In governmental accounting, the terms due to and due from are used to indicate short-term amounts receivable and payable. The terms advance to and advance from, on the other hand, indicate noncurrent portions of long-term loans. This nonspendable fund balance indicates that amounts reported in advance to accounts should not be considered available spendable resources, since they do not represent net current assets.

It should be noted that on the governmental fund balance sheet, due from other funds equals due to other funds; similarly, advances to other funds equals advances from other funds.

Example:

The following entries record collection of the two current \$5,000 semiannual payments on the general fund advance to the central garage fund, reclassify the two payments due within the next year, and adjust the reported nonspendable fund balance to agree with the year-end balance of the advance to account.

Account	Debit	Credit
Cash	10,000	
Due from Central Garage Fund		10,000
<i>(To record collection of two current semiannual installments on long-term loan to Central Garage Fund)</i>		

Account	Debit	Credit
Due from Central Garage Fund	10,000	
Advance to Central Garage Fund		10,000
<i>(To reclassify the two semiannual payments due within the next fiscal year on long-term loan to Central Garage Fund)</i>		

Account	Debit	Credit
Nonspendable Fund Balance - Advance to Central Garage Fund	10,000	
Unassigned Fund Balance		10,000
<i>(To adjust nonspendable fund balance to year-end balance of Advance to Central Garage Fund account)</i>		

9.07 Accounting for Financing Uses

General and special revenue fund financing uses should be classified by fund, function and activity, budget unit, character and, for expenditures, object class. They are recognized in the accounting period in which the fund liability is incurred.

The exceptions are:

- Unmatured principal and interest on general long-term debt should be recognized only when due
- Compensated absences should be recognized as payments that come due each period, upon the occurrence of relevant events such as employee resignations and retirements

CHAPTER 9 APPENDIX A ROAD FUND ACCOUNTING

Introduction

9A.01 Public Ways and Facilities

Public ways and facilities are a major function of county government. The construction and maintenance of county roads and bridges is one of the major activities within this function that requires special accounting treatment.

9A.02 Legal Basis

Divisions 2 and 3 of the Streets and Highways Code (S & H) prescribe the duties and powers of counties in the construction and maintenance of county roads.

9A.03 County Road System

Section 25 of the Streets and Highways Code (S & H) defines a county highway as “any highway which is:

- a. Laid out or constructed as such by the county
- b. Laid out or constructed by others and dedicated or abandoned to or acquired by the county
- c. Made a county highway in any action for the partition of the real property
- d. Made a county highway pursuant to law.”

Although the code defines county highways, in order to distinguish among them reference is usually made to state highways, county roads, and city streets. The total of the highways referred to in Section 25 is called the county road system.

9A.04 Organization

To perform this road function all counties have a Road Fund, which may also be a customer of a department of public works. Accounting methods subsequently described are applicable to a road department, whereas a department of public works is an Internal Service Fund and is accounted for on a proprietary fund basis, (see Chapter 13: Proprietary Funds).

Financial Accounting

9A.05 Fund Type

Special revenue funds are used to account for and report the proceeds of specific revenue resources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects. A Special Revenue Fund is established to account for the available financing and financing requirements associated with the Road Fund. The Road Fund uses the same balance sheet accounts presented in Chapter 9: on General and Special Revenue Funds.

9A.06 Budgetary Control

Budgetary controls are exercised over Salaries and Employee Benefits, Services and Supplies, Other Charges, Capital Assets, Other Financing Uses, and Residual Equity Transfers. The projects adopted by the board as represented by cost centers are subject to budgetary control unless the board adopts other administrative controls (refer to S & H Section 2007).

9A.07 Revenues and Other Financing Sources

Road Fund revenues and other financing sources are accounted for in accordance with Chapter 6: External Financing Sources (Revenues, Other Financing Sources, and Transfers). Additional accounts may be established as necessary for reporting requirements. For example, S & H Section 2150 requires that Highway Users Tax revenue be kept in a separate account for snow removal, heavy rainfall, storm damage, etc. An alternative would be to establish and maintain a subsidiary revenue ledger for the desired level of detail.

Motor Vehicle Fuel Taxes are usually the major revenue source for the county road program. Other Road Fund revenues include traffic fines and forfeitures, federal forest reserve receipt apportionments, and federal flood control receipt apportionments. The cost of certain projects is shared by the state and federal governments. Counties may supplement these sources by operating transfers from the General Fund and by district assessments for expenditure in the area of benefit.

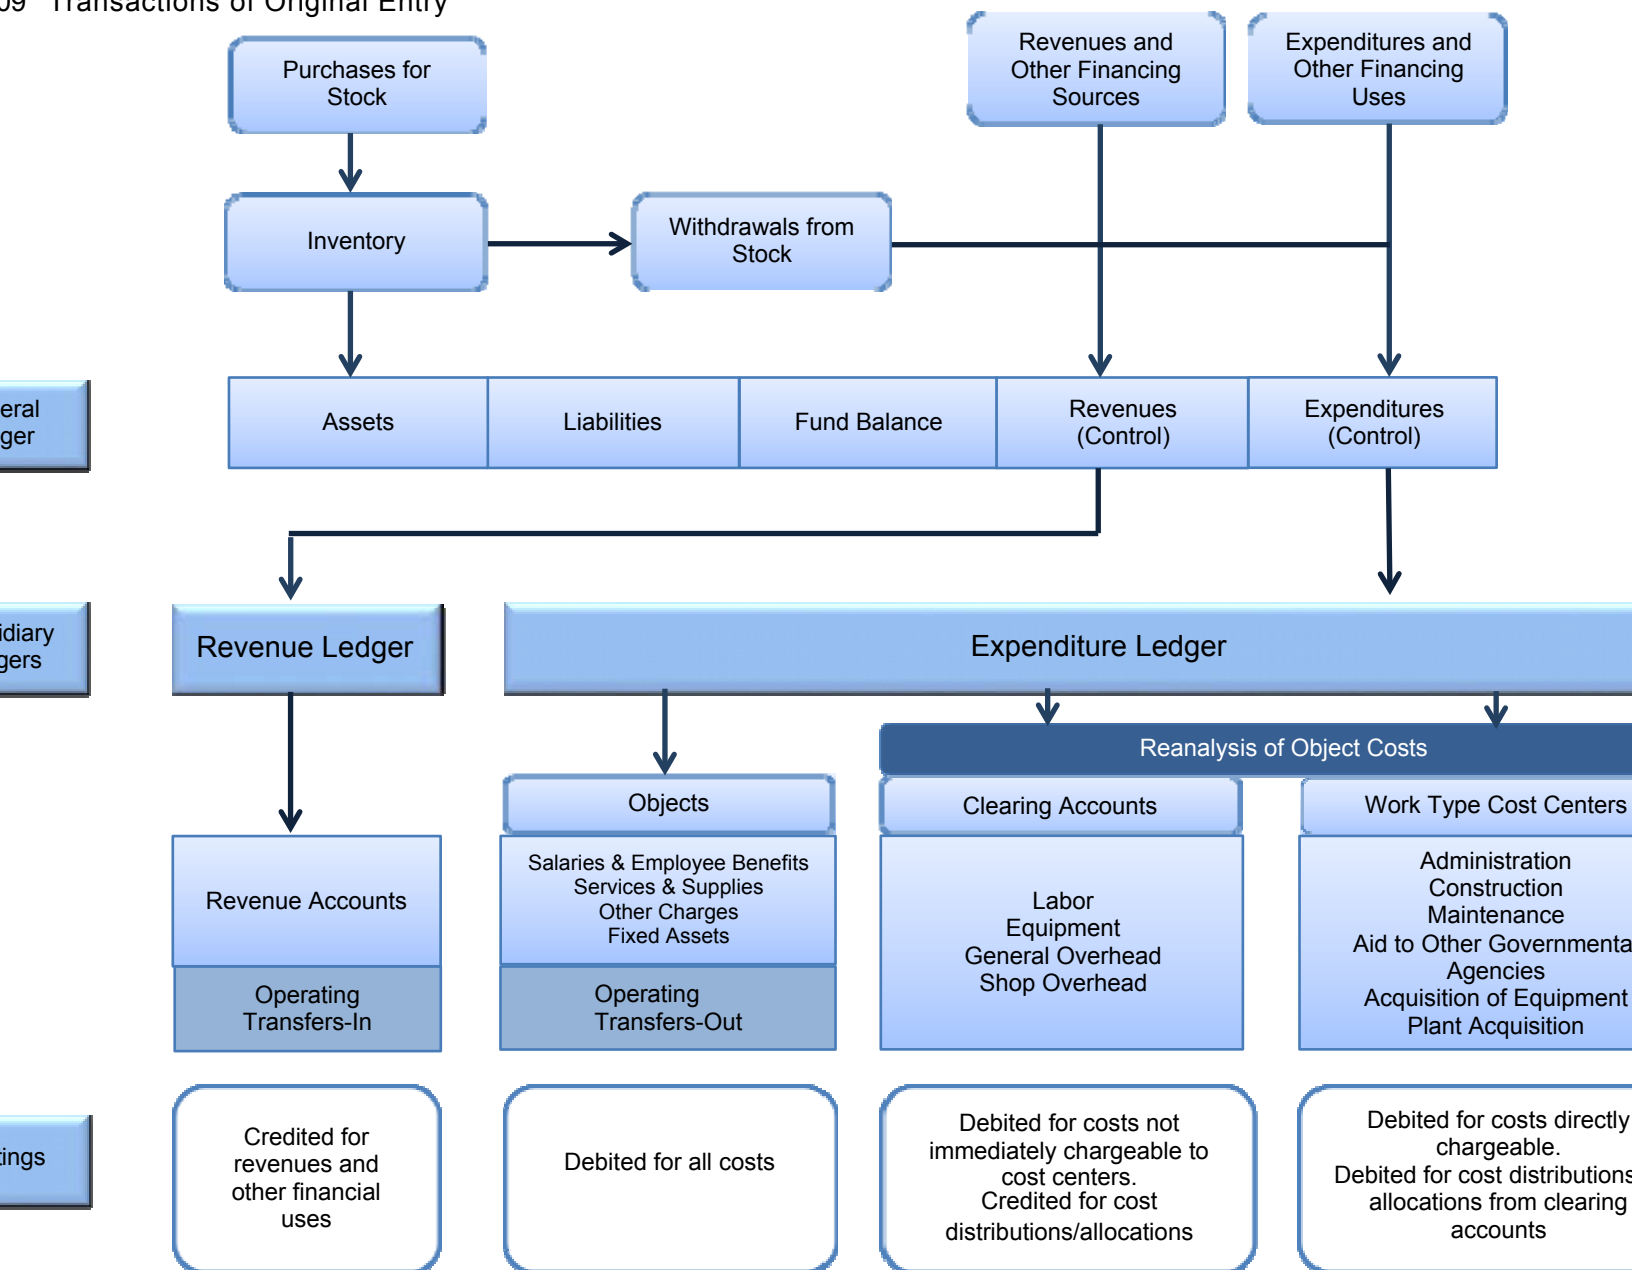

Interest earned on investments of Road Fund money must be deposited in the Road Fund and used for road purposes, per S & H Section 1622.

If remittances of Highway Users Tax are reduced by amounts for Federal Aid Secondary (FAS) deposits, the Highway Users Tax must be recorded at its gross amount and a Deposit With Others should be debited until the expenditure is incurred.

9A.08 Expenditures and Other Financing Uses

Accounts for expenditures and other financing uses accounts are maintained in accordance with Chapter 7: Financing Uses.

09 Transactions of Original Entry

Cost Accounting

The information presented in this section is an example of a model used to capture data required for completing the Annual Road Report.

9A.10 Cost Accounts

Cost accounts are established to account for the costs associated with an activity, project or job. Generally, expenditures recorded in object accounts would be allocated to a cost account. They include both the direct and indirect costs that represent the costs of the road program.

9A.11 Cost Centers

Work type cost centers should be maintained for the following expenditure categories:

- Administration
- Construction
- Maintenance
- Aid to Other Governmental Agencies
- Acquisition of Equipment
- Plant Acquisition
- Reimbursable Work

9A.12 Clearing Accounts

Clearing accounts are those in which expenditures are paid and subsequently allocated or distributed to cost centers. Such accounts are maintained for:

- Labor
- Equipment Maintenance
- General Road Overhead
- Shop Overhead

9A.13 Projects

In support of the work type cost centers, job cost or project accounts are maintained in support of the construction, aid to other governmental agencies, plant acquisition, and reimbursable work cost centers. Job/Project costs are segregated into the following categories:

- Contracts
- Other Direct Charges, including Materials From Inventory
- Labor
- Equipment Usage
- General Road Overhead

9A.14 Labor - Clearing Account

This account is used to distribute all salaries and employee benefits paid by subobject and is credited when labor is distributed by job/project and work type.

Example:

- a) The monthly payroll is \$25,000. The county share of retirement is \$1,750. The county also pays \$175 toward employees' health insurance premiums:

Account	Debit	Credit
Expenditures	26,925	
Cash		26,925
Salaries and Employee Benefits	26,925	
* Labor - Clearing		26,925

- b) The distribution to cost centers is obtained from daily time cards and other sources:

Account	Debit	Credit
* Administration	2,155	
* Construction	10,760	
* Maintenance	8,610	
* Aid to Other Governmental Agencies	2,180	
* Reimbursable Work	3,220	
* Labor - Clearing		26,925

NOTE: An asterisk * preceding an account title designates a cost account.

If labor rates were equal to actual costs, the clearing account would be zero after each posting cycle. In practice there will be a variance. Variances should be analyzed periodically to determine the cause and reset rates if necessary. Variances between standard rates and actual charges could be accounted for as an adjustment to the general work overhead account or distributed upon another acceptable basis like labor hours.

9A.15 Labor Rates

Procedures for distributing labor to cost accounts should provide for uniformity of charges, should produce current cost information, should be standardized, should facilitate ease in accounting operations, and should be adaptable to manual or automated methods. For these reasons, the use of a weighted average labor rate is recommended in the distribution of labor costs to the respective cost accounts. By this method, a charge is composed of the direct labor per hour, or other appropriate unit, plus a pro rata share of labor-related costs such as the county's share of employees' retirement, O.A.S.D.I., group insurance premiums, vacation, sick leave and other employee benefits. A variance between accumulative allocations to cost accounts and the actual expenditures for payroll and the labor-related items for which the rate is weighted will be reflected in the difference between the debits and credits in the labor-clearing accounts.

These variances should be cleared at the end of the fiscal year on a pro rata basis to the appropriate cost centers or as a component of general road overhead. Care in establishing rates at the start of a fiscal year will minimize variance adjustments at the close or during the period.

The actual computation of rates will depend on: (1) gross salary; (2) county share of fringe benefits; (3) employee absence experience; and (4) time reporting basis (hourly, monthly). For employees whose labor costs are chargeable to only one cost center, such as administration, only a monthly rate is needed. For others, an hourly rate is required to distribute costs adequately and accurately.

Example: Computation of weighted average hourly labor rate

General

A labor rate should be computed for each pay range and step within. The rate should include a weight for the pro rata share of all labor-related indirect costs for which expenditures are charged to the road function object accounts.

Assumptions	
Salary Pay Step/Range	\$1,476 per Month
Salary Ordinance Provisions	Vacation Allowance: 15 Working Days Per Year
	Sick Leave: 12 Working Days Per Year
	Work Week: 40 Hours

9A.16 Equipment - Clearing Account

As with labor, this account is used to distribute the actual cost of equipment repair and operation. The postings are similar to those for labor.

Total debits to the Equipment - Clearing account should equal debits to the subsidiary equipment account. A record should be kept on each piece or class of equipment for which a rate is used, and all charges to that equipment are accumulated. Applied credits may also be posted to each card. Additionally, if certain units of equipment are grouped for purposes of rate computation, credits on all pieces in the group may be posted to a single record.

9A.17 Equipment Rental Rates

Equipment rental rates should be fixed to cover as closely as possible the cost of making the equipment available for each unit of service. This includes not only the direct operating costs, such as fuel, oil, tires and other operating supplies, but also maintenance and repairs, insurance, and overhead costs. Depreciation is included when equipment usage is purchased from outside the Road Fund, like an Internal Service Fund for Public Works. Optionally, depreciation may be based on replacement cost when a fund balance classification is established for a Capital Asset replacement in accordance with Chapter 13: Proprietary Funds. It is recommended that those indirect but related equipment costs, such as upkeep of equipment yards, shops or garages, also be considered.

Rates should be established by selected homogeneous classes or types of equipment. This means that all pieces of equipment of relatively the same type, capacity or other pertinent characteristics should bear the same rate. In some situations, particularly in large fleets, groupings may be advisable for equipment of same make and/or same relative type of usage.

Equipment rental rates are based on the estimated costs of operating the equipment over a certain period, usually the fiscal year. The total estimated costs for the year are then reduced to a rate per unit of service, based on the estimated number of units of service that will be performed during the year. A sound basis for arriving at estimates of operating costs and operating data is the cost or experience data of the equipment accumulated in prior years. There may be somewhat wide variations in operational costs and in units of service among individual pieces. Therefore, the selection of a rental rate by selected classes or types is recommended as a leveling device and, incidentally, to ease the accounting processes.

Since the first rates established must be based on estimates, they should be subjected to close scrutiny and should be adjusted periodically in light of actual experience data and possible revised estimates. Rental rates should always be reviewed at least at the end of the year, again in light of the actual operational cost and usage data.

For this reason, among others, it is necessary that an accounting for equipment operating costs and operating usage be maintained. A minimum charge may be set in order to encourage the productive use of equipment, like a standby rate.

Rental rates are normally stated in dollar amounts per hour or per mile. The unit of measure of service for which the rates are computed should be given careful consideration. Many factors, such as type of usage, loading times, etc. will have an effect. Rental rates for heavy trucks, tractors, loaders, etc., where mileage is not indicative of use, are stated in rates per hour, whereas passenger cars and light trucks rental rates may be set in terms of mileage (this basis is consistent with the Federal Emergency Management Agency [FEMA] requirements).

Example:

- a) County X has a fleet of six motor graders for which a rate is desired. The experience data summary for the prior year is as follows:

Computation - Rental Rate

Computation - Rental Rate							
Equip. No.	Operating Supplies	Repair Labor	Repair Parts	Insurance	General Road Overhead	Total Costs	Hours Used
101	\$ 1,030	\$ 298	\$ 1,080	\$ 60	\$ 338	\$ 2,806	1,082
102	1,302	198	986	78	224	2,788	1,120
103	834	478	1,876	42	542	3,772	838
104	1,206	168	422	88	192	2,076	1,464
105	1,076	324	1,298	66	368	3,132	1,210
106	1,110	386	1,452	66	438	3,452	1,189
Totals	\$ 6,558	\$ 1,852	\$ 7,114	\$ 400	\$ 2,102	\$ 18,026	6,903

		Total Costs
Total Costs, per Table		\$ 18,026
Estimated 5% Increase in Cost of Labor and Parts	$(\$1,852 + \$7,114) \times .05$	448
Total Estimated Cost of Operation During Ensuing Year		\$ 18,474
Estimated Hours of Use During Ensuing Year		7,400
Rental Rate for Motor Grader	$\$18,474 / 7,400$	\$ 2.50 per Hour

NOTE: No depreciation is considered within the example as it is not a component part of the operating expenditures of a Special Revenue Fund. In practice, most counties operate from a Department of Public Works Internal Service Fund where depreciation would be a component expense and the Road Fund would be a customer.

9A.18 Inventory

At the time materials are purchased, it may not be known which project or cost center will use them. They are stockpiled and withdrawn for use as needed. On the other hand, they may have been purchased for a particular project and delivered directly to the job site.

The ending balance of the Services and Supplies object should reflect the materials actually used during the year. This may be accomplished in two ways:

1. Consumption Inventory Method - Charging purchases initially to the asset account, Inventory. When materials are withdrawn for use, this account is credited and the Services and Supplies object is charged.
2. Purchases Method - By charging purchases initially to the expenditure object, Services and Supplies. At the end of the year this account is adjusted to actual usage, with an offsetting entry to the asset account.

Under the Purchases Method, an inventory clearing account must be used to receive balancing postings until the materials are withdrawn from stock for use. The clearing account reflects the net change in inventory during the current period. (See 9A:19, for sample postings for each method)

Job-site deliveries may be either routed through the inventory accounts (Asset Account: Consumption Inventory Method or Inventory Clearing: Purchases Method) or posted only to Services and Supplies and Cost Centers.

Materials should be centrally stored in one or a few locations and be under the physical control of a storekeeper. Receiving tickets should be written for all incoming materials and requisitions required for all withdrawals. This information is entered on an individual inventory card for each kind of material subject to control, and the balances are periodically verified by physical count.

9A.19 Materials Included in Inventory

It is not necessary to subject all purchases of materials and supplies to formal inventory accounting controls. Minor items, such as nuts, bolts, nails, welding rods, small hand tools, etc., may be kept under physical but not accounting control. This means that such purchases are charged to Services and Supplies and the usage is recorded through an overhead rate rather than as an inventory withdrawal. Inventory accounting itself is a cost and must be balanced against expected benefits. The extent of this accounting is influenced by:

- Misappropriation of materials
- Facilities
- Manpower
- Controls
- Materiality

It is recommended that accounting controls be established over the following materials, if stocked:

- Aggregate
- Asphalt, asphalt products
- Automotive supplies
- Pipe, drainage products
- Lumber
- Paint
- Steel
- Gasoline, diesel, grease and oil

Example:

- a) The beginning inventory is \$20,000. During the year, materials in the amount of \$120,000 are purchased:

Consumption Inventory Method				Purchases Method			
Account	Sub	Debit	Credit	Account	Sub	Debit	Credit
Inventory		120,000		Expenditures		120,000	
Cash			120,000	Cash			120,000
				Services & Supplies	120,000		
				*Inventory Clearing	120,000		
<i>*An asterisk preceding an account title designates a cost account</i>							

- b) \$80,000 in materials are purchased for direct delivery to job sites:

Consumption Inventory Method				Purchases Method			
Account	Sub	Debit	Credit	Account	Sub	Debit	Credit
Expenditures		80,000		Expenditures		80,000	
Cash			80,000	Cash			80,000
Services & Supplies	80,000			Services & Supplies	80,000		
*Cost Centers (various)	80,000			*Cost Centers (various)	80,000		
<i>*An asterisk preceding an account title designates a cost account</i>							

- c) \$110,000 in materials are withdrawn from inventory for use on projects and maintenance work:

Consumption Inventory Method				Purchases Method			
Account	Sub	Debit	Credit	Account	Sub	Debit	Credit
Expenditures		110,000		*Cost Centers (various)	110,000		
Inventory			110,000	*Inventory Clearing	110,000		
Services & Supplies	110,000						
*Cost Centers (various)	110,000						
<i>*An asterisk preceding an account title designates a cost account</i>							

- d) A physical inventory at the close of the year shows the book inventory to be overstated by \$500:

Consumption Inventory Method				Purchases Method			
Account	Sub	Debit	Credit	Account	Sub	Debit	Credit
Expenditures		500		General Overhead Clearing	500		
Inventory			500	*Inventory Clearing	500		
Services & Supplies	500						
General Overhead Clearing	500						
<i>*An asterisk preceding an account title designates a cost account</i>							

e) Year-end adjusting entry:

Consumption Inventory Method				Purchases Method			
Account	Sub	Debit	Credit	Account	Sub	Debit	Credit
N/A				Inventory		9,500	
				Reserve for Inventory			9,500
				Services & Supplies	9,500		
				*Inventory Clearing	9,500		
<i>*An asterisk preceding an account title designates a cost account</i>							

9A.20 Pricing

For consistent results, a uniform method of pricing requisitions must be adopted. The three more common methods are:

Date of Purchase	Number	Total Cost	Unit Cost
June 3	25	\$ 550.00	\$ 22.00
August 17	10	210.00	21.00
September 16	50	1,087.50	21.75
	85	\$ 1,847.50	

1. First In-First Out: It is assumed that withdrawals are from the oldest stock on hand. If 30 tires are requisitioned, they would be valued at \$655.00 (25 @ \$22.00 and 5 @ \$21.00)
2. Last In-First Out: This assumes that withdrawals are from the most recently purchases stock. The same 30 tires would have been valued at \$652.50 (30 @ \$21.75)
3. Average Cost: This method requires the computation of an average unit cost after each purchases. The average cost per tire is \$21.735 (\$1,847.50/85). The 30 tires withdrawn are then valued at \$652.05 (30 @ \$21.735)

The choice made among the above or other methods is not of great significance in governmental accounting. The important point is that the method selected be consistently followed.

9A.21 General Road Overhead

This overhead account consists of costs which apply generally to all road activity but which cannot be charged directly to specific cost centers. Costs of the following types are included:

- Cost of overall supervision of field operations (Those levels of employees between administrative and the working crew foremen, such as road superintendent, general foreman, etc.)
- Unallocable costs of moving equipment (Moving costs should be allocated to specific cost centers wherever possible)
- Cost of expendable small tools (shovels, picks, axes, etc.)
- Cost of non-permanent reusable barricades, warning signs, and other devices
- Road operations liability insurance premiums

- Labor, storage, supplies, materials, handling charges, and other costs attributable to the inventory operation which are not chargeable to shop overhead. (Counties wishing a more precise cost of materials could use an inventory overhead clearing account.)
- Clearing account variances

Such costs are usually charged to the General Road Overhead Clearing account.

Overhead is best allocated to cost centers as a percentage of the labor allocated to those cost centers. If the overhead rate is set at 10% of applied labor, which for the accounting period amounted to \$6,750, then \$675 in general road overhead would be applied.

Account	Debit	Credit
* Cost centers (various)	675	
* General road overhead - clearing		675
*An asterisk preceding an account title designates a cost account		

At the end of the year the clearing account will have a debit or credit balance, representing the under- or over-application of overhead. Size and causes of the variances indicate whether the application rate should be changed for the following year.

9A.22 Shop Cost

Shops are operated where certain repairs and maintenance are performed on road equipment. Labor, equipment usage, materials and overhead are applied not to cost centers but to equipment maintenance, the expense of which will be charged to cost centers through equipment usage rates. These costs are accumulated through the regular cost media: time cards, requisitions and overhead rates.

If the cost source documents show:

- \$300 in labor applied to pickup truck repair
- \$150 in automotive supplies requisitioned for the above repairs
- Shop overhead rate is 15% of applied labor the entries in the accounts are:

Account	Debit	Credit
Expenditures	150	
Inventory		150
Services and supplies	150	
* Equipment - clearing		150
* Equipment - clearing	345	
* Shop overhead - clearing		45
* Labor - clearing		300
<i>(The \$495 is charged in the subsidiary equipment ledger to the pickup trucks repaired)</i>		
*An asterisk preceding an account title designates a cost account		

9A.23 Shop Overhead

Shop overhead is limited to those shop expenses that cannot be charged to the repair job or for which such a charge is impractical.

Examples of such charges are:

- Occupancy expense, such as rent, utilities, cleaning expense
- Supervision and wage expense of supporting personnel, not chargeable to specific repair jobs
- Repairs and maintenance of shop structures and grounds, cost of alterations, and minor additions.
- Premiums on fire, theft and liability insurance, if shop portion is segregated
- Shop supplies, such as expendable tools, oxygen, welding rod, nails, bolts, etc.
- Repairs to shop equipment not subject to a usage rate

Certain equipment may be used partly in the shop and partly for other road purposes. Such equipment should carry a usage rate in order that costs may be correctly allocated.

Shop overhead is accounted for as general road overhead, except that its immediate destination is equipment maintenance rather than cost centers. It is subsequently reflected in the cost centers through equipment rental rates as a component of the rate development, as shown in Section 9A.17: Equipment Rental Rates.

Shop overhead is best distributed to repair jobs as a percentage of applied labor.

Example:

If the overhead rate is 15% of labor, which for repairing a grader amounted to \$100, \$15 in shop overhead would be applied:

Account	Debit	Credit
Expenditures	50	
Inventory		50
Services and supplies	50	
* Equipment - clearing		50
* Equipment - clearing	115	
* Shop overhead - clearing		15
* Labor - clearing		100
<i>(In the subsidiary equipment ledger, the grader is charged with \$165)</i>		
<i>*An asterisk preceding an account title designates a cost account</i>		

9A.24 Year-End Disposition of Variance

At the end of the year each clearing account will have a debit or credit balance, representing the difference between actual and applied costs. These balances should be cleared to cost centers, as follows:

- If a variance is 10% (5% labor clearing account) or more of total debits to the clearing account, it is allocated to each project within each cost center in proportion to the total prior allocations from that clearing account.
- If the variance is less than 10% (5% labor clearing account), it need only be allocated to each cost center as part of the general road overhead.

Allocations of variances should be made to reimbursable work projects even if the county does not intend to collect or refund the amount of variance applicable to the project.

9A.25 Administration

This cost center receives charges for the cost of administration and management of the road activity. Expenses of the following types are included:

- Salaries and expenses of road commissioners
- Salaries and expenses of deputies or assistants
- Salaries of clerical employees
- Office expense
- Convention and travel expense
- Supervisor's travel allowance
- General and undistributed engineering

In some counties, supervisory personnel may divide time between administrative and road operations. In others, administrative personnel may have other duties, such as that of county surveyor or engineer. In these situations, a monthly distribution of time must be made.

General and undistributed engineering is all work of the engineering staff of the road department or of outside engineering services that cannot be allocated to a specific cost center because the work is not specific or because division by cost center is impractical, such as:

- Safety engineering
- Traffic engineering
- Planning studies and investigations
- Appraisals
- Unallocable engineering

Unallocable engineering refers to the situation where two or more minor, and perhaps adjacent, projects were without any time segregation. Whenever practicable, such costs should be allocated to the project.

All costs of preliminary engineering for reconnaissance, preliminary and location survey, traffic and speed studies, materials and soils investigations and tests, and preparation of plans relative to a specific project

should be charged to that project. Costs of construction engineering, advertising for bids, setting of progress and final reports and estimates relative to a specific project should be charged to that project.

As a practical matter, administration usually allocated to job/project costs on the basis of direct expenditures excluding general undistributed engineering when an Internal Service Fund such as Public Works is estimated and the Road Fund is a customer.

9A.26 Construction

A single construction account controls all construction projects. Project costs are further segregated by category of expenditure.

Betterments that are minor in nature, including right-of-way acquisitions, may be grouped and regarded as a single project, unless it is necessary to subgroup them according to different restricted sources of financing.

9A.27 Rights of Way

Rights of way are land acquired for use as a road, either as an easement or by grant deed conveying title in fee. Rights-of-way costs include (Refer to Chapter 15: Capital Assets, Section 15.16: Intangible Costs):

- Payments for the land or interests therein
- Costs of removing, demolishing, moving, resetting or altering obstruction buildings, structures or other improvements
- Payment for damages to property arising by reason of the project
- Court costs in condemnation proceedings
- Cost of title searches and reports
- Salaries, transportation expenses of rights-of-way agents in connection with acquisition of rights-of-way boundaries whenever the right of way is conveyed to the county and the sole consideration for the conveyance is an agreement by the county to construct such fences
- All other expenses incurred for the purpose of acquiring rights-of-way free and clear of all physical obstructions and legal encumbrances

Costs for rights-of-way are charged to the Other Charges object and to the Construction Cost Center, if they do not meet the county's Capitalization threshold.

9A.28 Maintenance

A single maintenance account controls all maintenance work. Subsidiary maintenance/job/project accounts need to be kept to accumulate for:

- Snow removal
- Heavy rainfall and storm damage
- Other (additional records are kept as deemed necessary)

9A.29 Aid to Other Governmental Agencies

This cost center is charged with:

- Cash grants to another governmental agency to be expended on the streets or highways of that agency
- Amounts expended for work performed on the streets or highways of another agency

Example:

Costs incurred on city streets taken over as an extension of a county road through cities pursuant to S & H Code: Sections 1700 et al.

Costs of work on city streets which have been deeded to the county under the provisions of S & H Code: Section 1723, are not charged to this cost center but to Construction or Maintenance.

9A.30 Acquisition of Equipment

Definitions of equipment are set forth in Chapter 15: Capital Assets. Equipment is charged to this cost center, as are costs of labor, materials and overhead applied to the manufacture of equipment. In the latter case, job orders should be used to accumulate costs.

9A.31 Plant Acquisition

Definitions of land, structures, and improvements are also found in Chapter 15: Capital Assets. Since centralized budgeting and accounting for all county real property acquisition is recommended, structures and improvements acquired by purchase or construction contract may be charged directly to the County Plant Acquisition Budget Unit. Costs of structures and improvements constructed by force are accumulated account in the Road Budget Unit and, upon completion, billed and charged to the General Fund Unit.

Road Budget Unit Revenue	
Revenue	\$ 5,000
Plant Acquisition Budget Unit	
Structures and improvements	\$ 5,000

9A.32 Reimbursable Work

This cost center is charged the cost of performing work for, rendering services to, or furnishing materials to others on a reimbursable basis. Normally these services are performed on other than the county road system and are not considered to further road purposes. The following are included:

- Services for private parties and business firms, such as snow removal, oiling driveways, etc.
- Work performed or materials furnished for other county departments and other governmental agencies, such as leveling and oiling grounds, maintenance and repair of non-road department equipment, and furnishing gas and oil, building inspection services and street work for cities when not authorized by the board of supervisors as a contribution (S & H Code, Section 1680 et al.)

Equipment depreciation must be included in billings for reimbursable work, to comply with the anti-diversion principle.

Billings to outside parties should include charges for certain costs, such as administrative overhead, which may not have been distributed to the Reimbursable Work cost center.

Example:

- a) The cost of paving the Hospital District Parking Lot is performed with road fund resources and charged to the Reimbursable Work Cost Center:

Account	Debit	Credit
Expenditures	700	
Inventory		700
Services and supplies	700	
* Reimbursable work		700
* Reimbursable Work	3,530	
* Labor - clearing		2,300
* Equipment - clearing		1,000
* General road overhead - Clearing		230

- b) The Hospital District pays in full the cost of paving the parking lot:

Account	Sub	Debit	Credit
Road Fund cash		4,230	
Road Fund revenues			4,230
Charges for services	4,230		

9A.33 Encumbrances

An encumbrance system may be used at either the object or project level depending upon the budgetary control exerted locally. Encumbrance accounting is presented in Chapters 8: Specific Accounting Procedures and Chapter 16: Budgetary.

9A.34 Internal Service Funds

Internal service funds are the subject of Chapter 13: Proprietary Funds. If financing is available, it is advantageous to assign equipment ownership, maintenance and rental to an internal service fund. Accounting in the road department is simplified and depreciation may be included in the rental rates. (Depreciation rates based on replacement costs and moneys set aside for asset replacement are allowable as presented with Chapter 13: Proprietary Funds.)

Definitions

9A.35 General Definitions

The following definitions are those which are associated with the County Road Fund. The two general classifications of road working activities are:

Construction - The building or rebuilding of a road or its component parts to a degree that improved traffic service is provided and geometric or structural improvements are effected.

Maintenance - The preservation and upkeep of a road's constructed condition, and the operation of a road facility and its integral services to provide safe, convenient and economical highway transportation.

In addition to these general classifications of road activities, definitions for bridgings are required because of their traditional separation from roads.

Bridge - A single-span structure of more than 20 feet, measured under the copings along the center line of the road, and multiple-span structures where the individual spans are in excess of 10 feet, measured from center to center of supports along the center line of the road. (The width of a bridge is the distance between the inside faces of curbs, or railings where no curbs exist, measured perpendicularly to the center line of the road.)

Ferries are classified as bridges.

Culverts - Single-span structures of less than 20 feet center to center of supports, all pipe culverts, and all closed waterway structures not defined as bridges. Culverts are to be recognized as an integral part of the road not as a bridge.

Because of their unusual nature and infrequent occurrence, disaster operations should be separately identified in the road accounts. The most frequent of this type of item, "storm damage", is defined as follows:

Storm Damage - Extensive repair or replacement due to damage resulting from storm or flood.

The two general classifications, construction and maintenance, are further elaborated by the following discussion and examples of types of work to be included in each.

9A.36 Construction: Categories and Examples

Construction work includes three categories:

1. New Location - A construction which substantially deviates from the existing alignment and provides for an entirely new roadbed for the greater part of its length.
2. General Reconstruction - A construction involving realignment or the use of standards well above those of the existing element, whereby the type or the geometric and structural features are significantly changed.
3. Betterments - Minor construction which enhances traffic operation or increases the value or life of the facility or its components.

Types of work included in Road Construction:

The removal of old roadbeds and structures, and detour expense when connected with a construction project

Changes of alignment, profile, and cross-sections

Addition of a frontage road

Original surfacing of shoulders with material higher in quality than the adjacent roadside

The installation of an original set of traffic signs and markers on routes

Drainage and earth work protective structures within or adjacent to the right-of-way area

A complete reconstruction of or an addition to a culvert

Widening of a bridge

Installations or extensions of curb, gutter or under drain

Extensions and new installations of walls

Reconstruction of an intersection and its approaches to a substantially higher type, involving a change in its character and layout, including changes from a plain intersection to a major channelized intersection or to a grade separation and ramps

Placing sufficient new material on soil surface or gravel road to substantially improve the quality of the original surface

Improvement of a surface to a higher type

Resurfacing of concrete or brick pavement with bituminous material

Bituminous material of 1" or more placed on bituminous. Remix of existing bituminous surfacing with added materials to provide a total thickness of 1" or more

Stabilization of road base by the addition of cement, lime or asphaltic material

Replacement of existing pavement with one of a higher standard

Widening of existing roadbed or pavement, with or without resurfacing

Addition of auxiliary lanes such as speed change, storage or climbing lanes

Resurfacing, stabilizing or widening of shoulders, including side road approaches

Substantial addition to landscape treatment, such as top soil, sod, shrubs, trees, etc.

Extension of old culverts and replacement of headwalls

Replacement of culvert with a facility of greater capacity

Replacement of walls to a higher standard

Replacement of all major signs or traffic control devices on a route with a substantially improved signs

Installation of a new sign or replacement of an old sign with one of superior design such as increased size, illumination, or overhead installation

Installation or improvement of traffic signal controls at intersections and protective devices at grade crossings

Installation or expansion of lighting system

Replacement of structures and utilities that have been related. Extension or new installation of guard rail

Installation of a new facility for roadside rest areas or a complete replacement with major modifications

NOTE: Where an improvement as a whole is classed as construction, incidental operations of the normal maintenance type should be considered as part of the construction.

9A.37 Maintenance: Categories and Examples

Maintenance work includes two general categories: physical maintenance, and the operation of traffic services, the latter being (as defined in the opening section) the operations of safety facilities.

Examples of Maintenance Work:

Scarifying, reshaping and restoring material losses

Applying dust palliatives

Patching, repairing, surface treating, and joint filling on bituminous or concrete surfaces

Mud jacking concrete pavements

Repairing traveled ways and shoulders

Adding bituminous material of less than 1" to bituminous, including dealing costs

Remixing existing bituminous surfacing with added materials to provide a total thickness of less than 1"

Patching operations, including base restoration

Resealing road shoulders and side road approaches

Reseeding and re-sodding shoulders and approaches

Reshaping of drainage channels and side slopes

Restoring erosion controls

Cleaning culverts

Removing slides and restoring facilities damaged by slides (additional new facilities shall be constructions)

Mowing, tree trimming and watering

Replacing top soil, sod, shrubs, etc. on roadside

Repairing curbs, gutters, rip-rap, under drains, and culverts

Cleaning, painting and repairing bridges and structures

Repairing of drawbridges and ferries

All snow control operations, such as erection of snow fences and the actual removal of snow from the traveled way

Repainting pavements, striping's and markings

Repainting and repairing signs, guard rails, traffic signals. Lighting standards, etc.

Maintaining roadside rest areas

Adding small numbers of conventional traffic control devices, including signs

Servicing highway lighting and traffic control devices

Furnishing power for highway lighting and traffic control devices

Operating costs of draw bridges and ferries

Examples

9A.38 Background

The “County of X” operates as follows:

Organization - The Road Department is a separate county department with a full-time road commissioner.

Plant - There is an administration building with adjoining facilities for storage of materials and for repair of equipment.

Budgeted Positions - There are 55 Road Department employees:

Administrative:	
Road Commission	1
Clerical	3
Engineers	2
Shop	2
Construction and Maintenance	47
Total	55

Engineering, shop, and construction and maintenance employees have weighted-average hourly labor rates and prepare daily job-cost time cards.

Equipment - The department owns and operates its own equipment. Composite rental rates are used for each group with the exception of the miscellaneous group, each unit of which has its individual rates:

Group	No. of Units	Description
1	5	Passenger Cars
2	12	Pickup Trucks
3	12	Trucks
4	3	Motor Graders
5	3	Rollers (Self-Propelled)
6	5	Tractors, Loaders (Small)
7	2	Tractors, Loaders (Large)
8	1	Cranes, Including Boom Tractors
9	25	Miscellaneous

Usage rates are not used for shop equipment. Any repairs and maintenance are charged to Shop Overhead - Clearing and are distributed as a percentage of direct shop labor.

9A.38 Background (continued)

Stores - Stores control and detail inventory records are kept for the following classes of materials:

10	Aggregate
20	Asphalt
30	Automotive Supplies
50	Lumber
60	Paint
70	Steel
80	Gas, Oil, Diesel
40	Pipe, Drainage Products

All other materials and supplies are charged to one of the overhead accounts and are issued on “memo” requisitions.

General Ledger Accounts - The general ledger accounts and their post-closing balances at June 30, 20X1, are as follows:

General Ledger			
Assets			
101	Cash	\$	50,000
107	Accounts Receivable		7,000
110	Deposits With Others		15,000
123	Inventory of Materials and Supplies		30,000
	Total		\$ 102,000
Liabilities and Fund Equity			
203	Accounts Payable	\$	23,800
220	Deposits From Others		1,500
			\$ 25,300
241	Nonspendable Fund Balance - Inventories	\$	30,000
*243	Committed Fund Balance - Encumbrances		18,000
244	Assigned Fund Balance		28,700
	Total		76,700
			\$ 102,000

- The actual Reserved for Encumbrances account has been reclassified to Committed Fund Balance in this post-closing illustration to comply with *GASB Statement No. 54: Fund Balance Reporting and Governmental Fund Type Definitions*

9A.38 Background (continued)

Operating Accounts	
301	Revenues and Other Financing Sources
305	Expenditures and Other Financing Uses
Budgetary Accounts	
401	Estimated Revenues and Estimated Other Financing Sources
403	Unanticipated Revenues and Other Financing Sources
404	Unrealized Estimated Revenues and Estimated Other Financing Sources
405	Appropriations and Estimated Other Financing Uses
406	Budgetary Nonspendable Fund Balance
407	Budgetary Restricted Fund Balance
408	Budgetary Committed Fund Balance
409	Budgetary Assigned Fund Balance
411	Encumbrances
412	Budgetary Fund Balance - Reserved for Encumbrances
Subsidiary Revenue Accounts	
20	Vehicle Code Fines
30	Interest
41	State Highway Users Tax:
.1	Administration & Engineering (<i>S & H Code, Section 2104a</i>)
.2	Snow Removal (<i>S & H Code, Section 2104b</i>)
.3	Heavy Rainfall and Storm Damage (<i>S & H Code, Section 2104c</i>)
.4	Rights of Way and Construction (<i>S & H Code, Section 2106</i>)
.5	Any Road Purpose (<i>All Other</i>)
96	Road and Street Services
106	Other
121	Sale of Capital Assets
If these codes are prefixed by a 4, they refer to estimated revenues; by a 5, they refer to actual revenues.	

9A.38 Background (continued)

Subsidiary Ledger Expenditure Accounts			
Objects		Cost Centers	
1	Salaries and Employee Benefits	31	Administration
2	Services and Supplies	32	Construction
3	Other Charges	34	Aid to Other Governmental Agencies
4	Capital Assets	35	Acquisition of Equipment
5	Other Financing Uses	36	Plant Acquisition
Clearing Accounts		37	Reimbursable Work
21	Labor - Clearing	50	Operating Transfers:
22	Equipment - Clearing	1.	Plant
24	Shop Overhead - Clearing	2.	Interfund Reimbursable Work

Codes prefixed by a 6 refer to appropriations; by a 7, to encumbrances (applicable to objects only); and by an 8, to expenditures.

A three-digit number identifies each project. The block within which a number falls identifies the cost center. Projects are numbered in sequence within each block. A fourth digit is used to designate the type of expenditure.

Work Type Code (First Three Digits)			
101-179	Road Construction	*350-399	Other Maintenance
181-199	Rights of Way	401-499	Aid to Other Governmental Agencies
201-299	Bridge Construction	501-599	Acquisition of Equipment
* 300-324	Snow Removal	601-699	Plant Acquisition
* 325-349	Heavy Rainfall & Storm Damage	701-799	Reimbursable Work
Source of Cost (Fourth Digit)			
Direct Charges		Applied Charges	
1	Contracts	3	Labor
2	Other	4	Equipment
		5	General Road Overhead

- In this example, maintenance is segregated only by snow removal, heavy rainfall and storm damage, and all other maintenance. If additional detail were desired, project numbers could be assigned within the indicated blocks.

9A.39 Budget

The 20X1 budget is adopted as follows:

Budget Summary			
Budgetary Assigned Fund Balance	\$ 28,000	Appropriations	\$ 800,000
Estimated Revenues	648,300		
Other Financing Sources	123,700		
Total	\$ 800,000		\$ 800,000

9A.39 Budget (continued)

Detail of Estimated Revenues		
<i>Fines, Forfeits And Penalties</i>		
420	Vehicle Code Fines	\$ 11,000
<i>Revenue From Other Governmental Agencies</i>		
441	State Highway Users Tax	611,800
<i>Charges For Current</i>		
495	Road and Street Services	7,000
<i>Other Revenues</i>		
121	Sale of Capital Assets	8,500
	Other	10,000
Total		\$ 648,300

Detail of Requirements	
Function:	Public Ways and Facilities
Activity:	Public Ways
Budget Unit:	Road Construction and Maintenance

Road Department		
<i>Objects</i>		
601	Salaries and Employee Benefits	\$ 300,000
602	Services and Supplies	335,000
603	Other Charges	100,000
604	Capital Assets	45,000
605	Appropriation for Contingencies	20,000
Total		\$ 800,000

CHAPTER 10

CAPITAL PROJECTS FUNDS

10.01 Nature and Purpose

Governments often find it useful to report major capital acquisitions and construction separately from their ongoing operating activities. When this is the case, capital projects funds are used.

Capital projects funds are used to account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays including the acquisition or construction of capital facilities and other capital assets. Capital projects funds exclude those types of capital-related outflows financed by proprietary funds or for assets that will be held in trust for individuals, private organizations, or other governments. (NCGAS 1, ¶ 10; GASBS 54, ¶ 33)

Capital projects funds use the same flow of current financial resources measurement focus and the modified accrual basis of accounting that is used by other governmental fund types.

10.02 Fund Requirements

GASB pronouncement NCGAS 1 ¶ 29 states, “Governmental units should establish and maintain those funds required by law and sound financial administration. GASB pronouncement NCGAS 1 ¶ 23 states, “A local government’s funds may be established by state constitutional provisions or statutes, or by local charters, ordinances and governing body orders. Funds may also be created by the governing body to achieve sound and expeditious financial administration and reporting and/or to comply with grant or contract accounting and financial reporting requirements.”

It is generally recommended that a capital projects fund be used for the government’s major capital acquisition and construction activities, but may be required if they are financed through borrowings or contributions.

Capital Outlays financed from general obligation bond proceeds should be accounted for through a capital projects fund. Carefully read all grant and financing agreements, especially debt agreements, to determine whether capital projects funds are required. (NCGAS 1, ¶ 10, ¶ 23-26; GASBS 34, ¶ 50)

10.03 Relationship to Budget

Planning for capital projects funds begins in the government’s long-term capital budget. Estimated current capital outlays and the proposed revenues and other financing sources required to finance them are also set forth in the annual operating budget(s). When the annual operating budget is adopted, it provides legal authorization, on an annual basis, for the capital outlay expenditures set forth in the capital budget. Legal authorization for capital projects fund spending may also be provided indirectly by governing board approval of intergovernmental grant agreements or of debt instruments.

Formal budgetary integration is generally necessary for any capital projects fund that is used to account for more than one project. Governments sometimes employ formal budgetary integration, along with encumbrance accounting, to protect against capital projects cost overruns and to ensure that sufficient resources are available on a timely basis to meet expenditure requirements during the course of the year. Encumbered amounts for specific purposes should be classified appropriately as restricted, committed or assigned fund balance, dependent upon the funding source spending limitations.

10.04 Transactions and Illustrative Journal Entries

The county established long-range plans to construct a new county jail and for several years has provided for the accumulation of funds in a capital projects fund for this purpose. However, due to new state requirements concerning jail facilities and the availability of state grants to assist in financing these facilities, the county has decided to accelerate the plans for construction. The issuance of \$1,250,000 of general obligation bonds has been approved at a general election. Estimated construction costs and funding sources are as follows:

Account	Amount	% of Total
Capital Projects Fund - Jail (assigned)	\$ 250,000	5
Bond proceeds (restricted)	1,250,000	25
State grant (restricted)	1,000,000	20
General fund (committed)	2,500,000	50
Total project cost	\$ 5,000,000	100

General Fund contributions to this project could be committed in total during the first year. For the purposes of this example, it is assumed that the current-year budget contains appropriations for the funds, as follows:

General Fund	\$ 2,125,000
--------------	--------------

The balance of the General Fund contribution (\$375,000) will be appropriated in the budget for the next fiscal year.

In accordance with the government policy spending priorities, all restricted resources are spent first.

For this example, these funds are spent on a pro rata basis.

Residual balances, if any, remaining in the Capital Projects Fund at the completion of the project will be returned to the contributing funds, as follows:

Bond proceeds (to be distributed to the appropriate debt service fund)	31.25%
General fund	68.75%
	100.00%

A pro rata return of residual balances or some other disposition could be spelled out by agreement, debt agreement, or local custom.

First Fiscal Year:

a. July 1, 20X1

It is assumed that the county budget adopted for the fiscal year 20X1-X2 provided for this project:

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Estimated other financing sources	3,375,000	
Budgetary restricted fund balance		1,250,000
Budgetary committed fund balance		2,125,000
Estimated revenues (50% of state grant)	500,000	
Budgetary assigned fund balance	250,000	
Budgetary restricted fund balance	1,250,000	
Budgetary committed fund balance	2,125,000	
Appropriations		4,125,000
<i>(To record adopted operating budget)</i>		

Account	Debit	Credit
<i>General Fund</i>		
Estimated revenues	2,125,000	
Estimated other financing uses		2,125,000
<i>(To record budget for contributions to Capital Projects Fund)</i>		

Account	Debit	Credit
<i>General Fund</i>		
Other financing uses	2,125,000	
Due to Capital Projects Fund - Jail		2,125,000
<i>(To record liabilities for contributions due)</i>		

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Due from General Fund	2,125,000	
Other Financing Sources		2,125,000
<i>(To record receivables for General Fund share of the project)</i>		

b. December 15, 20X1

Account	Debit	Credit
<i>Capital Project Fund - Jail</i>		
Cash	2,125,000	
Due from General Fund		2,125,000
<i>(To record transfer of cash from General Fund)</i>		

Account	Debit	Credit
<i>General Fund</i>		
Due to Capital Projects Fund - Jail	2,125,000	
Cash		2,125,000
<i>(To record transfer of cash to the Capital Projects Fund - Jail)</i>		

c. January 15, 20X2

A contract is signed with Malcolm Bros. Architects for plans, specifications and construction, and supervision. The contract is for \$500,000:

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Encumbrances	500,000	
Budgetary Fund Balance - Reserved for encumbrances*		500,000
<i>(To record . . .)</i>		
<i>*See Chapter 16: Budgetary, for details of encumbrance accounting</i>		

d. February 1, 20X2

Bond anticipation notes are sold at 10% pending a better market condition for sale of bonds:

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Cash	1,250,000	
Other financing sources		1,250,000
<i>(To record sale of notes)</i>		

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Investments	1,250,000	
Cash		1,250,000
<i>(To record proceeds of notes invested at 10%)</i>		

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Unanticipated revenue	52,000	
Appropriations		52,000
<i>(To record budget adjustment for interest income and expense)</i>		

e. May 1, 20X2

A state grant is applied for and approved. The grant is payable in two installments, one at 50% completion of construction and one at 100% completion:

<i>No Entry</i>		
-----------------	--	--

f. May 1, 20X2

Malcolm Bros. submit the plans and specifications and bills the county for the first payment (50% of contract):

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Budgetary Fund Balance - Reserved for encumbrances	250,000	
Encumbrances		250,000
Expenditures	250,000	
Cash		250,000
Due from State	50,000	
Revenue		50,000
<i>(To recognize state grant revenue earned at 20% of expenditures)</i>		

g. June 15, 20X2

The first-phase construction contract is awarded to Smith Construction Co. for \$3,600,000. Site clearance and landscaping, to be performed by county forces, is estimated at \$25,000:

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Encumbrances	3,625,000	
Budgetary Fund Balance - Reserved for Encumbrances		3,625,000
<i>(To record . . .)</i>		

h. June 30, 20X2

A billing for \$15,000 is received from the road department for site clearance. The billing is cleared by journal entry:

Account	Debit	Credit
<i>Road Fund</i>		
Cash	15,000	
Revenue		15,000
<i>(To Record . . .)</i>		

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Budgetary Fund Balance - Reserved for encumbrances	15,000	
Encumbrances		15,000
Expenditures	15,000	
Cash		15,000
Due from State	3,000	
Revenue		3,000
<i>(To recognize state grant revenue earned at 20% of expenditures)</i>		

i. June 30, 20X2

Construction in Progress is recorded in the Capital Assets Accounting System:

Account	Debit	Credit
<i>Capital Assets Accounting System</i>		
Construction in progress	265,000	
Invested in capital assets		265,000
<i>(To record . . .)</i>		

j. June 30, 20X2

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Accrued interest receivable	52,000

Assigned fund balance	3,860,000	
Fund Balance - Reserved for encumbrances		3,860,000
<i>(To record <u>actual</u> fund balance encumbered for expenditure upon contractor performance)</i>		

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Appropriations	4,177,000	
Budgetary assigned fund balance		250,000
Estimated other financing sources		3,375,000
Estimated revenues		500,000
Unanticipated revenues		52,000
<i>(To reverse budgetary entries)</i>		

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Revenue	105,000	
Other financing sources	2,125,000	
Assigned fund balance		1,913,000
Expenditures		317,000
<i>(To close actual operating accounts into assigned fund balance)</i>		

Second Fiscal Year

a. July 1, 20X2

The county budget contains a provision to transfer from the General Fund \$375,000, representing the second-year General Fund Contribution to the Capital Projects Fund – Jail. The budget and the cash transfer for the Capital Projects Fund – Jail are recorded:

Account	Sub	Debit	Credit
<i>Capital Projects Fund - Jail</i>			
Estimated other financing sources		375,000	
Budgetary assigned fund balance			375,000
Estimated revenues		948,000	
Budgetary assigned fund balance		72,000	
Appropriations			1,020,000
Revenue State grant	948,000		
Interest income	72,000		
	1,020,000		
<i>(To record budget for the Capital Projects Fund)</i>			

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Due from General Fund	375,000	
Other financing sources		375,000
<i>(To record amount due from the General Fund)</i>		

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Fund Balance - Reserved for Encumbrances	3,860,000	
Assigned fund balance		3,860,000
Budgetary Assigned Fund Balance	250,000	
Budgetary Committed fund balance	3,610,000	
Encumbrances	3,860,000	
Appropriations prior year		3,860,000
Budgetary Fund Balance - Reserved for encumbrances		3,860,000
<i>(Encumbrances outstanding at year-end are re-established, along with their encumbered appropriations)</i>		

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Cash	375,000	
Due from General Fund		375,000
<i>(To record . . .)</i>		

Account	Debit	Credit
<i>General Fund</i>		
Estimated revenues	375,000	
Estimated other financing uses		375,000
<i>(To record budget for contributions to capital projects fund)</i>		

Account	Debit	Credit
<i>General Fund</i>		
Other financing uses	375,000	
Due to capital projects fund - jail		375,000
<i>(To record liability for contributions due)</i>		

Account	Debit	Credit
<i>General Fund</i>		
Due to capital projects fund - jail	375,000	
Cash		375,000
<i>(To record transfer of cash to the Capital Projects Fund - Jail)</i>		

b. August 1, 20X2

A contract with Smith Construction for Phase 2 of the construction is signed. The estimated cost of Phase 2 is \$875,000:

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Encumbrances	875,000	
Budgetary Fund Balance - Reserved for encumbrances		875,000
<i>(To record . . .)</i>		

c. December 15, 20X2

Malcolm Bros. certifies 50% completion of construction and submits a billing for $\frac{1}{4}$ of its contract.

Smith Construction Co. submits a billing for $\frac{1}{2}$ of the construction contract costs. The contract requires a 10% retention pending final acceptance of the building.

A claim for 1/2 of the state grant is submitted:

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Budgetary Fund Balance - Reserved for encumbrances	2,362,500	
Encumbrances		2,362,500
Expenditures	2,362,500	
Cash		2,138,750
Retention		223,750
Due from State	472,500	
Revenue		472,500
<i>(To recognize state grant revenue earned at 20% of expenditures)</i>		

d. January 15, 20X3

The county receives 50% of the total state grant:

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Cash	500,000	
Due from State		500,000
<i>(To record . . .)</i>		

e. February 1, 20X3

Bonds are sold, investments are cashed in, and bond anticipation notes are redeemed:

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Cash	1,250,000	
Other financing sources		1,250,000
<i>(To record proceeds of bond sale)</i>		

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Cash	1,375,000	
Revenue		73,000
Investments		1,250,000
Accrued interest receivable		52,000
<i>(To record sale of investments, interest revenue, and collection of interest revenue)</i>		

Account	Debit	Credit
<i>Capital Project Fund - Jail</i>		
Expenditures	73,000	
Accrued interest payable	52,000	
Retirement long-term debt	1,250,000	
Cash		1,375,000
<i>(To record redemption of bond anticipation notes, interest expense, and payment of interest on notes)</i>		

f. May 15, 20X3

The county receives notice of completion of construction from Malcolm Bros. and a billing for the final $\frac{1}{4}$ of its contract:

The County receives a billing from Smith Construction for the second payment, subject to 10% retention:

The County receives a billing from the road department for landscaping cost of \$8,000:

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Budgetary Fund Balance - Reserved for encumbrances	2,370,500	
Encumbrances		2,370,500
Expenditures	2,370,500	
Cash		2,146,750
Retention		223,750
Due from State	474,100	
Revenue		474,100
<i>(To recognize state grant revenue earned at 20% of expenditures)</i>		

Account	Debit	Credit
<i>Road Fund</i>		
Cash	8,000	
Revenue		8,000
<i>(To record . . .)</i>		

g. June 15, 20X3

The county receives the balance of the state grant, as follows:

Account	Actual Cost
Malcolm Bros, architects	\$ 500,000
Road Dept., site clearance	15,000
Smith Const. Co., construction	4,475,000
Road Dept., landscaping	8,000
Total cost	\$ 4,998,000

Account	Actual Cost
State grant proceeds, 20% of cost	\$999,600
Received January 15, 20X3	500,000
Due and received this payment	\$ 499,600

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Cash	499,600	
Due from State		499,600
<i>(To record . . .)</i>		

h. June 30, 20X3

The board of supervisors accepts the new jail facility and orders the paid retention to Smith Construction.

The Capital Projects Fund – Jail is closed and remaining balances, in accordance with the prior agreement, are transferred as follows:

1	Debt Service Fund	31.25%
2	General Fund	68.75%
		<u>100.00%</u>

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Retention	447,500	
Cash		447,500
Transfers-Out	1,600	
Cash		1,600
<i>(To record transfer of remaining balances)</i>		

Account	Debit	Credit
<i>Capital Projects Fund - Jail</i>		
Appropriations	4,808,000	
Budgetary Assigned fund balance	447,000	
Revenue	1,019,600	
Budgetary Fund Balance - Reserved for encumbrances	2,000	
Other financing sources	1,625,000	
Transfers-In		1,600
Assigned fund balance		1,697,000
Encumbrances		2,000
Expenditures		4,806,000
Estimated revenues		1,020,000

CHAPTER 11

DEBT

11.01 Long-Term Debt

Long-term debt is the term used to describe obligations that are not expected to be liquidated with available resources. Types of obligations found in this category include:

- Liabilities evidenced by formal debt instruments (such as term bonds, serial bonds, revenue bonds and tax anticipation notes)
- Liabilities arising from capital leases
- Installment purchase contracts
- Judgments and claims
- Unfunded pension obligations
- Accumulated vacation, sick pay, and other employee benefit amounts not yet due

Long-term liabilities of proprietary and fiduciary funds are accounted for through those funds. Other fund long-term liabilities must be maintained in sufficient detail in the debt accounting records to provide sufficient information for financial reporting and disclosure requirements.

11.02 Conduit Debt Obligations

Conduit debt obligations are certain limited-obligation revenue bonds, certificates of participation, or similar debt instruments issued by a state or local governmental entity for the express purpose of providing capital financing for a specific third party that is not a part of the issuer's financial reporting entity. Conduit debt is generally not reported on the face of a county's financial statements, but its existence is disclosed in the footnotes (e.g., revenue bond for a non-profit).

Conduit debt financial statement note disclosure should include a general description of transactions, the aggregate amount of conduit debt obligations at the balance sheet date, and a clear indication that the issuer has no obligation for such debt beyond the resources of the related lease or loan. The statement does not preclude issuers from continuing to report the conduit debt obligations as liabilities with related assets on their balance sheets as long as the debt is substantially the same as that previously reported.

For additional information, refer to GASB Interpretation No. 2: Disclosure of Conduit Debt Obligations.

11.03 General Obligation Bonds

These are bonds payable from taxes or other general revenue and secured by the full faith and credit of the county.

11.04 Revenue Bonds

These are bonds payable solely from a particular source of revenue or from other pledged revenues.

11.05 Special Assessment Bonds

These are payable from special assessments levied against the properties benefited.

11.06 Certificates of Participation (COPs)

A COP is a form of long-term asset transfer obligation that is securitized by future lease payments by the county rather than the full faith and credit of the county. The lease payments arise by virtue of a sale-leaseback arrangement, which is an integral part of the financing.

11.07 Bond Premium/Discount

This is the excess/deficiency of the proceeds collected over/under the face value of the bonds issued, exclusive of any accrued interest collected.

11.08 Amount Available in Debt Service Funds

This represents the fund balance recorded in debt service funds available for the payment of principal and interest of long-term debt. Although long-term liabilities are not reported in the financial statements at the fund level, assets set aside for future payment of the debt are reported at fund level.

11.09 Accounting for Debt Proceeds in Governmental Funds

Since governmental funds use the modified accrual basis of accounting, the proceeds of debt issuance are recorded in governmental funds as other financing sources and not as a liability. The face amount is recorded as long-term debt issued, the premium as premium on long-term debt. The debt issuance cost is reported as an expenditure. The bond premium/discount and debt issuance cost are amortized on the government-wide financial statements. Examples of accounting entries are presented in the exhibit at the end of this chapter.

11.10 Accounting for Debt Repayments in Governmental Funds

Since no liability for long-term debt is recorded in governmental funds, repayment of the debt is not recorded as a reduction of the liability. Instead, such payments are recorded as financing uses. Payments due within one month after year-end may be accrued if financial resources, such as deposits or transfers, are provided to a debt service fund. Examples of accounting entries are presented in the exhibit at the end of this chapter.

11.11 Debt Service Funds

Debt service funds may be used to account for the payment of principal and interest expenditures on general long-term obligations, other than bonds payable from special assessments or from obligations of enterprise operations. Debt service funds may also be used to account for payment of general long-term debt consisting of warrants, notes, lease-purchase agreements, installment purchase contracts, and other types of general long-term debt. If such payments are financed directly from unrestricted general governmental revenues, they may be accounted for in the General Fund.

11.12 Number of Debt Service Funds

Only the minimum number of debt service funds consistent with legal and operating requirements should be established. While most indenture agreements require the creation of a separate debt service fund for each bond issue, it is desirable, when possible, to account for general obligation bonds serviced by restricted components of the general property tax in a single debt service fund.

11.13 Budgetary Relationship

Debt service funds require an annual operating budget for estimated revenues, other financing sources, and appropriations. Debt service spending is authorized by the approval of the operating budget and/or governing board approval of bond documents. Such spending is controlled primarily through bond indenture provisions. Accordingly, budgetary accounts are often not formally integrated into the general ledger.

11.14 Debt Service Fund Accounting

The focus of debt service fund accounting is on sources and uses of available spendable resources rather than on costs of services. Such funds are, therefore, accounted for on a current financial resources measurement focus and use the modified accrual basis of accounting.

11.15 Leases

Leases are generally classified as capital leases or operating leases. Leases deemed to represent substantially all of the benefits and risks incident to ownership of the property (capital lease) should be accounted for as the acquisition of an asset and the incurrence of an obligation by the county (lessee). Other leases should be accounted for as operating leases, i.e., the rental of property.

11.16 Capital Lease Criteria

If a particular lease meets any one of the following criteria, it should be accounted for by the lessee as a capital lease:

- The lease transfers ownership of the property to the lessee by the end of the lease term
- The lease contains an option to purchase the leased property at a bargain price
- The lease term is equal to or greater than 75 percent of the estimated economic life of the leased property
- The present value of rental and other minimum lease payment equals or exceeds 90 percent of the fair value of the leased property

The last two criteria are not applicable when the beginning of the lease term falls within the last 25 percent of the total estimated economic life of the leased property.

11.17 Capital Lease Accounting

The amount to be recorded by the lessee as an asset and an obligation (or for governmental funds as a financing source) under a capital lease is the lower of the present value of the rental and other minimum lease payments or the fair value of the leased property. Periodic lease expenditures are treated as payments of the lease obligation and as interest expense (principal and interest), so that a constant periodic rate of interest is recorded on the remaining balance of the obligation.

11.18 Operating Lease Accounting

If none of the criteria for capital leases is met, the lease is classified as an operating lease. Neither an asset nor an obligation is recorded for operating leases. Rental payments are recognized as expenditures on the books of the fund from which the payment is made.

11.19 Authoritative Guidance

Authoritative guidance for lease accounting and reporting is found in Financial Accounting Standards Board (FASB) Statement No. 13: Accounting for Leases, as amended and interpreted.

11.20 Refundings of Debt

The accounting treatment described in GASB Statement No. 7, Advance Refundings Resulting in Defeasance of Debt, should be followed when debt refunding resulting in defeasance of debt is encountered in governmental funds.

A transaction that results in outstanding debt being removed from the balance sheet (i.e., extinguished) for financial reporting purposes is known as defeasance.

Advance refundings of governmental fund debt reported in the debt accounting records are accounted for as follows:

- For advance refundings resulting in defeasance of debt, accounted for in a governmental fund, the proceeds of the new debt should be reported as an “other financing source - proceeds of refunding bonds” in the funds receiving the proceeds. Payments to the escrow agent made from other resources of the entity should be reported as debt service expenditures.
- The debt accounting records should be adjusted for the increase/decrease in the amount of long-term debt.
- Appropriate allocations should be made when one large refunding issue is used to refund debt of various fund classifications.

All governmental entities that defease debt through an advance refunding should provide a general description of the transaction in the notes to the financial statements. Disclosures should include the difference between the cash flows required to service the old debt and the cash flows required to service the new debt and the economic gain or loss that arises as a result of the debt refunding.

The computations and disclosure requirements for advance refunding and defeasance of debt are extensive. While GASB Statement No. 7: Advance Refundings Resulting in Defeasance of Debt, describes the treatment of refunded debt in governmental funds, GASB Statement No. 23: Accounting and Financial Reporting for Refundings of Debt Reported by Proprietary Activities, deals with debt refunding in proprietary funds. If a refunding of proprietary fund debt is encountered, refer to GASB Statement No. 23: Accounting and Financial Reporting for Refundings of Debt Reported by Proprietary Activities.

Exhibits

E11.01 Debt Accounting

- a) On January 15, 2000, the voters authorized an addition to the civic auditorium and the issuance of bonds aggregating \$2,000,000. No formal accounting entry is necessary.

No formal accounting entry is necessary

- b) In October 2000, bonds with a face value of \$2,000,000 are sold, at 10% annual interest, for \$2,050,000, with issuance cost of \$22,500 and interest payable semi-annually on April 1 and October 1. The bond payments are to be paid from property tax levies:

Account	Debit	Credit
<i>Governmental Fund</i>		
Cash	2,027,500	
Debt issuance expenditures	22,500	
Long-term debt issued		2,000,000
Premium on bonds issued		50,000

NOTE: Although no debt is recorded in the governmental fund, the debt is reported in the government-wide financial statements.

- c) On December 15, the first installment of 2000-2001 secured taxes is apportioned:

Account	Debit	Credit
<i>Debt Service Fund</i>		
Cash	125,000	
Revenues		125,000

- d) Since cash on hand is insufficient to meet April 1 obligations, \$75,000 is temporarily borrowed from the General Fund on March 15, 2001:

Account	Debit	Credit
<i>Debt Service Fund</i>		
Cash	75,000	
Due to General Fund		75,000

Account	Debit	Credit
<i>General Fund</i>		
Due From debt service fund	75,000	
Cash		75,000

- e) On April 1, the first semi-annual interest installment of \$100,000 and 5% of the bond's principal payment of \$100,000 are due:

Account	Debit	Credit
<i>Debt Service Fund</i>		
Expenditures - Interest	100,000	
Expenditures - bond principal	100,000	
Matured interest payable		100,000
Matured bonds payable		100,000

NOTE: The related reduction in the balance of the long-term debt is reported in the government-wide financial statements only

- f) On April 15, the second installment of 2000-2001 secured taxes is apportioned and the temporary loan from the General Fund is repaid:

Account	Debit	Credit
<i>Debt Service Fund</i>		
Cash	130,000	
Revenues		130,000
Due to General Fund	75,000	
Cash		75,000

Account	Debit	Credit
<i>General Fund</i>		
Cash	75,000	
Due from debt service fund		75,000

- g) On June 30, the books of the Debt Service Fund are closed:

Account	Debit	Credit
<i>Debt Service Fund</i>		
Revenues	255,000	
Expenditures		200,000
Fund balance - available		55,000

E11.02 Capital Lease Accounting

On July 1, 2000, the county general fund department entered into a 10-year non-cancelable agreement to lease a machine from Dunning Corporation. The agreement requires equal annual payments of \$70,000 by December 31. The fair value of the machine is \$500,000 and has an estimated economic life of 16 years. The county's incremental borrowing rate is 8%.

Solution:

Capital Lease Criteria:		Response
A	Does the lease transfer ownership to the lessee by the end of the lease term?	No
B	Does the lease contain an option to purchase the leased property at a bargain price?	No
C	Is the lease term equal to or greater than 75% of the estimated economic life of the lease property (75% x 16 years = 12 years)?	No
D	Does the present value of rental and other minimum lease payments equal or exceed 90% of the fair value of the leased property?	Yes
Present value of an annuity of 10 payments of \$70,000 at 8% (\$ 70,000 x 6.71008)		<u>\$ 469,706</u>
90% of the fair value of the leased property (500,000 x .9)		<u>\$ 450,000</u>

The lease qualifies as a capital lease under criterion "D".

a) To record the leased property at the inception of the lease and the related obligation:

Account	Debit	Credit
<i>General Fund</i>		
Expenditure - capital outlay	469,706	
Other financing sources - capital leases		469,706

NOTE: The asset account "Equipment" and the liability account "Capital Lease Obligation" are reported only in the government-wide financial statements, not at the fund level.

b) To record the annual cash payment on June 30, 2001:

Account	Debit	Credit
<i>General Fund</i>		
Retirement of long-term debt	32,424	
Interest expenditure (\$469,706 x 8%)	37,576	
Cash		70,000

NOTE: The reduction in the debt balance is reported in the government-wide financial statements.

c) To record the annual cash payment on June 30, 2002:

Account	Debit	Credit
<i>General Fund</i>		
Retirement of long-term debt	35,018	
Interest expenditure (\$469,706 - 32,424 x 8%)	34,982	
Cash		70,000

NOTE: The reduction in the debt balance is reported in the government-wide financial statements.

CHAPTER 12

SPECIAL ASSESSMENTS

12.01 Nature and Purpose

Governmental Accounting Standards Board (GASB) Statement No. 6: Disclosure of Pension Information by Public Employee Retirement Systems and State and Local Governmental Employers, establishes accounting and financial reporting standards for capital improvements and services financed by special assessments.

The special assessment fund type, as adopted by GASB Statement No. 1: Authoritative Status of NCGA Pronouncements and AICPA Industry Audit Guide, should not be used in the financial statements, nor in accounting for the construction of public improvements or the provision of services financed by special assessments.

Special assessment improvements are paid for completely or in part by property owners in a limited geographical area deemed to be specifically benefited. This distinguishes them from improvements that benefit the entire community and are paid for with general governmental resources or through the issuance of general obligation bonds retired from general governmental resources.

For special assessments relating to the construction of public improvements, property owners are generally given the option of paying their special assessments in a lump sum or in interest-bearing annual installments over several years. Special assessment bonds are commonly issued to finance initial construction costs. Such bonds are usually serial bonds. As annual special assessment installments are collected, bonds in corresponding amounts are retired. Interest revenues on installment receivables are used to pay interest costs on special assessment bonds.

12.02 Types of Funds

Transactions of a special assessment should be reported in the fund type that best reflects the nature of the transaction, usually the General Fund, a special revenue fund, a capital projects fund, a debt service fund, or an enterprise fund, giving consideration to the number of funds principle.

Service-type special assessment projects are for operating activities and do not result in the purchase or construction of capital assets.

Fund types used:

- General Fund
- Special Revenue Fund
- Enterprise Fund

Capital improvement assessment projects are capital in nature and usually enhance the utility, accessibility, or aesthetic value of the affected properties.

Fund types used:

- Capital Projects Fund
- Debt Service Fund
- Enterprise Fund
- Agency Fund

12.03 Accounting

Accounting for special assessments can be grouped into service-type and capital improvement-type special assessments. Service-type special assessment projects are for operating activities and do not result in the purchase or construction of capital assets. Examples of such projects include street lighting, street cleaning, and snow plowing. Capital improvement special assessment projects provide improvements or additions to a government's capital assets. Typical special assessment capital improvement projects are streets, sidewalks, parking facilities, and curbs and gutters.

A. Service-Type Accounting

The transactions of a service-type special assessment should be reported in the fund type that best reflects the nature of the transactions and should be treated like user fees. This usually involves the use of the general fund, a special revenue fund, or an enterprise fund. In regard to basis of accounting, assessment revenues and expenditures should be recognized on the same basis of accounting as is normally used for that fund type.

B. Capital Improvement Accounting

If the government is obligated in some manner to assume the payment of related debt service in the event of default by the property owners, transactions related to capital improvements financed by special assessments should be reported in the same manner, and on the same basis of accounting, as any other improvement and financing transaction. This generally involves the following:

- 1) Transactions of the construction phase of the project should be accounted for in a capital projects fund or other appropriate fund.
- 2) The capital assets constructed or acquired, other than those related to an enterprise fund, should be accounted for in the Capital Assets Accounting System.
- 3) Transactions of the debt service phase should be accounted for in a debt service fund if one is required. At the time of the levy, special assessment receivables should be recognized and should be offset by deferred revenues; deferred revenues should be reduced as the assessments become measurable and available. As a practical matter, interest earned on special assessment levies may be accrued when due, rather than when earned, because it approximately offsets the related interest expenditure, which is also recognized when due.
- 4) Debt issued to finance capital projects should be accounted for as follows:
 - a. General obligation debt that will be repaid, in part, from special assessments should be reported like any other general obligation debt.
 - b. Special assessment debt for which the government is obligated in some manner should be accounted for in the debt accounting records, except for the portion, if any, that is a direct obligation of an enterprise fund or that is a current liability expected to be repaid from operating revenues of a fund.

- Special assessment debt that will be repaid from property owner assessments should be accounted for in the debt accounting records as Special Assessment Debt.
- Special assessment debt that will be repaid from general resources of the government should be accounted for in the debt accounting records as Other General Obligation Debt.

Even though the government is not obligated to assume the payment of related debt service in the event of default by the property owners, debt service transactions should be reported in the appropriate fund rather than in a debt service fund. This reflects the resources used to acquire the improvements.

Generally, the previously stated provisions should be followed even when the capital improvements financed by special assessments provide capital assets to a governmental or enterprise fund; the cost of the improvements should be capitalized on the balance sheet and should be offset by Invested in Capital Assets. In addition, special assessments debt that (a) is a direct obligation of the enterprise fund or (b) is not a direct obligation but is expected to be repaid from enterprise fund revenues should be reported as a liability on the enterprise fund's balance sheet.

12.04 Government Liability

The extent of a government's liability for debt related to a special assessment capital improvement can vary significantly. For example: the government may be primarily liable for the debt, as in the case of a general obligation issue; it may have no liability whatsoever for special assessment debt; or it may be obligated in some manner to provide a secondary source of funds for repayment of special assessment debt in the event of default by the assessed property owners. A government is obligated in some manner for special assessment debt if (a) it is legally obligated to assume all or part of the debt in the event of default or (b) it may take certain actions to assume secondary liability for all or part of the debt — and it takes, or has given indications that it will take, those actions.

Conditions that indicate that a government is obligated in some manner include:

- a. The government is obligated to honor deficiencies to the extent that lien foreclosure proceeds are insufficient
- b. The government is required to establish a restricted fund balance account, guarantee, or debt service fund with other resources
- c. The government is required to cover delinquencies with other resources until foreclosure proceeds are received
- d. The government must purchase all properties (sold for delinquent assessments) that were not sold at public auction
- e. The government is authorized to establish a restricted fund balance account, guarantee, or debt service fund, and it establishes a fund or account. (If a fund or account is not established, the considerations in subparagraphs g and h may nevertheless provide evidence that the government is obligated in some manner)
- f. The government may establish a separate fund with other resources for the purpose of purchasing or redeeming special assessment debt, (If a fund is not established, the considerations in subparagraphs g and h may nevertheless provide evidence that the government is obligated in some manner)
- g. The government explicitly indicates by contract, such as the bond agreement or offering statement, that in the event of default it may cover delinquencies, although it has no legal obligation to do so
- h. Legal decisions within the state or previous actions by the government related to defaults on other special assessment projects make it probable that the government will assume responsibility for the debt in the event of default

CHAPTER 13

PROPRIETARY FUNDS

Proprietary Funds

13.01 Characteristics

Proprietary Funds focus on the determination of operating income, changes in net assets (or cost recovery), financial position, and cash flows. The proprietary fund category includes enterprise and internal service funds.

Internal Service Funds (ISF)

13.02 Nature and Purpose

Internal service funds may be used to report any activity that provides goods or services to other funds, departments, or agencies of the primary government and its component units, or to other governments, on a cost-reimbursement basis. Internal service funds should be used only if the reporting government is the predominant participant in the activity. Otherwise, the activity should be reported as an enterprise fund.

13.03 Examples of Internal Service Funds

Examples of central services appropriate for ISF accounting are:

- Equipment, vehicle, and office machine maintenance and rental
- Stores
- Information technology
- Mailing services
- Printing and duplicating
- Communications
- Purchasing
- Carpentry and repair shops
- Risk management

Enterprise Funds

13.04 Nature and Purpose

Enterprise funds may be used to report any activity for which a fee is charged to external users for goods and services. Activities are required to be reported as enterprise funds if any one of the following criteria is met. Governments should apply each of these criteria in the context of the activity's principal revenue sources.

The activity is financed with debt that is secured solely by a pledge of the net revenues from fees and charges of the activity. Debt that is secured by a pledge of net revenues from fees and charges and the full faith and credit of a related primary government or component unit—even if that government is not expected to make any payments—is not payable solely from fees and charges of the activity. (Some debt may be secured, in part, by a portion of its own proceeds but should be considered as payable “solely” from the revenues of the activity.)

Laws or regulations require that the activity's costs of providing services, including capital costs (such as depreciation or debt service), be recovered with fees and charges, rather than with taxes or similar revenues.

The pricing policies of the activity establish fees and charges designed to recover its costs, including capital costs (such as depreciation or debt service.)

13.05 Examples of Enterprise Funds

For purposes of uniformity, enterprise funds include:

Examples of Enterprise Funds	
1	Airports
2	Harbors
3	Recreational facilities and services such as: <ol style="list-style-type: none"> Marinas Golf courses Stadiums Tennis centers Parks Swimming pools
4	Parking facilities
5	Transit systems
6	Public housing
7	Toll bridges
8	Health services and facilities such as: <ol style="list-style-type: none"> Hospitals Medical facilities
9	Public utilities such as: <ol style="list-style-type: none"> Water Electricity Gas Waste collection and disposal Cable TV

Proprietary Fund Accounting

13.06 Accounting Objectives

Accounting for proprietary funds:

- Accumulates the total cost (including depreciation and overhead) of providing the service;
- Permits integration of as much of a cost system as necessary to develop unit costs;
- Accumulates the charges to others; and
- Indicates the extent to which the user charges cover the cost.
- For enterprise funds, authorized subsidies indicate the amount which must be financed from taxes or other sources. Where a significant profit or loss will occur, mid-year rate adjustments should be made.

ISF charges should not produce any significant profit or loss in the long run. They should recover only the total costs of such services but should not result in any appreciable loss or require subsidies to avoid such losses.

Similarly, where the operations of an enterprise fund will produce significant fund net assets, rates should be adjusted periodically. There may be occasions where there are significant negative fund net assets which are expected to extend beyond the next fiscal year. In such circumstances, the negative position should be eliminated by increasing the rate and/or making transfers from the appropriate fund(s). These actions may extend beyond one year if a plan acceptable to the county auditor is established and followed.

This does not preclude the county from contributing start-up operating capital, funding for additional capital assets, or amounts to cover increased costs of capital asset replacement. Also, the county may adopt a policy that view any increased costs associated with capital asset replacement as part of the total costs of operations. Consequently, ISF charges may be established at a level that includes an amount designed to contribute to replacement on a pay as you go basis. Equity generated by this charge must be reserved.

13.07 Number of Funds

Individual proprietary funds are used to account for individual services. Such segregation is required to:

- Determine the total cost of providing a service, and
- Ensure that the resources generated by one service are not improperly or illegally utilized by another.

The single exception is where closely related services are merged into one enterprise fund because their respective revenues have been cross-pledged as security for a single issue of combined-purpose revenue bonds.

13.08 Budget and Budgetary Control

Sound financial administration requires the preparation and adoption of a comprehensive annual operating budget for the entire county government. This includes each of its proprietary funds. Budgets are necessary to ensure that:

- Service objectives are attained,
- Expenses are properly controlled, and
- Adequate resources will be available to finance current operations, repay long-term liabilities, and meet capital outlay requirements.

A proprietary fund budget is presented as a pro forma income statement and an accompanying schedule of expected capital asset purchases and position allocations and salaries. These statements and schedules, when approved, constitute the operating plan for their respective funds. Amounts are not brought forward to the budget summary.

For most proprietary fund operations, the demand determines the level of revenues and expenses. Increased demand for goods or services increases expenses but also results in a higher level of revenues. Similarly, decreased demand results in decreased expenses and revenues.

A proprietary fund should be allowed to operate in response to demand for its service. The governing body should establish procedures providing for adjustments to meet the demand.

The adopted expense estimates are not appropriations. They need not be established as budgetary accounts in the proprietary fund accounting system. The use of budgetary accounts in proprietary funds is

optional. Where a more formal or detailed control is desired, an integration similar to that for governmental funds is appropriate.

Similarly, proprietary fund financial reports do not require budgetary comparisons. Such comparisons may be shown as supplementary data if desired.

13.09 Basis of Accounting

Proprietary funds use the accrual basis of accounting in essentially the same manner as in commercial accounting. Recognition occurs at the time of the transaction: revenues when earned and expenses when incurred.

13.10 Accounts

Revenue and expense classifications of proprietary funds should parallel those of commercial enterprises providing similar services. This also applies to other accounts. Such a treatment enhances the comparability of financial statements and their usefulness for analysis purposes.

The State Controller has published Uniform Accounting Systems for Special Districts, which specifies appropriate accounting for particular enterprise operations. It should be followed for the activities included.

Proprietary fund capital assets and leasehold improvements are recorded in the fund accounts because they are used in the production of the goods or services provided to users. Moreover, the capital assets may serve as security for debt issued to establish, acquire, or improve the proprietary fund.

Depreciation, depletion, or amortization of these assets must be recorded to determine total expenses, net income, and changes in fund net assets.

Long-term liabilities (such as bonds, notes, capital leases, pensions, judgements, and similar commitments) directly related to and expected to be paid from proprietary funds should be included in the fund. These are specific fund liabilities. Also, such liabilities may constitute a mortgage or lien on the specific fund asset or income.

13.11 Establishing Charges

The board should set rates for goods and services so as to recover total costs for an internal service fund or the predetermined level of cost in the case of an enterprise fund. As previously noted, total costs include depreciation and full overhead, and may include an amount designed to contribute to the replacement of capital assets.

Establishment of rates and billings for services must be cost-based. An approved method of cost accounting and/or cost allocation is recommended. These methods assign the individual costs to the particular unit of service provided.

Frequently, expenses such as direct labor and supplies can be charged directly to the cost unit or activity. Others, such as office expense, utilities, building depreciation, and insurance, must be applied through an overhead rate.

13.12 Income/Loss

An internal service fund's activities may result in income or loss for the fiscal year. If the mid-year results indicate that there will be either a substantial income or loss for the year, rates should be adjusted at that

time; otherwise, they should be adjusted at year-end. The determination of the income or loss must take into consideration any required reserves. Adjustments to the ISF must also account for the balances in Unrestricted Net Assets.

Enterprise funds may be subsidized from general governmental sources. Generally this takes the form of a contribution at a stipulated maximum, to offset the deficit. Such support should be recorded in the budget as an interfund transfer. Actual payment is recorded as a transfer-in.

As with internal service funds, enterprise funds should adjust their rates at mid-year if a significant operating deficit is indicated.

13.13 Transfers

- a. The General Fund may provide support to an enterprise fund to cover operating deficiencies.

Example:

Service charges in the enterprise fund have been set to recover an estimated 80% of the cost, the balance to be underwritten by the General Fund. The budget of the latter fund contains \$60,000 under Interfund Transfers for this purpose. The budgeted support is now transferred to the enterprise fund:

Account	Debit	Credit
<i>General Fund</i>		
Transfers-Out	60,000	
Cash		60,000

Account	Debit	Credit
<i>Enterprise Fund</i>		
Cash	60,000	
Transfers-In		60,000

- b. The board may authorize the General Fund to make capital contributions to the proprietary funds or transfer excess funds from the proprietary funds. The board may also abolish a proprietary fund.

Example:

At the end of the year, after closing, the enterprise fund net assets account has a balance of \$125,000. The supervisors order the total capital reduced to \$110,000, along with a 5% decrease in rates:

Account	Debit	Credit
<i>General Fund</i>		
Cash	15,000	
Transfers-In		15,000

Account	Debit	Credit
<i>Enterprise Fund</i>		
Transfers-Out	15,000	
Cash		15,000

- c. The board may transfer to a proprietary fund any cash or other assets that can legally be transferred. This includes cash from the General Fund and capital assets that were not initially acquired with restricted moneys. Any general capital assets to be used in the enterprise fund are transferred from the Capital Asset Accounting System to the enterprise fund.

Example:

Enterprise Fund			
Land	\$ 100,000		
Buildings and improvements	350,000		
Equipment	20,000		
Accumulated depreciation - S & I		\$ 110,000	
Accumulated depreciation -equipment			\$ 8,500
Net assets Invested in capital assets			351,500

NOTE: A corresponding offsetting entry needs to be made to the Capital Asset Accounting System. As an alternative, the asset may be transferred at its net book value and depreciated over its remaining useful life.

Example:

The budget contains a provision for a contribution of \$100,000 from the General Fund to an enterprise fund - interfund transfers. The \$100,000 is transferred to the enterprise fund.

Account	Debit	Credit
<i>General Fund</i>		
Transfers-Out	100,000	
Cash		100,000

Account	Debit	Credit
<i>Enterprise Fund</i>		
Cash	100,000	
Transfers-In		100,000

If capital assets originally purchased from restricted funds are to be used in the enterprise, these items must be purchased by the enterprise fund or the donating fund.

13.14 Restricted Assets

Legally restricted enterprise fund cash, investments, and interest receivable balances are recorded in separate "restricted assets" accounts. Physical segregation is not required unless commingling is legally prohibited.

Examples are:

- Customer deposits
- Revenue bond restricted assets:
 - Construction account
 - Operations and maintenance
 - Current debt service account
 - Future debt service account
 - Renewal and replacement account

Revenue bond indentures usually refer to these accounts as “funds.” However, they are not funds in the sense of accounting entities. They are merely mandatory segregations. Whenever possible they should be referred to as accounts rather than funds.

Revenue bond proceeds earmarked for capital asset construction must be accounted for in a Revenue Bond Construction Account. Disbursements for authorized purposes are made from this account.

A Revenue Bond Operations and Maintenance Account often is established pursuant to a bond indenture. Resources for this account are provided through bond proceeds and/or operating income or net income. This account generally accumulates assets equal to operating costs for one month.

Moneys are accumulated in a Revenue Bond Current Debt Service Account (usually from certain bond proceeds and/or net operating revenues). Current debt service payments are made from this account. The current liabilities for revenue bond principal and interest are reported as: liabilities payable from restricted assets.

Funds are accumulated in the Revenue Bond Future Debt Service Reserve Account to pay matured bond principal and interest in the event of a deficiency. The amount is usually related to the annual debt service requirement and will not be utilized until the final payment.

Funds are also accumulated in a Revenue Bond Renewal and Replacement Account for emergency operating expenditures or renewals or replacement of assets.

Amounts that should be accumulated in Revenue Bond Operations and Maintenance, Revenue Bond Current Debt Service, Revenue Bond Future Debt Service Reserve, and Revenue Bond Renewal and Replacement accounts should be offset as a reservation of retained earnings. Details of shortages should be disclosed in notes to the financial statements.

13.15 Accounting and Reporting for Special Assessments

The accounting treatment described in GASB Statement No. 6, Disclosure of Pension Information by Public Employee Retirement Systems and State and Local Governmental Employers, should be followed when the capital improvements financed by special assessments provide capital assets to a government's enterprise fund, except that the cost of the improvements should be capitalized. In addition, only that portion, if any, of special assessment debt that (a) is a direct obligation of the enterprise fund or (b) is not a direct obligation but is expected to be repaid from enterprise fund revenues should be recorded as a liability on the enterprise fund's books.

However, a governmental entity is not precluded from recording all of the transactions and balances of a special assessment project within an enterprise fund to properly reflect the actual administration of a project. For example, an enterprise fund may bill and collect assessments, may be required to subsidize

debt service payments from enterprise fund resources, and may have unrestricted use of project surpluses. In that situation, the entire amount assessed to property owners should be recorded as the enterprise fund's assessments receivable at the time of the levy; special assessment debt, if any, should be recorded as a liability of the enterprise fund; and so forth. Collections of assessment principal reduce the receivable, and debt service payments reduce the liability. Interest income and expense should be recognized as they accrue.

13.16 Internal Service Fund - Illustrative Case

The following example illustrates the operation of an internal service fund.

Example:

- a. Prior to the 20X1-x2 fiscal year, the county decided to centralize the ownership and maintenance of all motor vehicles in an internal service fund. Funds were accumulated in the Designated for Establishment of a Motor Pool Fund account. By June 30, 20X5, this account amounted to \$315,000. Road equipment to be purchased is now recorded in the Capital Asset Accounting System at \$450,000.

An appraisal of each item in terms of age, condition, and estimated remaining life has established a current total book value of \$300,000. All other motor vehicles had been originally purchased by the General Fund. Their recorded value is \$60,000; current book value is \$30,000.

As of July 1, 20X5, the county transfers the accumulated \$315,000 and the vehicles originally purchased by the General Fund to the Motor Pool Fund. Office, storage, and repair facilities are rented from the Road Fund at \$400 per month:

Account	Debit	Credit
<i>General Fund</i>		
Transfers-Out	315,000	
Fund Balance Designated for Establishment of a Motor Pool Fund	315,000	
Cash		315,000
Fund Balance Available		315,000
<i>Motor Pool Fund</i>		
Cash	315,000	
Equipment	60,000	
Accumulated Depreciation		30,000
Transfers-In		345,000
<i>(As an alternative, equipment may be recorded at book value of \$30,000)</i>		

At the same time the Motor Pool Fund purchases the vehicles of the Road Fund:

Account	Debit	Credit
<i>Motor Pool Fund</i>		
Equipment	450,000	
Accumulated Depreciation		150,000
Cash		300,000
Unrestricted Net Assets	300,000	
Investment in Capital Assets, Net of Related Debt		300,000
<i>(As an alternative, equipment may be recorded at book value, \$300,000)</i>		
NOTE: This entry may be made for each sale or purchase of a capital asset or at year-end.		

Account	Debit	Credit
<i>Road Fund</i>		
Cash	300,000	
Sale of Capital Assets		300,000
Unrestricted Net Assets	300,000	
Investment in Capital Assets, Net of Related Debt		300,000
NOTE: This entry may be made for each sale or purchase of a capital asset or at year-end.		

- b. The General Fund makes a capital contribution of \$10,000 and an advance of \$25,000 to the Motor Pool Fund to finance initial operations:

Account	Debit	Credit
<i>Motor Pool Fund</i>		
Cash	35,000	
Transfers-In		10,000
Advance from Other Funds - General Fund		25,000
<i>General Fund</i>		
Transfers-Out	10,000	
Advance to Other Funds - Motor Pool Fund	25,000	
Cash		35,000

- c. For July, total billings to departments for equipment rental were \$11,000 (\$9,500 to the Road Fund and \$1,500 to the General Fund):

Account	Sub	Debit	Credit
<i>Motor Pool Fund</i>			
Accounts Receivable		11,000	
Income - Equipment Rental			11,000
Road Fund	9,500		
General Fund	1,500		

- d. On August 5 cash in the amount of the July billings was transferred to the Motor Pool Fund:

Account	Sub	Debit	Credit
<i>Motor Pool Fund</i>			
Cash		11,000	
Accounts Receivable			11,000
Road Fund	9,500		
General Fund	1,500		
<i>Road Fund</i>			
Expenditures		9,500	
Cash			9,500
Road Department - Rents and Leases - Equipment	9,500		
<i>General Fund</i>			
Expenditures		1,500	
Cash			1,500
Various Budget Units - Rents and Leases - Equipment	1,500		

- e. On September 1, a grader and two four-door sedans were traded in on similar new items of equipment. Details of these transactions are presented in tabular form:

	Purchase Price New Assets	Original Cost	Accumulated Depreciation	Trade-In Allowance
Grader	\$ 6,000	\$ 5,000	\$ 4,500	\$ 1,500
Sedan, 4-dr	1,500	1,400	1,000	350
Sedan, 4-dr	1,550	1,400	1,000	300
Total	\$ 9,050	\$ 7,800	\$ 6,500	\$ 2,150

Account	Debit	Credit
<i>Motor Pool Fund</i>		
<i>(Summary entry)</i>		
Equipment	8,200	
Accumulated Depreciation	6,500	
Net Assets Unrestricted	7,750	
Net Assets Invested in Capital Assets		7,750
Equipment		7,800
Cash		6,900

NOTE: It was determined that, during the first year of operation, equipment purchases would be limited to those that could be financed from the general cash account in order to allow the Cash for Equipment Replacement account to build up a balance. Beginning with the next year, replacement would be paid from the latter cash account. If the restricted cash account were used, the entry would be:

Account	Debit	Credit
<i>Motor Pool Fund</i>		
Equipment	8,200	
Accumulated Depreciation	1,500	
Net Assets Reserved for Vehicle Replacement	6,500	
Equipment		7,800
Cash		400
Cash Restricted for Vehicle Replacement		6,500
Net Assets - Unrestricted		6,500
<i>(This assumes that the restricted cash account is maintained at a level equal to accumulated depreciation)</i>		

- f. On October 1, short-term investments were purchased for \$27,000:

Account	Debit	Credit
<i>Motor Pool Fund</i>		
Investments	27,000	
Cash		27,000

- g. For the remainder of the year ended June 30, 20X6, additional outlays of the Motor Pool Fund were \$136,250:

Account	Debit	Credit
<i>Motor Pool Fund</i>		
<i>(Summary entry)</i>		
Superintendent's Salary	7,500	
Mechanics' Salaries	20,000	
Office Salaries	7,000	
Clerical Services	800	
Depreciation - Equipment	50,000	
Rent - Structures	4,800	
Repairs and Maintenance	14,000	
Insurance	2,500	
Employees' Retirement	2,800	
Supplies Used	23,650	
Inventory of Supplies (Increase)	3,200	
Net Assets Invested in Capital Assets	50,000	
Net Assets Unrestricted		50,000
Cash		76,500
Accumulated Depreciation		50,000
Accounts Payable (increase)		9,750

- h. Total billings for the period of August 1, 20X5, to June 30, 20X6, were \$124,600. At June 30, 20X6 all billings have been paid, with the exception of one to the City of Oak Park for \$1,500:

Account	Debit	Credit
<i>Motor Pool Fund</i>		
(Summary entry)		
Cash	123,100	
Accounts Receivable	1,500	
Income - Equipment Rental		124,600

- i. Interest earned on investments amounted to \$2,000 for the fiscal period:

Account	Debit	Credit
<i>Motor Pool Fund</i>		
Cash	2,000	
Interest Revenue		2,000

- j. At year-end, income and expense accounts are closed to Net Assets – Unrestricted:

Account	Debit	Credit
<i>Motor Pool Fund</i>		
Income - Equipment Rental	135,600	
Income - Interest	2,000	
Expenses (summary)		133,050
Net Assets - Unrestricted		4,550

13.17 Equipment Replacement Reserve (Designation)

The Government Code authorizes the establishment of an Equipment Replacement Reserve (Designation) based upon estimated replacement cost. The methodology used to determine the replacement cost, or inflationary factor, may vary depending on the class of equipment, availability of information (indices), or other market factors.

- A. The illustrative case below assumes the availability of accurate replacement cost information and a capital asset system that is capable of depreciating by class, using the straight-line method and historical cost.
1. The Motor Pool Internal Service Fund wishes to establish an Equipment Replacement Reserve (Designation) based on replacement cost beginning with fiscal year 20X5/x6. The straight-line depreciation based on historical cost for the year is \$50,000, while replacement cost for the same vehicles equals \$62,000. The equipment rental rates used to bill the various departments would be based on the \$62,000; the actual depreciation expense would be \$50,000, in accordance with Generally Accepted Accounting Principles (GAAP).
 2. The total revenue raised by the rental rates based on replacement cost for FY 20X5/X6 would be \$147,600.

A new entry to establish the Equipment Replacement Reserve (Designation) based on replacement cost would be required to comply with the Government Code.

Account	Debit	Credit
<i>Motor Pool Fund</i>		
Net assets - Unrestricted	12,000	
Net Assets Designated for Equipment Replacement		12,000

- B. The case assumed required accurate replacement information and a sophisticated capital asset system. This capability will not exist in all counties; as a result, other methods of estimating replacement cost may be used. The case offered below assumes the availability of an industry-wide inflationary index for vehicles:
1. Once again, the Motor Pool Internal Service Fund wishes to establish an Equipment Replacement Reserve. On July 1, 20X5, the index that the fund uses to determine inflationary trends shows that, during the preceding year, the cost of new vehicles increased 3%. This increase will be applied to the historical cost of the fleet of vehicles on hand (\$510,000 x 3%) to determine the additional revenue (\$15,300) that needs to be raised to establish the Equipment Replacement Reserve (Designation). Rental rates for the coming year would be adjusted to achieve the total income requirement of \$150,900.
 2. The remainder of the entries will be essentially the same as those contained in the prior example, except that the net effect of each will be higher by \$3,300 due to the increase in revenue over that achieved by the other method.
- C. The entries regarding the purchase of equipment during the following fiscal year would be as follows, assuming the existence of an Equipment Replacement Reserve:

Account	Debit	Credit
Equipment	8,200	
Accumulated Depreciation	6,500	
Net Assets Designated for Equipment Replacement	1,250	
Net Assets - Unrestricted	7,750	
Net Assets Invested in Capital Assets		7,750
Equipment		7,800
Cash		400
Cash Restricted for Vehicle Replacement		6,500
Net assets - Unrestricted		1,250

NOTE: The cases used to illustrate the uses of an Equipment Replacement Reserve (Designation) reflect the accounting and reporting of designations and not reserves.

13.18 Accounting and Financial Reporting For Proprietary Activities

GASB Statement No. 20: Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting, provides interim guidance on business-type accounting and reporting for proprietary activities, pending the expected issuance of one or more future pronouncements on the subject.

Proprietary activities should apply all applicable GASB pronouncements as well as the following pronouncements issued on or before November 30, 1989, except for those that conflict with or contradict GASB pronouncements: FASB Statements and Interpretations, Accounting Principles Board (APB) Opinions, and Accounting Research Bulletins (ARB).

In addition to applying the FASB Statements and Interpretations, APB Opinions, and ARBs required above, a proprietary activity may also apply all FASB Statements and Interpretations issued after November 30, 1989, except for those that conflict with or contradict GASB pronouncements.

The requirements of GASB Statement No. 20: Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting, also apply to all county proprietary nonexpendable trust funds and pension trust funds.

13.19 Refundings of Proprietary Debt

The accounting treatment described in GASB Statement No. 23: Accounting and Financial Reporting for Refundings of Debt Reported by Proprietary Activities, should be followed when debt refunding resulting in defeasance of debt is encountered in proprietary funds. For governmental fund debt refunding and general reporting requirements for debt refundings, refer to GASB Statement No. 7: Advance Refundings Resulting in Defeasance of Debt, summarized in Chapter 11: Debt, in this manual.

A transaction that results in outstanding debt being removed from the balance sheet (i.e., extinguished) for financial reporting purposes is known as defeasance. For current refundings and advance refundings resulting in the defeasance of debt reported by proprietary activities, the difference between the reacquisition price (amount required to repay previously issued debt in a refunding transaction) and the net carrying amount of the old debt (amount due at maturity, adjusted for any unamortized discount or premium and issuance costs related to the old debt) should be deferred and amortized as a component of interest expense over the remaining life of the old debt or the life of the new debt, whichever is shorter.

For current refundings of prior refundings and for advance refundings of prior refundings resulting in defeasance of proprietary fund debt, the difference between the reacquisition price and the carrying amount should be deferred and amortized over the shorter of the original amortization period remaining from the prior refundings or the life of the latest refunding debt (i.e., the new debt).

All governmental entities that defease debt through an advance refunding should provide a general description of the transaction in the notes to the financial statements and should include the difference between the cash flows required to service the old debt and the cash flows required to service the new debt, and the economic gain or loss that arises as a result of the debt refunding.

The computations and disclosure requirements for advanced refunding and defeasance of debt are extensive. If advanced refunding resulting in defeasance of debt is encountered, refer to GASB Statement No. 7: Advance Refundings Resulting in Defeasance of Debt, and GASB Statement No. 23: Accounting and Financial Reporting for Refundings of Debt Reported by Proprietary Activities, to ensure proper accounting and reporting.

13.20 Use of Not-For-Profit Accounting and Financial Reporting Principles by Proprietary Activities

Proprietary activities using not-for-profit accounting and financial reporting principles prior to July 1, 1995, may continue to do so if the principles are modified to comply with GASB Statement No. 29: The Use of Not-for-Profit Accounting and Financial Reporting Principles by Governmental Entities.

Not-for-profit accounting and financial reporting principles are generally defined as those contained in the American Institute of Certified Public Accountants' Statement of Position (SOP) 78-10, Accounting Principles and Reporting Practices for Certain Nonprofit Organizations, or Industry Audit Guide, Audits of

Voluntary Health and Welfare Organizations (May 1, 1994, version), except for those provisions relating to the joint costs of information materials and activities that include a fund-raising appeal.

Proprietary activities applying paragraph 7 of GASB Statement No. 20: Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting, are prohibited from adopting the provisions of FASB Statements No. 116: Accounting for Contributions Received and Contributions Made, FASB Statement No. 117: Financial Statements of Not-for-Profit Organizations, and FASB Statement No. 124: Accounting for Certain Investments Held by Not-for-Profit Organizations.

Refer to GASB Statement No. 29: The Use of Not-for-Profit Accounting and Financial Reporting Principles by Governmental Entities, for the required modifications to the AICPA publications.

CHAPTER 14

FIDUCIARY FUNDS (Trust and Agency Funds)

14.01 Fiduciary Funds (Trust and Agency Funds)

Fiduciary fund reporting focuses on net assets and changes in net assets. Fiduciary funds should be used to report assets held in a trustee or agency capacity for others and therefore cannot be used to support the government's own programs. The fiduciary fund category includes pension (and other employee benefit) trust funds, investment trust funds, private-purpose trust funds, and agency funds. The three classifications of trust funds should be used to report resources held and administered by the reporting government when it is acting in a fiduciary capacity for individuals, private organizations, or other governments. These funds are distinguished from agency funds generally by the existence of a trust agreement that affects the degree of management involvement and the length of time that the resources are held.

- Pension (and Other Employee Benefit) Trust Funds - used to report resources that are required to be held in trust for the members and beneficiaries of defined benefit pension plans, defined contribution plans, other postemployment benefit plans, or other employee benefit plans.
- Investment Trust Funds - used to report the external portion of investment pools reported by the sponsoring government, as required by GASB Statement No. 31: Accounting and Financial Reporting for Certain Investments and for External Investment Pools, paragraph 18.
- Private-Purpose Trust Funds – used to report all other trust arrangements under which principal and income benefit individuals, private organizations, or other governments (such as a fund used to report escheat property).
- Agency Funds - used to report resources held by the reporting government in a purely custodial capacity (assets equal liabilities). Agency funds typically involve only the receipt, temporary investment, and remittance of fiduciary resources to individuals, private organizations, or other governments.

14.02 Classification of Fiduciary Funds

The following is a description and example of the Fiduciary Fund classification:

Classification	Includes	Examples	
Pension (and other employee benefit) Trust Funds	Funds accounting for locally administered retirement systems.	<ul style="list-style-type: none"> • 1937 Act retirement funds • Defined contribution plans 	
Investment Trust Funds	Amounts managed by the county treasury for the external pool participants.	<ul style="list-style-type: none"> • School districts • Independent special districts • Trial Court 	
Private-Purpose Trust Funds	Amounts held by the county under which the principal and income benefit individuals, private organizations, or other governments.	<ul style="list-style-type: none"> • When legally mandated or under a formal trust agreement 	
Agency Funds	Only net assets held for specific other persons or entities.	<ul style="list-style-type: none"> • Taxes • Interest • Tax-defaulted land rentals • In-lieu monies • Payroll clearing funds • Tax redemption fees • Inheritance taxes 	<ul style="list-style-type: none"> • Fines, forfeits and penalties • Sales and use tax clearing fund • Withholding tax • Credit union deduction • State retirement system

14.03 Number of Funds

Separate funds must be established where legally required. Separate pension (and other employee benefit) trust funds must be used for individual retirement systems. Agency Funds are used for individual agency relationships; however, it is frequently possible to utilize a separate account instead of a separate fund. Many fiduciary funds have only a single asset, cash, offset by one or more liabilities or fund balance accounts totaling the same amount. Debits to cash are offset by credits to the fund liability and vice versa. This condition lends itself to a grouping, under which the several cash accounts are combined into a single cash account, and the share of each fund in the consolidated cash is preserved through separate accounts. This device permits a substantial reduction in the number of funds and accounts without loss of accountability.

14.04 Agency Fund Accounting Entries

All agency fund transactions simply increase or decrease assets and liabilities. If agency fund cash is invested and interest earnings are allocable to parties outside the government, such earnings are credited to appropriate liability accounts due to those parties.

14.05 Taxes

In order to properly account for the levy, collection, and distribution of the various kinds of property taxes, a number of accounts and subsidiary records are used.

14.06 Transfers Involving Trust and Agency Funds

Government Code Sections 27005 and 27009, which require the use of warrants and deposit permits for disbursements and receipts, are regarded as having application only to the county treasury as a whole and not to individual funds within the treasury. It is recommended that transfers between funds be accomplished by journal entry rather than by warrant.

CAPITAL ASSETS

Introduction

15.01 Introduction

Capital asset accounting is required for the following reasons:

- To safeguard a sizeable investment.
- To fix responsibility for the custody of equipment.
- To assist in the formulation of acquisition and retirement policies through accumulation of data regarding prices, sources of supply, and useful life.
- To provide data for financial reporting.
- To provide record support and to account for reimbursement of depreciation under grants and proprietary service programs.
- To provide information for insurance purposes.

This discussion is limited to the accounting for capital assets for governmental funds that are accounted for in the Capital Assets Accounting System, regardless of the fund that may finance their acquisition. Capital assets acquired by proprietary funds are not included in this category. Although it is possible that, under certain conditions, some of the principles outlined herein may be applicable to the accounting for capital assets in proprietary funds, in general such accounting should follow the principles of commercial accounting.

Definitions

15.02 Capital Assets – Definition

Capital Assets - assets of significant value that: have a utility that extends beyond the current year; and are broadly classified as land, buildings and improvements, infrastructure, equipment and intangible assets; and exceed the capitalization policies as set by the county auditor/board.

15.03 Land

Land - including that associated with infrastructure, should be reported as “land” at cost, estimated cost, or estimated fair value at date of acquisition.

15.04 Buildings and Improvements

Buildings and Improvements - physical property of a permanent nature, examples of which are buildings, structural attachments, storage tanks, reservoirs and parking areas. Sidewalks, trees and drives in connection with other structures or parks should also be capitalized.

Structures and improvements with a value that exceeds a minimum value of \$5,000 to \$150,000 as established by the county’s capitalization policy shall be capitalized. A governmental agency may exercise the option to consistently capitalize selected items of lesser value.

Construction costs of streets, roads, bridges, drainage or lighting systems, etc., have generally been excluded from the general fixed assets of governmental entities because they usually are immovable and of value only to the governmental unit. However, it is now recommended that the asset be recorded for record keeping and stewardship purposes, if desired, provided appropriate disclosure is made in the notes of the agency's financial statements and that subsequent ongoing expenditures for streets and roads not be capitalized. Construction of a street or road system includes such appurtenances as traffic signs and signals, street name signs, street lights, bridges, and grade separations. Items not an integral part of the system, such as parking meters and portable traffic signals, are considered equipment and are handled in the manner described in the equipment category.

Fixtures are permanent structural attachments that are not intended to be removed and that function as part of the structure, such as boilers, lighting fixtures, and plumbing.

15.05 Equipment

Equipment - includes moveable personal property of a relatively permanent nature and of significant value, such as furniture, machines, tools, and vehicles.

Relatively permanent - having a useful life of one year or longer.

Significant value - a minimum value of \$100 to \$5,000 as established by the county's capitalization policy.

The cost test may be applied in some instances to aggregates of units of similar type or purpose, such as blocks of folding chairs, and shelving and filing drawers, rather than to the unit itself.

Although a library's investment in books might be regarded as a capital asset, practical considerations dictate that book purchases shall not be capitalized. With the exception of some of the more expensive volumes and sets, individual purchases do not meet the significant value test. Also, formal accounting could add little in the way of control to the card indices and charge-out procedures already in effect. The additional benefit does not justify the heavy expenditure of time and effort.

15.06 Intangible Assets

Intangible assets - includes easements, land use rights (such as the right to use a water source) computer software, patents, and trademarks. Intangible assets may be externally generated (purchased or received from a third party) or internally generated such as computer software. Generally, intangible assets have the following three required characteristics:

- Lack of physical substance
- Nonfinancial in nature
- Useful life extends beyond a reporting period

Intangible assets should be classified as capital assets and follow the existing authoritative guidance related to the accounting and financial reporting for capital assets. One key exclusion relates to intangible assets that are acquired or created primarily for the purpose of directly obtaining income or profit. These intangible assets should be treated as an investment. Intangible assets with a value that exceeds a county's capitalization policy shall be capitalized. A governmental agency may exercise the option to consistently capitalize selected items of lesser value.

Externally acquired intangible assets are reported when purchased or received. Internally generated intangible assets must meet three criteria to begin to be reported as a capital asset:

- Objective: The government's specific objective and service capacity have been determined.
- Feasibility: The potential of completing the asset for its intended use has been demonstrated
- Intention: The government's intention to complete the project has been demonstrated.

15.07 Infrastructure

Infrastructure assets - long-lived assets that normally are stationary in nature and can be preserved for a significantly greater number of years than other capital assets.

Infrastructure assets include roads, bridges, tunnels, drainage systems, water and sewer systems, dams, and lighting systems. Buildings, except those that are an ancillary part of a network of infrastructure assets, should not be considered infrastructure.

Other items not an integral part of the infrastructure, such as parking meters and portable traffic signals, are considered equipment.

15.08 Treatment of Costs Subsequent to Acquisition

Capital asset expenditures that are incurred after their original acquisition are defined and recorded as follows:

Maintenance - expenditures that neither materially add to the value of property nor appreciably prolong its life, but merely keep it in an ordinary efficient operating condition. Maintenance costs shall not be capitalized.

Capitalized expenditures - expenditures that materially add to the value of property or appreciably extend its life. The cost of capitalized expenditures should be added to the book value of the asset where the original cost of a component being improved can be specifically identified. This amount should be written off and the new cost capitalized. Capitalized expenditures are, on occasion, referred to as betterments.

The decision as to whether an expenditure should be capitalized shall be made by an evaluation of engineering, physical, or other relevant factors, apart from cost.

Additions - new and separate units, or extensions of existing units, and are considered capital assets. As with betterments, the test of significance should be applied. Additions and improvements to infrastructure assets should be capitalized.

Alterations - changes in the physical structure or arrangement of capital assets, the cost of which does not qualify as an increase in capital assets under the foregoing definitions of betterments and additions. Alterations shall not be capitalized.

15.09 Unit of Accountability

It is essential to the application of capitalization policy that the unit of accountability be established. A capital asset may be a small, integrated item, such as a desk or adding machine, or it may be a complex aggregation of components, such as a building or a block of similar items. The classification of an expenditure between capital outlay and operating expense often is determined by its relationship to some existing unit.

15.10 Classification Independent of Financing Source

The decision whether or not to capitalize an expenditure must be based on the definitions and rules given herein. The source of financing, although important in other respects, has no bearing upon classification.

Valuation

15.11 Reasons for Assigning Value

A dollar value should be assigned to each capital asset item for the following reasons:

- Dollar amounts serve as a control device; they are an important aspect of identification of a particular item or group of items
- Dollar amounts make it possible to present to the public the governmental agency's investment in capital assets
- Dollar amounts provide a check on the adequacy of the governmental agency's insurance coverage
- Dollar amounts on individual items provide information for cost accounting
- Dollar amounts provide the cost basis for depreciating the asset for financial reporting

15.12 Valuation Basis

Capital assets should be recorded at historical cost. The cost of a capital asset should include capitalized interest or ancillary charges necessary to place the asset into its intended location and condition for use. Ancillary charges include costs that are directly attributable to asset acquisition, such as freight and transportation charges, site preparation costs, and professional fees. Donated capital assets should be reported at their estimated fair value on the date accepted by the board.

Historical cost determination problems are most often encountered in the case of land or structures acquired in the distant past. If determining historical cost is not practical due to inadequate records, recording should be based upon estimates of original cost at the date of construction or purchase. The difference between the actual cost and the recorded estimate could be sizeable and still have no material impact on current financial statements. Also, as the capital asset system ages, recorded value will tend to approach historical cost. However, recording current value instead of an estimated original cost is not acceptable.

15.13 Land Cost

The cost of land includes all expenditures in connection with its acquisition, such as:

- Purchase price
- Appraisal and negotiation fees
- Title search fees
- Surveying fees
- Cost of consents
- Relocation costs
- Condemnation costs

- Clearing land for use
- Demolishing or removing structures
- Filing costs

Receipts from the sales of salvage should be credited against the land cost.

In establishing the Capital Assets Accounting System, the assessor may be able to supply information about the location and value of land owned.

15.14 Buildings and Improvements Cost

The cost of buildings and improvements includes all expenditures in connection with their acquisition, such as:

- Purchase price of construction cost
- Fixtures attached to the structure
- Architects' fees
- Accident or injury costs
- Payment of damages
- Insurance during construction
- Cost of permits and licenses
- Net interest cost during construction

The cost should be reduced for:

- Sale of salvage from materials charged against the construction
- Discounts, allowances, and rebates secured
- Amounts recovered through surrender of liability and casualty insurance

Rentals of property during the construction period should be credited to revenue unless otherwise restricted. Actual or imputed interest costs associated with the construction period should be capitalized in accordance with Financial Accounting Standards Board (FASB) Statement No. 34: Capitalization of Interest Cost, and supplemental updates. For a more detailed discussion of interest capitalization see FASB Statement No. 34, Capitalization of Interest Cost.

In establishing the Capital Assets Accounting System, information about the buildings and improvements owned may be obtained from the assessor and the insurance carrier.

15.15 Equipment Cost

The cost of equipment includes:

- Purchase price or construction cost less discounts
- Freight or other carriage charges
- Sale, use, or transportation taxes
- Installation costs

In establishing the Capital Assets Accounting System, information on equipment may be obtained from departmental inventories on file, insurance carriers, and special physical inventories.

15.16 Intangible Costs

The cost or value of intangible assets includes:

- Purchase price
- Labor costs
- Appraisal and negotiation fees
- Development costs
- Installation costs

15.17 Infrastructure Costs

The cost of infrastructure includes all costs in connection with their acquisition, such as:

- Construction or purchase costs
- Engineering, surveyor, and architect fees
- Insurance costs related to construction
- Permit or license fees

Major types of infrastructure cost include:

- Roads
- Gas distribution piping
- Sea walls
- Fire hydrants
- Drainage ditches
- Streets
- Water wells
- Irrigation systems
- Highways

- Guard rails
- Tunnels
- Sidewalks
- Culverts
- Dams/dikes
- Curbs
- Airport runways
- Landscaping
- Piers
- Bridges
- Storm piping
- Docks
- Sewers
- Electrical systems

Original historical cost may be estimated when records are unavailable or inadequate.

15.18 Construction/Development by Force Account

Capital assets constructed/developed by the governmental agency are recorded in the same manner as those acquired by purchase or construction contract.

Costs are initially charged to the accounts of the cost center performing the construction/development and are then transferred to the project. These costs include direct labor, materials, equipment usage, and overhead. Overhead is limited to those items that can be distributed on the basis of direct labor, such as workers' compensation and employee group insurance premiums, retirement, sick leave, and vacation allowances. Administrative overhead outside the cost center may be capitalized when it is clearly related to the construction/development.

15.19 Donated Assets

Capital and intangible assets donated to the governmental agency should be entered in the accounts at their fair market value as of the date of acceptance by the board.

Surplus property purchases at nominal prices far below actual value are in part donations and should be so valued.

15.20 Assets Acquired Under Lease-Purchase Agreements

Lease contracts convey property to another for a specific period of time for a specified rent. Lease contracts are accounted for by the financing method under which the payments are treated as debt service. For accounting treatment of capital leases, Financing Method, refer to Chapter 11, Debt.

15.21 Transfers to Proprietary Funds

For reasons indicated in the introduction, capital assets used by proprietary funds are considered to belong to those funds, rather than being accounted for in the Capital Assets Accounting System. This circumstance requires that transactions involving capital assets and the aforementioned funds be regarded as taking place between independent financial entities.

Accounting for such capital asset transfers must reflect the actual terms of the transactions. Capital assets may be donated or sold to proprietary funds. If donated, no entries are required in the accounts of the funds that had originally purchased the assets because the donated assets are not accounted for as assets of the original fund. If sold, the original fund may:

- Receive cash (accounted for as revenue), or
- Acquire a receivable that will be collected from future earnings of the fund purchasing the assets.

Conversely, if governmental funds purchase proprietary fund capital assets, the purchase price must be recorded as an expenditure as though purchased from an outside vendor.

15.22 Sources of Information

Information regarding capital asset additions is best taken from purchase invoices and contracts even though there is sometimes an undue lag between physical possession of the property and the receipt of these documents.

In governmental agencies where a purchasing agent exists and is assigned the responsibility for handling surplus property sales, equipment abandonments, and interdepartmental transfers of equipment, close cooperation with him/her facilitates the functioning of the property accounting system. In those agencies where a purchasing agent does not exist and the individual department head controls the purchase, movement, and disposition of assets, procedures and report forms must be designed to give the property accounting officer prompt notice of any change in the composition or physical location of the assets.

Accounts and Procedures

15.23 Capital Assets Accounting System

Capital assets acquired from a governmental fund, as distinguished from a proprietary fund, are accounted for in a Capital Assets Accounting System. The asset accounts in this system are:

- Land
- Buildings and improvements
- Equipment
- Infrastructure
- Intangible assets
- Construction/development in progress

The equity of the governmental agency in these assets is shown in a number of Investment accounts, set up according to the source of the outlay, such as:

- Investment in Capital Assets – General Fund
- Investment in Capital Assets – Special Revenue Funds
- Investment in Capital Assets – General Obligation Bonds
- Investment in Capital Assets – Accumulative Capital Outlay Fund
- Investment in Capital Assets – Donations

These accounts are posted simultaneously with, but independently of, the related transactions recorded in the governmental funds.

15.24 Construction/Development in Progress

At the close of the fiscal period, the recorded project expenditures for capital assets not yet completed should be recognized in the Capital Assets Accounting System. This is accomplished by charging Construction/Development in Progress and crediting the appropriate Investment in Capital Assets account. If the project is incomplete by the end of the following period then these accounts are adjusted to reflect any additional expenditures.

Upon completion the proper asset, usually Buildings and Improvements or Infrastructure, is debited with the total of the completed construction/development, the Construction/Development in Progress account is credited with previously recorded costs, and the Investment account is credited for the difference.

15.25 Disposition of Capital Assets

Capital assets may be sold, abandoned, or traded in on new assets. Regardless of the manner of disposition or the amount of the proceeds, the asset must be removed from the Capital Assets Accounting System at its recorded value. The governmental agency, not being concerned with the amount of any gain or loss, records any disposition proceeds in the revenue accounts.

15.26 Identification of Equipment

There are two main reasons for affixing a sequence number to as many items as is possible and practical:

1. Ease of identification: It is much quicker to identify equipment by number than either to search for obscurely placed serial numbers or to match physical characteristics to a word description. This is particularly true when dealing with many items of similar, but not quite identical, appearance.
2. Inventory-taking: A department physical inventory may be taken rapidly if a listing of items in sequence number order is available. Any item seen may be quickly located on the list and checked off. Otherwise the inventory must be taken in the order listed or the entire listing must be searched to locate the item.

There are some items for which a number may not be practical, such as:

- Certain medical and laboratory instruments
- Equipment habitually coated with dirt and grease
- Unique, readily identifiable items

Judgment must be exercised as to which equipment is best left unnumbered. Probably no single method of numbering will prove adequate, depending upon the surface, composition, and usage of the item. Some of the commonly used identifiers are:

- Decals
- Die-stamped numbers
- Metal tags affixed with rivets or nails
- Metal tags with pre-coated adhesive on the back
- Stenciled numbers

Standardization regarding the location for affixing tags to capital assets is desirable.

15.27 Individual Records

An individual record of each unit of accountability should be maintained. Information recorded should include:

- An abbreviated word description
- Cost or other basis
- Date acquired
- Date and method of retirement
- Department charged with the item
- Fund from which purchased
- Method by which acquired
- Posting reference
- Assigned sequence number
- Vendor's name if purchased

Optional data might include value for insurance purposes, estimated life, and equipment class code.

15.28 Subsidiary Records

For control purposes it is convenient to group detailed records by department, or by location in the case of equipment. Records filed by department constitute a subsidiary ledger to the Capital Assets Accounting System control account Equipment. Similarly, individual records for land, infrastructure, and buildings and improvements may be grouped by location to constitute subsidiary ledgers to the other control accounts.

Larger governmental agencies with thousands of assets may wish to install intermediate control records by the various departments and locations.

15.29 Physical Inventories

To ensure that the system is functioning as intended, complete physical inventories of equipment should be taken at intervals prescribed by law or, in the absence of applicable statute, the judgment of the local governing body.

The taking of inventories will be facilitated if the property accounting officer provides a current listing in numerical order of the equipment charged to departments. The listing form should provide space for checking each item present, notation of exceptions, and certification.

In addition to the above the property accounting officer, in the interests of internal control, should conduct test-check physical inventories of departments or item groups selected at random. Failure to find any item should be discussed with the department head as promptly as possible.

15.30 Shortages and Overages

An investigation of any shortages or overages should be made in cooperation with the department involved. Frequently, such a condition is due to an accounting lag in recording acquisitions, transfers, and dispositions. Overages are seldom unexplainable. Shortages may exist because of the accounting lag or because of pilferage.

15.31 Depreciation

Capital assets should be depreciated over their estimated useful lives unless they are either inexhaustible or are infrastructure assets reported using the modified approach. Inexhaustible capital assets such as land and land improvements should not be depreciated.

Capital assets that are being or have been depreciated should be reported net of accumulated depreciation in the statement of net assets. (Accumulated depreciation may be reported on the face of the statement or disclosed in notes). Capital assets that are not being depreciated, such as land or infrastructure assets reported using the modified approach, should be reported separately if the government has a significant amount of these assets. Capital assets also may be reported in greater detail such as by major class of asset (for example, infrastructure, buildings and improvements, vehicles, machinery and equipment).

Depreciation expense should be reported in the government-wide statement of activities. Depreciation expense should be measured by allocating the net cost of depreciable assets (historical cost less estimated salvage value) over their estimated useful lives in a systematic and rational manner.

15.32 Amortization

Qualified intangible assets should be amortized over their useful life. Intangible assets with no legal, contractual, regulatory, technological, or other factors limiting their useful life should be considered to have an indefinite useful life and should not be amortized. As an example, a permanent right-of-way easement would be considered to have an indefinite useful life. Additional information regarding the accounting and financial reporting for intangible assets can be found in GASB Statement No. 51: Accounting and Reporting for Intangible Assets.

Exhibits

E15.01 Examples of Classification and Posting

For simplicity, it is assumed that all transactions are cash. Departments mentioned are financed through the General Fund, unless otherwise stated.

Capital asset purchase		A printer is purchased for \$1,000 for the clerk. Application of Policy: The asset is capitalized in the amount of the expenditure.						
General Ledger			Subsidiary Ledger (Revenue Ledger)			Capital Assets Accounting System		
Accounts	Debit	Credit	Accounts	Debit	Credit	Accounts	Debit	Credit
Expenditures	1,000		Clerk - Equipment	1,000		Equipment	1,000	
Cash		1,000				Investment in Capital Assets - General Fund		1,000

Distinction between Capital Asset and Maintenance Expenditures

10 Examples:

Capital vs.		A section of bleachers costing \$200 is purchased for the Parks and Recreation Building as a replacement for a damaged section of bleachers having 40 sections.						
Expenditure EXAMPLE 1		Application of Policy: The section replaces a part of the larger accountability unit of 40 sections and is therefore maintenance.						
General Ledger			Subsidiary Expenditure (Revenue) Ledger			Capital Assets Accounting System		
Accounts	Debit	Credit	Accounts	Debit	Credit	Accounts	Debit	Credit
Expenditures	200		Parks and Recreation - Building Maintenance of Equipment	200		No entry		
Cash		200						

Capital Asset vs. Maintenance Expenditure 2	Ten \$200 sections of bleachers are added to the above bleachers, making a total of 50 sections.								
	Application of Policy:			This is an addition to the existing capitalized bleachers. Additions to such equipment blocks should be capitalized regardless of whether or not they meet the cost test.					
General Ledger			Subsidiary Expenditure (Revenue) Ledger			Capital Assets Accounting System			
Accounts	Debit	Credit	Accounts	Debit	Credit	Accounts	Debit	Credit	
Expenditures	2,000		Parks and Recreation Building - Equipment	2,000		Equipment	2,000		
Cash		2,000				Investment in Capital Assets – General Fund		2,000	

Capital Asset vs. Maintenance Expenditure <i>EXAMPLE 3</i>	A new radiator is installed in a five-year-old auto for the administrator at a cost of \$145.							
	Application of Policy: This is ordinary maintenance, as defined.							
General Ledger			Subsidiary Expenditure (Revenue) Ledger			Capital Assets Accounting System		
Accounts	Debit	Credit	Accounts	Debit	Credit	Accounts	Debit	Credit
Expenditures	145		Administrator Maintenance of Equipment	145		No entry		
Cash		145						

Capital Asset vs. Maintenance Expenditure <i>EXAMPLE 4</i>	A boiler that is part of the hospital heating system is being replaced by a boiler purchased for \$5,000. The original cost of the existing boiler was included in the cost of the hospital structure originally capitalized in the Capital Assets Accounting System.							
	Application of Policy:		This is maintenance of the existing heating system, notwithstanding the fact that the old boiler may have cost only \$3,500.					
General Ledger			Subsidiary Expenditure (Revenue) Ledger			Capital Assets Accounting System		
Accounts	Debit	Credit	Accounts	Debit	Credit	Accounts	Debit	Credit
Expenditures	5,000		Hospital Maintenance of Buildings and Improvements	5,000		No entry		
Cash		5,000						

Capital Asset vs. Maintenance Expenditure <i>EXAMPLE 5</i>	A new 5-ton cooling system costing \$3,500 is installed in the hospital, replacing an existing 3-ton system, which had originally cost \$1,500.								
	Application of Policy:			The expenditure is a capitalizable expenditure: capitalize the new item; write off the replaced item.					
General Ledger			Subsidiary Expenditure (Revenue) Ledger			Capital Assets Accounting System			
Accounts	Debit	Credit	Accounts	Debit	Credit	Accounts	Debit	Credit	
Expenditures	3,500		Hospital – Buildings and Improvement	3,500		Buildings and Improvements	3,500		
Cash		3,500				Investment in Capital Assets - General Fund		3,500	
						Investment in Capital Assets – General Fund	1,500		
						Buildings and Improvement		1,500	

Capital Asset vs. Maintenance Expenditure <i>EXAMPLE 6</i>	\$1,750 is expended on the installation of new partitions in the hospital lobby to provide additional office space.								
	Application of Policy:			The addition is less than \$5,000 and is accordingly charged to maintenance.					
General Ledger			Subsidiary Expenditure (Revenue) Ledger			Capital Assets Accounting System			
Accounts	Debit	Credit	Accounts	Debit	Credit	Accounts	Debit	Credit	
Expenditures	1,750		Hospital - Maintenance of Buildings and Improvements	1,750		No entry			
Cash		1,750							

Capital Asset vs. Maintenance Expenditure <i>EXAMPLE 7</i>	A new building is painted at a cost of \$11,000							
	Application of Policy:		Painting as part of the initial construction cost is regarded as capital outlay. Subsequent repair is maintenance.					
General Ledger			Subsidiary Expenditure (Revenue) Ledger			Capital Assets Accounting System		
Accounts	Debit	Credit	Accounts	Debit	Credit	Accounts	Debit	Credit
Expenditures	11,000	<input type="checkbox"/> Buildin	Buildings and Improvements of Equipment	11,000		Buildings and Improvements	11,000	
Cash		11,000				Investment in Capital Assets - General Fund		11,000

Capital Asset vs. Maintenance Expenditure 8	An administration building was constructed with an unpainted exterior. After 15 years, the building is painted at a cost of \$15,000.								
	Application of Policy: Although a theoretical case exists for classification as an addition, it is considered preferable to regard this as an expense of maintaining the original exterior of the building								
General Ledger			Subsidiary Expenditure (Revenue) Ledger			Capital Assets Accounting System			
Accounts	Debit	Credit	Accounts	Debit	Credit	Accounts	Debit	Credit	
Expenditures	15,000		Administration Building - Maintenance of Buildings and Improvements	15,000		No entry			
Cash		15,000							

Capital Asset vs. Maintenance Expenditure <i>EXAMPLE 9</i>	A shop building is completely reshungled for \$1,700.								
	Application of Policy:			The replacement is in-kind and is accordingly classified as maintenance.					
General Ledger			Subsidiary Expenditure (Revenue) Ledger			Capital Assets Accounting System			
Accounts	Debit	Credit	Accounts	Debit	Credit	Accounts	Debit	Credit	
Expenditures	1,700		Shop Building Maintenance of Buildings and Improvements	1,700		No entry			
Cash		1,700							

Capital Asset vs. Maintenance Expenditure <i>EXAMPLE 10</i>	The shingles in the above roof are replaced with shake shingles at a cost of \$6,800								
	Application of Policy:			The amount of the betterment is greater than \$5,000 as established by the auditor. Capitalize the new item; write off the \$1,100 remaining book value of the old roof.					
General Ledger			Subsidiary Expenditure (Revenue) Ledger			Capital Assets Accounting System			
Accounts	Debit	Credit	Accounts	Debit	Credit	Accounts	Debit	Credit	
Expenditures	6,800		Shop Buildings and Improvements	6,800		Buildings and Improvements	6,800		
Cash		6,800		Investment in Capital Assets - General Fund		6,800			
				Investment in Capital Assets - General Fund	1,100				
				Buildings and Improvements		1,100			

Purchase of a capital asset with a trade-in for a governmental fund type <i>METHOD A</i>	A laptop is purchased for the assessor for \$2,675. The vendor allows \$125 for an old laptop, which had originally cost \$1,250.							
	Application of Policy:		The new asset is recorded at cost. The old asset is removed at its recorded value. The trade-in value is recognized as revenue.					
General Ledger			Subsidiary Expenditure (Revenue) Ledger			Capital Assets Accounting System		
Accounts	Debit	Credit	Accounts	Debit	Credit	Accounts	Debit	Credit
Expenditures	2,675		Assessor - Equipment	2,675		Equipment	2,675	
Cash		2,550				Investment in Capital Assets - General Fund		2,675
Other Financing Sources - Proceeds from General Capital Asset Trade-in		125				Investment in Capital Assets - General Fund	1,250	
						Equipment		1,250

Purchase of a capital asset with a trade-in for a governmental fund type <i>METHOD B</i>	A laptop is purchased for the assessor for \$2,675. The vendor allows \$125 for an old laptop, which had originally cost \$1,250.							
	Application of Policy:		Record purchase of the laptop net of the trade-in allowance. Note that the trade-in value is recognized only in the Capital Assets Accounting System.					
General Ledger			Subsidiary Expenditure (Revenue) Ledger			Capital Assets Accounting System		
Accounts	Debit	Credit	Accounts	Debit	Credit	Accounts	Debit	Credit
Expenditures	2,550		Assessor - Equipment	2,675	❑ Equip	Equipment	2,675	
Cash		2,550				Investment in Capital Assets - General Fund		2,675
						Investment in Capital Assets - General Fund	1,250	
						Equipment		1,250

Purchase of a capital asset with a trade-in	The Parks Department was allowed \$1,000 on an old pick-up truck toward the purchase of a new one. The old truck originally cost \$3,000 and the price of the new truck is \$6,200 before any trade-in allowance								
	Application of Policy: Same as with preceding example (here using <i>Method A</i>)								
General Ledger			Subsidiary Expenditure (Revenue) Ledger			Capital Assets Accounting System			
Accounts	Debit	Credit	Accounts	Debit	Credit	Accounts	Debit	Credit	
Expenditures	6,200		Parks Department - Equipment	6,200		Equipment	6,200

CHAPTER 16 BUDGETARY

16.01 Scope of Chapter

One of the fundamental principles governing the manual states “The accounting system should provide the basis for appropriate budgetary control.” This chapter describes the accounts and procedures by which such control may be established. It does not deal with budget forms, presentation or procedure, which are governed by state law and administrative directive, but is concerned with accounting for actual transactions within the framework of the adopted budget.

An accurate comparison of transactions with budget estimates shows compliance with legal provisions and assists in the preparation of future budgets.

16.02 Budgetary Accounts

Budgetary accounts are those necessary to reflect budget operations and condition. Although based entirely upon estimate, they have the same status as those accounts that reflect actual financial transactions. All are integrated into the overall accounting structure, a condition which emphasizes the importance of the budget in the county operation. The budgetary accounts are:

Estimated Revenues and Estimated Other Financing Sources - These are amounts of revenue estimated to accrue or to be collected during a given period.

Appropriations and Estimated Other Financing Uses - These are authorizations granted by the legislative body to make expenditures and incur obligations for specific purposes during the fiscal year.

Encumbrances - These are commitments related to unperformed (executory) purchase orders, contracts, or other obligations that are chargeable to an appropriation and for which a part of an appropriation is segregated. This account is used if a county uses the encumbrance system. The Encumbrances account never has a credit balance and always agrees with the Budgetary Fund Balance - Reserved for Encumbrances account. Encumbrances outstanding at fiscal year-end do not constitute expenditures. For financial reporting purposes, reserves for encumbrances will need to be reclassified to restricted, committed, or assigned fund balance depending on the county's spending prioritization policy.

Budgetary Fund Balance - This budgetary account is used to account for differences between estimated revenue and appropriations. The use of a budgetary fund balance account simplifies the integration of budgetary accounts into the general ledger and permits the periodic testing of budgetary account balances with a budgetary trial balance. For additional budgetary control, counties may establish budgetary fund balance accounts for the various fund balance classifications (nonspendable, restricted, committed, assigned, unassigned). For budgetary purposes, nonspendable, restricted, committed, and assigned fund balance are also referred to as unavailable fund balance.

At all times during the year: (1) total general ledger budgetary account debits and credits must be equal; (2) total general ledger account debits and credits must be equal; and (3) total integrated general ledger debits and credits (including both budgetary and actual account balances) must be equal. The equality of these relationships should be tested periodically. This practice is consistent with the all-inclusive (clean surplus) theory, which states, in part, that only the results of operations should be reflected in the fund balance.

Budgetary Fund Balance - Reserved for Encumbrances - This account is used whenever a county uses the encumbrance system. This account never has a debit balance and always agrees with the balance in the Encumbrances account. This account is always posted at the same time as Encumbrances and in equal amounts. As a budgetary account, it is closed at fiscal year-end, along with encumbrances.

Like operating accounts, budgetary accounts are closed at the end of the fiscal period.

16.03 Fund Balance – Reserved for Encumbrances

There is a Reserve for Encumbrances account in the actual account structure. It is a segregation of fund balance to provide for expenditures upon vendor performance of outstanding commitments at year-end, represented by encumbered appropriations just before the budgetary accounts are closed. On the balance sheet, Reserve for Encumbrances must be reclassified as restricted, committed, or assigned, as appropriate in the Fund Balance section.

16.04 Budgetary Control

The budgetary control exerted by these accounts consists of a comparison of their balances with those of their operating account counterparts. Such a comparison indicates the degree to which operations deviate from the original plan. Both budgetary and operating accounts are often placed on the same subsidiary ledger page to facilitate this comparison.

Balances of budgetary accounts are always opposite in effect (debit, credit) to those of the accounts controlled.

Budgetary Account	Account or Balance Controlled	Differences Indicate
Estimated revenues (debit)	Revenues (credit)	Over- or under-realized Revenues
Appropriations (credit)	Expenditures (debit) Encumbrances (debit)	Unexpended and unencumbered appropriations
Budgetary fund balance	Estimated revenues and appropriations	Effect on beginning fund balance available

16.05 Control and Subsidiary Ledger Accounts

Budgetary accounts in the general ledger are also referred to as control accounts, with reference to their subsidiary ledger accounts. Just as all the detailed expenditure subobjects of a fund are controlled by a single general ledger expenditures account, so are the detailed appropriations by budget unit and subobject controlled by the general ledger appropriations account. In like manner, the Estimated Revenues account in the general ledger controls the revenue estimates by account for that fund. All encumbrances placed on individual appropriations of a fund are controlled by the Encumbrances account.

16.06 Combined Subsidiary Ledgers

A subsidiary ledger could be established for estimated revenues and another for appropriations. However, since both estimated revenues and revenues are expressed in terms of the same accounts, their subsidiary ledgers are often combined. This facilitates the budgetary control function and adds little, if anything, to the size of the resulting ledger, since the recording of an estimated revenue seldom requires more than one entry per account per year.

General Fund			20X1-20X2		Account Library Services	
			Revenues			
Date	Posting Reference	Description	Estimate Debit	Actual Credit	Unrealized Balance	
7-1	J-1	Budget	1,500*		1,500 Dr	
8-6	DP-161	July Fines		150**	1,350 Dr	

*Controlled by general ledger estimated revenues account

**Controlled by general ledger revenues account

Similarly, appropriations and expenditures are both expressed in terms of the expenditure accounts and may be readily combined in a single appropriation expenditure ledger.

General Fund			20X1-20X2		Account Library Services	
			Expenditures			
Date	Posting Reference	Description	Appropriation Credit	Actual Debit	Remaining Balance	
7-1	J-1	Budget	6,000*		6,000 Cr	
7-5	W-98	Jones Off.		160**	5,840 Cr	

*Controlled by general ledger appropriations account

**Controlled by general ledger expenditures account

16.07 The Encumbrance System

When appropriations are restricted on the basis of commitments, an encumbrance system is in effect. Under this system, Encumbrances is debited and the appropriate Budgetary Fund Balance - Reserved for Encumbrances account is credited at the time a commitment is issued. The appropriation remains encumbered until payment is made or a cancellation occurs, at which time the encumbering entry is reversed.

Encumbrances may be set up in a separate subsidiary ledger. However, it is usually more convenient and useful to include them also in the combined appropriation-expenditure ledger.

Example:

- a) A purchase order is issued for a microfilm machine for the clerk. The estimated cost is \$2,500

Account	Sub	Debit	Credit
Encumbrances		2,500	
Budgetary Fund Balance-Reserved For Encumbrances			2,500
Clerk - Equipment	2,500		

b) The microfilmer is received, along with a statement for \$2,530. The statement is paid:

Account	Sub	Debit	Credit
Budgetary Fund Balance - Reserved for encumbrances		2,500	
Encumbrances			2,500
Clerk - Equipment	2,500		
Expenditures		2,530	
Cash			2,530
Clerk - Equipment	2,530		

NOTE: The encumbrance is always reversed in the same amount for which it was placed, regardless of the amount of the related expenditure. An encumbrance system, properly used, reduces the possibility of commitments in excess of appropriations due to a delay in the receipt of billings. Obviously, if a difference existed between the estimated and the actual cost of an item, an additional appropriation may be required.

16.08 Extent of Application

When an encumbrance system is used, appropriations should be encumbered for all purchase orders, contracts, and other written commitments. Additional encumbrances are a matter of local choice.

16.09 Need for Encumbrance System

Generally, the need for the type of control provided by encumbrance accounting increases as the size of the county increases. No exact rule can be stated as to what size county should use an encumbrance system. The best guide is probably that encumbrance accounting should be utilized to the extent necessary to ensure effective budgetary control and accountability and to facilitate effective cash planning and control.

It is also possible, particularly in very small governments, to facilitate appropriate budgetary control through the use of a simple file of unfilled purchase orders. When a particular purchase is proposed, this file is checked to determine whether any encumbrances are outstanding against the relevant appropriation. If so, no commitment can be made unless the unencumbered balance is sufficient to cover the proposed purchase.

16.10 Purchase Order Clearance Necessary

It is not necessary that a county have a purchasing agent in order to use the encumbrance system. However, in order for it to function, purchase orders must be reviewed by the auditor to determine the adequacy of unencumbered appropriations before approval and issuance to vendors. No pre-expenditure control can be exerted if the first notice of a proposed expenditure is the arrival of an invoice or claim.

16.11 Year-End Treatment of Budgetary Accounts

At June 30, the balances of Appropriations and Estimated Revenues are closed to Budgetary Fund Balance. The Encumbrances accounts are also closed at year-end, along with the Budgetary Fund Balance - Reserved for Encumbrances. However, the fund balance at June 30 should be offset to the extent of outstanding commitments. This outstanding commitment, with approval of the governing body, should be re-established as appropriations applicable to prior years in the new fiscal year. If prior-year commitments are not re-established, they should be cancelled unless otherwise provided for in the new year.

If an encumbrance system is in effect, encumbrances outstanding at year-end represent the estimated amount of the expenditures ultimately to result if unperformed commitments in process at year-end are completed. Encumbrances outstanding at year-end do not constitute expenditures or liabilities. If performance on an executory contract is complete, or meets criteria for accrual, an expenditure and liability should be recognized rather than an encumbrance. In the current budget document, the total of such appropriations is offset by the Budgetary Fund Balance - Reserved for Encumbrances; there is no detailed presentation by budget unit.

Example:

a) Entry to adopt budget:

Account	Debit	Credit
Budgetary Unassigned Fund Balance	300,000	
Estimated Revenues	900,000	
Appropriations		1,200,000

b) As of June 30, the books are closed:

Account	Debit	Credit
Revenues	1,000,000	
Appropriations	1,200,000	
Budgetary Fund Balance - Reserved for Encumbrances	50,000	
Unassigned Fund Balance	100,000	
Estimated Revenues		900,000
Expenditures		1,100,000
Encumbrances		50,000
Budgetary Unassigned Fund Balance		300,000

c) As of June 30, the Reserve for Encumbrances outstanding is established:

Account	Debit	Credit
Unassigned Fund Balance	50,000	
Fund Balance- Reserved for Encumbrances		50,000

d) As of July 1 of the new fiscal year, the new budget is recorded:

Account	Debit	Credit
Estimated Revenues	950,000	
Budgetary Unassigned Fund Balance	150,000	
Appropriations		1,100,00

- e) Encumbrances outstanding at the end of the preceding year are re-established, along with their encumbered appropriations:

Account	Debit	Credit
<i>Budgetary Accounts</i>		
Budgetary Unassigned Fund Balance	50,000	
Encumbrances	50,000	
Appropriations - Prior Year		50,000
Budgetary Fund Balance - Reserved for Encumbrances		50,000
<i>Actual Accounts</i>		
Fund Balance - Reserved for Encumbrances	50,000	
Unassigned Fund Balance		50,000

The detailed appropriations making up the \$50,000 total are entered in the subsidiary ledger and immediately encumbered. Either of the following methods may be used:

Method 1 Current-year appropriations and appropriations for re-established encumbrances are recorded in the same account.

General Fund		20X1 - 20X2			Budget Unit Library Account Office Expense	
Date	Posting Ref.	Description	Appropriations <i>Credit</i>	Encumbrances <i>Debit</i>	Expenditures <i>Debit</i>	Unencumbered Appropriations <i>Credit</i>
7-1...	J-1	Budget	5,000			5,000
7-1...	J-2	Prior encumbrance	250	250		5,000
7-31...	W-246	Smith Pub. Co.		(250)	245	5,005
7-31...	J-3	Cancel appropriation	(5)			5,000

Under this method, differences between amounts encumbered and amounts actually expended are immediately transferred from the appropriations account involved to Appropriation for Contingencies or to the contingencies fund, to prevent the indirect increase in current appropriations through the over-encumbering of prior-year appropriations.

Method 2 Appropriations for re-established encumbrances are recorded in an account separate from current-year appropriations.

General Fund		20X1 - 20X2 (Current Year)			Budget Unit Library Account Office Expense	
Date	Posting Ref.	Description	Appropriations <i>Credit</i>	Encumbrances <i>Debit</i>	Expenditures <i>Debit</i>	Unencumbered Appropriations <i>Credit</i>
7-1...	J-1	Budget	5,000			5,000
7-1...	J-2	Prior encumbrance	250	250		
7-31...	W-246	Smith Pub. Co.		(250)	245	5
7-31...	J-3	Cancel appropriation	(5)			

Under this method such differences may be transferred to Appropriation for Contingencies, the contingencies fund, or the fund balance at the end of the fiscal year, inasmuch as separate accounting control is exerted over the appropriation for re-established encumbrances.

16.12 Deposits With Others

With respect to deposits, all or part of which are expected to ultimately become expenditures, an encumbrance should be placed on the appropriation at the time the deposit is made. In this case, the deposit is considered the equivalent of a commitment. The encumbrance remains until the amount of expenditure is determined, at which time the encumbrance is lifted and the appropriate part of the deposit is charged to expenditures.

Example: Road F.A.S. payments will be expensed when the warrant is drawn.

a) A deposit is made for the project:

Account	Sub	Debit	Credit
Encumbrances		50,000	
Budgetary Fund Balance - Reserved For Encumbrances			50,000
Professional and Specialized Services	50,000		
Deposits With Others		50,000	
Cash			50,000

b) Upon completion of the project, the county's share of the cost is \$46,000. The remaining \$4,000 on deposit is refunded:

Account	Sub	Debit	Credit
Budgetary Fund Balance - Reserved for Encumbrances		50,000	
Encumbrances			50,000
Professional and Specialized Services	50,000		
Cash		4,000	
Expenditures		46,000	
Deposits With Others			50,000
Professional and Specialized Services	46,000

CHAPTER 19

PUBLIC ASSISTANCE PROGRAM

Public Assistance Program

19.01 Introduction

This chapter deals primarily with the effect of public assistance transactions upon county operating funds and accounts.

Public assistance programs originate in federal and state laws. Most are regulated and supervised by the state Department of Social Services and are financed in varying degree with federal, state, and county money. Counties administer them at the local level.

Payments and disbursements under these programs are made by the counties, which then file claims with the Department of Social Services as a basis for reimbursement. Claims are subject to routine desk review and periodically detailed examination by state and federal auditors. The counties are held financially liable for disallowed claims and are responsible for any deviations and irregularities from public assistance program policies prescribed in state manuals. This causes initial recording and accounting of public assistance to be somewhat tentative, because it is subjected to adjustments upon the various funds involved.

19.02 State Manuals

In the exercise of its supervisory capacity, the State, through various agencies, has published manuals containing regulations for different programs. Reference must be made to these manuals for specific information. The State also publishes amendments, updates, and proposed changes in regulations.

19.03 County Operating Funds

It is recommended that the General Fund be used to account for public assistance expenditures and other activities.

19.04 Public Assistance Disbursement Fund

Public assistance disbursements are charged against the General Fund by a journal entry, and an equal amount of cash is transferred to the Public Assistance Disbursement Fund to finance disbursements. The use of this clearing fund is recommended, although optional, and is used only to account and control public assistance disbursements by means of Electronic Benefit Transfer (EBT), warrants, and direct deposit.

19.05 Public Assistance Advance Fund

The county may deposit advances in a Public Assistance Advance Fund until such time as the monies are earned as revenue through the expenditure and claiming process. The remittance advice from the State shows all the program categories included in the advance. For control purposes, the county uses and maintains a subsidiary ledger and analysis of each program category in the fund. The analysis must be reconciled with the state statement of cash advances mailed quarterly to each county. When revenues are earned through the expenditure claiming process, advances are credited to the revenue accounts for each corresponding program.

19.06 Principal Aids

Aid in the form of cash grants is given families with dependent children and other eligible persons. Cash grants may be given to clients in the form of warrants, direct deposit, or EBT.

19.07 General Relief

Welfare and Institutions Code Section 17000 requires the county to support and relieve all indigent legal residents. These are local programs, regulated by the county board of supervisors rather than the State. Aid may be in the form of cash or in kind.

19.08 Administration Cost

Costs of administering the assistance programs are shared by the federal, state and county governments. Administrative costs are broadly divided between Social Services and Eligibility and Grants.

19.09 Public Assistance Advances

Prior to and during each month, the State advances to each county a sum of money equal to the estimated federal and state shares of administrative and assistance expenditures to be made during that month. Amounts are transferred from the Advances Fund to the General Fund as necessary to make Financial Aid Payments. This may be done either at the time warrants are issued or after preparation of the claim, depending on the policy of the county.

19.10 Administrative Advances

The advances for administration are determined from the approved claims available at the time the estimating process begins each month. At least once each quarter, the State adjusts for prior-period over- or under-funding, based on the estimates of the quarter computed to the quarterly expenditure report. All administrative advances are timed for release approximately mid-month.

19.11 Assistance Advances

Advances for the assistance programs are generally received by the county on or before the day the recipient's grant is to be mailed for delivery.

While the monthly assistance estimate is determined from caseload, average grant, and seasonal and economic factors, the allocation to each county is based upon the relationship between the latest available month's expenditures and the current estimated need. Each month, prior estimates are adjusted to actual and the current estimates are adjusted for the difference.

19.12 Supplemental Advances

Supplemental administration and assistance cash advances are made if the expenditure estimate analysis reveals that insufficient funds were provided and federal or state funds are available.

19.13 Statement of Cash Advances

A statement of cash advances (Form AA 190) itemizes by month the estimates, adjustments, and supplements for the quarter by account or by fund. The statement is released by the Department of Social Services during the last week of each calendar quarter.

19.14 Repayments and Cancelled Warrants

Repayments of public assistance program aid general relief, warrants cancelled for non-presentation within the established period, and cash EBT expungements may be accounted for as revenue. On the state claim form, cancellations, expungements, and repayments are a reduction of total payments. If public assistance program aid general relief, warrants cancelled for non-presentation within the established period, and cash EBT expungements are accounted for as revenue, then a reconciliation between the county's records and the claims submitted is required.

19.15 Adjusted Claims

County claims for reimbursement may be adjusted by the State as a result of desk review or field audit. If, as illustrated in Section 19.17, revenue had been recorded in the General Fund at the time the claim was submitted, an adjusting entry must be made in the amount of the change. If a claim under a program not financed through advances is disallowed, and the original claim has already been reimbursed, repayment by the county is a revenue reduction.

19.16 Accounting Considerations

Administration and assistance advances originating from the State are held in the Public Assistance Advances Fund. Public assistance disbursements may be issued through a separate clearing fund with a separate warrant series or in the General Fund using separate accounts. The General Fund accounts for all public assistance administration and assistance expenditures. Revenue is recognized through the claim reimbursement process.

The advances are not available for the county's current operations and obligations until such time as the revenues are recognized in the General Fund books. Interest earned by the Public Assistance Advances Fund is credited to the General Fund.

19.17 Transaction and Illustrative Journal Entries

a) July advances are received from the State.

Account	Sub	Debit	Credit
<i>Public Assistance Advance Fund</i>			
Cash		322,500	
Deferred Revenue			322,500
Assistance - federal	185,000		
Assistance - state	135,000		
Administration - federal	2,000		
Administration - state	500		

- b) An analysis of the county public assistance disbursements for July indicated a federal liability of \$184,800, a state liability of \$134,750 and a county liability of \$65,450:

Account	Sub	Debit	Credit
<i>General Fund</i>			
Expenditures		385,000	
Cash			385,000
Support and care of persons - county	65,450		
Support and care of persons - state	134,750		
Support and care of persons - federal	184,800		
<i>(To record the July public assistance expenditures and to transfer cash in that amount to the Public Assistance Disbursement Fund)</i>			

If a separate public assistance disbursement fund is not used, the following journal entry would have been made:

Account	Sub	Debit	Credit
<i>General Fund</i>			
Expenditures		385,000	
Warrants payable			385,000
Public assistance - aid programs - county	65,450		
Public assistance - aid programs - state	134,750		
Public assistance - aid programs - federal	184,800		
<i>Public Assistance Disbursement Fund</i>			
Expenditures		385,000	
Warrants payable			385,000
<i>(To record the transfer of cash from the General Fund and to record the issuance of public assistance warrants)</i>			

- c) At this point, revenue is recognized in the General Fund. Cash is transferred from the Public Assistance Advances Fund to the General Fund in an amount equal to the federal and state liability:

Account	Sub	Debit	Credit
<i>Public Assistance Advance Fund</i>			
Deferred Revenue		319,550	
Cash			319,550
Assistance - state	134,750		
Assistance - federal	184,800		
<i>General Fund</i>			
Cash		319,550	
Revenue			319,550
State for public assistance program	134,750		
Federal for public assistance programs	184,800		

- d) County public assistance administration expenditures analysis for the first quarter ended September is shown below. A claim has been prepared and has been mailed to the State:

Program/Functions	Total Expenditures	Federal Funds	State Funds	County Funds
CalWORKs	\$ 1,306	\$ 640	\$ 333	\$ 333
Foster Care	75	31	22	22
Title XX Social Services	1,067	802	9	256
Staff Development	10	7	1	2
Non-Assistance Food Stamp	423	211	106	106
WIN Social Services	59	53		6
Child Support Enforcement	49	37		12
Child Support Enforcement	36		27	9
Total	\$ 3,025	\$ 1,781	\$ 498	\$ 746

Account	Sub	Debit	Credit
<i>Public Assistance Advance Fund</i>			
Deferred Revenue		2,279	
Cash			2,279
Administration - federal	1,744		
Administration - state	471		
Child Support Enforcement - federal	37		
Child Support Enforcement - state	27		
<i>(To transfer the federal and state shares of the administrative cost to the General Fund)</i>			

Account	Sub	Debit	Credit
<i>General Fund</i>			
Cash		2,279	
Revenues			2,279
Federal for public assistance administration	1,744		
State for public assistance administration	471		
Federal for public assistance - child support	37		
State for public assistance - child support	27		
<i>(To recognize revenue transferred from the Public Assistance Advance Fund for the federal and state shares of the administrative cost)</i>			

- e) On August 29, the audited claim for Public Assistance - Administration was received. A letter attached to the reviewed claim stated that there was a \$210 federal disallowance and a \$90 state disallowance:

Account	Sub	Debit	Credit
<i>General Fund</i>			
Revenue		300	
Cash			300
Administration - Federal	210		
Administration - State	90		
<i>(To record the federal and state July claim adjustments and to transfer cash back to the Public Assistance Advance Fund. Refer to Section 19.17 for the original entry)</i>			

Account	Sub	Debit	Credit
<i>Public Assistance Advance Fund</i>			
Cash		300	
Deferred Revenue			300
Administration - federal	210		
Administration - state	90		
<i>(To record the transfer of cash from the General Fund in the amount of the federal and state July claim adjustments)</i>			

Medi-Care Program

19.40 Introduction

On March 1, 1966, Texas' Medicaid program succeeded the former Public Assistance Medical Care and Medical Assistance to the Aged program. The Medicaid program is under the provisions of Title XIX of the Social Security Act and is administered by the state Department of Health Services. The program's goal is to provide, within the prescribed limits, basic health and medical care and other related services to the medically indigent and medically needy, recipients of public assistance programs, the aged, the blind, and other persons.

In comparison, Medicare is a federal program, authorized under Title XVIII of the Social Security Act and administered by the Secretary of Health and Human Services to provide retired and aged persons with:

- Hospital insurance to help pay the cost of hospitalization and related care, and
- Health insurance to help pay bills for covered medical services.

19.41 Program Description

The Medicaid program provides direct health benefits to public assistance recipients and low-income Texans.

Eligibility

A broad range of persons is eligible for Medicaid:

- Patient Share Persons receiving, or eligible for, aid to families with dependent children, the federal supplemental security income (SSI/SSP) program, or aid to the potentially self-supporting blind.
- Persons who would be eligible for public assistance except for excess income.
- Persons under 21 who do not qualify as dependent children but do qualify on the basis of
- financial eligibility, provided they are not away from home for the purpose of attending school at a level above the 12th grade.
- Persons 21 to 65 years of age who are below the required income and property level.
- Medically indigent persons whose income is sufficient to meet their day-to-day non-medical needs but insufficient for adequate health care.
- Persons with kidney failure who do not otherwise qualify for Medicare and who are not entitled to Medicare benefits.
- Persons who qualify for and are currently receiving aid under the federal Cuban refugee or Indochinese refugee assistance programs.

Patient Share

Medically indigent persons whose monthly or quarterly income is above prescribed limits, but who otherwise qualify, are entitled to Medicaid program benefits. Upon payment of their share of medical and health care costs for services provided to them in that month or quarter, Medicaid will pay the rest within the prescribed limits.

Financing and Payment

The State Controller shall deposit all state and federal government contributions to the state Health Care Deposit Fund. Medicaid program costs are paid upon the order of the Controller, in accordance with certifications made at the direction of the Department of Health Services.

Medical Providers of Medical and Health Care

Eligible recipients are issued monthly Medicaid cards. They are entitled to choose their doctor, hospital, and other health providers.

Fiscal Intermediaries

Providers of health care send their billings to the fiscal intermediary, the state Department of Health Services. Providers are reimbursed from the state Health Care Deposit Fund within the prescribed limitations.

Billings

19.42 Billings for services rendered must be submitted to the fiscal intermediary not more than two months after the month in which the service was rendered. If the patient did not identify himself as a Medicaid recipient, the bill must be submitted within 60 days after the date he has been so certified by the provider, except that such certification date may not be later than one year after the month in which service was rendered. Identification of a patient as a Medicaid beneficiary means presentation to the provider of the patient's Medicaid card.

Prepaid Health Plans

19.43 A goal of the program is that care be provided, to the extent feasible, through a system of prepaid health plans through contracts with carriers. The State has established requirements covering services to be provided and co-payment levels for carriers wishing to provide health care services on a prepaid basis. Counties meeting these conditions are eligible to become carriers of a prepaid health insurance plan.

Program Limitation

19.44 On July 1, 1972, and at the beginning of each fiscal year thereafter, the State establishes a monthly schedule of total payments by service categories. If it appears that the total cost will be exceeded, or if payments to date have exceeded the schedule by 10%, any category may be reduced by up to 10%. If such reductions are insufficient to cover the shortage, elective services in the basic benefit schedule may be postponed, but no particular service may be completely eliminated.

19.45

19.46 Accounting

Welfare and Institutions Code Section 14161 states:

“Carriers and providers of Medicaid benefits shall be required to utilize uniform accounting and cost-reporting systems as shall be developed and adopted by the department. If any other provision of law provides for uniform accounting and cost-reporting systems for hospitals, the department shall adopt these systems.

Child Support Enforcement Program

Introduction

-
- The Child Support Program (CSP) was established by the federal government under Title IV-D of the Social Security Act; its purpose is to establish paternity and ensure support of children whose parents are
- absent from the home. All case level activity in Texas is handled by the local child support agency. In the case of children receiving public assistance, support collected is used to offset aid paid for those children and a proportionate share is returned to the federal, state and county governments, according to their participation in the aid payment. The federal government participates in the cost of the program
- operation through reimbursement of administrative costs at the rate shown on the claim form.

The Department of Child Support Services is the single state agency charged with overall IV-D program administration in Texas. As part of that responsibility, the department prescribes the fiscal system of the program. This includes federal administrative cost funding, recoupments of aid paid and the adjustment of grant advances.

CHAPTER 20

RETIREMENT SYSTEM AND OTHER POST EMPLOYMENT BENEFITS (OPEB) REPORTING

Introduction

20.01 Objectives of This Chapter

Although the Government Code specifies the organization, administration and operating guidelines for pension plans, standards concerning the accounting and financial reporting of governmental pension plans are established by the Government Accounting Standards Board (GASB). The purpose of this section is to clarify GASB pension accounting and financial reporting pronouncements and explain the applicability of these standards to the State's government retirement systems.

20.02 Applicability of This Chapter

The discussion is relevant to the reporting of retirement systems generally, but it is specifically directed to the approximately 20 counties operating their retirement systems under the County Employees Retirement Law of 1937 (hereinafter 1937 Act) Government Code sections 31450-33017 and the provisions of Government Code Sections 69002-74898 relating to justice, municipal and superior courts, and marshals. Nearly all other counties are members of the Public Employees Retirement System and, accordingly, do not have to file reports in conformance with this chapter. Counties operating retirement systems under Government Code Sections 53215 et. seq. should conform as much as practical to the provisions of this chapter.

20.03 Basic Features of the 1937 Act Systems

1937 Act systems employ the advance funding technique under which assets are accumulated during each member's working life (GC §31581). The system is administered by a board of five members (GC §31520) or, if safety members are included, nine members (GC §31520.1). The retirement board shall conduct an audit of the fund once every 12 months and report upon its financial condition to the board of supervisors and the retirement board (GC §31593). In addition to the 1937 Act requirement, a periodic independent financial audit is a requirement of all public pension and retirement plans under Chapter 21 of the Government Code. The county auditor or a certified public accountant shall perform an audit of the system in accordance with generally accepted auditing standards.

Other basic features are found in the following Government Code sections:

31453-5	County contributions
31462-1	Final compensation
31592-2.3	Disposition of excess earnings
31620	Members' contributions
31640	Service
31700	Deferred retirement
31780	Death benefits
31800	Integration with Social Security Old Age, Survivors and Disability Insurance (OASDI)

Additional references are cited below as they pertain to the topic discussed.

20.04 Generally Accepted Accounting Principles for State and Local Governmental Pension Plans and Employers

The Governmental Accounting Standards Board (GASB) has issued the following statements pertaining to governmental pension plans:

GASB Statement No. 25: Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans, establishes financial reporting standards for governmental pension plans.

GASB Statement No. 27: Accounting for Pensions by State and Local Governmental Employers, establishes accounting and financial reporting standards on pension plans for governmental employers.

Governmental pension plan accounting and financial reporting standards established in these authoritative pronouncements are incorporated into the various sections of this chapter. However, pension plans and employers should refer to the original text of these statements when determining the definitions and accounting and reporting of the pension plans' financial position.

20.05 Administration Expenses

Under Government Code section 31580, "The board of supervisors shall appropriate annually from the proper county funds the amount necessary to defray the entire expense of administration of the retirement system based upon budget estimates prepared by the treasurer."

Alternately, under Government Code section 31580.2, if the board of retirement and board of investment have appointed administrative, technical and clerical staff personnel pursuant to Government Code section 31522.1, the entire expense of administration, not to exceed eighteen-hundredths of one percent of the total assets of the system, shall be charged against earnings of the fund.

Actuarial Reviews – Pension Plans And Employers

20.06 Importance of Actuarial Reviews

The actuary, a key individual in the existence of a retirement system, must compute the required contribution rate. Based on the actuary's valuation and recommendation, the county board of supervisors may adopt new actuarial assumptions and member contribution rates, and county and district appropriations to ensure adequate funding for the pension plan.

Government Code section 7504 specifies that services must be performed by an enrolled actuary. "An enrolled actuary, for the purposes of this Section, means an actuary enrolled under subtitle C of Title III of the federal Employee Retirement Income Security Act of 1974 (Public Law 93-406) and who has demonstrated experience in public retirement systems."

The American Academy of Actuaries, in its Actuarial Principles and Practices in Connection with Pension Plans, states the elements that should be included in an actuarial valuation conducted in accordance with generally accepted actuarial principles and practices.

20.07 Frequency of Actuarial Valuation

At present, there are two sets of rules addressing the frequency of actuarial valuation in a governmental pension plan in the State of Texas. Government Code Sections 31453 and 7504 both require an actuarial valuation made at intervals not to exceed three years. GASB Statement No. 25: Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans, and

GASB Statement No. 27: Accounting for Pensions by State and Local Governmental Employers, require an actuarial valuation made at intervals not to exceed two years.

Although the 1937 Act requires an actuarial valuation only once every three years, use of this frequency may cause assumptions to become inaccurate with respect to changing conditions during the intervening period. Factors such as significant changes in benefit provisions, or the size or composition of the population covered by the plan since the previous valuation, may affect the results of the valuation. As a result, obsolete rates can be used and sizeable actuarial deficits or surpluses can occur.

Therefore, an actuarial valuation should be performed at least once every two years (24 months) in accordance with GASB Statement No. 25 and GASB Statement No. 27. However, to ensure that rates may remain more attuned to changing conditions, it is recommended that counties consider having a yearly actuarial valuation.

20.08 Actuarial Valuation Parameters and Definitions

Specific actuarial valuation parameters and definitions are established in GASB Statements No. 25 and GASB Statement No. 27. The actuarial methods and assumptions applied for financial reporting should be the same methods and assumptions applied in determining the plan's funding requirements, unless complying with the standards require the use of different methods or assumptions. A pension plan and its participating employer(s) should apply the same actuarial methods and assumptions in determining similar or related information disclosed in their respective financial reports.

20.09 The Schedule of Funding Progress

- a. Benefits to Be Included - The actuarial present value of total projected benefits should include all pension benefits to be provided by the plan to the plan members or their beneficiaries in accordance with:
 1. The terms of the plan, and
 2. Any additional statutory or contractual agreement (e.g., cost-of-living adjustments and other types of postretirement benefit increases not previously included in the plan terms).
- b. Actuarial Assumptions - The selection of all actuarial assumptions should be guided by Actuarial Standard of Practice No. 4, Measuring Pension Obligations, as revised from time to time by the Actuarial Standards Board.
- c. Economic Assumptions
- d. Actuarial Cost Method - The actuary should use one of the following actuarial cost methods: entry age, frozen entry age, attained age, frozen attained age, projected unit credit, or aggregate actuarial cost method.
- e. Actuarial Value of Assets - Generally, a market-related valuation should be used.
- f. Actuarial Accrued Liability (AAL) - This is the portion of pension liability not provided for by future normal costs.
- g. Unfunded Actuarial Accrued Liability (UAAL) - This is the excess of the AAL over the actuarial value of the asset. A positive represents a liability; a negative represents a funding excess.

20.10 The Schedule of Employer Contributions

The employer(s) annual required contributions (ARC) computation should be actuarially determined and include the employer's normal cost and a provision(s) for amortizing the total unfunded actuarial accrued liability (UAAL).

Amortization parameters:

- Maximum amortization period - For a term of not more than ten years from the effective date of GASB Statement No. 25, June 30, 1996: 40 years. After that ten-year term: 30 years.
- Minimum amortization period - Ten years; this restriction does not apply when a plan is closed to new entrants and all or most of the plan members have retired.
- Amortization method - The total unfunded actuarial liability may be determined in level dollar amounts or as a level percentage of the projected payroll of active members. If the level percentage of projected payroll method is used, the assumed payroll growth rate should not include an assumed increase in the number of active plan members.

Valuation Of Investments - Pension Plans

20.11 Permissible Investments

Government Code section 31594 allows the board of the retirement system to invest in any form or type of investment deemed prudent by the board, pursuant to the requirements of Government Code section 31595.

Government Code section 31595 states the fiduciary duties of the board and its officers with respect to the system.

20.12 Valuation Basis

According to GASB Statement No. 25, plan investments, whether equity or debt securities, real estates, or other investments (excluding insurance contracts), should be reported at their fair market value at the reporting date.

20.13 Net Appreciation (Depreciation) in the Fair Value of Investments

The net appreciation (depreciation) in the fair value of investments includes the realized gain or loss on investments that were both bought and sold during the year and the unrealized gains and losses.

Financial Statements - Pension Plans And Employers

20.14 Required Statements

Retirement systems operating under the 1937 Act are required to submit financial statements under two separate Government Code requirements, as follows:

- a. Government Code Sections 31597 and 31597.1 require that the retirement board file with the county auditor and board of supervisors a statement exhibiting financial position of the fund at the end of the operating year, June 30 for fiscal-year plans and December 31 for calendar-year plans, and transactions for the year ended. The statements shall be filed before October 31 for fiscal-year plans and April 30 for calendar-year plans. There is no requirement that these financial statements be audited.
- b. Government Code section 7503 requires that all state and local public retirement systems prepare an annual report in accordance with Generally Accepted Accounting Principles (GAAP), and Government Code section 7504 requires that the audited financial statements be submitted to the State Controller within six months of the close of each fiscal year.

The following statements are required by generally accepted governmental accounting principles:

1. A Statement of Plan Net Assets that includes information about the plan assets, liabilities, and net assets as of the plan's fiscal year (reporting date). The statement should provide information about the fair value and composition of net assets.
2. A Statement of Changes in Plan Assets that includes information presented in three sections:
 - Additions to plan assets: contributions from the employer(s), plan members, and other sources, and net investment income.
 - Deductions from plan assets: benefits and refunds paid to plan members and beneficiaries, and total administrative expenses.
 - Net increase (or decrease) for the year in plan net assets.

20.15 Chart of Accounts and Explanations of Accounts

The following accounts should be maintained to meet the reporting requirements of Government Code Sections 7501-7504 and GASB Statement No. 25. It is recommended that these accounts be used in the preparation of the aforementioned financial statements.

Statement of Plan Net Assets	Explanation of Account
Cash and Cash Equivalents	
Receivables	Accrued interest on cash deposits, bonds, and other negotiable instruments
Contributions Receivable	Member and employer retirement contributions accrued but not yet received
Interest Receivable	
Dividends Receivable	Accrued dividends on stocks or other investments
Mortgage Loans	The current portion of real estate mortgage loans
Other	Receivables that cannot be properly classified under the categories listed above
Investments	Stated at Fair Value
Government Bonds	Include U.S. government bonds, government agency bonds (e.g., Federal Land Bank and Federal Home Loan Banks), and municipal bonds
Corporate Bonds	
Corporate Stocks	Include both preferred and common stocks
Real Estate Mortgage Loans	At amortized cost—include in this category FHA, VA, GNMA, FNMA, conventional single-family loan, . FHA project loans, private-placement mortgage backed securities, etc.
Real Estate Equity Investments	The acquisition cost of real estate property such as land and buildings
Short-Term Investments	Include time certificates of deposits, banker acceptances, and commercial and finance paper
Other	Investments that cannot be properly classified under the investment categories listed above
Capital Assets	
Equipment and Furniture	Tangible property of a more or less permanent nature, other than land or buildings and improvements thereon
Accumulated Depreciation - Equipment and Furniture	A valuation account to record the accumulation of periodic credits made to record the expiration of the estimated service life of capital assets
Buildings and Improvements	A capital asset account reflecting the acquisition cost of permanent structures owned or held and improvements thereon
Accumulated Depreciation - Buildings and Improvements	A valuation account to record the accumulation of periodic credits made to record the expiration of the estimated service life of capital assets
Land	A capital asset account that reflects the cost of land owned or held
Other Assets	Those assets that cannot be reasonably categorized under the asset classification discussed above (e.g., long-term receivables)
Liabilities	Usually short-term in nature—include benefits due but unpaid, employer and member contributions received in advance, and accrued expenses (expenses incurred but not due until a later date)
Accounts Payable	
Accrued Expense	
Other	

Net Assets Held for Pension Benefits	
Active Member Reserves	Assets accumulated by active member retirement contributions and accumulated interest on active member contribution to fund their basic, cost-of-living, and other retirement benefits (detail by general and safety members)
General	
Safety	
Other	All other reserves not described above including contingency reserves
Employer Advance Reserves	Assets accumulated by employer contributions to fund future basic, cost-of-living, disability, and other retirement benefits (detail by general and safety members)
General	
Safety	
Other	All other reserves not described above including contingency reserves
Retired Reserves	Include employer pension reserves, member annuity reserves, and other reserves used to pay benefits to current retirees and beneficiaries (detail by general and safety members)
General	
Safety	
Contingency Reserves	
Other Reserves	All other reserves not described above
Unrestricted	Unrestricted fund equity
Statement of Changes in Plan Net Assets	Explanation of Account
Additions	
Member Contribution	Member contributions paid into the system to fund basic, cost-of-living, and other retirement benefits (detail by general and safety members)
General Members	
Safety Members	
Employer Contribution	The portion of employer contribution to fund benefits associated with service rendered by plan participants in the current year, as determined under the plan's actuarial cost method (detail by general and safety members)
Normal Cost - General Members	
Normal Cost - Safety Members	
Past Service Cost - General Members	The portion of employer contribution designed to pay interest on, and to amortize the principal of, the unfunded actuarial accrued liability, as determined under the plan's actuarial cost method (detail by general and safety members)
Past Service Cost - Safety Members	
Employer Subsidies of Member Contribution - General Members	Report member contributions paid for by the employer (detail by general and safety members)
Employer Subsidies of Member Contribution - Safety Members	
Net Investment Income	Monies earned on cash deposits, bonds, and other investments. Include amortization of premiums and discounts on debt securities and interest income on leases
Interest	
Dividends	
	The sum of:
	1. Realized gains and losses on investments both bought and sold during the year, measured as the difference between the proceeds of sale and the original cost;
	2. Realized gains and losses on investments bought in prior years and sold during this year, measured as the difference between the proceeds of sale and the fair value of the investment at the beginning of the year; and
	3. Unrealized gains and losses for the year on investments held at year-end, measured as the difference between fair value of the investment at year-end, and either the original cost (if purchased during the year) or the fair value of the investment at the beginning of the year (if purchased in a prior year)
Net Appreciation (Depreciation) in Fair Value of Investments	
Total Investment Expenses	Deduct investment management and custodial fees and other significant investment related costs

Deductions	
Benefit Payments	
Service Retirement Benefits - General Members	Pension and annuity payments on account of service retirement. Includes survivor continuance benefits (detail by general and safety members)
Service Retirement Benefits - Safety Members	
Disability Benefits - General Members	Payments to members retired on account of total and permanent disability, or payments on account of partial and temporary disability (detail by general and safety members)
Disability Benefits - Safety Members	
Death Benefits - General Members	Lump sum payments made to a designated beneficiary or to the estate of a member upon the member's death (detail by general and safety members)
Death Benefits - Safety Members	
Other	Include payments made to members from employer contributions prior to normal or early retirement age and retired member health insurance premiums
Refunds	
Membership Refunds - General Members	A refund of contributions, including interest, to a member upon separation from service, or to the beneficiary upon the member's death (detail by general and safety members)
Membership Refunds - Safety Members	
Employer Refunds - General Members	Report employer refunds (detail by general and safety members)
Employer Refunds - Safety Members	
Administration	
General	Administrative and management cost pertaining to the retirement system
Professional Services	Investment counseling fees, actuarial services, audit services and other professional charges
Other Expenses	

Financial Reporting For Pension Plans By Counties

20.17 Financial Reporting Framework

The financial reporting framework under GAAP for local governmental employers that provide or participate in pension plans is extensively discussed in GASB Statement No. 27, with reference to Statements No. 25 and GASB Statement No. 26. GASB Statements No. 25 and GASB Statement No. 27 apply to a single-employer, agent multiple-employer, or cost-sharing multiple-employer defined benefit pension plan that provides retirement income and other types of postemployment benefits, including disability benefits, death benefits, life insurance, and healthcare benefits, or a defined contribution plan.

The requirements established in the GASB statements mentioned above apply whether:

- The plan is included as a pension trust fund in the financial reporting entity of the employer, or
- The pension plan's financial report is included in a separate financial report issued by the plan or by the public employee retirement system that administers the plan and is also included as a pension trust fund in the financial reporting entity of the sponsor or employer.

20.18 Financial Statements

The following statements are required by GASB Statement No. 25 when the pension plan's financial statements are solely presented in the financial report of an employer:

- A Statement of Plan Net Assets.
- A Statement of Changes in Plan Net Assets.

20.19 Notes - Pension Plan Financial Report Solely in Financial Report

The following Notes to the Financial Statements are required (minimum requirements) when the pension plan's financial statements are solely presented in the financial report of an employer (pension trust fund):

- All disclosures as described in GASB Statement No. 25.
- Plan Description Section - Whether the pension plan issues a stand-alone financial report, or is included in the report of a public employee retirement system or another entity, and, if so, how to obtain the report as described in GASB Statement No. 27.
- Funding Policy Section - Required contribution rate(s) of the employer in accordance with the funding policy, in dollars or as a percentage of current-year covered payroll, as described in GASB Statement No. 27.

20.20 Notes - Pension Plan Financial Report Available in Stand-Alone Report

The following Notes to the Financial Statements are required when the pension plan issued a publicly available stand-alone financial report and presented its financial report in the financial report of an employer (pension trust fund), provided that the employer discloses information about how to obtain the stand-alone financial report:

- Plan description as described in GASB Statement No. 27
- Disclosure of the number of participating employers and other contributing entities as described in GASB Statement No. 25
- Summary of significant accounting policies as described in GASB Statement No. 25
- Funding policy as described in GASB Statement No. 27
- Concentration of investments as described in GASB Statement No. 25

20.21 Additional Notes

- Counties classified as single-employer or agent multiple-employer under GASB Statement No. 27 should refer to GASB Statement No. 27 for additional financial statements footnote disclosures.
- Counties classified as cost-sharing multiple-employer under GASB Statement No. 27 should refer to GASB Statement No. 27 for additional financial statements footnote disclosures.

20.22 Required Supplementary Information - Employer

Additional required supplementary information for a single-employer or agent multiple-employer as described in GASB Statement No. 27 is as follows:

- A schedule of funding progress that includes historical trend information about the actuarially determined funded status of the plan from a long-term, on-going plan perspective and the progress made in accumulating sufficient assets for at least three years.
- Factors that significantly affect the identification of trends in the amounts reported.

Financial Reporting By Pension Plans

20.23 Financial Reporting Framework

The financial reporting framework for a local government defined benefit pension plan is extensively discussed in GASB Statement No. 25. GASB Statement No. 25 applies to a single-employer, agent multi-employer, or cost-sharing multiple-employer defined benefit pension plan that provides retirement income and other types of postemployment benefits, including disability benefits, death benefits, life insurance and healthcare benefits.

The requirements apply whether:

- The plan is included as a pension trust fund in the financial reporting entity of the employer, or
- The plan's financial statements are included in a separate financial report issued by the plan or by the public employee retirement system that administers the plan.

20.24 Financial Statements

The following statements are required by GASB Statement No. 25:

- A Statement of Plan Net Assets.
- A Statement of Changes In Plan Net Assets.

20.25 Notes

The following Notes to the Financial Statements are required, as described in GASB Statement No. 25:

- Plan description.
- Summary of significant accounting policies
- Contributions and reserves.
- Funding policy
- Concentration of investments.
- Required Supplementary Information (RSI)

20.26 Required Supplementary Information (RSI)

The following RSI is required by GASB Statement No. 25 and should be presented by the plan immediately after the notes to the financial statement (all actuarially determined information reported should be calculated in accordance with the parameters stated in Section 20.08: Actuarial Valuation Parameters and Definitions, and should be presented as of the actuarial calculation date):

- A schedule of funding progress that includes historical trend information about the actuarially determined funded status of the plan from a long-term, on-going plan perspective, and the progress made in accumulating sufficient assets for at least six years.
- A schedule of employer contributions that includes historical trend information about the annual required contributions of the employer(s) (ARC) and the contributions made by the employer(s) in relation to the ARC for at least six years.

20.27 Notes to Required Supplementary Information

The following Notes to the Required Supplementary Information are required by GASB Statement No. 25:

- Identification of the actuarial methods and significant assumptions used for the most recent year reported in the required schedules, including the actuarial cost method, the method(s) used to determine the actuarial value of assets, and the assumptions with respect to the inflation rate, investment return, projected salary increases, and postretirement benefit increases.
- Also disclose the amortization method (level dollar or level percentage of projected payroll) and the amortization period (equivalent single amortization period, for plans that use multiple periods) for the most recent actuarial valuation and whether the period is closed or open. Plans that use the aggregate actuarial cost method should disclose that the method does not identify or separate amortized unfunded actuarial liabilities.
- Factors that significantly affect the identification of trends in the amounts reported include, for example, changes in benefit provisions, the size or composition of the population covered by the plan, or the actuarial methods and assumptions used. (Except for amounts previously reported based on the standard measures of the pension benefit obligation according to GASB Statement No. 5: Disclosure of Pension Information by Public Employee Retirement Systems and State and Local Governmental Employers, the amounts reported for prior years should not be reported, unless that measure was used in determining the employer's actuarially determined required contributions for the year for which the amounts are reported.)

Notes to Financial Statements

An integral part of the financial statements are notes that describe important features of the system and explain selected items of the statements. Due to the large number of variations in footnote disclosures, depending on the type of pension plan and whether the disclosures are made by the pension plan or the employer(s), each individual pension plan and employer should use the appropriate examples given in GASB Statement No. 25 and GASB Statement No. 27 as a guide and write their own footnote disclosures to meet the objectives of their own financial report.

SCHEDULE OF FUNDING PROGRESS (Plan and Employer) (Dollar amounts in thousands)						
Actuarial Valuation Date	Actuarial Value of Assets	Actuarial Accrued Liability (AAL) - Entry	Unfunded AAL (UAAL)	Funded Ratio	Covered Payroll	UAAL as a Percentage of Covered Payroll
	(a)	(b)	(b-a)	(a/b)	(c)	[(b-a)/c]
12/31/X5	\$2,005,238	\$2,626,296	\$621,058	76.4%	\$ 901,566	68.9%

Projected salary increases*	5.5 - 9.5%
Cost-of-living adjustments	None

**Includes inflation at 5.50%*

Other Post-Employment Benefits Reporting

20.29 Objectives of This Section

The purpose of this section is to clarify GASB Other Post-Employment Benefits (OPEB) accounting and financial reporting pronouncements and explain the applicability of these standards to Local Government Financial Statements.

20.30 Applicability of This Section

This section is relevant to any Local Government that provides other post-employment benefits as part of the total compensation offered to attract and retain the services of qualified employees.

20.31 Generally Accepted Accounting Principles for Local Government Other Post-Employment Benefits Plans, and Employers

GASB Statement No. 43: Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans, establishes uniform financial reporting standards for OPEB plans and supersedes the interim guidance included in GASB Statement No. 26: Financial Reporting for Postemployment Healthcare Plans Administered by Defined Benefit Pension Plans.

GASB Statement No. 45: Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions, improves the relevance and usefulness of financial reporting by (a) requiring systematic, accrual-basis measurement and recognition of OPEB cost (expense) over a period that approximates employees' years of service and (b) providing information about actuarial accrued liabilities associated with OPEB, and whether and to what extent, progress is being made in funding the plan.

20.32 Frequency of Actuarial Valuation

GASB Statement No. 43 and GASB Statement No. 45 requires an actuarial valuation every two years for plans with more than 200 members; and every three years for plans with less than 200 members. OPEB plans with a total membership of fewer than one hundred have the option to apply a simplified alternative measurement method instead of obtaining actuarial valuations.

20.33 The Schedule of Employer Contributions

Amortization parameters (OPEB Plans):

- **Maximum Amortization Period** - The maximum acceptable amortization period for the total unfunded actuarial liability is thirty years. The total unfunded actuarial liability may be amortized as one amount, or components of the total may be separately amortized.
- **Minimum Amortization Period** - The maximum acceptable amortization period for the total unfunded actuarial liability is 10 years and is not required when a plan is closed to new entrants and all or almost all of the plan members have retired.
- **Amortization Method** - The total unfunded actuarial liability may be determined in level dollar amounts or as a level percentage of projected payroll of active plan members; however, projected decreases in that number should be included if no new members are permitted to enter the plan.

20.34 Financial Reporting Framework

The financial reporting framework under GAAP for local governmental employers that provide or participate in OPEB plans is extensively discussed in GASB Statements No. 43 and GASB Statement No. 45.

The requirements established in the GASB statements mentioned above apply whether:

- The plan is included as a pension trust fund in the financial reporting entity of the employer, or
- The OPEB plan's financial report is included in a separate financial report issued by the plan or by the public employee retirement system that administers the plan and is also included as an OPEB trust fund in the financial reporting entity of the sponsor or employer.

20.35 Financial Statements

The following statements are required by GASB Statements No. 43 and GASB Statement No. 45:

- A Statement of Plan Net Assets
- A Statement of Changes in Plan Net Assets
- Notes to the Financial Statements
- A required schedule of funding progress (RSI)
- A required schedule of employer contribution (RSI)

CHAPTER 21

DEFERRED COMPENSATION PLANS

General

21.01 Nature and Purpose

The chapter as written is intended to apply to deferred compensation plans under Internal Revenue Code (IRC) Section 457; however, the accounting procedures prescribed also apply to other deferred compensation plans.

21.02 Nature of IRC Section 457 Plan

Reference to deferred compensation plans is made in IRC Section 457 and in several sections of the state code. Under a county deferred compensation plan, the employee may postpone receipt of part of his/her current salary until after retirement.

21.03 Governing Federal Regulations

Significant federal regulations pertaining to IRC Section 457 plans are as follows:

The plan must:

- Limit participants to state and local government employees
- Limit the amount deferred to that permitted by law
- Provide that the employee must enter into a deferred agreement before the first day of the month in which a deduction is to be taken
- Prohibit distribution of amounts payable under the plan to the participants or other beneficiaries until after the participant leaves county service or is faced with an unforeseeable emergency
- Provides that all assets and income of the plan are held in trust for the exclusive benefit of the participants and their beneficiaries

In addition, the plan should explain:

- The meanings of words and terms
- Who will administer the plan
- Types of investments to be made
- Who bears the cost of administration
- Which employees are eligible
- How employees may enroll
- The sign-up period
- Maximum and minimum contributions
- Investment options available to employees
- How earnings are credited to individual accounts
- What amount of contributions is terminated or changed

The options available to the employee/beneficiary in the event of retirement, separation, disability, death, leave of absence, and hardship

Provision must be made for the issuance of either W-2 or 1099 forms to former employees or their beneficiaries, covering plan disbursements.

21.04 Social Security and Retirement Unaffected

Participation in a deferred compensation plan does not affect the employee's Social Security and retirement contributions, which continue to be based upon gross salary before any deductions*. The payroll system must be programmed to compute Social Security and retirement on gross salary as well as federal and state income taxes on the gross salary minus the amount of compensation deferred.

* This is true except when the agreement between the contracting agency and the public retirement system specifically excludes deferred compensation from the base.

21.05 Other Operating Funds Unaffected

Existence of a deferred compensation plan has no effect upon the budget and expenditures of the operating funds that finance employee salaries. Both continue to be recorded at the gross amount. Deferred compensation is a payroll deduction. It should be noted that a deferred compensation plan established under IRC Section 401(k) allows employer-paid contributions. Those contributions should be recorded as retirement expenditures of the operating funds that finance employee salaries.

Investments

21.06 Results Not Guaranteed

The county places moneys received from deferred compensation contributions in the types of investments authorized by the plan. There is no guarantee that any particular rate of earnings will be realized, or that there will even be any gain. The employee assumes all investment risks.

21.07 Investment Methods

The county may decide to invest deferred compensation amounts itself or it may elect to enter into a financial services contract which designates a third party to invest the deferred compensation amounts.

If the county decides to invest the amounts itself, the amounts may be invested only by the board or the treasurer (with approval of the board). If the plan so provides, a participant advisory committee can provide investment advice and guidance.

The board of supervisors has general authority to contract for special services, including financial services. Investment and trustee services associated with deferred compensation may be contracted out if:

- The terms and conditions are set forth in the contract
- The deferred compensation is deposited with a corporation or association authorized to conduct the business of a trust company in this state
- The deferred compensation is invested only in the manner set forth in the written agreement
- The agreement provides that deferred compensation and any increment will be returned to the board if the contractor fails to comply with terms and conditions of the agreement

While the county may contract with one or more fiscal agents for investment, depository, disbursement and accounting services, control and responsibility cannot be delegated.

21.08 Valuation of Investments

Counties that report IRC Section 457 plans should apply the valuation provisions of GASB Statement 31: Accounting and Financial Reporting for Certain Investments and for External Investment Pools, to plan investments listed in subparagraphs 2a through 2e of that statement. All other plan investments should be reported at fair value. If it is impractical to obtain investment valuation information from the plan administrator as of the county's balance sheet date, the most recent report of the administrator should be used, adjusted for interim contributions and withdrawals. This valuation approach is required even if the plan participant's share is determined by some other valuation method. Investment income should also be reported as required by GASB Statement 31: Accounting and Financial Reporting for Certain Investments and for External Investment Pools.

Accounting

21.09 Accounting Considerations

The IRC requires that moneys originating from the deferral of compensation by employees be "held in trust for the exclusive benefit of the participants and their beneficiaries." GASB Statement No. 32: Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans—a rescission of GASB Statement No. 2 and an amendment of GASB Statement No. 31, provides guidance in determining when such assets should be reported in the county's financial statements.

Plans not requiring reporting in county financial statements based on this guidance would use an agency fund to account for payroll deductions and third-party administrator payments.

Plans that require reporting in county financial statements based on this guidance would use a pension (and other employee benefit) trust fund as defined by GASB Statement No. 34: Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Government. The suggested title of the fund is the Deferred Compensation Investment Fund. Income is recognized upon the receipt (and investment) of deferred salary amounts from employees and employers. Investment income is recognized in accordance with the requirements of GASB Statement No. 31: Accounting and Financial Reporting for Certain Investments and for External Investment Pools. Expenditures are recognized upon the withdrawal of employee income deferrals, payment of compensation to retired participants, and payment of administrative fees.

Assets should be limited to cash, investments, and amounts due from other funds. Liabilities are generally limited to amounts being processed for disbursement, but not yet disbursed at June 30. The participants' equity is reflected in the fund balance of the trust fund.

Proper accounting controls require that either the county or the external administrator maintain, for each participant, subsidiary accounting records that individually report the employee's contribution, employer contributions, investment income, and administrative costs. The total of these individual subsidiary records should equal (or be reconcilable to) the total reported at the fund level for financial statement purposes.

22.03	Allocation Bases for Risk Management	391
22.04	Glossary of Risk Management Terms	392

This page intentionally left blank

CHAPTER 22

RISK MANAGEMENT

22.01 Risk Management

The cost of “Risk” includes: (1) Insurance — which is merely a funding medium or a prefunding of losses; (2) Uninsured Losses — which is the retained loss, including small items such as minor accidents, repairs and replacements, and deductibles; (3) Administration — salaries, benefits and other operating expenses associated with the total risk of the agency; and (4) Safety Program Cost — without risk there would be no need for such a program.

The most important aspect of a risk management program is to formulate and establish a risk management policy statement. This document, in the form of a resolution by the board of supervisors, sets the tone for the risk management program throughout the county by communicating from the board to all levels of the jurisdiction: (1) the goals of the risk management program; (2) authority and responsibilities of the risk manager; (3) coordination of the risk management activities; (4) guidelines on risk retention through the use of deductibles of self-insurance; (5) the centralization of the insurance responsibilities; and (6) support of the risk management philosophy of loss reduction and prevention.

The development, operation, control and review of a risk management program that is attuned to this policy statement dictates that the total program be centrally budgeted. To capture the “total cost” of the program, it is recommended that the accounting for the program be accomplished by utilizing an internal service fund (ISF). This also allows for better allocation of cost back to the various operating funds serviced, and is the best method that a jurisdiction has of determining the total cost of the risk management program. All other treatments are lacking in some components of the cost. The evaluation, operation, control and review of the risk management program also is simplified with this total program approach. This method has been designed to conform to generally accepted accounting principles (GAAP) for both purchased insurance as well as “self-insurance.”

The following pronouncements of the Governmental Accounting Standards Board (GASB) provide accounting standards for risk financing: GASB Statement No. 10: Accounting and Financial Reporting for Risk Financing and Related Insurance Issues, GASB Statement No. 30: Risk Financing Omnibus—an amendment of GASB Statement No. 10, and GASB Interpretation No. 4: Financial Reporting for Reverse Repurchase Agreements—an interpretation of GASB Statement No. 3.

The general accounting procedures for ISFs are described in Chapter 13: Proprietary Funds of this manual. The ISF method is recommended for any county with a partially or wholly self-insured program. Use of the General Fund or Fund Incurring the RISK (FIR) to record self-insurance costs is an acceptable alternative.

Illustrative entries unique to risk management ISFs are presented in Chapter 22: Risk Management Section 22.02: Risk Management Internal Service Fund (ISF) Illustrative Entries.

22.02 Risk Management Internal Service Fund (ISF) Illustrative Entries

Assume that a county is under a self-administered risk management program that includes workers' compensation and liability insurance and is using a contracting claims adjuster.

- a) On July 1, the county's operating funds are billed for annual liability premium charges and workers' compensation insurance charges, based on the relative risk factors and the loss experience for each department:

Account	Sub	Debit	Credit
Due From Other Funds		2,100,000	
Revenue From Liability Premium Charges			900,000
Revenue From Workers' Compensation Premium Charges			1,200,000
General Fund	1,100,000		
Road Fund	1,000,000		

- b) Cash is received from the operating funds as a result of billings by the ISF:

Account	Sub	Debit	Credit
Cash		2,100,000	
Due From Other Funds			2,100,000
General Fund	1,100,000		
Road fund	1,000,000		

- c) On September 1, the contract claims adjuster is paid the full amount of a 13-month contract at \$1,000 per month, extending from July 1, 20X1 to July 31, 20X2:

Account	Debit	Credit
Professional and Specialized Services (claims adjuster expense)	2,000	
Prepaid Expenses	11,000	
Cash		13,000

- d) Liability and workers' compensation payments are made:

Account	Debit	Credit
Judgments and Damages - Liability	100,000	
Judgments and Damages - Workers' Compensation	470,000	
Cash		570,000

- e) Revenue is received from a third-party source whose liability resulted from actions that caused damage to county property or an injury to a county employee:

Account	Debit	Credit
Cash	7,000	
Revenue from Recoveries		7,000

- f) At year-end, the prepaid claims adjustor expense is adjusted and the current-year expense is recorded:

Account	Debit	Credit
Professional and Specialized Services (claims adjustor expense)	10,000	
Prepaid Expenses		10,000

- g) At year-end, claims incurred but not yet reported, reported but not yet settled, and settled but not yet paid are accrued:

Account	Debit	Credit
Judgments and Damages - Liability	300,000	
Judgments and Damages - Workers' Compensation	200,000	
Liability Claims Payable		300,000
Workers' Compensation Claims Payable		200,000

Claims incurred but not reported should be accrued in accordance with GASB Statement No. 10: Accounting and Financial Reporting for Risk Financing and Related Insurance Issues, and GASB Statement No. 30: Risk Financing Omnibus—an amendment of GASB Statement No. 10. This entry may be reversed at the beginning of the next fiscal year and then reestablished at the end of the year.

22.03 Allocation Bases for Risk Management

Self-insurance programs require an effective cost allocation system to formulate contributions. Contributions must be:

- Equitable, reflecting actual hazards and costs
- Based on easily ascertained and quantifiable data
- Adjustable for different size deductibles, if units have widely disparate financial size

The following list of insurances gives allocation bases for each:

Insurance Type	Allocation Base
Workers' Compensation	The county should establish at least a 50/50 division of experience/exposure. It is recommended that, after five years of loss history has been accumulated, a 70/30 division favoring experience; after ten years of history, an 80/20 division favoring experience.
General Liability	The county should establish at least a 50/50 division of experience/exposure. It is recommended that, after 7 to 10 years of loss history has been accumulated, a 70/30 division favoring experience.
Auto	Past loss experience, mileage, etc.
Property Damage	Property value; department activity risk factor; specific identification of policies that cover specific property; square footage for buildings occupied by more than one department
Group Insurance (Health, Life, etc.)	Number of employees
Fidelity	Department activity risk factor and number of employees

22.04 Glossary of Risk Management Terms

Definitions of commonly used risk management terms may be found in GASB Statement No. 10: Accounting and Financial Reporting for Risk Financing and Related Insurance Issues.

CHAPTER 23

GRANT, ENTITLEMENT AND SHARED REVENUE ACCOUNTING

23.01 Introduction

Counties receiving resources from other governmental units are often required to follow special legal, contractual, accounting or reporting requirements. This chapter provides general guidelines on the accounting treatment for grants, entitlements and shared revenues. Governmental Accounting Standards Board Statements No. 6, No. 24, No. 33, No. 34 and No. 36 have been used as sources of reference for this chapter.

23.02 Definitions

The following definitions make the distinction between grants, entitlements and shared revenues:

- Grant - a contribution or gift of cash or other asset from another governmental agency to be applied to a specified purpose or use. Grants are classified as either capital or operating and are program revenues unless unrestricted. Capital grants are restricted by the grantor to a specific acquisition and/or construction of a fixed asset. All other grants are classified as operating.
- Entitlement - the amount of payment to which a county is entitled as determined by the agency providing the resource. Determination of the entitlement usually follows an allocation formula contained in statute. It may not be restricted to a specified purpose or use.

Grants and entitlements are separated into two categories.

1. Government-Mandated Nonexchange Transactions - revenues from other governments and require the county to use them for specific purpose or purposes.
 2. Voluntary Nonexchange Transactions - revenues arise from legislative or contractual agreements, other than exchanges, entered into willingly by two or more parties.
- Shared Revenue - a revenue levied by one government but shared on a predetermined basis, often in proportion to the amount collected, with another level of government. State sales and gasoline taxes are examples of shared revenues that are derived tax revenues that the state administers and collects.

Throughout the remainder of this chapter, the word grant includes entitlement, shared revenue, and grant in its definition.

Pursuant to GASB Statement No. 24: Accounting and Financial Reporting for Certain Grants and Other Financial Assistance, food stamps will be recognized by the State as revenues and expenditures and, therefore, shall not be reported by the county.

23.03 Fund Identification

Accounting for grant proceeds shall be within one of the proper governmental, proprietary or fiduciary fund types. In identifying the proper fund to use, the purpose and requirements of the grant must be carefully reviewed.

Grants received to finance a function normally funded through the General Fund may be accounted for within that fund if legal requirements can be satisfied. However, the use of a special revenue fund may be appropriate for grants extending beyond one year because grant transactions and resources can be accounted for as a separate entity. Resources received to finance principal and interest on general long-term debt are to be accounted for in the Debt Service Fund. Capital grants received to purchase or construct capital assets other than those associated with proprietary fund types are to be accounted for in the Capital Projects Fund.

Capital or operating grants received for proprietary fund types are to be accounted for within the same fund types.

Pass-Through Grants are resources received by one governmental entity to transfer to or spend on behalf of a secondary recipient. All cash pass-through received by a government entity (referred to as a "recipient government") should be reported in the financial statements. As a general rule, cash pass-through grants should be recognized as recipient government serves only as a cash conduit, the grant should be reported in an Agency Fund. A recipient government serves only as a cash conduit if it merely transmits grantor-supplied moneys without having any responsibility for monitoring recipient compliance, determining recipient eligibility, or exercising discretion on how the funds are allocated.

Some grants may require more than one fund at the discretion of the recipient or grantor. Until determination of the proper funds to be used for such a grant, an agency fund may be used to account for such resources. However, resources held temporarily in this fund must be included in the government-wide statements. At the time of distribution from the agency fund, revenues will be recognized by the financed funds.

23.04 Basis of Accounting

The basis of accounting is determined by the type of nonexchange transaction. Based on the substance of the grant, entitlement, or shared revenue transactions, the county must determine whether the transactions are derived tax revenues, imposed nonexchange revenues, government-mandated, or voluntary nonexchange transactions. Under the accrual and modified accrual basis, the county can record revenue only when transactions are subject to reasonable estimation and collection is likely to occur. Only fund basis financial statements of Governmental Funds (General, Special Revenue, Capital Projects, Debt Service, and Permanent Funds) use the modified accrual basis. All other funds are accounted for on the accrual basis.

23.05 Revenue Recognition

Derived Tax Revenue - Revenues should be recognized when all of the following are met:

- a) The exchange that the tax is based upon has occurred
- b) The amount is measurable
- c) The tax is expected to be collected

Governmental-Mandated Nonexchange Transactions - Revenues should be recognized when all of the following are met:

- a) When the county qualifies as recipient or a secondary recipient qualifies
- b) The state or federal government has identified the period in which the county can expend resources
- c) The county has incurred cost related to the revenues (i.e., expenditure-driven grant programs)

Voluntary Nonexchange Transactions - Revenues should be recognized when all of the following are met:

- a) When the county qualifies as a recipient or a secondary recipient qualifies
- b) The state or federal government or other governmental unit has identified the period in which the county can expend resources
- c) The county has incurred cost related to the revenues (i.e., expenditure-driven grant programs)
- d) The county has met any contingency imposed by the provider and has the right to the resources

When using the modified accrual basis of accounting, availability is the final criterion when recording these nonexchange revenues.

After a nonexchange transaction has been recognized in the financial statements, it may become apparent that:

- a) The eligibility requirements are no longer met (the transaction was recognized as a government-mandated or voluntary nonexchange transaction)
- b) The recipient will not comply with the purpose restrictions within the specified time limit

In these circumstances, if it is probable that the provider will not provide the resources or will require the recipient to return all or part of the resources already received, the recipient should recognize a decrease in assets (or an increase in liabilities) and an expense, and the provider should recognize a decrease in liabilities (or an increase in assets) and a revenue, for the amount that the provider is expected to cancel or reclaim.

23.06 Capital Assets

Capital assets other than proprietary fund types are accounted for within the Capital Assets Accounting System. When capital assets are acquired with grant funds, it must be determined whether the grantor or the county is the legal owner. If the grantor retains an interest in the asset, then it should be segregated and reported separately within the Capital Assets Accounting System.

23.07 Grant Control

In order to ensure control over grants, the county shall maintain a proper grant inventory. It is suggested that grant information records be kept on each grant. A sample form is illustrated on the following page. This will be helpful in maintaining control over grants.

GRANT INFORMATION RECORD (Sample Form)

1	Title of Grant Project:				CFDA #
2	Grant Objectives:				Date
3	Dept.	No.	Contact Person	Phone	
4	Grantor Agency			Grant I.D. No.	
5	Funding Source and Statutes:				
	Name			Statute No.	
6	Contract Status:	Awarded		Applied For	
7	Contract Period:	From		To	
8	Will program occupy county facilities? Yes <input type="checkbox"/> No <input type="checkbox"/> Square Footage Occupied				
	Location				
	Budgetary				
9	a. Revenues will be deposited into:	Dept.	Index	Account	
	b. Appropriations will be recorded in:	Dept.	Index	Account	
	Fiscal Data				
		Sources of Contributions			Grant
		1	2	3	4
		Federal	State	County	Other
	Costs Included in Grant Contract	Revenue	Revenue	Contributions	Contributions
		5			
		Total			Grant
10	a. Personnel	\$	\$	\$	\$
	b. Services/Supplies				
	c. Equipment				
	d. Indirect Costs ¹				
	e. Other Charges Misc.				
	f. Total Grant	\$	\$	\$	\$
	Percentages				100%
	g. Unfunded Co. Costs				
	Total Cost of Grant	\$	\$	\$	\$
	h. What has been/will be the net county cost each year of the grant?		FY____ - ____	FY____ - ____	FY____ - ____

	Appropriations	\$	\$	\$	\$
	Less: Revenues				
	Net County Cost	\$	\$	\$	\$
11	How many years has grant been funded?				Is grant renewable? Yes <input type="checkbox"/> No <input type="checkbox"/>
12	Other Data/Comments				
Please present detail and calculations on reverse side of this sheet.					(page 1 of 2)

(Sample Form Continued)

INSTRUCTIONS FOR COMPLETING THE GRANT INFORMATION RECORD

1-7 Current data relating to attached grant application.

8 "County facilities" includes county building space, whether it is owned, rented, leased or leased with an option to purchase. Please Indicate:

(a) Address

(b) *Square footage to be occupied

9 Budgetary Data

10 Fiscal Data

(a) Personnel:

Indicate county employees' salaries and benefits

Indicate non-county employees' salaries and benefits

Total Personnel Costs

(b) Services & Supplies

Indicate additions to your departmental budget for this grant

(c) Equipment:

Indicate additions to your departmental budget for this grant

(d) Indirect Costs:

(Computation)

Dept. No

County Salaries
& BenefitsDepartmental
Indirect Rate*

Indirect Cost

County Employees (Refer to 10a)

Total (From 10a above)

\$

Total Indirect - Transfer to Line 10d

\$

(e) Other Charges and Misc. (detail if any miscellaneous)

(g) List below additional contribution of county resources not included in grant application.

Salaries Direct

Salaries — Administrative**

Services and Supplies

Equipment

Indirect Costs

Total (Transfer to Line 10g)

(h) Show appropriation, revenue, and net county cost by fiscal year. Amounts shown are actual expenditures and actual revenues expected to be paid or received during the fiscal year. Indicate whether figures are estimated. Total revenues must equal sum of Federal, State and other revenues in Columns 1, 2 and 4 of Line 10(f). Total net county cost must equal county contributions on Line 10(f), Column 3.

* Departmental indirect rates and space allocations are available from the Auditor-Controller's office.

** Include here only that portion of administrative salaries that is not included in the computation of the department's indirect rate.

(page 2 of 2)

23.08 Single Audit (Circular OMB A-133)

This circular is issued pursuant to the Single Audit Act of 1997, Public Law Section No. 98-502, as amended. It establishes audit requirements for state and local governments that receive federal aid and defines federal responsibilities for implementing and monitoring those requirements.

In complying with this act, it is imperative that the county is able to identify all federal revenues and the expenditure of those revenues. In addition, expenditures must be identified by program and federal catalog number as found in the catalog of Federal Domestic Assistance published by the General Services Administration.

APPENDIX A

GLOSSARY OF ACCOUNTING TERMS

This page intentionally left blank

APPENDIX C

GLOSSARY OF ACCOUNTING TERMS

The following explanations of terms are presented to aid in understanding the terminology generally used in governmental accounting, auditing, financial reporting and budgeting.

Abatement. A complete or partial cancellation of a levy imposed by a government. Abatements usually apply to tax levies, special assessments, and service charges.

Abstract. See Redemption Roll.

Accountability. The state of being obliged to explain one's actions, to justify what one does. Accountability requires governments to answer to the citizenry—to justify the raising of public resources and the purposes for which they are used. Governmental accountability is based on the belief that the citizenry has a “right to know,” a right to receive openly declared facts that may lead to public debate by the citizens and their elected representatives. See Fiscal Accountability, Financial Accountability, Operational Accountability.

Account. A record of a type of monetary transaction maintained in a ledger. Also sometimes referred to as object (for example, objects of expenditures or revenues). See Object.

Account number. See Coding.

Accounting period. See Fiscal period.

Accounting Principles Board (APB). Authoritative private-sector standard-setting body that preceded the Financial Accounting Standards Board. The APB issued guidance in the form of opinions.

Accounting procedures. All processes which discover, record, classify, and summarize financial information to produce financial reports and to provide internal control.

Accounting Standards Executive Committee (AcSEC). An AICPA committee that is authorized to issue Practice Bulletins. A Practice Bulletin specifically targeted to state and local governments and cleared by GASB would enjoy “level 2” status on the hierarchy of authoritative sources of GAAP.

Accounting system. The methods and records established to identify, assemble, analyze, classify, record and report a government's transactions and to maintain accountability for the related assets and liabilities.

Accounts payable. A short-term liability account reflecting amounts owed to private persons or organizations for goods and services received by a government (but not including amounts due to other funds of the same government).

Accounts receivable. An asset account reflecting amounts due from private persons or organizations for goods and services furnished by a government (but not including amounts due from other funds or other governments).

Accreted value. A valuation basis for certain investments and debt instruments that reports on the balance sheet only that portion of their face value that reflects principal and interest accrued to date.

Accrual basis. The basis of accounting under which transactions are recognized when they occur, regardless of the timing of related cash flows.

Accrued expenses. Expenses incurred but not paid.

Accrued interest payable. A liability account reflecting interest costs incurred but not due until a later date.

Accrued revenue. Revenues earned but not received. See Modified accrual basis.

Accrued taxes payable. A liability account reflecting taxes incurred but not due until a later date.

Accrued salaries and wages payable. A liability account reflecting salaries and wages earned by employees but not due until a later date.

Accumulated depreciation. A contra-asset account to report the accumulation of periodic credits made to reflect the expiration of the estimated service life of capital assets.

Acquisition costs. A term used in connection with public-entity risk pools. Costs that vary with and are primarily related to the acquisition of new and renewal contracts. Commissions and other costs that are primarily related to contracts issued or renewed during the period in which the costs are incurred are considered to be acquisition costs.

Actual accounts. Those accounts which show actual financial position and results of operations, such as actual assets, liabilities, fund balances, revenues, expenditures, and expenses, as distinguished from budgetary accounts. See Budgetary accounts.

AcSEC. See Accounting Standards Executive Committee.

Activity. A specific and distinguishable service performed by one or more organizational components of a government for the purpose of accomplishing a function for which the government is responsible. For example, “food inspection” is an activity performed in the discharge of the “health” function. See Subactivity.

Activity classification. Expenditure classification according to the specific lines of work performed by organization units. For example, “sewage treatment and disposal,” “garbage collection,” “garbage disposal,” and “street cleaning” are activities performed in carrying out the function of “sanitation.” The segregation of the expenditures made for each of these activities constitutes an activity classification.

Actuarial accrued liability. A term used in connection with defined benefit pension plans. That portion, as determined by a particular actuarial cost method, of the actuarial present value of pension plan benefits and expenses which is not provided for by future normal costs.

Actuarial assumptions. A term used in connection with defined benefit pension plans. Assumptions as to the occurrence of future events affecting pension costs, such as: mortality, withdrawal, disablement and retirement; changes in compensation and government-provided pension benefits; rates of investment earnings and asset appreciation or depreciation; procedures used to determine the actuarial value of assets; characteristics of future entrants for open group actuarial cost methods; and other relevant items.

Actuarial basis. A basis used in computing the amount of contributions to be made periodically to a fund or account so that the total contributions plus the compounded earnings thereon will equal the required payments to be made out of the fund. The factors taken into account in arriving at the amount of these contributions include the length of time over which each contribution is to be held and the rate of return compounded on such contribution over its life. A Pension Trust Fund for a public employee retirement system is an example of a fund used to account for a defined benefit pension plan concerned with actuarial basis data.

Actuarial cost method. A term used in connection with defined benefit pension plans. A procedure for determining the actuarial present value of pension plan benefits and expenses and for developing an actuarially equivalent allocation of such value to time periods, usually in the form of a normal cost and an actuarial accrued liability.

Actuarial section. One of five sections of a CAFR of a public employee retirement system. The contents of this section typically include the actuary's certification letter, a summary of actuarial assumptions and methods, a schedule of active member valuation data, a schedule of retirants and beneficiaries added to and removed from rolls, a solvency test, an analysis of financial experience, an independent actuarial review opinion (if available), and a discussion of changes in plan provisions (if the plan has been amended).

Actuarial value of assets. A term used in connection with defined benefit pension plans. The value of cash, investments, and other property belonging to a pension plan, as used by the actuary for the purpose of an actuarial valuation. The actuarial value of assets, which may represent an average value over time, normally differs from the amount reported in the financial statements, which is a point-in-time measure (i.e., as of the date of the statement of net assets).

ADA. Average Daily Attendance, as determined by the State Department of Education.

Additions. A term used to describe increases in the net assets of fiduciary funds.

Administration cost. Includes only those direct costs for administration, data processing, collection, and appeal that are incurred by county auditors, assessors, and tax collectors.

Adopted budget. The budget document formally approved by the board of supervisors after the required public hearings and deliberations on the recommended budget. See Final budget and Recommended budget.

Ad valorem property tax. Any assessment imposed on the basis of the value of the real property, including any special ad valorem assessment.

Ad valorem property taxation. Any source of revenue derived from applying a property tax rate to the assessed value of property.

Advance From _____ Fund. A liability account used to record noncurrent portions of a long-term debt owed by one fund to another fund within the same reporting entity. See Due From _____ Fund and Interfund Receivable/Payable.

Advance refunding. A transaction in which new debt is issued to provide monies to pay interest on old, outstanding debt as it becomes due, and to pay the principal on the old debt either as it matures or at an earlier call date. An advance refunding occurs before the maturity or call date of the old debt, and the proceeds of the new debt are invested until the maturity or call date of the old debt. Most advance refunding results in defeasance of debt. [SGAS 7]

Advance To _____ Fund. An asset account used to record noncurrent portions of a long-term loan from one fund to another fund within the same reporting entity. See Due To _____ Fund and Interfund Receivable/Payable.

Adverse opinion. An opinion stating the auditor's view that the financial statements do not present fairly the financial position, results of operations, or changes in financial position, in conformity with generally accepted accounting principles.

Agency funds. One of four types of fiduciary funds. Agency funds are used to report resources held by the reporting government in a purely custodial capacity (assets = liabilities). Agency funds typically involve only the receipt, temporary investment, and remittance of fiduciary resources to individuals, private organizations, or other governments. See Fiduciary funds.

Agent multiple-employer defined benefit pension/OPEB plan. An aggregation of single-employer plans, with pooled administrative and investment functions. Separate accounts are maintained for each employer so that the employer's contributions provide benefits only for the employees of that employer. A separate actuarial valuation is performed for each individual employer's plan to determine the employer's periodic contribution rate and other information for the individual plan, based on the benefit formula selected by the employer and the individual plan's proportionate share of the pooled assets.

Aggregate actuarial cost method. A term used in connection with defined benefit pension plans. A method under which the excess of the actuarial present value of projected benefits of the group included in an actuarial valuation over the actuarial value of assets is allocated on a level basis over the earnings or service of the group between the valuation date and assumed exit. This allocation is performed for the group as a whole, not as a sum of individual allocations. That portion of the actuarial present value allocated to a valuation year is called the normal cost. The actuarial accrued liability is equal to the actuarial value of assets.

Agricultural land. See Open Space Land.

Agricultural preserve. An area devoted to either agricultural use, recreational use, open space use, or any combination of such uses, and which is established in accordance with the provisions of the Texas Land Act.

Agricultural use. Use of land for the purpose of producing an agricultural commodity for commercial purposes.

Allocate. To divide a lump-sum appropriation into parts which are classified for expenditure by specific organization units and/or for specific purposes, activities, or objects. See Allocation.

Allocated claims adjustment expenses. A term used in connection with risk financing activities. Expenses associated directly with specific claims paid or in the process of settlement, such as legal and adjusters' fees. In the context of risk financing activities, expenses associated directly with specific claims paid or in the process of settlement, such as legal and adjuster's fees.

Allocation. A part of a lump-sum appropriation which is classified for expenditure by specific organization units and/or for special purposes, activities, or objects. See Allocate.

Allot. To divide a budgetary appropriation into amounts that may be encumbered or expended during an allotment period (e.g., a government may choose to allot its annual budget to 12 monthly periods). See Allotment and Allotment period.

Allotment. A part of an appropriation that may be encumbered or expended during a given period. See Allot and Allotment period.

Allotment ledger. A subsidiary ledger which contains an account for each allotment showing the amount allotted, expenditures for the allotment period, outstanding encumbrances, and net balance. See Appropriation ledger.

Allotment period. A period of time during which an allotment is effective. Monthly and quarterly allotments are most common. See Allot and Allotment.

Allowance For Uncollectibles. A contra-asset valuation account used to indicate the portion of a receivable not expected to be collected.

Alternate method of tax apportionment. Allows counties to allocate secured property taxes to jurisdictions at 100% of the billed amount rather than actual tax collections. The county collects all future delinquent payments, penalties and interest, and distributes them to the appropriate funds.

Amortization. (1) The portion of the cost of a limited-life or intangible asset charged as an expense during a particular period. (2) The reduction of debt by regular payments of principal and interest sufficient to retire the debt by maturity.

Amortization schedule. A schedule of debt service payments separating the portions of payments attributable to principal and interest.

Analytical review. The process of attempting to determine the reasonableness of financial data by comparing their behavior with other financial and nonfinancial data.

Annual budget. A budget applicable to a single fiscal year. See Budget and Operating budget.

Annual covered payroll. A term used in connection with defined benefit pension plans. All elements included in annual compensation paid to active employees on which contributions to a pension plan are based.

Annual financial report. A financial report applicable to a single fiscal year.

Annual inflation factor. See Cost of living.

Annual operating budget. See Operating budget.

Annual required contribution (ARC). A term used in connection with defined benefit pension plans. The employer's mandated contribution for the year, calculated in accordance with certain parameters. The parameters include requirements for the frequency and timing of actuarial methods and assumptions that are acceptable for financial reporting.

Annual tax increment. The difference resulting from the comparison of base-year to current- year values.

Annuities payable. A liability account reflecting the amount of annuities due and payable to retired employees in a public employee retirement system.

Annuity. A series of equal payments made or received at equal intervals over a specified period of time.

Annuity, amount of. The total amount of money accumulated or paid during an annuity period from an annuity and compound interest at a specified rate.

Annuity bonds. See Serial bonds.

Annuity period. The length of time during which annuity payments are to occur.

APB. See Accounting Principles Board.

Apportionment. See Allotment.

Appraisal. See Appraise.

Appraise. To estimate the value, particularly the value of property. If the property is valued for purposes of taxation, the narrower term "assess" is substituted.

Appropriated budget. The expenditure authority created by the appropriation bills or ordinances, which are signed into law, and the related estimated revenues. The appropriated budget would include all fund balance classifications, transfers, allocations, supplemental appropriations, and other legally authorized legislative and executive changes.

Appropriation. A legal authorization granted by a legislative body to make expenditures and to incur obligations for specific purposes. An appropriation is usually limited in amount and time it may be expended. See Continuing appropriation and Indeterminate appropriation.

Appropriation account. A budgetary account set up to record spending authorizations for specific purposes. The account is credited with the original appropriation and any supplemental appropriations and is charged with expenditures and encumbrances.

Appropriation balance. See Unallocated balance of appropriation, Unencumbered allotment, Unencumbered appropriation, Unexpended allotment, and Unexpended appropriation.

Appropriation bill. A bill through which appropriations are given legal effect. See Ordinance, Resolution, Order.

Appropriation expenditure. An expenditure chargeable to an appropriation. Since virtually all expenditures of governments are chargeable to appropriations, the term expenditures by itself is widely and properly used.

Appropriation expenditure ledger. See Appropriation ledger.

Appropriation for contingencies. A budgetary provision representing that portion of the financing requirements set aside to meet unforeseen expenditure requirements.

Appropriation ledger. A subsidiary ledger containing an account for each appropriation. Each account usually includes the amount originally appropriated, transfers to or from the appropriation, amounts charged against the appropriation, the available balance and other related information. See Allotment ledger.

Arbitrage. Classically, the simultaneous purchase and sale of the same or an equivalent security in order to profit from price discrepancies. In government finance, the most common occurrence of arbitrage involves the investment of the proceeds from the sale of tax-exempt securities in a taxable money market instrument that yields a higher rate, resulting in interest revenue in excess of interest costs.

Assess. To establish an official property value for taxation. See Appraise.

Assessed value. One hundred percent of full value for the 1981-82 fiscal year and the following fiscal years. For 1980-81 and prior fiscal years, the assessed value was 25 percent of the full value.

Assessed valuation. A valuation set upon real estate or other property by a government as a basis for levying taxes.

Assessee. The person to whom the property or tax is assessed.

Assessment. (1) The process of making the official valuation of property for taxation. (2) The valuation placed upon property as a result of this process. See Special assessment.

Assessment year. The period beginning with a lien date and ending immediately prior to the succeeding lien date for taxes levied by the same agency.

Assessor roll. See Roll Being Prepared.

Assessment roll. With real property, the official list containing the legal description of each parcel of property and its assessed valuation. The name and address of the last known owner usually are listed. With personal property, the assessment roll is the official list containing the name and address of the owner, a description of the personal property and its assessed value.

Asset. A probable future economic benefit obtained or controlled by a particular entity as a result of past transactions or events.

Asset allocation. A term used in connection with pension plans. The process of determining which types of investments are to be included and the percentages that they are to comprise in an overall investment portfolio.

Assigned fund balance. This is the portion of fund balance that reflects a government's intended use of resources. Such intent would have to be established at either the highest level of decision making, or by a body (finance committee) or an official designated for that purpose. Amounts in excess of nonspendable, restricted, and committed fund balance in funds other than the General Fund automatically would be reported as assigned fund balance.

Attained age actuarial cost method. A term used in connection with defined benefit pension plans. A method under which the excess of the actuarial present value of projected benefits over the actuarial accrued liability in respect to each individual included in an actuarial valuation is allocated on a level basis over the earnings or service of the individual between the valuation date and assumed exit. The portion of this actuarial present value that is allocated to a valuation year is called the normal cost. The actuarial accrued liability is determined using the unit credit actuarial cost method.

Audit. A methodical examination of utilization of resources. It concludes in a written report of its findings. An audit is a test of management's accounting system to determine the extent to which internal accounting controls are both available and being used. See Internal auditing, Independent audit, Financial audit, Program compliance audit, Single audit, and Performance auditing.

Audit committee. A group of individuals, selected by the governing body, having specific responsibility for addressing all issues related to audits of the entity. Ideally, audit committees form a direct communication link between the auditor and the governing body; therefore, the majority of the committee's members normally would be expected not to have management responsibilities within the entity under audit.

Audit finding. In the context of a financial audit, a weakness in internal controls or an instance of noncompliance with applicable laws and regulations that is presented in the audit report in conformity with GAGAS. A typical audit finding is composed of a statement of the condition (i.e., weakness or instance of noncompliance) and the criterion or criteria used to define it, an explanation of the cause of the condition, a discussion of its results, and recommendations for improvement. Findings ordinarily are presented together with a response from management, which states management's concurrence or non-concurrence with each finding and its plan for corrective action.

Audit guides. A series of AICPA publications that enjoy "level 2" status on the hierarchy of authoritative sources of GAAP.

Audit management. The process used to procure auditing services to monitor the performance of the auditor, and to ensure the satisfactory resolution of issues raised by the audit.

Audit procurement. The process used to obtain auditing services from independent public accountants.

Audit program. A detailed outline of work to be done and procedures to be followed in any given audit.

Auditor's report. In the context of a financial audit, a statement by the auditor describing the scope of the audit and the auditing standards applied in the examination, and setting forth the auditor's opinion on the fairness of presentation of the financial information in conformity with GAAP or some other comprehensive basis of accounting.

Audit resolution. The process whereby corrective action is planned, implemented and monitored to remedy weaknesses discovered and reported in conjunction with an audit.

Audit scope. In the context of a financial statement audit, the coverage provided by the independent auditor's opinion on the financial statements.

Audited claims payable. See Accounts payable.

Auditor. See Internal auditor and Independent auditor.

Auditor-Controller. If the office of the controller is established by the county, the county auditor is the ex-officio controller, charged with the additional duties of auditing and statistical and financial reporting. See County auditor or Director of finance .

Auditor rotation. Policy that a government periodically change the independent auditor of its financial statements.

Auditor's opinion. An expression in the audit report of the auditor's position on whether the financial information of the entity is presented fairly, in all material respects, in conformity with generally accepted accounting principles (or with other specified accounting principles applicable to the auditee).

Auditor's report on internal controls and compliance over financial reporting. Report issued in conjunction with a financial audit performed in accordance with GAGAS. In this report, the independent auditor reports on internal control weaknesses and instances of noncompliance discovered in connection with the financial audit, but does not offer an opinion on internal controls or compliance.

Authority. A government or public agency created to perform a single function or a restricted group of related activities. Usually, such units are financed from service charges, fees, and tolls, but in some instances they also have taxing powers. An authority may be completely independent of other governments or partially dependent upon other governments for its financing or the exercise of certain powers. See Special district.

Available financing. In governmental fund types, the sum of the components which are available to meet the financing requirements for the accounting period involved. It includes unassigned fund balance, decreases in other fund balance classifications (nonspendable, restricted, committed and assigned), revenues, other financing sources, and transfers in. This is a conventional term and should not be used in the financial statement presentation.

Available fund balance. For budgetary presentation purposes, that portion of the governmental type fund balance which is available for financing the budget requirements for the accounting period involved. This is a conventional term, which is synonymous with the accepted term "unassigned fund balance," of the general fund, and for other governmental fund types, the portion of the assigned fund balance being used to finance budget requirements.

Availability criterion. Principal of the modified accrual basis of accounting, according to which revenues may be recognized only when they are collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period.

Availability period. A specified period immediately following the close of the fiscal year, by the end of which cash must be collected for related revenue to be recognized in accordance with the availability criterion of modified accrual accounting.

Back taxes. All payments required to be made under any provision of law allowing payment of delinquent taxes in installments, except payments of current taxes due on the property and the penalties and costs on the current taxes.

Balance sheet. The financial statement disclosing the assets, liabilities and equity of an entity at a specified date in conformity with GAAP.

Bank balance. In the context of GASB Statement No. 3, Deposits With Financial Institutions, Investments (Including Repurchase Agreements), and Reverse Repurchase Agreements, the amount credited by a financial institution to the government's account as opposed to the government's own ledger balance for the account (e.g., if checks have been written against an account but have not yet cleared the bank, the ledger balance would be lower than the bank balance).

Bank holding company. A company that controls one or more banks and may own subsidiaries with operations closely related to banking. When branch banking was severely limited, bank holding company statutes allowed banking systems to develop by permitting common ownership of several banks. Generally, the Bank Holding Company Act provides that a holding company has control over a bank if it owns, controls, or holds 25 percent or more of the voting stock of the bank.

Bank investment contracts (BIC). A separate account at a financial institution that functions like a guaranteed investment contract (GIC).

Bankers' acceptances. Short-term, non-interest-bearing notes sold at a discount and redeemed by the accepting banks at maturity for face value. Bankers' acceptances generally are created based on a letter of credit issued in a foreign trade transaction.

Banking pools. One of four different types of public-entity risk pools. An arrangement by which monies are made available for pool members in the event of loss on a loan basis.

Base year (assessor). The assessment year 1975-76 serves as the original base year. Thereafter, any assessment year in which real property, or a portion thereof, is purchased, is newly constructed, or changes ownership shall become the base year used in determining the full cash value for such real property, or a portion thereof.

Basic financial statements (BFS). See Financial statements.

Basis differences. Differences that arise when the basis of budgeting differs from the basis of accounting prescribed by GAAP.

Basis of accounting. A term used to refer to when revenues, expenditures, expenses, and transfers—and the related assets and liabilities—are recognized in the accounts and reported in the financial statements. Specifically, it relates to the timing of the measurements made, regardless of the nature of the measurement, on either the modified accrual or the accrual basis.

Betterment. An addition made to, or a change made in, a capital asset, other than maintenance, to prolong its life or to increase its efficiency. The cost of the addition or change is normally added to the book value of the asset. The term improvements is preferred.

Bill. A term used to denote a law or statute passed by certain legislative bodies. A bill has greater legal formality and standing than a resolution. See Appropriation bill, Ordinance, Resolution, Order.

Blending. The method of reporting the financial data of a component unit that presents the component unit's balances and transactions in a manner similar to the presentation of the balances and transactions of the primary government.

Blue book. A term commonly used to designate the GFOA's publication, Governmental Accounting, Auditing, and financial reporting (GAAFR).

Board roll. See State assessed roll.

Bond. A written promise to pay a specified sum of money, called the face value or principal amount, at a specified date or dates in the future, called the maturity date(s), together with periodic interest at a specified rate. Sometimes, however, all or a substantial portion of the interest is included in the face value of the security. See Deep-discount debt and Zero-coupon debt. The difference between a note and a bond is that the latter is issued for a longer period and requires greater legal formality. See General obligation bonds payable, Revenue bonds payable, and Surety bond.

Bond anticipation notes. Short-term interest-bearing notes issued by a government in anticipation of bonds to be issued at a later date. The notes are retired from proceeds of the bond issue to which they are related. See Interim borrowing.

Bond covenant. A legally enforceable promise made by an issuer of bonds to the bondholders, normally contained in the bond resolution or indenture (e.g., pledged revenues).

Bond discount. The difference between the present value and the face amount of bonds when the former is less than the latter. In common usage, the term also often includes issuance costs withheld from the bond proceeds by the underwriter.

Bond indenture. A formal agreement, also called a deed of trust, between an issuer of bonds and the bondholder.

Bond ordinance (resolution). An ordinance or resolution authorizing a bond issue.

Bond premium. The difference between the present value and the face amount of bonds when the former is greater than the latter.

Bonded debt. That portion of indebtedness represented by outstanding bonds. See Gross bonded debt, Net bonded debt, and Funded debt.

Bonds authorized and unissued. Bonds that have been legally authorized but not issued and that can be issued and sold without further authorization.

Bonds issued. Bonds sold by the government.

Bonds payable. Generally, the face value of bonds issued and unpaid. In the case of deep-discount and zero-coupon bonds, however, only the accreted value of the security is reported as bonds payable on the balance sheet.

Book entry system. A system that eliminates the need to physically transfer bearer-form paper or to register securities by using a central depository facility.

Books of original entry. The record in which the various transactions are formally recorded for the first time (e.g., cash journal, check register, or general journal). With automated bookkeeping methods, one transaction may be recorded simultaneously in several records, one of which may be regarded as the book of original entry. Memorandum books, check stubs, files of duplicate sales invoices, etc., on which first or prior business notations may have been made, are not books of original entry in the accepted meaning of the term, unless they are also used as the media for direct posting to the ledgers.

Book value. Value as shown by books of account. In the case of assets which are subject to reduction by valuation allowances, "book value" refers to cost or stated value less the appropriate allowance. Sometimes a distinction is made between "gross book value" and "net book value," the former designating value before deduction of related allowances and the latter the value after their deduction. In the absence of any modifiers, however, the term book value is understood to be synonymous with net book value.

Budget. A plan of financial operation embodying an estimate of proposed expenditures for a given period and the proposed means of financing them. Used without any modifier, the term usually indicates a financial plan for a single fiscal year. The term "budget" is used in two senses in practice. Sometimes it designates the financial plan presented to the board of supervisors for adoption and sometimes the plan finally approved by that body. See Annual budget, Capital budget, Capital program, Long-term budget, Operating budget, Performance budget, Program budget and Traditional budget.

Budget document. (1) The instrument used by the budget-making authority to present a comprehensive financial program to the appropriating body. The budget document usually consists of three parts. The first part contains a message from the budget-making authority, together with a summary of the proposed expenditures and the means of financing them. The second consists of schedules supporting the summary. These schedules show in detail past years' actual revenues, expenditures, and other data used in making the estimates. The third part is composed of drafts of the appropriation, revenue, and borrowing measures necessary to put the budget into effect. (2) The instrument used to present the plan of financial operations of the county and of the special district whose affairs and finances are under the supervision and control of the board of supervisors.

Budget-GAAP basis differences. Differences arising from the use of a basis of accounting for budgetary purposes that differs from the basis of accounting applicable to the fund type when reporting on operations in conformity with GAAP. For example, a cash-basis budget would produce a budget-GAAP basis difference.

Budget-GAAP differences. Differences between the GAAP reporting model and a government's budgetary practices.

Budget-GAAP entity differences. Differences arising from the inclusion or exclusion in the budget of organizations, programs, activities and functions that may or may not be compatible with the criteria defining the government reporting entity.

Budget-GAAP perspective differences. Differences that result when the structure of financial information for budgetary purposes is not compatible with the fund structure prescribed by GAAP (i.e., some governments budget on the basis of organizational or program structures that differ from the funds used for financial reporting purposes).

Budget-GAAP timing differences. Variations such as continuing appropriations, project appropriations, automatic reappropriations, and biennial budgeting that separate budgetary accounting from GAAP.

Budget message. A general discussion of the proposed budget as presented in writing by the budget-making authority to the legislative body. The budget message should contain an explanation of the principal budget items, an outline of the government's experience during the past period and its financial status at the time of the message, and recommendations regarding the financial policy for the coming period.

Budget request. The sum of the organizational estimates of available financing and financing requirements for the period involved. The budget requests are compiled to prepare the recommended budget. See Recommended budget.

Budget unit. That classification of the budget expenditure requirements into appropriately identified accounting or organizational units deemed necessary or desirable for control of the financial operation.

Budget year. For budgetary purposes, the budget year means the fiscal year (July 1 through June 30) for which the budget is being prepared.

Budgetary accounts. In governmental fund types, accounts which integrate the budgeted operations and condition into the general ledger of the fund.

Budgetary basis of accounting. The method used to determine when revenues and expenditures are recognized for budgetary purposes.

Budgetary comparisons. Statements or schedules presenting comparisons between approved budgetary amounts (as amended) and actual results of operations on the budgetary basis.

Budgetary control. The control or management of a government or enterprise in accordance with an approved budget to keep expenditures within the limitations of available appropriations and available revenues.

Budgetary guidelines. Recommendations on budgeting issued by the National Advisory Council on State and Local Budgeting (NACSLB). The NACSLB's budgetary guidelines are chiefly of interest to accountants because of the emphasis they place on performance measurement in the context of the budgetary process.

Budgetary integration. The management control technique by which the annual operating budget is recorded in the general ledger through the use of budgetary accounts. Budgetary integration is intended to facilitate control over revenues and expenditures during the year.

Budgetary journal entries. Journal entries involving budgetary accounts. Budgetary journal entries arise in connection with budgetary integration.

Budgetary reporting. The requirement to present budget-to-actual comparisons in connection with financial reporting. Budgetary reporting is required in connection with the basic financial statements for both the general fund and individual major special revenue funds with legally adopted annual budgets. Budgetary reporting also is required within the comprehensive annual financial report to demonstrate compliance at the legal level of control for all governmental funds with legally adopted annual budgets.

Buildings and improvements. A capital asset account reflecting the acquisition cost of permanent structures owned or held by a government, and improvements thereon.

Business-type activities. Those activities of a government carried out primarily to provide specific services in exchange for a specific user charge.

CAFR. See Comprehensive Annual Financial Report.

Calendar year. The yearly period from the first day of January to the last day of December, inclusive, for which the tax is imposed.

Callable bond. A type of bond with a feature that permits the issuer to pay the obligation before the stated maturity date by giving notice of redemption in a manner specified in the bond contract.

CAP. See Committee on Accounting Procedure.

Capital and related financing activities. A term used in connection with cash flows reporting. Capital and related financing activities include: (a) acquiring and disposing of capital assets used in providing services or producing goods, (b) borrowing money for acquiring, constructing, or improving capital assets and repaying the amounts borrowed, including interest, and (c) paying for capital assets obtained from vendors on credit.

Capital assets. Long-lived tangible and intangible assets obtained or controlled as a result of past transactions, events or circumstances. Capital assets include buildings, equipment, improvements other than buildings, infrastructure, and land. In the private sector, these assets are referred to most often as property, plant and equipment. Capital Assets also include intangible assets such as easements, land use rights (water rights, timber rights), computer software, patents, and trademarks. See Intangible assets.

Capital budget. A plan of proposed capital outlays and the means of financing them. See Capital program.

Capital expenditures. Expenditures resulting in the acquisition of or addition to the government's general capital assets.

Capital grants. Grants restricted by the grantor for the acquisition and/or construction of capital assets. See Operating grants.

Capital improvement program. See Capital program.

Capital improvement special assessments. Special assessment projects that are capital in nature and enhance the utility, accessibility, or aesthetic value of the affected properties. Usually, the projects also provide improvements or additions to a government's general capital assets. Typical special assessment capital improvements are streets, sidewalks, parking facilities, and curbs and gutters. Sometimes the improvements provide capital assets that become an integral part of a government's enterprise activities (e.g., water or sewer main construction).

Capital lease. An agreement that conveys the right to use property, plant or equipment, usually for a stated period of time, that meets one or more of the criteria set forth in SFAS No. 13 for lease capitalization.

Capital outlays. See Capital expenditures.

Capital program. A plan for capital expenditures to be incurred each year over a fixed period of years to meet capital needs arising from the long-term work program or other capital needs. It sets forth each project or other contemplated expenditure in which the government is to have a part and specifies the resources estimated to be available to finance the projected expenditures.

Capital projects fund. A fund created to account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays, including the acquisition or construction of major capital facilities and other capital assets. Capital project funds exclude those types of capital-related outflows financed by proprietary funds or for assets that will be held in trust for individuals, private organizations, or other governments.

Capitalization contribution. A term used in connection with public-entity risk pools. A contribution to meet initial or ongoing capital minimums established by statute, regulation, or the pooling agreement itself. Capitalization contributions generally take the form of cash.

Capitalization policy. The criteria used by a government to determine which outlays should be reported as capital assets.

Capitalization threshold. The dollar value at which a government elects to capitalize tangible or intangible assets that are used in operations and that have initial useful lives extending beyond a single reporting period. See Capitalization policy.

Capping. A term used in connection with municipal solid-waste landfills. The cost of final cover expected to be applied near or after the date that the landfill stops accepting solid waste.

Carrying amount. The amount at which assets and liabilities are reported in the financial statements. Carrying amount also is known as book value. See Book value.

Cash. An asset account reflecting currency, coin, checks, postal and express money orders, and bankers' drafts on hand or on deposit with an official or agent appointed as custodian of cash and bank deposits. Cash also includes deposits in other kinds of accounts or cash management pools that have the general characteristics of demand deposit accounts. All cash must be accounted for as a part of the fund to which it belongs. Any restrictions or limitations as to its availability must be indicated in the records and statements. It is not necessary, however, to have a separate bank account for each fund unless required by law.

Cash basis of accounting. Basis of accounting that recognizes transactions or events when related cash amounts are received or disbursed.

Cash discount. An allowance received or given if payment of an account is completed within a stated period of time.

Cash equivalent. A term used in connection with cash flows reporting. Short-term, highly liquid investments that are both (a) readily convertible to known amounts of cash and (b) so near their maturity that they present insignificant risk of changes in value because of changes in interest rates. Generally, only investments with original maturities of three months or less meet this definition. For this purpose, “original maturity” means the original maturity to the entity holding the investment.

Cash-flow underwriting. The practice of an insurance enterprise depending on investment income rather than on positive underwriting results to achieve a profit.

Cash with fiscal agent. An asset account reflecting deposits with fiscal agents, such as commercial banks, for the payment of long-term debt principal and interest.

Ceded premiums/claims costs. Terms used in connection with public-entity risk pools. Ceded premiums are those transferred to another enterprise in connection with a reinsurance arrangement. Ceded claims costs are those transferred to another enterprise through reinsurance.

Certificate of Achievement for Excellence in Financial Reporting Program. A voluntary program administered by GFOA to encourage governments to publish efficiently organized and easily readable CAFRs/CUFRs and to provide peer recognition and technical assistance to the finance officers preparing them.

Certificates of Participation (COP). Certificates issued for the financing of capital assets. COPs represent undivided interests in the rental payments under a tax-exempt lease.

Certified Public Accountant (CPA). An accountant who has met all the statutory and licensing requirements of a given state for use of that designation. All U.S. states require accountants, at a minimum, to complete successfully a uniform national examination before being allowed to designate themselves as CPAs.

Change in ownership. A transfer of a percent interest in real property, including the beneficial use thereof, the value of which is substantially equal to the value of the fee interest.

Character classification. Expenditure classification according to the time periods expenditures are presumed to benefit. The four character groupings are: (1) current operating expenditures, presumed to benefit the current fiscal period; (2) debt service, presumed to benefit prior fiscal periods as well as current and future fiscal periods; (3) capital outlays, presumed to benefit the current and future fiscal periods, and (4) intergovernmental expenditures, where one government transfers resources to another.

Check. A bill of exchange drawn on a bank and payable on demand; a written order on a bank to pay on demand a specified sum of money to a named person, to his or her order, or to the bearer out of money on deposit to the credit of the maker. A check differs from a warrant in that the latter is not necessarily payable on demand and may not be negotiable. It differs from a voucher in that the latter is not an order to pay. A voucher-check combines the distinguishing characteristics of a voucher and a check; it shows the propriety of a payment and is an order to pay.

Claim. (1) Potential losses that can rise from (a) employment (e.g., workers’ compensation and unemployment), (b) contractual actions (e.g., delays or inadequate specifications), (c) actions of government personnel (e.g., medical malpractice, damage to privately owned vehicles by government-owned vehicles, improper police arrest), and (d) governmental properties (e.g., personal injuries, property damage). (2) In the context of insurance, a demand for payment of a policy benefit because of the occurrence of an insured event, such as the destruction or damage of property and related deaths or injuries.

Claims-made policy. A term used in connection with public-entity risk pools. A type of policy that covers losses from claims asserted (reported or filed) against the policyholder during the policy period, regardless of whether the liability-imposing events occurred during the current or any previous period in which the policyholder was insured under the claims-made contract or other specified period before the policy period (the policy retroactive date).

Claims-servicing pool. One of four different types of public-entity risk pools. An arrangement by which a pool manages separate accounts for each pool member from which the losses of that member are paid. Also referred to as an account pool.

Classification of property. Any enumeration or grouping of property by a statute which results in it being treated differently from other property for the purpose of taxation.

Classified presentation. The separate presentation on the statement of position of the current and long-term portions of assets and liabilities.

Closed amortization period. A term used in connection with the unfunded actuarial accrued liability associated with defined benefit pension and OPEB plans. A specific number of years that is counted from one date and, therefore, declines to zero with the passage of time. For example, if the amortization period is initially 30 years on a closed basis, 29 years remain after the first year, 28 years after the second year, and so forth.

Closed-end mutual fund. An SEC-registered investment company that issues a limited number of shares to investors that are then traded as an equity security on a stock exchange.

Code. See Coding.

Coding. A system of numbering or otherwise designating accounts, entries, invoices, vouchers, etc., in such a manner that the symbol used reveals quickly certain required information. To illustrate the coding of accounts, numbers in the 400 range could be used for expenditures, numbers between 420 and 430 for expenditures within the public safety function, and the number 421 for expenditures incurred in connection with the police activity classification. Within the police activity classification, the number 421.5 could be used for support services, and the number 421.51 for communications support services. Accordingly, an expenditure for police radios would be classified as 421.51 (i.e., expenditures for communications services, within support services, within the police activity classification, within the public safety function).

Collateral. Assets pledged to secure deposits, investments or loans.

Collateral pool. As applied to single financial institutions, a group of securities pledged by a single financial institution against all the public deposits it holds. A multiple financial institution collateral pool is a group of securities pledged by various financial institutions to provide common collateral for their deposits of public funds. In such a collateral pool, the assets of the pool and the power to make additional assessments against the members of the pool, if necessary, ensure that there will be no loss of public funds because of the default of a member.

Collector's roll. See Tax roll.

Combination bond. A bond issued by a government that is payable from the revenues of a governmental enterprise but that is also backed by the full faith and credit of the government.

Combining financial statements. Financial statements that report separate columns for individual funds or component units. Combining financial statements normally are required in a CAFR to support each column in the basic financial statements that aggregates information from more than one fund or component unit.

Commercial paper. Unsecured short-term promissory note issued by corporations for a specific amount and maturing on a specific day. The maximum maturity for commercial paper is 270 days, but most is sold with maturities of up to 30 days. The credit risk of almost all commercial paper is rated by a rating service.

Committed fund balance. The portion of fund balance that represents resources whose use is constrained by the limitations that the government imposes upon itself at its highest level of decision making (normally the governing body) and that remain binding unless removed in the same manner.

Commitments. In the context of note disclosure, contingent obligations at the balance sheet date, arising from the terms of executory contracts.

Committee on accounting procedure (CAP). Authoritative private-sector standard-setting body that preceded the Accounting Principles Board and the FASB. The CAP issued guidance in the form of Accounting Research Bulletins.

Commodities programs. The distribution of surplus agricultural products as a form of assistance, often in connection with school lunch programs.

Comparability. The principle according to which differences between financial reports should be due to substantive differences in the underlying transactions or the governmental structure rather than the selection of different alternatives in accounting procedures or practices.

Comparative data. Information from prior fiscal periods provided to enhance the analysis of financial data of the current fiscal period.

Comparative financial statements. Financial statements providing all of the information required by GAAP for two or more fiscal periods.

Compensated absences. Absences, such as vacation, illness and holidays, for which it is expected employees will be paid. The term does not encompass severance or termination pay, postretirement benefits, deferred compensation, or other long-term fringe benefits, such as group insurance and long-term disability pay.

Compliance auditing. Auditing for compliance with applicable laws and regulations. Tests of compliance with laws and regulations are substantive tests; therefore, the term “compliance auditing” should not be confused with the similar term “compliance testing,” which usually refers to testing for compliance with internal control procedures.

Compliance supplement. A term used in connection with single audits. A publication of the U.S. Office of Management and Budget outlining compliance requirements for federal awards programs. The publication is designed to assist independent auditors performing single audits.

Component unit. A separate governmental unit, agency, or non-profit corporation that is combined with other component units to constitute the reporting entity in conformity with GAAP.

Component Unit Financial Report (CUFR). A report covering all funds of a component unit.

Component unit financial statements. Financial statements of a component unit that may be issued separately from the component unit financial report.

Composite depreciation methods. Depreciation methods applied to groups of assets rather than to individual assets.

Comprehensive Annual Financial Report (CAFR). A financial report that encompasses all funds and component units of the government. The CAFR should contain: (a) the basis financial statements and required supplementary information, (b) combining statements to support columns in the basis financial statements that aggregate information from more than one fund or component unit, and (c) individual fund statements as needed. The CAFR is the government unit's official annual report and also should contain introductory information schedules necessary to demonstrate compliance with finance-related legal and contractual provisions and statistical data. The CAFR of a public employee retirement system or an investment pool also should provide information on investments. Likewise, the CAFR of a public employee retirement system should provide actuarial information.

Comprehensive framework of internal controls. A structure of internal controls that provides for: (a) a favorable control environment, (b) the continuing assessment of risk, (c) the design, implementation, and maintenance of effective control-related policies and procedures, (d) the effective communication of information, and (e) the ongoing monitoring of the effectiveness of control-related policies and procedures as well as the resolution of potential problems identified by controls.

Condensed financial statements. Abbreviated financial statements sometimes required by GAAP to be presented within the notes to the financial statements in connection with component units, external investment pools, and segments. In addition, GAAP prescribes the presentation of condensed financial information for the prior fiscal year as part of management's discussion and analysis.

Conduit debt. Certain limited-obligation revenue bonds, certificates of participation, or similar debt instruments issued by a state or local governmental entity for the express purpose of providing capital financing for a specific third party that is not a part of the issuer's financial reporting entity. Although conduit debt obligations bear the name of the governmental issuer, the issuer has no obligation for such debt beyond the resources provided by a lease or loan with the third party on whose behalf they are issued.

Connection fees. Fees charged to join or to extend an existing utility system. Often referred to as tap fees or system development fees.

Consistency. The principle that, once an accounting principle or reporting method is adopted, it will be used for all similar transactions and events. The concept of consistency in financial reporting extends to many areas, such as valuation methods, basis of accounting, and determination of the financial reporting entity.

Construction contracts payable. A liability account reflecting amounts due on contracts for construction of buildings and other improvements.

Construction/development in progress. A capital asset account reflecting the cost of construction or development work for projects not yet completed. The terms Construction in Progress and Development in Progress are used when recognizing project expenditures in the Capital Assets Accounting System for the construction of capital assets, such as, building and improvements, infrastructure or the development of internally generated intangible assets.

Consumption method. The method under which inventories are recorded as expenditures/expenses when used. See Purchases method.

Contingency appropriation. See Appropriation for contingencies.

Contingent liabilities. Items which may become liabilities as a result of conditions undetermined at a given date, such as guarantees, pending law suits, judgments under appeal, unsettled disputed claims, unfilled purchase orders, and uncompleted contracts. Contingent liabilities should be disclosed within the financial statements (including the notes) when there is a reasonable possibility that a loss may have been incurred. Guarantees, however, should be disclosed even though the possibility of loss may be remote.

Continuing appropriation. An appropriation that, once established, is automatically renewed without further legislative action, period after period, until altered or revoked. The term should not be confused with Indeterminate appropriation.

Contracts payable. A liability account reflecting amounts due on contracts of goods or services furnished to a government. Amounts withheld as guarantees on contracts should be classified separately in an account entitled Retainage Payable. See Accounts payable.

Control account. An account in the general ledger where there is recorded the aggregate of debit and credit postings to a number of related accounts called subsidiary accounts. For example, Taxes Receivable is a control account supported by the aggregate of individual balances in individual property taxpayers' subsidiary accounts. See General ledger and Subsidiary account.

Control cycle. A term used in connection with the evaluation of internal controls. A series of logically connected transactions/processes and associated control-related policies and procedures.

Control deficiency in internal control. A control deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis.

Controller. See Auditor-Controller or Director of Finance.

Corrective action plan. A plan that state and local officials are required to submit to appropriate federal officials under the Single Audit Act. The plan details how material noncompliance or weaknesses found in the audit will be eliminated or why corrective action is not necessary.

Cost. The amount of money or other consideration exchanged for property or services.

Cost accounting. The method of accounting that provides for the assembling and recording of all the elements of cost incurred to accomplish a purpose, to carry on an activity or operation, or to complete a unit of work or a specific job.

Cost ledger. A subsidiary record wherein each project, job production center, process, operation, product, or service is given a separate account to which all items entering into its cost are posted in the required detail. Such accounts should be arranged and kept so that the results shown in them may be reconciled with and verified by a control account or accounts in the general books.

Cost of living. The Annual Percentage Factor as determined by the Texas State Comptroller's office used in determining the annual inflation factor (not to exceed 2%).

Cost of replacement. See Replacement cost.

Cost of reproduction. See Reproduction cost.

Cost records. All ledgers, supporting records, schedules, reports, invoices, vouchers, and other records and documents reflecting the cost of projects, jobs, production centers, processes, operations, products, or services, or the cost of any of the component parts thereof.

Cost reimbursement basis. A term used in connection with internal service funds. The setting of charges so that costs are systematically recovered on a break-even basis over time.

Cost-sharing multiple-employer defined benefit pension/OPEB plan. A single plan with pooling (cost-sharing) arrangements for the participating employers. All risks, rewards, and costs, including benefit costs, are shared and are not attributed individually to the employers. A single actuarial valuation covers all plan members and the same contribution rate(s) applies for each employer.

Cost unit. A term used in cost accounting to designate the unit of product or service whose cost is computed. These units are selected for the purpose of comparing the actual cost with a standard cost or with actual costs of units produced under different circumstances or at different places and times. See Unit cost and Work unit.

Counterparty. A term used in connection with custodial credit risk. Another part to a transaction. In the case of deposits and investments made by governmental entities, a counterparty could be the issuer of a security, a financial institution holding a deposit, a broker-dealer selling securities, or a third party holding securities or collateral.

County auditor. In counties, a statutory office charged with being the county's chief accounting officer, and with performing various fiscal duties, including the receipt and disbursement of money by the county treasurer, settlement of payment due the county, etc. See Auditor-Controller.

County board. The county board of supervisors when sitting as the county board of equalization.

County Budget Act. The section of the Government Code which prescribes county budget matters. Government Code Sections 29000 through 29144 and Section 30200.

County counsel. The county counsel or the district attorney of the county if there is no county counsel, and the city attorney of the City and County of San Francisco.

County treasurer. In counties, a statutory office charged with the receipt, custody, and payment of money in the county treasury.

Coupon rate. The interest rate specified on interest coupons attached to a bond. The term nominal interest rate is also used in this sense.

Covenant. See Bond covenant.

Coverage ratio. The ratio of revenues for debt to related debt service payments. See Net revenues available for debt service.

Crossover refunding. A type of advance refunding in which the escrow established with the proceeds of the refunding bonds only begins to secure repayment of the refunded debt at some specified future time, known as the crossover date.

CUFR. Component Unit Financial Report

Current. As applied to budgeting and accounting, the operations of the present fiscal period, as opposed to past or future periods. It usually connotes items likely to be used up or converted into cash within one year.

Current assets. Those assets which are available or can be made readily available to finance current operations or to pay current liabilities. Those assets which will be used up or converted into cash within one year. Examples of: cash, temporary investments, and taxes receivable that will be collected within one year.

Current costs. A term used in connection with municipal solid-waste landfills. The amount that would be paid if all equipment, facilities, and services included in the estimate of closure and postclosure care costs were acquired during the current period..

Current Financial Resources Measurement Focus. Measurement focus where the aim of a set of financial statements is to report the near-term (current) inflows, out-flows, and balances of expendable financial resources. The current financial resources measurement focus is unique to accounting and financial reporting for state and local governments and is used solely for reporting the financial position and results of operations of governmental funds.

Current liabilities. Liabilities which are payable within one year.

Current refunding. A refunding transaction in which the proceeds of the refunding debt are applied immediately to redeem the debt to be refunded. This situation differs from an advance refunding, where the proceeds of the refunding bonds are placed in escrow pending the call date or maturity of the debt to be refunded.

Current resources. Resources to which recourse can be had to meet current obligations and expenditures. Examples of: current assets, estimated revenues of a particular period not yet realized, transfers from other funds authorized but not received, and, in the case of certain funds, bonds authorized and unissued.

Current roll auditor's/auditor's roll. The roll containing the property on which current taxes are a lien.

Current roll supplemental/supplemental roll. The roll for the fiscal year during which the change in ownership occurs or the new construction is completed.

Current tax rate. The tax rate applicable to the current roll, including any rate for voter approved indebtedness.

Current taxes. Taxes levied and becoming due within one year.

Custodial agreement. A written contract establishing the responsibilities of a custodian who holds collateral for deposits with financial institutions, investment securities, or securities underlying repurchase agreements.

Custodial credit risk. The risk that a government will not be able (a) to recover deposits if the depository financial institution fails or (b) to recover the value of investment or collateral securities that are in the possession of an outside party if the counterparty to the investment or deposit transaction fails.

Customer deposits. A liability account used in an Enterprise Fund to reflect deposits made by customers as a prerequisite to receiving services and/or goods provided by the fund.

Data processing. (Information Systems) (1) The preparation and handling of information and data from source media through prescribed procedures to obtain such end results as classification, problem solution, summarization, and reports. (2) Preparation and handling of financial information wholly or partially by mechanical or electronic means. See Electronic Data Processing (EDP).

Debt. An obligation resulting from the borrowing of money or from the purchase of goods and services. Debts of governments include bonds, time warrants, and notes. See Accounts payable, Bonds, Note payable, General long-term debt.

Debt extinguishments. See Advance refunding bonds, Defeasance, In-substance defeasance of debt.

Debt limit. The maximum amount of outstanding gross or net debt legally permitted.

Debt proceeds. The difference between the face amount of debt and the issuance discount or the sum of the face amount and the issuance premium. Debt proceeds differ from cash receipts to the extent issuance costs, such as underwriters' fees, are withheld by the underwriter.

Debt ratios. Comparative statistics illustrating the relation between the issuer's outstanding debt and such factors as its tax base, income or population. These ratios often are used as part of the process of determining the credit rating of an issue, especially with general obligation bonds.

Debt service. Appropriations required to pay the cost of interest and redemption charges, including the funding of any reserve or sinking fund requirements on indebtedness existing or legally authorized as of January 1, 1979, or on bonded indebtedness thereafter approved according to law by a vote of the electors of the issuing entity, voting in an election for such purpose.

Debt service fund. A fund established to account for and report financial resources that are restricted, committed, or assigned to expenditure for principal and interest. Debt service funds should be used to report resources if legally mandated. Financial resources that are being accumulated for principal and interest maturing in future years also should be reported in debt service funds.

Debt service fund requirements. The resources which must be provided for a debt service fund so that all principal and interest payments can be made in full and on schedule.

Debt service requirements. The amount of money required to pay interest on outstanding debt, serial maturities of principal for serial bonds, and required contributions to accumulate moneys for future retirement of term bonds.

Deduction. A term used in connection with fiduciary funds. A decrease in the net assets of a fiduciary fund.

Deep-discount debt. Debt issued with a stated interest rate significantly less than the effective interest rate (e.g., less than 75 percent of the effective interest rate).

Defaulted taxes. Delinquent secured property taxes that become subject to redemption penalties and fees as of July 1st. Five years after becoming tax defaulted, a property, by operation of law, becomes subject to the Tax Collector's power to sell.

Defeasance. The legal release of a debtor from being the primary obligor under the debt, either by the courts or by the creditor. Also referred to as a legal defeasance. See In-substance defeasance.

Deferred charges. Expenditures which are not chargeable to the fiscal period in which they are made but are carried on the asset side of the balance sheet, pending amortization or other disposition (e.g., bond issuance costs). Deferred charges differ from prepaid items in that they usually extend over a long period of time (more than five years) and are not regularly recurring costs of operation. See Prepaid items.

Deferred compensation plans. Plans that offer employees the opportunity to defer receipt of a portion of their salary and the related liability for federal income taxes. Several sections of the Internal Revenue Code authorize certain state and local governments to provide deferred compensation plans for their employees.

Deferred credits. Credit balances or items which will be spread over following accounting periods, either as additions to revenue or as reductions of expenses. Examples of: taxes collected in advance and premiums on bonds issued.

Deferred maintenance. The act of not performing (deferring) maintenance at the time it should have been, or was scheduled to be, performed. Maintenance in this context means more than routine preventive maintenance and repairs. It includes replacement of parts, periodic road resurfacing and other activities needed to maintain the capital asset at its originally contemplated serviceability for its originally estimated life.

Deferred revenue. Amounts for which asset recognition criteria have been met, but for which revenue recognition criteria have not been met. Under the modified accrual basis of accounting, amounts that are measurable but not available are one example of deferred revenue.

Deficiency. A general term indicating the amount by which anything falls short of some requirement or expectation. The term should not be used without qualification.

Deficit. (1) The excess of the liabilities of a fund over its assets. (2) The excess of expenditures over revenues during an accounting period; or, in the case of proprietary funds, the excess of expenses over revenues during an accounting period.

Defined benefit pension plan. A pension plan having terms that specify the amount of pension benefits to be provided at a future date or after a certain period of time; the amount specified usually is a function of one or more factors, such as age, years of service, and compensation.

Defined contribution pension plan. A pension plan having terms that specify how contributions to a plan member's account are to be determined, rather than the amount of retirement income the member is to receive. The amounts received by a member will depend only on the amount contributed to the member's account, earnings on investments of those contributions, and forfeitures of contributions made for other members that may be allocated to the member's account.

Delinquent abstract. See Redemption Roll.

Delinquent roll. See Redemption Roll.

Delinquent special assessments. Special assessments remaining unpaid on and after the date to which a penalty for nonpayment is attached.

Delinquent taxes. Taxes remaining unpaid on and after the date a penalty for nonpayment is attached. Even though the penalty may be subsequently waived and a portion of the taxes may be abated or canceled, the unpaid balances continue to be delinquent taxes until abated, cancelled, paid or converted into tax liens.

Delinquent unsecured roll. A list of unsecured property declared to be in default by the tax collector in a particular year.

Demand bonds. Long-term debt issuances with demand ("put") provisions that require the issuer to repurchase the bonds upon notice from the bondholder at a price equal to the principal plus accrued interest. To ensure its ability to redeem the bonds, issuers of demand bonds frequently enter into short-term standby liquidity agreements and long-term "takeout" agreements.

Depletion. The allocation of the cost of wasting assets (e.g., timber, oil, coal) to the periods benefited by their use.

Deposits. In the context of required note disclosures, cash and near cash items placed on account with a financial institution or fiscal agent. Some deposits (e.g., checking accounts) are subject to withdrawal upon demand without notice or penalty (demand deposits) and others (e.g., certificates of deposit) can be withdrawn without penalty only upon completion of a fixed period (time deposits).

Depository insurance. Insurance on deposits with financial institutions. FDIC, FSLIC and some state governments provide this insurance.

Deposit warrant. A financial document prepared by an appointed accounting or finance officer authorizing the treasurer of a government to accept for deposit sums of money collected by various departments and agencies of the government. See Warrant.

Depreciation. (1) Expiration in the service life of capital assets, other than wasting assets, attributable to wear and tear, deterioration, action of the physical elements, inadequacy and obsolescence. (2) The portion of the cost of a capital asset, other than a wasting asset, charged as an expense during a particular period. In accounting for depreciation, the cost of a capital asset, less any salvage value, is prorated over the estimated service life of such an asset, and each period is charged with a portion of such cost. Through this process, the entire cost of the asset is ultimately charged off as an expense.

Depreciation schedule. A schedule listing the annual allocation of the cost of capital assets to future periods, using one of the depreciation methods acceptable under GAAP.

Derivative. A contract whose value depends on, or derives from, the value of an underlying asset, reference rate, or index. The term also is applied to similar transactions, such as structured financial instruments (for example, mortgage-backed securities).

Derived tax revenues. Nonexchange revenues that result from assessments imposed on exchange transactions (for example, income taxes, sales taxes, and other assessments on earnings or consumption).

Developer fees. Fees charged to developers to cover, in whole or in part, the anticipated cost of improvements that will be necessary as a result of the development (e.g., parks, sidewalks).

Direct charges. See Direct expenses.

Direct costs. See Direct expenses.

Direct costing. A term used in connection with the valuation of capital assets. Use of source data (e.g., invoices) to establish the historical cost of a capital asset.

Direct debt. The debt which a government has incurred in its own name or assumed through the annexation of territory or consolidation with another government. See Overlapping debt.

Direct expenses. Expenses specifically traceable to specific goods, services, units, programs, activities or functions. Direct expenses differ from indirect expenses in that the latter cannot be specifically traced and so must be allocated on some systematic and rational basis.

Direct labor. The cost of labor directly expended in the production of specific goods or rendition of specific services.

Direct materials. The cost of materials which become an integral part of a specific manufactured product or which are consumed in the performance of a specific service.

Director of finance. An office, created by the voters, with the power and duties of the auditor-controller, treasurer, and tax collector, and such other duties as prescribed by the board of supervisors.

Disallowed costs. Claims for grantor resources that have been rejected by the grantor. Disallowed costs are to be distinguished from "questioned costs," which are potential disallowed costs that have not yet been rejected by the grantor.

Disclaimer of opinion. A report stating that the auditor does not express an opinion on the financial statements. The disclaimer of opinion is appropriate when the auditor has not performed an examination sufficient in scope to enable him to form an opinion on the financial statements. A disclaimer of opinion should not be expressed because the auditor believes, on the basis of the examination, that there are material departures from GAAP. In such circumstances, an adverse opinion would be appropriate. See Adverse opinion and Qualified opinion.

Discount. In the context of bonds payable and investments, the amount by which par value exceeds the price paid for a security. The discount generally represents the difference between the nominal interest rate and the actual or effective rate of return to the investor.

Discount rate. The rate used to adjust a series of future payments to reflect the time value of money. For the purpose of calculating the pension benefit obligation defined by GASB, this rate is equal to the estimated long-term rate of return on current and future investments of the pension plan. For capitalized leases, the discount rate used by the lessee is the lessee's incremental borrowing rate unless the lessee is aware of the lessor's implicit rate and that rate is less than the lessee's incremental borrowing rate.

Discounted present value. See Present value.

Discrete presentations. The inclusion of a separate column for a component unit in the applicable basic financial statements. GAAP permits discrete presentations if a component unit has adopted accounting principles inconsistent with authoritative governmental pronouncements but considered to be generally accepted, and if the inclusion of the component unit would distort a fund type of the reporting entity. State colleges and universities are often presented by means of discrete presentations.

Discussion memorandum (DM). A document issued by either GASB or FASB as a basis for written comments by respondents, leading to the issuance of one or more GASB or FASB pronouncements. In a DM, neither GASB nor FASB attempts to reach any conclusions about the issues and related arguments and implications presented. A DM is not an authoritative document and should not be used to justify departures from GAAP.

Documented vessel. Any vessel required to have a valid marine document issued by the Bureau of Customs of the United States, subject to special valuation procedures.

Dollar repurchase/reverse repurchase agreement. An agreement that involves the transfer of securities and in which the parties agree that the securities returned usually will be of the same issuer but will not be the same certificates. Fixed-coupon and yield-maintenance agreements are the most common types of dollar agreements.

Double entry. A system of bookkeeping that requires, for every entry made to the debit side of an account or accounts, an entry or entries be made in an equal amount to the credit side of another account or accounts.

Dry period financing. The cash required to cover those times when cash receipts are insufficient to meet the cash demands.

Due from _____ fund. An asset account used to indicate amounts owed to a particular fund by another fund for goods sold or services rendered. This account includes only short-term obligations on open account, not interfund loans. See Advance from _____ fund and Interfund receivable/payable.

Due from _____ government. An asset account reflecting amounts due to the reporting government from another government. These amounts may represent grants-in-aid, shared taxes, taxes collected by another unit, loans, and charges for services rendered by a reporting unit for another government.

Due process. The procedures followed by GASB to ensure that the views of all interested parties are solicited and considered prior to issuing an authoritative pronouncement. At a minimum, due process requires that all statements and interpretations be preceded by an exposure draft.

Due to fiscal agent. A liability account reflecting amounts due to fiscal agents, such as commercial banks, for servicing a government's maturing interest and principal payments on indebtedness.

Due to _____ fund. A liability account reflecting amounts owed by a particular fund to another fund for goods sold or service rendered. These amounts include only short-term obligations on open account and not interfund loans. See Advance to _____ fund and Interfund receivable/payable.

Early recognition option. A term used in connection with debt service funds. The option to recognize an expenditure in the current period in a debt service fund for principal and interest payments due early in the subsequent period. This option is available only in situations involving the nondiscretionary transfer of resources to a debt service fund in the current period for payments due shortly after the end of the fiscal year (i.e., usually within one to several days, and never more than one month later).

Earnings. See Income and Revenues.

Economic gain/loss. In the context of an advance refunding, the difference between the present value of the old debt service requirements and the present value of the new debt service requirements, discounted at the effective interest rate and adjusted for additional cash paid.

Economic resources measurement focus. A measurement focus under which the aim of a set of financial statements is to report all inflows, outflows, and balances affecting or reflecting an entity's net assets. The economic resources measurement focus is used for proprietary and fiduciary funds, as well as for government-wide financial reporting. It also is used by business enterprises and not-for-profit organizations in the private sector.

EDP. Acronym for electronic data processing.

Education revenue augmentation fund (ERAF). The fund established for the deposit of moneys deducted and transferred from the county, cities and special districts for subsequent distribution to non-basic aid schools.

Effective interest rate. The rate of earnings on a bond investment, based on the actual price paid for the bond, the coupon rate, the maturity date, and the length of time between interest dates, in contrast with the nominal interest rate.

Effectiveness. A term used in connection with the evaluation of internal controls and performance measurement. The degree to which an entity, program, or procedure is successful at achieving its goals and objectives.

Efficiency. A term used in connection with the evaluation of internal controls and performance measurement. The degree to which an entity, program, or procedure is successful at achieving its goals and objectives with the least use of scarce resources.

Electronic data processing (EDP). Data processing by means of high-speed electronic equipment. See Data processing.

Eligibility requirements. A term used in connection with government-mandated and voluntary nonexchange transactions. Conditions established by the provider of resources stipulating matters such as the qualifying characteristics of recipients, time requirements, allowable costs, and other contingencies.

Emerging issues task force. A group established under the auspices of an authoritative standard-setting body and authorized to publish consensus positions on technical issues not specifically addressed by that body. GASB has not established an emerging issues task force, although it is empowered to do so.

Eminent domain. The power of a government to acquire private property for public purposes. It is frequently used to obtain real property that cannot be purchased from owners in a voluntary transaction. When the power of eminent domain is exercised, owners are compensated by the government in an amount determined by the courts.

Enabling legislation. Authorizes the government to assess, levy, charge, or otherwise mandate payment of resources (from external resource providers) and includes a legally enforceable requirement that those resources be used only for the specific purposes stipulated in the legislation. Legal enforceability means that a government can be compelled by an external party—such as citizens, public interest groups, or the judiciary—to use resources created by enabling legislation only for the purposes specified by the legislation.

Encumbrances. Commitments related to unperformed (executory) contracts for goods or services. Used in budgeting, encumbrances are not GAAP expenditures or liabilities, but represent the estimated amount of expenditures ultimately to result if unperformed contracts in process are completed. Any encumbrances remaining at fiscal year-end will need to be classified as restricted, committed or assigned fund balance in the governmental fund balance sheet.

Endowment. Funds or property that are donated with either a temporary or permanent restriction as to the use of principal. Endowments with the stipulation that the principal balance not be disbursed are often accounted for in permanent funds. See Permanent fund.

Enterprise fund. (1) A fund established to account for operations financed and operated in a manner similar to private business enterprises (e.g., water, gas and electric utilities; airports; parking garages; or transit systems). In this case the governing body intends that the costs (i.e., expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges. (2) A fund established because the governing body has decided that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control accountability, or other purposes.

Entitlement. The amount of payment to which a state or local government is entitled, pursuant to an allocation formula contained in applicable statutes.

Entity. The basic unit upon which accounting and/or financial reporting activities focus. The basic governmental legal and accounting entity is prescribed by GAAP to be the reporting entity for financial statement reporting purposes and it alone may issue CAFRs and BFS.

Entity differences. A difference between the budgetary basis of accounting and GAAP, arising because the appropriated budget either includes or excludes organizations, programs, activities, and functions which may or may not be compatible with the criteria defining the governmental reporting entity.

Entry. The record of a financial transaction in the appropriate book of account.

Entry age actuarial cost method. A term used in connection with defined benefit pension plans. A method under which the actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated on a level basis over the earnings or service of the individual between entry age and assumed exit age(s). The portion of this actuarial present value allocated to a valuation year is called the normal cost. The portion of this actuarial present value not provided for at a valuation date by the actuarial present value of future normal costs is called the unfunded actuarial accrued liability.

Equalized roll. The combination, as of August 20, of the local valuations certified by the assessor, any changes made by the county board of supervisors in July, and the current state-assessed valuations reported by the State Board of Equalization.

Equipment. See Machinery and equipment.

Equity accounts. In those accounts presenting either fund balances or net assets, this is the difference between assets and liabilities of the fund.

Equity securities. Investments that represent an ownership interest in an enterprise.

Equivalent single amortization period. The weighted average of all amortization periods used when components of the total unfunded actuarial accrued liability are separately amortized and the average is calculated in accordance with the parameters.

Escheat. The reversion of private property to a government because there is no one to inherit or because of a breach of condition.

Estimated life. The expected economic useful life of an asset, from the date placed in service to the projected retirement date.

Estimated revenue. The amount of revenue estimated to accrue or to be collected during a fiscal period.

Estimated uncollectible accounts. See Allowance for uncollectibles.

Estimated uncollectible receivables. See Allowance for uncollectibles.

Ethics rule 202. An ethics rule established by AICPA that places upon auditors the burden of proof for justifying any material departures from the guidance found on levels 2,3, or 4 of the GAAP hierarchy.

Ethics rule 203. An ethics rule established by AICPA that makes it an ethical violation for an auditor to state that financial statements are “fairly presented in conformity with GAAP” if those statements materially violate standards issued by FASB, GASB, or the Federal Accounting Standards Advisory Board. A special exception applies when unusual circumstances would make the application of an authoritative standard misleading.

Exchange transaction. A transaction in which each party receives and gives up essentially equal values.

Exchange-like transaction. A transaction in which there is an identifiable exchange between the reporting government and another party, but the values exchanged may not be quite equal or the direct benefits of the exchange may not be exclusively for the parties to the exchange. Examples include certain fees for regulatory or professional licenses and permits, certain tap fees, certain developer contributions, certain grants and donations, and other transactions that, regardless of the label applied to them, are based on an exchange of similar but not equal values.

Exempt property. Property acquired by a public entity, that becomes exempt from taxation under the laws of the state.

Expected useful life. See Estimated life.

Expenditure-driven grants. Government-mandated or voluntary nonexchange transactions in which expenditure is the prime factor for determining eligibility. Also referred to as reimbursement grants.

Expenditures. Decreases in net financial resources. Expenditures include current operating expenses which require the present or future use of net current assets, debt service and capital outlays, and intergovernmental grants, entitlements and shared revenues.

Expenses. Outflows or other using up of assets or incurrences of liabilities (or a combination of both) from delivering or producing goods, rendering services or carrying out other activities that constitute the entity's ongoing major or central operations.

Explicit measurable equity interest. A term used in connection with joint ventures. An asset resulting from a stipulation in the joint venture agreement that the participants have a present or future claim to the net resources of the joint venture and setting forth the method to determine the participants' shares of the joint venture's net resources.

Exposure draft (ED). A proposed statement or interpretation issued for public comment by GASB or FASB.

External auditor. Independent auditor(s) typically engaged to conduct the audit of a government's financial statements.

External financing sources. In governmental fund types, includes revenues, other financing sources, and transfers in. This is a conventional term and should not be used in the financial statement presentation.

Face value. As applied to securities, the amount of the issuer's liability stated in the security document. See Par value.

Fair value. A term used in connection with the valuation of investments. The amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

Federal award. Federal financial assistance and Federal cost-reimbursement contracts that non-Federal entities receive directly from Federal awarding agencies or indirectly from pass-through entities.

Federal financial assistance. For purposes of applying the provisions of the Single Audit Act of 1997 and OMB Circular A-133, Audits of State and Local Governments, assistance provided by a federal agency in the form of grants, contracts, loans, loan guarantees, property, cooperative agreements, interest subsidies, insurance, or direct appropriations. Federal financial assistance does not include direct federal cash assistance to individuals.

Federal program. All Federal awards to a non-Federal entity assigned a single number in the Catalog of Federal Domestic Assistance (CFDA).

Fidelity bond. A written promise to indemnify against losses from theft, defalcation, and misappropriation of public monies by government officers and employees.

Fiduciary fund. A fund used to account for assets held by a government unit in a trustee capacity or as an agent for others and which therefore cannot be used to support the government's own programs. The fiduciary fund category includes pension (and other employee benefit) trust funds, investment trust funds, private-purpose trust funds, and agency funds. A trustee acquires legal title to the assets entrusted but, in the agency relationship, title rests with the principal.

Final amended budget. A term used in connection with budgetary reporting. The adopted budget adjusted by all fund balance classifications, transfers, allocations, supplemental appropriations, and other legally authorized legislative and executive changes applicable to the fiscal year, whenever signed into law or otherwise legally authorized.

Final budget. The adopted budget adjusted by all revisions throughout the fiscal year as of June 30. See Adopted budget.

Financial accountability. A term used in connection with the definition of the financial reporting entity. The level of accountability that exists if a primary government appoints a voting majority of an organization's governing board and either is able to impose its will on that organization or there is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the primary government. A primary government may also be financially accountable for governmental organizations with a separately elected governing board, a governing board appointed by another government, or a jointly appointed board that is fiscally dependent on the primary government.

Financial Accounting Foundation (FAF). A not-for-profit organization responsible for overseeing the operations of both GASB and FASB.

Financial Accounting Standards Advisory Council (FASAC). Advisory group that assists FASB. FASAC includes representatives of all of FASB's major constituents.

Financial Accounting Standards Board (FASB). The authoritative accounting and financial reporting standard-setting body for business enterprises and not-for-profit organizations. FASB is the direct successor of the Committee on Accounting Procedure and the Accounting Principles Board. GASB and its predecessors have elected to apply a number of FASB's standards, as well as those of its predecessors, to state and local government.

Financial audit. An audit made to determine whether the financial statements of a government are presented fairly, in conformity with GAAP.

Financial reporting entity. A primary government, organizations for which the primary government is financially accountable, and other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete. However, a governmental organization other than a primary government (such as a component unit, a joint venture, a jointly governed organization, or other stand-alone government) serves as the nucleus for its own reporting entity when it issues separate financial statements.

Financing requirements. In governmental fund types, the total financing needs for the accounting period involved. This is a conventional term and should not be used in the financial presentation.

Financial resources. Cash and other assets that, in the normal course of operations, will become cash.

Financial resources measurement focus. A Measurement focus according to which the aim of a set of financial statements is to report the near-term (current) inflows, outflows, and balances of expendable (spendable) financial resources. The current financial resources measurement focus is unique to accounting and financial reporting for state and local governments and is used solely for reporting the financial position and results of operations of governmental funds.

Financial section. One of the three basic sections of a CAFR. The financial section is used to present the independent auditor's report on the financial statements, the basic financial statements (including the notes to the financial statements); required supplementary information; combining statements; individual fund statements and schedules; and supplementary information, as needed.

Financial statements. A tabulation of amounts, derived from accounting records and expressed in words and dollars, that displays either 1) the financial position of the reporting unit at a moment in time or 2) inflows and outflows of resources from transactions or other events during a period of time.

Financial uses. In governmental fund types, decreases, excluding expenditure refunds, in the net current assets of a fund. "Financing uses" includes expenditures, other financing uses, and transfers out.

Finding. A published communication of an internal control weakness or instance of noncompliance in connection with an audit.

Fiscal accountability. The responsibility of governments to justify that their actions in the current period have complied with public decisions concerning the raising and spending of public moneys in the short term (usually one budgetary cycle or one year). This term is used in contrast to operational accountability.

Fiscal agent. A fiduciary agent, usually a bank or county treasurer, who performs the function of paying debt principal and interest when due.

Fiscal dependence. A term used in connection with the definition of the financial reporting entity. A situation requiring the inclusion of a legally separate entity as a component unit within the financial reporting entity because the governing board of the primary government may "arbitrarily" override the financial decisions of the legally separate entity regarding (a) its budget, (b) the levying of taxes or the setting of rates or charges, or (c) the issuance of bonded debt.

Fiscal funding clause. A clause in a lease agreement providing that the lease is cancelable if the legislature or other funding authority does not appropriate the funds necessary for the government unit to fulfill its obligations under the lease agreement.

Fiscal period. Any period at the end of which a government determines its financial position and the results of its operations. Often referred to as an Accounting period.

Fiscal year. For financial reporting purposes, any 12-month period to which the annual operating budget applies and at the end of which a government determines its financial position and the results of its operations. For budgetary purposes, the current 12 month period to which the annual operating budget applies and at the end of which a government determines its position and the results of its operations.

Five percent criterion. The second of two tests used to determine whether a given governmental fund or enterprise fund must be reported as a major fund in the basic financial statements. This test is applied to the combined total assets, liabilities, revenues or expenses/expenditures of all governmental and enterprise funds for which the 10 percent criterion has been met. See Ten percent criterion.

Fixed budget. A budget setting forth dollar amounts that are not subject to change based on the volume of goods or services to be provided. See Flexible budget.

Fixed charge (fixed charge assessment). A charge in addition to any ad valorem taxes included on a tax bill. Fixed charges are not based on the assessed value of the property and are levied on a parcel basis (i.e. for sewer, library, and flood control assessments). See Special benefit assessment(s).

Fixed costs. Costs of providing goods or services that do not vary proportionately to the volume of goods or services provided (e.g., insurance and contributions to retirement systems).

Fixed coupon repurchase/reverse repurchase agreement. Agreements in which the parties agree that the securities returned will have the same stated interest rate as, and maturities similar to, the securities transferred. See Repurchase agreement and Reverse repurchase agreement.

Fixed-income securities. Securities that offer a specified, measurable cash flow (e.g., most bonds).

Fixtures. Attachments to buildings that are not intended to be removed and cannot be removed without damage to the buildings. Those fixtures with a useful life presumed to be as long as that of the building itself are considered a part of the building; all others are classified as equipment.

Flexible budget. A budget whose dollar amounts vary according to the volume of goods or services to be provided. See Fixed budget.

Flow of current financial resources. See Current financial resources measurement focus.

Flow of economic resources. See Economic resources measurement focus.

Food stamps. A federal award program that is intended to improve the diets of members of low-income households by increasing their ability to purchase food.

Force account. A method employed in the construction and/or maintenance of capital assets whereby a government's own personnel are used instead of an outside contractor. This method also calls for the purchase of materials by the government and the possible use of its own equipment, but the distinguishing characteristic of the force account method is the use of the government's own personnel.

Foreclosure. The seizure of property as payment for delinquent tax or special assessment obligations. Ordinarily, property foreclosed is resold to liquidate delinquent tax or special assessment obligations, but on occasion governments retain possession for their own needs.

- Forfeiture.** The automatic loss of cash or other property as a punishment for not complying with legal provisions and as compensation for the resulting damages or losses. This term should not be confused with confiscation. The latter term designates the actual taking over of the forfeited property by the government. Even after property has been forfeited, it cannot be said to be confiscated until the government claims it.
- Formal budgetary integration.** The management control technique through which the annual operating budget is recorded in the general ledger through the use of budgetary accounts. It is intended to facilitate control over revenues and expenditures during the year.
- Formula grants.** Government-mandated or voluntary nonexchange transactions involving the provision of resources based upon established criteria (e.g., number of full-time equivalent students) other than the incurrence of qualifying expenditures. Also commonly referred to as shared revenues
- Franchise.** A special privilege granted by a government permitting the continued use of public property, such as city streets, and usually involving the elements of monopoly and regulation.
- Frozen entry age actuarial cost method.** A term used in connection with defined benefit pension plans. A method under which the excess of the actuarial present value of projected benefits of the group included in an actuarial valuation, over the sum of the actuarial value of assets plus the unfunded frozen actuarial accrued liability, is allocated on a level basis over the earnings or service of the group between the valuation date and assumed exit. This allocation is performed for the group as a whole, not as a sum of individual allocations. The frozen actuarial accrued liability is determined using the entry age actuarial cost method. The portion of this actuarial present value allocated to a valuation year is called the normal cost.
- Full cash value.** The amount of cash or its equivalent that property would bring if exposed for sale in the open market.
- Full faith and credit.** A pledge of the general taxing power for the payment of debt obligations. Bonds carrying such pledges are referred to as general obligation bonds or full faith and credit bonds.
- Full scope audit.** An audit covering: (1) Financial and Compliance, to determine (a) whether the financial statements of an audited entity present fairly the financial position, results of operations, and (when applicable) cash flows in accordance with generally accepted accounting principles, and (b) whether the entity has complied with the various legal and contractual requirements that may have a material effect upon the financial statements; (2) Economy and Efficiency, to determine (a) whether the entity is managing and utilizing its resources (such as personnel, property, space) economically and efficiently, (b) the causes of inefficiencies or uneconomical practices, and (c) whether the entity has complied with laws and regulations concerning matters of economy and efficiency; and (3) Program Results, to determine (a) whether the desired results or benefits established by the legislature or other authorizing body are being achieved, and (b) whether the agency has considered alternatives that might yield the desired results at a lower cost.
- Function.** A group of related activities aimed at accomplishing a major service or regulatory program for which a government is responsible. For example, public health is a function. See Subfunction.
- Functional-basis combining.** The process of grouping or combining similar funds and/or component units on a functional basis (e.g., transportation, economic development) for financial reporting purposes.
- Functional classification.** Expenditure classification according to the principal purpose for which expenditures are made. Examples are public safety, public health, and public welfare.
- Fund.** A fiscal and accounting entity with a self-balancing set of accounts in which cash and other financial resources, all related liabilities and equities or balances, and changes therein, are recorded and segregated to carry on specific activities or attain certain objectives in accordance with special regulations, restrictions or limitations.

Fundamental analysis. A method of estimating the fair value of a security when it is thinly traded or when quoted market prices are not available. Fundamental analysis considers assets, liabilities, operating statement performance, management, and economic environment of the issuer in estimating a fair value.

Fund balance. The difference between fund assets and fund liabilities of governmental funds.

Fund balance classifications. Financial statements for governmental funds may report up to five components of fund balance: nonspendable, restricted, committed, assigned and unassigned. (The General Fund is the only governmental fund with a positive unassigned amount.)

Fund balance sheet. A balance sheet for a single fund. See Fund and Balance sheet.

Fund capital assets. Those capital assets associated with proprietary or trust funds.

Fund classifications. One of the three categories (governmental, proprietary, and fiduciary) used to classify fund types.

Fund financial statements. Basic financial statements for a governmental fund. In contrast to government-wide financial statements.

Fund type. Any one of eleven categories into which all funds are classified in governmental accounting. The governmental fund types are: General, Special Revenue, Debt Service, Capital Projects, and Permanent. The proprietary fund types are Enterprise and Internal Service. The fiduciary fund types are Pension (and Other Employee Benefit) Trust, Investment Trust, Private-Purpose Trust, and Agency.

Funded debt. The same as bonded debt, which is the preferred term.

Funded mandate. Also known as a government-mandated nonexchange transaction. A situation where a government at one level provides resources to a government at another level and requires the recipient to use the resources for a specific purpose (for example, federal programs that state or local governments are mandated to perform).

Funded ratio. The actuarial value of assets expressed as a percentage of the actuarial accrued liability.

GAAFR. Acronym for Governmental Accounting, Auditing, and Financial Reporting a publication of the GFOA. Also known as the “Blue Book.”

GAAP hierarchy. An authoritative list of the sources of GAAP. The GAAP hierarchy for state and local governments is set forth in Statement of Auditing Standards No. 69, The Meaning of “Present Fairly in Conformity with Generally Accepted Accounting Principles” in the Independent Auditor’s Report.

Generally accepted accounting principles (GAAP). Uniform minimum standards and guidelines for financial accounting and reporting. They govern the form and content of the financial statements of an entity. GAAP encompasses the conventions, rules and procedures necessary to define accepted accounting practice at a particular time. The principles include not only broad guidelines of general application, but also detailed practices and procedures. GAAP provides a standard by which to measure financial presentations. The primary authoritative body on the application of GAAP to state and local governments is GASB.

Generally accepted auditing standards (GAAS). Standards established by AICPA for the conduct and reporting of financial audits. There are ten basic standards classed into three broad categories: general standards, standards of fieldwork, and standards of reporting. The Auditing Standards Board of AICPA publishes Statements on Auditing Standards (SASs) to comment and expand upon these basic standards. SAS, together with the ten basic standards, constitute GAAS. GAAS sets forth the objectives of the audit and establishes measures that can be applied to judge the quality of its performance.

Generally accepted government auditing standards (GAGAS). Standards established by the GAO in its publication, Government Auditing Standards (GAS), commonly known as the “Yellow Book, for the conduct and reporting of both financial and performance audits. GAGAS sets forth general standards applicable to both types of audits and separate standards of fieldwork and reporting for financial and performance audits. The GAGAS standards of fieldwork and reporting for financial audits incorporate and build upon GAAS.

General capital assets. Capital assets that are not assets of any fund, but of the government unit as a whole. Most often these assets arise from the expenditure of the financial resources of governmental funds.

General fund. The fund used to account for and report all financial resources, except those required to be accounted for in another fund.

General journal. A journal in which are recorded all entries not recorded in special journals. See Journal and Special journal.

General ledger. A record containing the accounts needed to reflect the financial position and the results of operations of a government. In double entry bookkeeping, the debits and credits in the general ledger are equal (i.e., the debit balances equal the credit balances). See Subsidiary ledger, Control account, and Subsidiary account.

General long-term debt. Long-term debt expected to be repaid from governmental funds. See Long-term debt.

General obligation bonds payable. Bonds backed by the full faith and credit of government. See Full faith and credit.

General revenues. All revenues not reported as program revenues in the government-wide statement of activities. All taxes, even those that are levied for a specific purpose, are general revenues and should be reported by type of tax (e.g. sales tax, property tax, franchise tax, income tax). All other nontax revenues (interest, grants, contributions) that do not meet the criteria to be reported as program revenues should be reported as general revenues.

Government Accountability Office (GAO). The investigative arm of the U.S. Congress charged with improving the performance and accountability of the federal government. The GAO issues the publication Government Auditing Standards (GAS), commonly known as the “Yellow Book,” which sets generally accepted government auditing standards (GAGAS).

Government Finance Officers Association (GFOA). Formerly the Municipal Finance Officers Association. An organization comprised of accounting and finance professionals from throughout the United States and Canada. The GFOA has played a major role in the development and promotion of GAAP for state and local government and sponsors the Certificate of Achievement for Excellence in Financial Reporting Program. Publishes Governmental Accounting, Auditing, and Financial Reporting (GAAFR), commonly known as the “Blue Book.”

Governmental external investment pool. An arrangement that commingles (pools) the moneys of more than one legally separate entity and invests, on the participants’ behalf, in an investment portfolio; one or more of the participants not being part of the sponsor’s reporting entity. In Texas counties, it is typical for external pools to be used; the participants that are not typically part of the county’s reporting entity and may include school districts and local-board-governed special districts.

Governmental accounting. The composite activity of analyzing, recording, summarizing, reporting and interpreting the financial transactions of governments.

Governmental Accounting Standards Advisory Council (GASAC). An advisory body established to assist GASB. The membership of GASAC represents all major groups with an interest in accounting and financial reporting for state and local governments.

Governmental Accounting Standards Board (GASB). The authoritative accounting and financial reporting standard-setting body for government entities.

Governmental Accounting, Auditing and Financial Reporting (GAAFR). Publication of the GFOA also known as the “Blue Book.” Provides detailed guidance to the application of principles to the accounting and financial reporting activities of state and local governments.

Governmental activities. Those activities of a government that are carried out primarily to provide services to citizens and that are financed primarily through taxes and intergovernmental grants.

Governmental entity. For accounting and financial reporting purposes, an entity subject to the hierarchy of GAAP applicable to state and local governmental units. The criteria used to distinguish governmental entities from nongovernmental entities are set forth in the AICPA’s Audits of State and Local Governmental Units.

Governmental financial reporting model. The minimum combination of financial statements, note disclosures, and required supplementary information prescribed for state and local governments by GASB.

Governmental funds. Funds generally used to account for tax-supported activities. There are five different types of governmental funds: the general fund, special revenue funds, debt service funds, capital projects funds, and permanent funds.

Government-mandated nonexchange transactions. Transactions that occur when a government at one level provides resources to a government at another level and requires the recipient to use the resources for a specific purpose (for example, federal programs that state or local governments are mandated to perform) also known as a funded mandate.

Government-wide financial statements. Financial statements that incorporate all of a government’s governmental and business-type activities, as well as its nonfiduciary component units. There are two basic government-wide financial statements: the statement of net position and the statement of activities. Both basic government-wide financial statements are presented using the economic resources measurement focus and the accrual basis of accounting.

Grant anticipation note (GAN). Short-term interest-bearing note issued by a government in anticipation of grants to be received at a later date. The notes are retired from proceeds of the grants to which they are related. See Interim borrowing.

Grants. Contributions or gifts of cash or other assets from another government to be used or expended for a specified purpose, activity or facility. See Capital grants and Operating grants.

Grants-in-aid. See Grants.

Gross bonded debt. The total amount of direct debt of a government, represented by outstanding bonds before deduction of any assets available and earmarked for their retirement.

Guaranteed investment contract (GIC). A group annuity contract designed to provide guarantees of principal and interest on funds deposited with an insurance company for a specified party.

Historical cost. See Cost.

Hold-harmless agreement A contract under which the liability of one party for damages is assumed by another.

Homeowner exemption. A value reduction provided to homeowners pursuant to Revenue and Taxation Code Section No. 218.

Impact fees. Fees charged to developers to cover, in whole or in part, the anticipated cost of improvements that will be necessary as a result of the development (e.g., parks, sidewalks).

Implementation guides. Guidance on the proper implementation of authoritative accounting and financial reporting standards issued by the staff of GASB. Implementation guides use a question-and-answer format and enjoy “level 4” status on the hierarchy of GAAP for state and local governments.

Imposed nonexchange revenues. Revenues that result from assessments imposed on nongovernmental entities, including individuals, other than assessments on exchange transactions (e.g. property taxes, fines).

Imprest account. An account into which a fixed amount of money is placed for the purpose of minor disbursements or disbursements for a specific purpose (e.g., payroll). When disbursements are made, a voucher is completed to record their date, amount, nature and purpose. From time to time, a report with substantiating vouchers is prepared; the account is replenished for the exact amount of the disbursements and appropriate general ledger accounts are charged. The total of cash plus substantiating vouchers always should equal the total fixed amount of money set aside in the imprest account. See Petty cash.

Improvements. Buildings, other structures, and other attachments or annexations to land which are intended to remain so attached or annexed, such as sidewalks, trees, drives, tunnels, drains, and sewers. Sidewalks, curbing, sewers, and highways are sometimes referred to as “betterments,” but the term “improvements” is preferred. See Buildings and improvements.

Improvements other than buildings. Attachments or annexations to land that are intended to remain so attached or annexed, such as sidewalks, trees, drives, tunnels, drains and sewers. Sidewalks, curbing, sewers and highways are sometimes referred to as betterments, but the term improvements is preferred.

“In-relation-to” opinion. An indication in the independent auditor’s report that the auditor does not render an opinion on the fair presentation per se of certain information contained in the financial report (e.g., combining and individual fund financial statements), but does assert that the information in question is fairly presented “in relation to” the audited financial statements).

Income. A term used in proprietary fund type accounting to represent (1) revenues or (2) the excess of revenues over expenses. See Operating income, Income before transfers, and Net income.

Income before transfers. Proprietary fund operating income plus nonoperating revenues and minus nonoperating expenses.

Incurred but not reported (IBNR) claims. A term used in connection with risk financing. Claims for insured events that have occurred but have not yet been reported to the governmental entity, public entity risk pool, insurer, or reinsurer as of the date of the financial statements. IBNR claims include (a) known loss events that are expected to be presented later as claims, (b) unknown loss events that are expected to become claims, and (c) expected future development on claims already reported.

Independent auditor. Auditor(s) who are independent, both in fact and appearance, of the entities they audit. Both GAAS and GAGAS set specific criteria that must be met for an auditor to be considered independent.

Indeterminate appropriation. An appropriation which is not limited either to any definite period of time or to any definite amount. A distinction must be made between an indeterminate appropriation and a continuing appropriation. First, whereas a continuing appropriation is indefinite only as to time, an indeterminate appropriation is indefinite as to both time and amount. Second, even indeterminate appropriations that are indefinite only as to time are to be distinguished from continuing appropriations in that such indeterminate appropriations may eventually lapse (e.g., an appropriation to construct a building may be made to continue in effect until the building is constructed; once the building is completed, the unexpended balance of the appropriation lapses). On the other hand, a continuing appropriation may continue forever and can be abolished only by specific action of the legislative body.

Indirect charges/costs/expenses. See Overhead.

Individual investment accounts. An investment service provided by a governmental entity for other, legally separate entities that are not part of the same reporting entity. With individual investment accounts, specific investments are acquired for individual entities and the income from and changes in the value of those investments affect only the entity for which they were acquired.

Industrial development bonds. Bonds issued by governments, the proceeds of which are used to construct facilities for a private business enterprise.

Information systems. See Data processing.

Infrastructure assets. Public domain capital assets such as roads, bridges, curbs and gutters, streets and sidewalks, drainage systems, lighting systems and similar assets that are immovable and can be preserved for a significantly greater number of years than most capital assets.

In-substance defeasance of debt. An advance refunding in which the government is not legally released from being the primary obligor on the refunded debt, but the possibility of the government having to make additional payments is considered remote under criteria provided by GAAP. See Advance refunding.

Insured defined benefit pension plan. A pension financing arrangement whereby an employer accumulates funds with an insurance company, while employees are in active service, in return for which the insurance company unconditionally undertakes a legal obligation to pay the pension benefits of those employees or their beneficiaries, as defined in the employer's plan.

Intangible assets. Intangible assets includes easements, land use rights (such as the right to use a water source) computer software, patents, and trademarks. Intangible assets may be externally generated (purchased or received from a third party) or internally generated such as computer software. Generally, an intangible asset possesses all of the following characteristics: a) lack of physical substance, b) nonfinancial nature, and c) initial useful life extending beyond a single reporting period. Intangible assets should be classified as capital assets and should follow the existing authoritative guidance related to the accounting and financial reporting of capital assets. See Capital assets.

Interest in property. Includes any legal or equitable interest.

Interest method. In the context of bonds, a method of periodic amortization of issuance costs and premium or discount over the term of the related debt. The objective of the interest method is to arrive at a periodic interest cost (including amortization) that will represent a level effective rate on the sum of the face amount of the debt and (plus or minus) the unamortized premium or discount and issuance costs at the beginning of each period. The difference between the periodic interest cost so calculated and the nominal interest on the outstanding amount of the debt is the amount of periodic amortization.

Interest receivable on investments. An asset account reflecting the amount of interest receivable on investments.

Interfund activity. Activity between funds of the primary government, including blended component units.

Interfund activities are divided into two broad categories: reciprocal and nonreciprocal. Reciprocal interfund activity comprises interfund loans and interfund services provided and used. Nonreciprocal interfund activity comprises interfund transfers and interfund reimbursements.

Interfund loans. Loans made by one fund to another, where both funds are included in the primary government's reporting unit. See Interfund activity.

Interfund receivable/payable. Short-term loans made by one fund to another, or the current position of an advance to or from another fund, where both funds are included in the primary government's reporting unit. See Interfund activity.

Interfund reimbursements. Repayments made by one fund to another, where both funds are included in the primary government's reporting unit. See Interfund activity.

Interfund services provided and used. Sales and purchases of goods and services by one fund to/from another at a price approximating their external exchange value, where both funds are included in the primary government's reporting unit. See Interfund activity.

Interfund transaction. Transactions between funds of the same government reporting entity. See Interfund activity.

Interfund transfers. Transfer of assets (cash, goods) between funds of the primary government reporting entity. See Interfund activity.

Intergovernmental payable. A liability account reflecting amounts owed by the reporting government to another government.

Intergovernmental receivable. An asset account reflecting amounts due to the reporting government from another government. These amounts may represent grants-in-aid, shared taxes, taxes collected by another unit, loans, and charges for services rendered by the government for another government.

Intergovernmental revenues. Revenues from other governments in the form of grants, entitlements, shared revenues, or payments in lieu of taxes.

Interim borrowing. (1) Short-term loans to be repaid from general revenues during the course of a fiscal year. (2) Short-term loans in anticipation of tax collections, grants or bond issuance. See Bond anticipation notes, Grant anticipation notes and Tax anticipation notes.

Interim financial statements. Financial statements prepared as of a date or for a period during the fiscal year and including only financial transactions during the current year to date.

Internal auditing. An independent appraisal of the diverse operations and controls within a government entity to determine whether acceptable policies and procedures are followed, established standards are met, resources are used efficiently and economically, and the organization's objectives are being achieved. The term covers all forms of appraisal of activities undertaken by auditors working for and within an organization.

Internal control structure. Policies and procedures established to provide reasonable assurance that specific government objectives will be achieved.

Internal financial reporting. Financial reporting specifically designed to meet the needs of management.

Internal service fund (ISF). A proprietary type fund used to account for the financing of goods or services provided by one department or agency to other departments or agencies of a government, or to other governments, on a cost-reimbursement basis.

Interperiod equity. The measure of the extent to which current-year revenues are sufficient to pay for the services provided by the government entity during the year, and whether current-year citizens are receiving services by shifting part of the payment burden to future years' citizens or by using up previously accumulated resources.

Intrafund transfer. A transfer of central staff costs to the operating units in the same governmental type fund.

Introductory section. The first of three essential components of any CAFR. The introductory section typically provides general information on a government's structure and personnel, as well as information useful in assessing the government's economic condition. The contents of the introductory section normally fall outside the scope of the independent audit of the financial statements. The key element of the introductory section is the letter of transmittal.

Inventory. (1) A detailed list showing quantities, descriptions, and values of property and, frequently, units of measure and unit prices. (2) An asset account reflecting the cost of goods held for resale or for use in operations. Under some circumstances, inventory is not valued at cost but at the lower of cost or market.

Investing activities. A term used in connection with cash flows reporting. Investing activities include making and collecting loans (except program loans) and acquiring and disposing of debt or equity instruments.

Investment in capital assets net of related debt. One of three components of net assets that is required by GAAP to be reported in both government-wide and proprietary fund financial statements. Related debt, for this purpose, includes the outstanding balances of any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of capital assets of the government.

Investments. Most commonly, securities and real estate held for the production of revenues in the form of interest, dividends, rentals, or lease payments. The term does not include capital assets used in government operations.

Investment section. One of four sections of a CAFR for an investment pool and one of five sections of a CAFR of a public employee retirement system.

Investment trust fund. A fiduciary fund type used to report governmental external investment pools in separately issued reports and the external portion of these same pools when reported by the sponsoring government.

Invitation to comment (ITC). A due-process document that may be released by GASB to solicit the views of interested parties on a topic under study by the board prior to the release of an exposure draft.

Job account. An account pertaining either to an operation which occurs regularly (a "standing order") or to a specific piece of work ("job order") showing all charges for material and labor used and other costs incurred, together with any allowances or other credits.

Joint venture. A legal entity or other contractual arrangement in which a government participates as a separate and specific activity for the benefit of the public or service recipients and in which the government retains an ongoing financial interest.

Jointly governed organization. A regional government or other multi-governmental arrangement that is governed by representatives from each of the governments that create the organization, but that is not a joint venture because the participants do not retain an ongoing financial interest or responsibility.

Journal. A book of original entry. See General journal, Special journal, and Register.

Journal voucher. A standard form provided for the recording of certain transactions or information in place of, or supplementary to, the journals or registers. The journal voucher usually contains an entry or entries, explanations, references to documentary evidence supporting the entry or entries, and the signature or initials of one or more properly authorized officials.

Judgment. An amount to be paid or collected by a government as the result of a court decision, including a condemnation award in payment for private property taken for public use.

Judgment bonds. Bonds issued to finance judgments.

Judgments payable. A liability account reflecting amounts owed as the result of court decisions, including condemnation awards for private property taken for public use.

Jurisdiction. A local agency, school district, community college district, or county superintendent of schools.

Jurisdictional change. Any changes to the boundaries of a jurisdiction, including formations, consolidations and dissolutions.

Landfill closure and postclosure care costs. Costs incurred to provide for the protection of the environment that occur near or after the date that a municipal solid-waste landfill stops accepting solid waste and during the postclosure period. Closure and postclosure care costs include the cost of equipment and facilities (e.g., leachate collection systems and final cover) as well as the cost of services (e.g., postclosure maintenance and monitoring costs).

Lapse. As applied to appropriations, the automatic termination of an appropriation. Except for indeterminate appropriations and continuing appropriations, an appropriation is made for a certain period of time. At the end of this period, any unexpended or unencumbered balance thereof lapses, unless otherwise provided by law. Also referred to as the lapse period.

Leasehold. The right to the use of real estate by virtue of a lease, usually for a specified term of years, for which consideration is paid.

Lease-purchase agreements. Contractual agreements that are termed "leases," but which in substance amount to purchase contracts. See Capital lease.

Lease rental bond. A bond usually issued by a non-profit authority and secured by lease payments to be made by the government leasing the project financed by bond proceeds.

Ledger. A group of accounts in which are recorded the financial transactions of an entry. See General ledger and Subsidiary ledger.

Legal debt limit. See Debt limit.

Legal debt margin. The excess of the amount of debt legally authorized over the amount of debt outstanding. See Debt limit.

Legal defeasance. A situation that occurs when debt is legally satisfied based on certain provisions in the debt instrument, even though the debt is not actually repaid. When debt is defeased, it is no longer reported as a liability on the face of the statement of position; only the new debt, if any, is reported as a liability.

Legal level of budgetary control. The level at which spending in excess of budgeted amounts would be a violation of law.

Legal investments. 1) Investments that savings banks, insurance companies, trustees and other fiduciaries (individual or corporate) are permitted to make by the laws of the state in which they are domiciled, or under the jurisdiction in which they operate or serve. The investments which meet the conditions imposed by law constitute the legal investment list. 2) Investments that governments are permitted to make by law.

Legal opinion. 1) An opinion of an authorized official such as an attorney or county counsel regarding the legal issues applicable to a particular situation. 2) In the case of government bonds, the opinion of a specialized bond attorney as to the legality of a bond issue.

Lent securities. The securities lent by the lender to the borrower in a securities lending transaction. Also referred to as underlying securities.

Letter of credit. A financial institution's written guarantee of a customer's drafts, up to a specified amount, for a certain period of time.

Level (1-4) guidance. In the context of the hierarchy of GAAP for state and local governments, a reference to the relative authority of a given source of GAAP guidance.

Level of budgetary control. One of the three possible levels of budgetary control and authority to which organizations, programs, activities and functions may be subject. These levels of budgetary control are (a) appropriated budget, (b) legally authorized nonappropriated budget review and approval process, which is outside the appropriated budget process, and (c) nonbudgeted financial activities, which are not subject to the appropriated budget and the appropriation process or to any legally authorized nonappropriated budget review and approval process, but still are relevant for sound financial management and oversight. See Legal level of budgetary control.

Level of effort requirements. A requirement that a grant recipient not use grant resources to reduce its own participation in a given program or activity.

Levy. 1) verb To impose taxes, special assessments or service charges for the support of government activities. 2) noun The total amount of taxes, special assessments or service charges imposed by government.

Liabilities. Obligations of an entity to transfer assets or provide services to other entities in the future as a result of past transactions or events.

Lien. A form of encumbrance holding property as security for the payment of taxes.

Lien date. For property (ad valorem) taxes, the date when an enforceable legal claim to taxable property arises. Generally the lien date is specified in the relevant enabling legislation. Many governments use the term lien date even though a lien is not formally placed on the property at that date. Alternatively, the term assessment date is used to describe this same date.

Liquidity. The ability to convert assets to cash quickly without significant losses.

Loan premium or fee. A term used in connection with securities lending arrangements. Payments from the borrower to the lender as compensation for the use of the underlying securities when the borrower provides securities or letters of credit as collateral.

Loans receivable. An asset account reflecting amounts loaned to individuals or organizations external to a government, including notes taken as security for such loans. Loans to other governments should be recorded and reported separately.

Local agency. Any city, county, special district, or authority.

Local improvement tax. See Special assessment.

Local roll. Property on the secured and unsecured roll that is the county assessors duty to assess.

Long-term budget. A budget prepared for a period longer than a fiscal year; or, in some state governments, a budget prepared for a period longer than a biennium. Long-term budgets concerned with capital outlay plans and capital improvement programs are referred to as capital budgets.

Long-term debt. See General long-term debt.

Lump-sum appropriation. An appropriation made for a stated purpose, or for a named department, without specifying further the amounts that may be spent for specific activities or for particular objects of expenditure (e.g., a lump-sum appropriation for the police department would not specify the amounts to be spent for uniform patrol, traffic control, etc., or for salaries and wages, materials and supplies, travel).

Machinery and equipment. Property that does not lose its identity when removed from its location and is not changed materially or consumed immediately—within one year—by use.

Maintenance. The act of keeping capital assets in a state of good repair. It includes preventive maintenance; normal periodic repairs; replacement of parts, structural components and so forth and other activities needed to maintain the asset so that it continues to provide normal services and achieves its optimum life.

Major fund. A term used in the context of GAAP defined basic fund financial statements for a governmental fund or enterprise fund reported as a separate column. The general fund is always a major fund. Otherwise, criteria for determining major funds is defined in GAAP literature. However, any other governmental or enterprise fund not meeting this criteria may be reported as a major fund if the government's officials believe that fund is particularly important to financial statement users.

Major program. A term used in the context of single audits. As part of the single audit, the independent auditor must gain an understanding of internal controls over compliance for each major federal award program and then test those controls. In addition, the independent auditor must render an opinion on whether the government complied with laws, regulations, and provisions of contracts or grant agreements that could have a direct and material effect on each major federal award program.

Management letter. A term used in connection with the independent audit of the financial statements. A formal communication by the auditor to management that focuses on internal control weaknesses discovered in the course of the audit of the financial statements. The management letter should be distinguished from the management representation letter which is a communication by management to the independent auditor in which management takes formal responsibility for the fair presentation of the financial statements and makes certain specific representations regarding their contents.

Management's discussion and analysis (MD&A). A component of required supplementary information used to introduce the basic financial statements as defined by GAAP. It also provides an analytical overview of the government's financial activities.

Margin. In the context of repurchase agreements and reverse repurchase agreements, the excess of the market value, including accrued interest of the securities underlying a repurchase-reverse repurchase agreement or a fixed-coupon repurchase-reverse repurchase agreement, over the agreement amount, including accrued interest. It is common practice for a margin to be built into an agreement to protect against declines in the market value of the underlying securities.

Market risk. The risk that the market value of an investment, collateral protecting a deposit, or securities underlying a repurchase agreement will decline. Market risk is affected by the length to maturity of a security, the need to liquidate a security before maturity, the extent to which collateral exceeds the amount invested, and how often the amount of collateral is adjusted for changing market values.

Market value. See Full cash value.

Master agreement. A written contract covering all future transactions between the parties to repurchase-reverse repurchase agreements and establishing each party's rights in the transactions. A master agreement often will specify, among other things, the right of the buyer-lender to liquidate the underlying securities in the event of default by the seller-borrower.

Matched position. When the proceeds from a reverse repurchase agreement are invested in securities that mature at, or almost at, the same time as the reverse repurchase agreement and the proceeds from those securities will be used to liquidate the agreement.

Matching requirement. A requirement that a grant recipient contribute resources to a program that equal or exceed a predetermined percentage of amounts provided by the grantor.

Material weakness. A deficiency or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented or detected and corrected on a timely basis.

Materiality. The magnitude of an omission or misstatement of accounting information that makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement. The objective of accountability in governmental financial reporting adds another perspective to materiality. Specifically, accountability requires materiality to be judged not only in a quantitative manner, but also in a qualitative manner. That is, accountability involves such issues as legal and contractual compliance that may not have a material effect on the entity's reported operating results and financial position but that would influence or change the judgement of a reasonable person about how the government conducted its affairs during the period.

Matrix pricing. A method of estimating the fair value of a security when it is thinly traded or when quoted market prices are not available. Matrix pricing estimates a security's fair value by considering coupon interest rates, maturity, credit rating, and market indexes as they relate to the security being valued and to similar issues for which quoted prices are available.

Matured bonds payable. A liability account reflecting unpaid principal on bonds that have reached or passed their maturity date.

Matured interest payable. A liability account reflecting unpaid interest on bonds that have reached or passed their maturity date.

Measurement focus. The accounting convention that determines 1) which assets and which liabilities are included on a government's balance sheet, and where they are reported there, and 2) whether an operating statement presents information on the flow of financial resources (revenues and expenditures) or information on the flow of economic resources (revenues and expenses).

Mineral rights. Provides the right to enter in or upon the land for the exploration, development, and production of minerals, including oil, gas, and other hydrocarbon.

Mobile home. A stationary, non-motorized vehicle designed and equipped for human habitation. For property tax purposes, mobile home is defined as containing 320 or more square feet of area, having no more than two dwelling units, and not permanently affixed to land (no foundation).

Mobile home base year value. The full cash value on the date a mobile home is purchased or ownership changes. If the mobile home undergoes any new construction after it is purchased or changes ownership, the base year value of the new construction is its full cash value on the date on which the new construction is completed and, if uncompleted, on the lien date.

Modified accrual basis of accounting. The accrual basis of accounting adapted to the current financial resources measurement focus. Under it, revenues and other financial resource increments (e.g., bond issue proceeds) are recognized when they become susceptible to accrual, that is when they become both “measurable” and “available to finance expenditures of the current period.” “Available” means collectible in the current period or soon enough thereafter to be used to pay liabilities of the current period. Expenditures are recognized when the related fund liability is incurred except for: 1) inventories of materials and supplies that may be considered expenditures either when purchased or when used, and 2) prepaid insurance and similar items that may be considered expenditures either when paid for or when consumed.

Modified approach. The election not to depreciate infrastructure assets that are part of a network or subsystem of a network that meet two specific requirements. First, the government manages the eligible infrastructure assets using an asset management system that has certain specified characteristics; second, the government documents that the eligible infrastructure assets are being preserved approximately at (or above) a condition level established and disclosed by the government.

Money market investment. A short-term, highly liquid debt instrument, including commercial paper, banker’s acceptances, and U.S. Treasury and agency obligations. Asset-backed securities, derivatives, and structured notes are not included in this term.

Mortgage bonds. Bonds secured by a mortgage against specified properties of a government, usually its public utilities or other enterprises. If primarily payable from enterprise revenues, they are also classed as revenue bonds. See Revenue bonds.

Multi-purpose grants. A term used in connection with the identification of program revenues. Grants intended to finance activities reported in different functional categories in the government-wide statement of activities.

Multipurpose grants that do not provide for specific identification of the programs and amounts should be reported as general revenues.

Municipal. In its broadest sense, an adjective which denotes the state and all subordinate units of government. In a more restricted sense, an adjective which denotes a city or village, as opposed to other local governments.

Municipal bond. A bond issued by a state or local government.

Municipal corporation. A political and corporate body established pursuant to state statutes to provide government services and regulations for its inhabitants. A municipal corporation has defined boundaries and a population, and is usually organized with the consent of its residents. It usually has a seal and may sue and be sued. Cities and villages are examples of municipal corporations. See Quasi-municipal corporation.

Municipal Finance Officers Association. See Government Finance Officers Association.

Municipal improvement certificates. Certificates issued in lieu of bonds for the financing of special improvements. As a rule, these certificates are placed in the contractor’s hands for collection from the special assessment payers.

Municipal solid-waste landfill. A discrete area of land or an excavation that receives household waste, and that is not a land application unit, surface impoundment, injection well, or waste pile, as those terms are defined in regulations of the Environmental Protection Agency. It may also receive other types of Resource Conservation and Recovery Act Subtitle D wastes such as commercial solid waste, non-hazardous sludge, and industrial solid waste. The term municipal indicates the primary type of solid waste received by the landfill, not its ownership.

National Advisory Council On State And Local Budgeting (NACSLB). A working group created by eight public-sector organizations to establish a comprehensive framework for public-sector budgeting that could be used by state and local governments as an ideal against which to measure and improve the quality of their own budget practices. The Government Finance Officers Association (GFOA) has formally recommended NACSLB guidelines to its members.

National Committee On Governmental Accounting (NCGA). A committee of the Municipal Finance Officers Association that served as the authoritative accounting and financial reporting standard-setting body for local governments from 1946 until the establishment of the National Council on Governmental Accounting (NCGA) in the 1970s.

National Committee On Municipal Accounting (NCMA). A committee of the Municipal Finance Officers Association that served as the authoritative accounting and financial reporting standard-setting body for local governments prior to 1946. NCMA was one of the predecessors of GASB.

National Council On Governmental Accounting (NCGA). An organization established through the sponsorship of the Government Finance Officers Association to develop, promulgate, and interpret principals of accounting, financial reporting, and related financial management activities for the state and local governments in the United States and Canada. Immediate predecessor of the GASB.

Negotiable certificates of deposit. Transferable certificates of deposit. Because they are transferable, negotiable certificates of deposit are subject to custodial credit risk.

Net bonded debt. Gross bonded debt less any cash or other assets available and earmarked for its retirement and less all self-supporting debt (e.g., revenue bonds). Also referred to as net general obligation debt.

Net book value. See Book value.

Net cost. A term used in the context of the government-wide statement of activities. The difference between functional expenses and program revenues.

Net income. The proprietary fund excess of operating revenues, nonoperating revenues, and transfers-in over operating expenses, nonoperating expenses, and transfers out.

Net interest cost. A method used to calculate a bond issuer's interest cost. The net interest cost (NIC) does not take into account the time value of money. The NIC is equal to the total interest payments plus discount (or minus premium) divided by the number of bond years.

Net pension/OPEB obligation. A term used in connection with defined benefit pension plans. The cumulative difference between annual pension cost and the employer's contributions to the plan, including the pension liability (asset) at transition, and excluding (a) short-term differences and (b) unpaid contributions that have been converted to pension-related debt.

Net profit. See Net income.

Net revenues. See Net income and Net revenues available for debt service.

Net revenues available for debt service. Proprietary fund gross operating revenues less operating and maintenance expenses (which normally does not include depreciation expense or interest expense on bonds). Net revenues available for debt service as thus defined is used to compute "coverage" on revenue bond issues. Under the laws of some states and the provisions of some revenue bond indentures, to compute revenue bond coverage, net revenues available for debt service must be computed on a cash basis rather than in conformity with GAAP. See Coverage ratio.

New construction. Any addition to real property, whether land or improvements (including fixtures) since the last lien date; and any alteration of land or of any improvement (including fixtures), since the last lien date that constitutes a major rehabilitation thereof or that converts the property to a different use.

No-commitment special assessment debt. Special assessment debt that is secured solely by liens on assessed properties and resources provided from bond proceeds and is not backed by either the full faith and credit of the government or by any other type of general government commitment.

Nominal account. Those accounts whose balances are transferred to equity or net asset accounts at the close of each fiscal year. Examples are revenue and expense accounts.

Nominal interest rate. The contractual interest rate shown on the face and in the body of a bond and used to compute the amount of interest to be paid, in contrast to the effective interest rate. See Coupon rate.

Noncapital financing activities. A term used in connection with cash flow reporting. Noncapital financing activities include borrowing money for purposes other than to acquire, construct, or improve capital assets and repaying those amounts borrowed, including interest. This category includes proceeds from all borrowings (such as revenue anticipation notes) not clearly attributable to acquisition, construction, or improvement of capital assets, regardless of the form of the borrowing. Also included are certain other interfund and intergovernmental receipts and payments.

Nonexchange transaction. A transaction in which a government (including the federal government, as a provider) either gives value (benefit) to another party without directly receiving equal value in exchange or receives value (benefit) from another party without directly giving equal value in exchange.

Nonfinancial assets. A term used in connection with the current financial resources measurement focus and the modified accrual basis of accounting. Assets that are expected to be used in the provision of goods or services rather than converted to cash. Financial statement preparers have the option of treating prepaid items and inventories of supplies as either a financial asset (consumption method) or as a nonfinancial asset (purchases method).

Nonoperating expenses. Proprietary fund expenses which are not directly related to the fund's primary activities (e.g., interest).

Nonoperating nonunitary. Properties that do not operate as a unit and are not part of the primary function of the assessee.

Nonoperating properties. Properties owned by an enterprise fund but not used in the provision of the fund's primary service activities.

Nonoperating revenues. Proprietary fund revenues incidental to or byproducts of the fund's primary activities.

Nonparticipating interest-earning investment contracts. Investment contracts whose value is not affected by market (interest rate) changes (e.g., nonnegotiable certificates of deposit with redemption terms that do not consider market rates). This definition excludes investment contracts that are negotiable or transferable, or whose redemption value considers market rates.

Nonreciprocal interfund activity. The internal counterpart to nonexchange transactions. This category includes both interfund transfers and interfund reimbursements.

Nonspendable fund balance. This classification includes amounts that cannot be spent because they are either (a) not in spendable form; for example, inventories and prepaid amounts or (b) legally or contractually required to be maintained intact (e.g. corpus or principal of a permanent fund. The “not in spendable form” criterion includes items that are not expected to be converted to cash. Also, long-term loan and notes receivables, and capital assets held for resale would be reported as nonspendable unless the proceeds are restricted, committed or assigned.

Nonspendable Fund Balance - Advance To Other Funds. An account used to segregate a portion of the fund balance to indicate that noncurrent portions of long-term interfund receivables do not represent expendable available financial resources.

Nonspendable Fund Balance - Endowments. An account used to indicate that the trust fund balance amounts representing endowment principal are legally restricted.

Nonspendable Fund Balance - Capital Assets Held For Resale. An account used to segregate a portion of the fund balance to indicate that capital assets held for resale do not represent expendable available financial resources.

Nonspendable Fund Balance - Inventories. An account used to segregate a portion of the fund balance to indicate that, under the purchases method, inventories of supplies do not represent expendable available financial resources, even though they are a component of net current assets.

Nonspendable Fund Balance - Noncurrent Loans Receivable. An account used to segregate a portion of the fund balance to indicate that noncurrent portions of long-term loans receivable do not represent expendable available financial resources.

Nonspendable Fund Balance - Prepaid Items. An account used to segregate a portion of the fund balance to indicate that prepaid items do not represent expendable available financial resources, even though they are a component of net current assets.

Nonunitary. See Operating nonunitary.

Normal cost. In the context of defined benefit pension and OPEB plans, that portion of the actuarial present value of plan benefits and expenses which is allocated to a valuation year by the actuarial cost method.

Normal costing. A term used in connection with the valuation of capital assets. Estimate of historical cost based on current cost of reproduction new indexed by a reciprocal factor of the price increase of a specific item or classification from the appraisal date to the estimated date of acquisition. That is, the historical cost of an asset is estimated by taking the value of acquiring the asset new today and then discounting that amount by an appropriate inflation factor back to the date of acquisition.

Normally. A term used in connection with the application of the modified accrual basis of accounting to certain long-term liabilities. Specifically, certain accrued liabilities are recognized as expenditures in governmental funds only when they are “normally” expected to be liquidated with current available financial resources (e.g., compensated absences, claims and judgements, special termination benefits, landfill closure and postclosure care costs). For this purpose, the term “normally” should be interpreted from the perspective of the practice of state and local governments generally.

Note payable. In general, an unconditional written promise signed by the maker to pay a certain sum in money on demand or at a fixed or determinable time, either to the bearer or to the order of a person designated therein. See Temporary loans.

Note receivable. A legal right to receive payment of a certain sum of money on demand or at a fixed or determinable time, based on an unconditional written promise signed by the maker.

Notes to the financial statements. The summary of significant accounting policies and other disclosures required for a fair presentation of the financial statements of a government in conformity with GAAP and not included on the face of the financial statements themselves. The notes to the financial statements are an integral part of a CAFR/CUFR.

Number of funds principle. The principle that only the minimum number of funds consistent with legal and operating requirements should be established, since unnecessary funds result in inflexibility, undue complexity, and inefficient financial administration.

Object. As used in expenditure classification, this term applies to the article purchased or the service obtained, rather than to the purpose for which the article or service was purchased or obtained (e.g., personal services, contractual services, materials, and supplies). See Activity, Account, Character, Classification, Function, and Object class.

Object classification. Expenditure classification according to the types of items purchased or services obtained (e.g., personal services, materials, supplies and equipment).

Object of expenditure. See Object.

Obligated in some manner. A term used in connection with special assessment debt and the determination of the financial reporting entity. A government is obligated in some manner for debt if (a) it is legally obligated to assume all or part of the debt in the event of default or (b) the government may take certain actions to assume secondary liability for all or part of the debt and the government takes, or has given indications that it will take, those actions. Stated differently, the phrase obligated in some manner is intended to include all situations other than those in which (a) the government is prohibited (by constitution, charter, statute, ordinance, or contract) from assuming the debt in the event of default or (b) the government is not legally liable for assuming the debt and makes no statement, or gives no indication, that it will, or may, honor the debt in the event of default.

Obligations. Amounts a government may be legally required to meet out of its resources. They include not only actual liabilities but also unliquidated encumbrances.

Obsolescence. The decrease in the value of capital assets, resulting from economic, social, technological or legal changes.

Office of Management and Budget (OMB). An agency of the federal government with regulatory oversight of Single Audits. In fulfillment of this responsibility the OMB has issued Circular A-133, Audits of States, Local Government, and Non-Profit Organizations.

Official statement. A document published by a government planning to issue long-term debt that provides information on the proposed long-term debt issue, the purpose of the issue, and the means of servicing the indebtedness, as well as other information about the issuer that may be helpful in evaluating credit-worthiness.

On-behalf payments of fringe benefits and salaries. Direct payments made by one entity (the paying entity or paying government) to a third-party recipient for the employees of another, legally separate entity (the employer entity or employer government). They include payments made by governmental entities on behalf of nongovernmental entities and payments made by nongovernmental entities on behalf of governmental entities, and may be made for volunteers as well as for paid employees of the employer entity.

Open amortization period. A term used in connection with defined benefit pension and OPEB plans. An open amortization period (open basis) is one that begins again or is recalculated at each actuarial valuation date. Within a maximum number of years specified by law or policy (for example, 30 years), the period may increase, decrease, or remain stable.

Open-end mutual funds. An open-end mutual fund is one that continuously offers its shares for sale to the public, compared with a closed-end company, which may issue only a limited number of shares. Mutual funds generally do not issue share certificates; instead, they send out periodic statements showing deposits, withdrawals, and dividends credited to the investor's account.

Open space land (Williamson Act). (1) Land within an agricultural preserve and subject to a contract or an agreement, (2) Land subject to a scenic restriction, (3) Land subject to an open-space easement.

Open space use. The use or maintenance of land in such a manner as to preserve its natural characteristics, beauty, or openness for the benefit and enjoyment of the public, to provide essential habitat for wildlife, or for the solar evaporation of sea water in the course of salt production for commercial purposes, if such land is within: a scenic highway corridor; a wildlife habitat area; a saltpond; a managed wetland area; or a submerged area.

Operating activities. A term used in connection with cash flow reporting. Operating activities generally result from providing services and producing and delivering goods, and include all transactions and other events that are not defined as capital and related financing, noncapital financing, or investing activities.

Operating budget. Plans of current expenditures and the proposed means of financing them. The annual operating budget (for some state governments: the biennial operating budget) is the primary means by which most of the financing, acquisition, spending, and service delivery activities of a government are controlled. The use of annual operating budgets is usually required by law. Even where not required by law, however, annual operating budgets are essential to sound financial management and should be adopted by every government. See Budget.

Operating expenses. Proprietary fund expenses related directly to the fund's primary activities.

Operating grants. Grants that are restricted by the grantor to operating purposes or that may be used for either capital or operating purposes, at the discretion of the grantee. See Capital grants.

Operating income. The excess of proprietary fund operating revenues over operating expenses.

Operating lease. A lease agreement that does not meet the criteria for capitalization set forth in GAAP pronouncements.

Operating nonunitary. A group of properties that operate as a unit but are not part of the primary function of the assessee.

Operating revenues. Proprietary fund revenues directly related to the fund's primary activities. They consist primarily of user charges for goods and services.

Operational accountability. Governments' responsibility to report the extent to which they have met their operating objectives efficiently and effectively, using all resources available for that purpose, and whether they can continue to meet their objectives for the foreseeable future.

Optional bond. See Callable bond.

Order. A formal legislative enactment by the governing board of certain local governments that has the full force and effect of law (e.g., county governing bodies in some states pass orders rather than laws, resolutions or ordinances).

Ordinance. A formal legislative enactment by the governing board of a municipality. If it is not in conflict with any higher form of law, such as a state statute or constitutional provision, it has the full force and effect of law within the boundaries of the municipality to which it applies. The difference between an ordinance and a resolution is that the latter requires less legal formality and has a lower legal status. Ordinarily, the statutes or charter will specify or imply those legislative actions that must be by ordinance and those that may be by resolution. Revenue raising measures, such as the imposition of taxes, special assessments and service charges, universally require ordinances. See Resolution.

Other financing source. An increase in current financial resources that is reported separately from revenues to avoid distorting revenue trends. The use of the other financing sources category is limited to items so classified by GAAP.

Other financing use. A decrease in current financial resources that is reported separately from expenditures to avoid distorting expenditure trends. The use of the other financing uses category is limited to items so classified by GAAP.

Other postemployment benefits (OPEB). Postemployment benefits provided by an employer to plan participants, beneficiaries, and covered dependents through a plan or other arrangement that is separate from a plan to provide retirement income. OPEB includes postemployment health care benefits provided through a public employee retirement system or pension plan. In addition to postemployment health care benefits (such as illness, dental, vision, and hearing), OPEB may include, for example, life insurance, disability income, tuition assistance, legal services, and other assistance programs.

Other sources of GAAP. Potential sources of accounting and financial reporting guidance that may be used in the absence of authoritative guidance on one of the four levels of the hierarchy of GAAP for state and local governments. Examples of other sources of GAAP for state and local governments include concept statements of GASB, pronouncements of FASB that are not authoritative for government, professional publications, textbooks, and position papers of professional organizations. GASB concepts statements take precedence as an other source of GAAP.

Outlays. Synonymous with expenditures. See Capital expenditures.

Outcome measures. A term used in connection with service efforts and accomplishments reporting. Indicators that measure accomplishments or results that occur (at least partially) because of services provided. Results also include measures of public perceptions of outcomes.

Output measures. A term used in connection with service efforts and accomplishments reporting. Indicators that measure the quantity of services provided. Output measures include both measures of the “quantity of service provided” and measures of the “quantity of a service provided that meets a certain quality requirement.”

Overdraft. (1) The amount by which checks, drafts or other demands for payment on the treasury or on a bank exceed the amount of the credit against which they are drawn. (2) The amount by which requisitions, purchase orders, or audited vouchers exceed the appropriation or other credit to which they are chargeable.

Overhead. Those elements of cost necessary in the production of a good or service which are not directly traceable to the product or service. Usually these costs relate to objects of expenditure which do not become an integral part of the finished product or service, such as rent, heat, light, supplies, management and supervision (indirect costs/charges/expenses).

Overlapping debt. The proportionate share that property within each government must bear of the debts of all local governments located wholly or in part within the geographic boundaries of the reporting government.

Except for special assessment debt, the amount of debt of each unit applicable to the reporting unit is arrived at by (1) determining what percentage of the total assessed value of the overlapping jurisdiction lies within limits of the reporting unit, and (2) applying this percentage to the total debt of the overlapping jurisdiction. Special assessment debt is allocated on the basis of the ratio of assessments receivable in each jurisdiction, which will be used wholly or in part to pay off the debt, to total assessments receivable, which will be used wholly or in part for this purpose.

Overlapping governments. All local governments located wholly or in part within the geographic boundaries of the reporting government.

Oversight responsibility. A basic criterion for including a government department, agency, institution, commission, public authority or other organization in a government unit's reporting entity for basic financial reports. Oversight responsibility is derived from the government unit's power and includes financial interdependency, selection of governing authority, designation of management, ability to significantly influence operations, and accountability for fiscal matters.

Oversight unit. In defining the reporting entity, the component unit that has the ability to exercise oversight responsibility. Typically, an oversight unit is the primary unit of government directly responsible to the chief executive and the elected legislative body.

Par value. In the case of bonds, the amount of principal that must be paid at maturity. Par value is referred to as the face value of the security.

Participating interest-earning investment contracts. Interest-earning investment contracts whose value is affected by market changes in interest rate (e.g. contracts that are negotiable or transferable or whose redemption value considers market rates).

Passenger facilities charges (PFCs). A fixed fee authorized by the Federal Aviation Administration that airports may impose on each departing passenger for use in eligible construction projects or for related debt service. This charge is collected by whoever sells the ticket and then remitted to the airport.

Pass-through grants. Grants and other financial assistance received by a governmental entity to transfer to or spend on behalf of a secondary recipient.

Pay-as-you-go basis. In the context of pension accounting and risk management, the failure to finance retirement obligations or anticipated losses on a current basis, using an acceptable actuarial funding method.

Paying agent. An entity responsible for paying long-term debt principal and interest on behalf of the government.

Payment in lieu of taxes (PILOT). A payment that a property owner not subject to taxation makes to a government to compensate it for services that the property owner receives that normally are financed through property taxes.

Pension (and other employee benefit) trust fund. A trust fund used to account for public employee retirement systems and other employee benefit plans. Pension (and Other Employee Benefit) Trust Funds use the accrual basis of accounting and have a capital maintenance measurement focus.

Pension cost. A measure of the periodic cost of an employer's participation in a defined benefit pension plan.

Pension obligation bonds. Bonds issued by employers to finance one or more elements of their pension obligation to employees. Pension obligation bonds may be used 1) to reduce or eliminate the employer's net pension obligation, 2) to pay the employer's annual required contribution for the year, or 3) to reduce or eliminate the plan's unfunded actuarial accrued liability.

Pension plan. An arrangement for the provision of pension benefits in which all assets accumulated for the payment of benefits may legally be used to pay benefits, including refunds of member contributions, to any of the plan members or beneficiaries, as defined by the terms of the plan.

Pension-related debt. All long-term liabilities of an employer to a pension plan, the payment of which is not included in the annual required contributions of a sole or agent employer or the actuarially determined required contributions of a cost-sharing employer. Payments generally are made in accordance with installment contracts that usually include interest. Examples include contractually deferred contributions and amounts assessed to an employer upon joining a multiple-employer plan.

Pension trend data. Actuarially based data over time concerning the funding progress of a defined benefit pension plan and employers' actual and annual required contributions to the plan.

Performance auditing. A systematic process of objectively obtaining and evaluating evidence regarding the performance of an organization, program, function or activity. Evaluation is made in terms of its economy and efficiency of operations and its effectiveness in achieving desired regulations, for the purpose of ascertaining the degree of correspondence between performance and established criteria and communicating the results to interested users. The performance audit function provides an independent, third-party review of management's performance and the degree to which the performance of the audited entity meets pre-stated expectations.

Performance budget. A budget that bases expenditures primarily upon measurable performance of activities and work programs. A performance budget may also incorporate other bases of expenditure classification, such as character and object class, but these are secondary to activity performance.

Performance measurement. A commonly used term for service efforts and accomplishments reporting.

Permanent fund. A governmental fund type used to report resources held in a fiduciary capacity that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that support the reporting government's program(s) for the benefit of the government or its citizenry.

Perpetual inventory. A system whereby the inventory of units of property at any date may be obtained directly from the records, without resorting to an actual physical count for each item or group of items to be inventoried. This system provides an ongoing record of goods ordered, received, and withdrawn, and the balance on hand, in units and frequently also in value.

Personal property. Includes all property that is not real property, both tangible or intangible.

Perspective differences. Differences between the budgetary basis of accounting and GAAP that result when the structure of financial information used for GAAP financial reporting differs from the structure of financial information used for budgetary purposes.

Petty cash. A sum of money set aside on an imprest basis to make change or to pay small obligations for which the issuance of a formal voucher and check would be too expensive and time-consuming. Petty cash accounts are sometimes referred to as petty cash "funds." However, they are not "funds" in the sense of governmental accounting. Petty cash accounts should be reported as assets of the fund of ownership. See Imprest account.

Petty cash voucher. A form used to record individual disbursements of petty cash.

Pledged revenues. Funds generated from revenues and obligated to debt service or to meet other obligations specified by the long-term debt contract.

Policyholder dividends. A term used in connection with public-entity risk pools. Payments made or credits extended to the insured by the insurer, usually at the end of a policy year, that result in reducing the net insurance cost to the policyholder. These dividends may be paid in cash to the insured or applied by the insured to reduce premiums due for the next policy year.

Popular annual financial reporting. Supplementary financial reporting designed to meet the special needs of interested parties who are either unable or unwilling to use the more detailed financial information provided in traditional CAFR.

Popular Annual Financial Reporting Award. An awards program sponsored by the GFOA with the objective of encouraging and assisting governments to prepare and publish high-quality popular annual financial reports.

Population. The population of any entity of government other than a school district shall be determined by a method prescribed by the Legislature, provided that such determination shall be revised, as necessary, to reflect the periodic census conducted by the United States Department of Commerce, or successor agency of the United States Government. The population of any school district shall be such school district's average daily attendance as determined by a method prescribed by the Legislature.

Possessory interests. Possession of, claim to, or right to the possession of land or improvements, except when coupled with ownership of the land or improvements in the same person. Taxable improvements of tax-exempted land.

Postemployment healthcare benefits. Medical, dental, vision, and other health-related benefits provided to terminated employees, retired employees, dependents, and beneficiaries.

Posting. The act of transferring to an account in a ledger the data, either detailed or summarized, contained in a book or document of original entry.

Potential component unit. A separate government unit, agency or nonprofit corporation that needs to be evaluated to determine if it is to be included with other component units and the oversight unit to constitute the reporting entity.

Potentially misleading to exclude. A term used in connection with defining the financial reporting entity. The basis for including a legally separate entity within the financial reporting entity even though that separate entity does not meet either of the normal criteria for inclusion as a component unit (i.e., board appointment or fiscal dependency).

Preliminary project stage. A term used in connection with computer software developed or obtained for internal use. Costs incurred prior to the development stage of computer software (e.g., the conceptual formulation of alternatives, the evaluation of alternatives, the determination of the existence of needed technology, and the final selection of alternatives).

Preliminary views (PV). A due-process document issued by GASB that solicits comments from interested parties on a proposed authoritative pronouncement prior to the issuance of an exposure draft.

Premium. (1) The excess of the price of a security over its face value, excluding any amount of accrued interest bought or sold. (2) The consideration paid for an insurance contract.

Premium deficiency. A term used in connection with public-entity risk pools. A situation that occurs if the sum of 1) expected claims costs (including incurred but not reported claims) and all expected claim adjustment expenses and 2) expected dividends to policyholders or pool participants exceeds related unearned premiums.

Prepaid items. Payment in advance of the receipt of goods and services in an exchange transaction. Prepaid items differ from deferred charges in that they are spread over a shorter period of time than deferred charges and are regularly recurring costs of operations. Examples of prepaid items are prepaid rent, prepaid interest, and unexpired insurance premiums. See Deferred charges.

Prepayment of taxes. The deposits of money with a government on condition that the amount deposited is to be applied against the tax liability of a designated taxpayer after the taxes have been levied and such liability has been established. See Taxes collected in advance.

Present value. The discounted value of a future amount or amounts of cash, assuming a given rate of interest.

Primary government. A term used in connection with defining the financial reporting entity. A state government or general-purpose local government. Also, a special-purpose government that has a separately elected governing body, is legally separate, and is fiscally independent of other state or local governments. The primary government is the focus of the financial reporting entity.

Primary users of general-purpose external financial reports. Those groups of financial statement users whose needs guide the development of GAAP. For state and local governments, the primary users of general-purpose external financial reports are (a) those to whom government is primarily accountable (the citizenry), (b) those who directly represent the citizens (legislative and oversight bodies), and (c) those who lend or participate in the lending process (investors and creditors).

Principal. In the context of bonds other than deep-discount debt, the face value or par value of a bond or issue of bonds payable on stated dates of maturity. See Face value and Par value.

Prior secured roll. See Redemption Roll.

Prior unsecured roll. Unsecured taxes unpaid as of February 28 of each fiscal year.

Prior years' tax levies. Taxes levied for fiscal periods preceding the current one.

Private-purpose trust fund. A fiduciary trust fund type used to report all trust arrangements, other than those properly reported in pension and other employee benefit trust funds or investment trust funds, under which principal and income benefit individuals, private organizations, or other governments.

Pro forma. Latin: "as a matter of form," "an example." Term is used in conjunction with a noun to denote merely a sample form (i.e. pro forma document, statement, certificate, or presentation) the contents of which may be either wholly or partially hypothetical.

Program. Group activities, operations or organizational units directed to attaining specific purposes or objectives.

Program budget. A budget wherein expenditures are based primarily on programs of work and secondarily on character and object classification, on the one hand, and performance on the other. See Performance budget and Traditional budget.

Program compliance audit. An examination leading to the expression of an opinion on the degree of the audited entity's compliance with requirements imposed by intergovernmental grantors and the audited entity's eligibility for grant monies.

Program loan. A term used in connection with cash flows reporting. A loan made and collected as part of a governmental program that provides a "direct" benefit to "individual" constituents.

Program revenue. A term used in connection with the government-wide statement of activities. Revenues that derive directly from the program itself (fees and charges) or from parties outside the reporting government's taxpayers or citizenry, as a whole; they reduce the net cost of the function to be financed from the government's general revenues.

Projected unit credit actuarial cost method. A method under which the projected benefits of each individual included in an actuarial valuation are allocated by a consistent formula to valuation years. The actuarial present value of benefits allocated to a valuation year is called the normal cost. The actuarial present value of benefits allocated to all periods prior to a valuation year is called the actuarial accrued liability.

Property. Includes all matters and things, real, personal and mixed, capable of private ownership.

Proprietary funds. Sometimes referred to as income determination or commercial-type funds, the classification used to account for a government's ongoing organizations and activities that are similar to those often found in the private sector (i.e., enterprise and internal service funds). All assets, liabilities, equities, revenues, expenses and transfers relating to the government's business and quasi-business activities are accounted for through proprietary funds. The GAAP used are generally those applicable to similar businesses in the private sector and the measurement focus is on determination of net income, financial position and changes in financial position. However, where GASB has issued pronouncements applicable to those entities and activities, they should be guided by these pronouncements.

Provisions. In governmental fund types, budgeted amounts to provide for increases or decreases in fund balance classifications.

Public authority. See Authority.

Public corporation. See Municipal corporation and Quasi-municipal corporation.

Public employee retirement system (PERS). A state or local governmental entity entrusted with administering one or more pension plans; it also may administer OPEB plans and deferred compensation plans. A public employee retirement system also may be an employer that provides or participates in a pension plan or other types of employee benefit plans for employees of the system.

Public-entity risk pool. A cooperative group of governmental entities joining together to finance an exposure, liability, or risk. Risk may include property and liability, workers' compensation, or employee health care. A pool may be a stand-alone entity or included as part of a larger governmental entity that acts as the pool's sponsor.

Purchase order. A document authorizing the delivery of specified merchandise or the rendering of certain services and the making of a charge for them.

Purchases method. The method under which inventories are recorded as expenditures when acquired. See Consumption method.

Pure cash conduit. A term used in connection with pass-through grants. A grantor that merely transmits grantor-supplied moneys without having administrative or direct financial involvement in the program.

Purpose restrictions. A term used in connection with government-mandated and voluntary nonexchange transactions. Legal limitations that specify the purpose or purposes for which resources are required to be used (as distinguished from eligibility requirements).

Qualified opinion. An opinion stating that, “except for” the effect of the matter to which the qualification relates, the financial statements present fairly the financial position, results of operations, and (when applicable) cash flows in conformity with GAAP. Such an opinion is expressed when a lack of sufficient, competent evidential matter or restrictions on the scope of the auditor’s examination have led the auditor to conclude that an unqualified opinion cannot be expressed, or when the auditor believes, on the basis of the examination, that (1) the financial statements contain a departure from GAAP, the effect of which is material, (2) there has been a material change between periods in accounting principles or in the method of their application, or (3) there are significant uncertainties affecting the financial statements, and the auditor has decided not to express an adverse opinion or to disclaim an opinion. See Adverse opinion and Disclaimer of opinion.

Quasi-municipal corporation. An agency (e.g., a county or school district) established by the state primarily to help the state to carry out its functions. Some counties and other agencies ordinarily classified as quasi-municipal corporations have been granted the powers of municipal corporations by their states. See Municipal corporation.

Questioned cost. A determination by an auditor that an expenditure under a grant does not meet all of the grantor’s requirements and therefore may be subject to disallowance and subsequent refund to the grantor.

Rate base. The value of utility property used in computing an authorized rate of return as authorized by law or a regulatory commission.

Rating. In the context of bonds, normally an evaluation of credit-worthiness performed by an independent rating service.

Real account. An account, the balance of which is carried forward into the next fiscal year (a balance sheet account). See Nominal account.

Real estate or Real property. (a) The possession of, claim to, ownership of, or right to possession of land; (b) all mines, minerals, and quarries in the land, all standing timber whether or not belonging to the owner of the land, and all rights and privileges appertaining thereto, and/or (c) improvements.

Realized gains and losses. The cumulative effect of appreciation and depreciation in the value of investments reported at fair value at the time those investments are sold.

Reappropriation. The inclusion of a balance from the prior year’s budget as part of the budget of the subsequent fiscal year. Reappropriation is common for encumbrances outstanding at the end of a fiscal year that a government intends to honor in the subsequent fiscal year.

Reasonable assurance. A term used in connection with financial auditing. The principle that the goal of the independent audit of the financial statements is to ensure that financial statements are free from “material” misstatement. The principle of reasonable assurance rests upon the assumption that it is not cost beneficial to attempt to ensure that financial statements are free of immaterial misstatements.

Rebatable arbitrage. A term used in connection with the reinvestment of the proceeds of tax-exempt debt. A requirement to remit to the federal government interest revenue in excess of interest costs when the proceeds from the sale of tax-exempt securities are reinvested in a taxable money market instrument with a materially higher yield.

Recommended budget. The recommended budget is prepared from compiled budget requests by the administrative officer or the auditor, as designated by the board and is recommended to the board by the designated county official on or before June 30 each year, as the board directs. The recommended budget document is formally approved by the board of supervisors to serve as the basis for public hearings prior to the determination of the adopted budget. See Adopted budget and Budget request.

Reciprocal interfund activity. The interfund counterpart to exchange and exchange-like transactions. This category includes both interfund loans and interfund services provided and used.

Recoverable expenditure. An expenditure that is made for or on behalf of another government, fund, or department or for a private individual, firm or corporation and that will subsequently be recovered in cash or its equivalent.

Redemption. The realization of a right to have the title of property restored free and clear of the lien of any taxes, through payment of money.

Redemption amount. The total amount that would be necessary to redeem tax-defaulted property at the time an election is made to pay delinquent taxes.

Redemption roll. All secured taxes defaulted as of June 30 of each fiscal year.

Refund. 1) noun An amount paid back or credit allowed because of an overcollection or because of the return of an object sold. 2) verb To pay back or allow credit for an amount because of an overcollection or because of the return of an object sold. 3) verb To provide for the payment of an obligation through cash or credit secured by a new obligation.

Refunding. New long-term debt issued to retire long-term debt already outstanding. The refunding debt may be used to provide the resources for redeeming the outstanding long-term debt, in cash, or the refunding debt may be exchanged with holders of the outstanding debt. See Advance refunding.

Register. A record for the consecutive entry of a certain class of events, documents, or transactions, with proper notation of all the required details. See Journal.

Registered bond. A bond whose owner is registered with the issuing government. A registered bond cannot be sold or exchanged without a change of registration.

Registered security. A security that has the name of the owner written on its face. A registered security cannot be negotiated except by the endorsement of the owner.

Registered warrant. A warrant which is registered by the paying officer for future payment due to a present lack of monies and which is to be paid in the order of its registration. In some cases, such warrants are registered when issued; in others, when first presented to the paying officer by the holders. See Warrant.

Regular serial bonds. Serial bonds in which all periodic installments of principal repayment are equal.

Regulated enterprises. Enterprises for which (a) rates for regulated services or products are either established by, or subject to approval by, an independent, third-party regulator (or the governing board itself if it is empowered by statute or contract to establish rates that bind customers), (b) the regulated rates are designed to recover the specific enterprise's costs of providing regulated services or products, and (c) it is reasonable to assume that the regulated activity can set and collect charges sufficient to recover its costs. Regulated enterprises have the "option" of adopting certain specialized guidance issued by FASB. In practice, the term "regulated enterprise" normally is applied only to enterprises that elect this option.

Reimbursable expenditures. See Recoverable expenditure.

Reimbursement grant. A grant for which a potential recipient must first incur qualifying expenditures to be eligible. Reimbursement grants are also referred to as "expenditure-driven grants."

Reimbursements. (1) Repayments of amounts remitted on behalf of another party. (2) Interfund transactions that constitute reimbursements of a fund for expenditures or expenses initially made from it that properly apply to another fund (e.g., an expenditure properly chargeable to a Special Revenue Fund is initially made from the General Fund and is subsequently reimbursed). These transactions are recorded as expenditures or expenses (as appropriate) in the reimbursing fund and as reductions of the expenditure or expense in the fund that is reimbursed.

Reinsurance. A transaction in which an assuming enterprise (reinsurer), for a consideration (premium), assumes all or part of a risk undertaken originally by another insurer (ceding enterprise). However, the legal rights of the insured are not affected by the reinsurance transaction, and the ceding enterprise issuing the original insurance contract remains liable to the insured for payment of policy benefits.

Related organization. A term used in connection with defining the financial reporting entity. An organization for which a primary government appoints a voting majority of the board, but for which it is not “financially” accountable.

Related party transaction. A transaction that an informed observer might reasonably believe reflects considerations other than economic self-interest based upon the relationship that exists between the parties to the transaction. The term often is used in contrast to an arm’s length transaction.

Relative order of liquidity. An order for presenting assets and liabilities on the statement of net assets, based upon how readily they may be converted to cash or will require the use of cash.

Relevance. The principle that there should be a close logical relationship between the financial information provided and the purpose for which it is needed. Information is relevant if it is capable of making a difference in a user’s assessment of a problem, condition, or event.

Reliability. The principle that financial information should be verifiable, free from bias, and faithfully represent what it purports to represent.

Religious exemption. The tax exemption allowed on property used exclusively for religious purposes.

Replacement cost. The amount of cash or other consideration that would be required today to obtain the same asset or its equivalent. See Reproduction cost.

Report. noun A statement or description. verb The process of communicating information.

Reporting entity. The oversight unit and all of its related component units, if any, that are combined in the CAFR/BFS.

Reporting package. A term used in connection with single audits. A package that the auditor must communicate to the Federal Audit Clearing House that includes (a) the government’s financial statements, (b) the government’s supplementary schedule of expenditures of federal awards, (c) the auditor’s reports, (d) a summary schedule of prior audit findings, and (e) a corrective action plan. The reporting package must be accompanied by a special data collection form that summarizes the information contained in the reporting package.

Reproduction cost. The cost as of a certain date of reproducing an exactly similar new property in the same place. Sometimes this term is designated as reproduction cost new to distinguish it from depreciated reproduction cost, which is the reproduction cost of a given property less the estimated accumulated depreciation applicable to it. In the absence of any modifier, however, reproduction cost is understood to be synonymous with reproduction cost new. See Replacement cost.

Repurchase agreement. A generic term for an agreement in which a government entity (buyer-lender) transfers cash to a broker-dealer or financial institution (seller-borrower); the broker-dealer or financial institution transfers securities to the entity and promises to repay the cash plus interest in exchange for the same securities or for different securities.

Request for proposal (RFP). A formalized method used in the procurement of services by soliciting information concerning the qualifications, experience and proposed compensation arrangements of prospective firms. The RFP sets forth the services being sought and requests information from firms interested in procuring the engagement.

Required supplementary information (RSI). Statements, schedules, statistical data, or other information which, according to GASB, is necessary to supplement, although not required to be a part of, the basic financial statements.

Requisition. A written demand or request, usually from one department to the purchasing officer or to another department, for specified articles or services.

Resolution. A special or temporary order of a legislative body; an order of a legislative body requiring less legal formality than an ordinance of statute. See Ordinance.

Resource. An element of the means available to a government to carry out its functions and activities. This includes money, property, equipment, manpower and other assets both tangible and intangible.

Restricted assets. Assets whose use is subject to constraints that are either (a) externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments or (b) imposed by law through constitutional provisions or enabling legislation.

Restricted fund balance. Fund balance should be classified as restricted when constraints placed on the use of resources are either (a) externally imposed by creditors, grantors, contributors, or laws or regulations of other governments or (b) imposed by law through constitutional provisions or enabling legislation.

Restricted fund balance - debt service. An account used to segregate a portion of the fund balance for resources legally restricted to the payment of general long-term debt principal and interest maturing in future years.

Restricted net assets. A component of net assets calculated by reducing the carrying value of restricted assets by the amount of any related debt outstanding.

Restricted net position. One of three components of net position that must be reported in both government-wide and proprietary fund financial statements. It consists of restricted assets reduced by liabilities and deferred inflows of resources related to those assets. Generally, a liability or deferred inflow of resources related to restricted assets if the asset results from a resource flow that also results in the recognition of a liability/deferred inflow of resources or if the liability will be liquidated with the restricted assets reported.

Retained earnings. An equity account reflecting the accumulated earnings of a commercial business in the private sector. The term is not used in governmental accounting, which uses a "net assets" concept instead.

Retention. A liability account reflecting amounts due on construction contracts not paid pending final inspection of the project or the lapse of a specified period, or both. The unpaid amount is usually a stated percentage of the contract price.

Retirement allowances. Amounts paid to government employees who have retired from active service or to their survivors.

Retirement fund. See Pension (and other employee benefits) trust fund.

Retrospectively (experience) rated policy. A term used in connection with public-entity risk pools. An insurance policy for which the final amount of the premium is determined by adjusting the initial premium based on actual experience during the period of coverage (sometimes subject to maximum and minimum limits). A retrospectively rated policy is designed to encourage safety by the insured and to compensate the insurer if larger-than-expected losses are incurred.

Revenue and claims development trend data. Required supplementary information mandated by GASB for public-entity risk pools.

Revenue anticipation note (RAN). A short-term, interest-bearing note issued by a government in anticipation of revenues to be received at a later date. The note is retired from the revenues to which it is related.

Revenue bonds. Bonds whose principal and interest are payable exclusively from earnings of an enterprise fund. In addition to a pledge of revenues, such bonds sometimes contain a mortgage on the enterprise fund's property.

Revenue bonds payable. A liability account which reflects the face value of revenue bonds issued and outstanding.

Revenue district. Includes every city and district for which the county officers assess property and collect taxes or assessments.

Revenues. (1) Increases in the net current assets of a governmental fund type from other than expenditure refunds and transfers. Also, general long-term debt proceeds and transfers in are classified as other financing sources rather than as revenues. (2) Increases in the net total assets of a proprietary fund type, net total assets from other than expense refunds, capital contributions, and transfers. Also, transfers-in are classified separately from revenues.

Reverse repurchase agreement. An agreement in which a broker-dealer or financial institution (buyer-lender) transfers cash to a government entity (seller-borrower); the entity transfers securities to the broker-dealer or financial institution and promises to repay the cash plus interest in exchange for the same securities or different securities.

Revolving fund. An imprest account which is accounted for as an asset of a fund.

Risk-sharing pools. One of four different types of public-entity risk pools. An arrangement by which governments pool risks and funds and share in the cost of losses.

Roll being prepared. 1) Assessor's Roll: the roll being compiled by the assessor for the ensuing fiscal year prior to certification of valuations to the county auditor. 2) Supplemental Roll: the roll for the fiscal year following the fiscal year in which the change in ownership occurs or new construction is completed.

Salary-related payments. A term used in connection with compensated absences. Payments by an employer that are directly and incrementally associated with payments made for compensated absences on termination. Such salary-related payments include the employer's share of Social Security and Medicare taxes and also might include the employer's contributions to pension plans.

Salvage value. The estimated value that will be realized upon sale of an asset at the end of its useful life.

Schedule of employer contributions. A term used in connection with defined benefit pension and OPEB plans. Trend data on employers' annual required contribution to a plan and actual contributions.

Schedule of funding progress. A term used in connection with defined benefit pension and OPEB plans. Trend data on the relationship between the actuarial value of pension plan assets and the related actuarial accrued liability.

Schedules. See Supporting schedules.

School district or entity. Any school district, community college district, or county superintendent of schools.

Scope of public service. One of the criteria used to determine whether the statements of a potential component unit should be included in the financial statements of a reporting entity. This criterion embraces two aspects: (1) is the activity for the benefit of the reporting entity and/or its residents? and (2) is the activity conducted within the geographic boundaries of the reporting entity and is it generally available to the citizens of that entity?

Scrap value. The value that will be realized upon sale of an asset if sold for its materials.

Scrip. An evidence of indebtedness, usually in small denomination, secured or unsecured, interest-bearing or noninterest-bearing, stating that the government, under conditions set forth, will pay the face value of the certificate or accept it in payment of certain obligations.

Secured roll. State-assessed property and property which, in the opinion of the assessor, has sufficient value to guarantee payment of taxes levied, which if unpaid can be satisfied by the sale of the property by the tax collector.

Security. A negotiable or nonnegotiable instrument that signifies an ownership interest, the right to an ownership interest, or creditor status.

Securities lending transactions. Transactions in which governmental entities transfer their securities to broker-dealers and other entities for collateral—which may be cash, securities, or letters of credit—and simultaneously agree to return the collateral for the same securities in the future.

Segment. An identifiable activity (or grouping of activities) required to be accounted for separately which is reported as or within an enterprise fund or another stand-alone entity for which one or more revenue bonds or other revenue-backed debt instruments (such as certificates of participation) are outstanding. A segment has a specific identifiable revenue stream pledged in support of revenue bonds or other revenue-backed debt and has related expenses, gains and losses, assets, and liabilities that can be identified.

Segment information. In the context of governmental financial reporting, the presentation of selected information on certain individual enterprise funds. Such disclosures are required by GAAP for primary governments with activities meeting the definition of segments.

Segregation of incompatible duties. The principle of internal control that no single employee should be placed in a position that allows that employee both to commit and to conceal an irregularity in the ordinary course of the employee's duties.

Self-supporting debt or self-liquidating debt. Debt obligations whose principal and interest are payable solely from the earnings of the enterprise for whose construction or improvement the bonds were originally issued. See Revenue bonds.

Serial bonds. Bonds whose principal is repaid in periodic installments over the life of the issue. See Regular serial bonds and Straight serial bonds.

Service assessments. Special assessment projects for operating activities that do not result in the purchase or construction of capital assets. Often such service assessments are for services that are normally provided to the public as general government functions and that would otherwise be financed by the general fund or a special revenue fund. Those services include street lighting, street cleaning and snow plowing. Financing for these routine services typically comes from general revenues. However, when routine services are extended to property owners outside the normal service area of the government or are provided at a higher level or at more frequent intervals than that provided the general public, special assessments are sometimes levied. Only the affected property owners are charged for the additional services.

Service efforts and accomplishments reporting. A term used by GASB to describe the presentation of performance measures in connection with general purpose external financial reporting.

Shared revenues. Revenues levied by one government but shared on a predetermined basis—often in proportion to the amount collected at the local level—with another government or class of governments.

Shared taxes. See Shared revenues.

Short-term debt. Debt with a maturity of one year or less after the date of issuance. Short-term debt usually includes variable-rate debt, bond anticipation notes, tax anticipation notes, and revenue anticipation notes.

Significant deficiency. A significant deficiency is a deficiency or combination of deficiencies in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Single audit. Audit designed to meet the needs of all federal grantor agencies and performed in accordance with the Single Audit Act of 1984 (as amended) and Office of Management and Budget (OMB) Circular A-133, Audits of States, Local Governments and Non-Profit Organizations. The Single Audit Act allows or requires governments (depending on the amount of federal assistance received) to have one audit performed

Single Audit Act of 1984. Federal legislation that provides for state and local government recipients of federal financial awards to have one audit performed to meet the needs of all federal grantor agencies. The Single Audit Act was amended in 1996.

Single-program government. A term used in connection with financial reporting for special purpose governments. A government that budgets, manages, and accounts for its activities as a single program. Single-program governments that use only governmental funds have the option to combine their fund financial statements and their government-wide financial statements into a single, combining presentation.

Sinking fund. See Debt service fund.

Sinking fund bonds. Bonds issued under an agreement which requires the government to set aside periodically out of its revenues a sum that, with compound earnings thereon, will be sufficient to redeem the bonds at their stated date of maturity. Sinking fund bonds are usually term bonds.

Solvency test. A term used in connection with pension plan financial reporting. Comparison of a pension plan's present assets to its aggregate accrued liabilities classified into the following categories: (a) liability for active member contributions on deposit, (b) liability for future benefits to present retired lives, and (c) liability for service already rendered by active members. In preparing this schedule, valuation assets are arbitrarily allocated first to the liability for active member contributions on deposit, second to the liability for future benefits to present retired lives, and third to the liability for service already rendered by active members, regardless of the method used for asset allocation.

Special assessment. A compulsory levy made against certain properties to defray part or all of the cost of a specific capital improvement or service deemed to primarily benefit those properties; in addition to any ad valorem taxes. See Special benefit assessment and Fixed charge assessment.

Special assessment bonds. Bonds payable from the proceeds of special assessments. If the bonds are payable only from the collections of special assessments, they are known as special assessment bonds. If, in addition to the assessments, the full faith and credit of the government are pledged, they are known as general obligation special assessment bonds.

Special assessment liens receivable. Claims a government has upon properties until special assessments levied against them have been paid. The term normally applies to those delinquent special assessments the government has taken legal action to collect through the filing of claims.

Special assessment roll. The official list showing the amount of special assessments levied against each property presumed to be benefited by an improvement or service.

Special Assessments Receivable - Current. Account for uncollected special assessments that a government has levied and are due within one year and are not yet considered delinquent.

Special Assessments Receivable - Delinquent. Account for special assessments remaining unpaid on and after the date to which a penalty for nonpayment is attached.

Special Assessments Receivable - Noncurrent. Account for uncollected special assessments that a government has levied but that are not due within one year.

Special benefit assessment. See Special assessment, Fixed charge assessment, and Service assessment.

Special district. An independent unit of local government organized to perform a single government function or a restricted number of related functions. Special districts usually have the power to incur debt and levy taxes; however, certain types of special districts are entirely dependent upon enterprise earnings and cannot impose taxes. Examples of special districts are water districts, drainage districts, flood control districts, hospital districts, fire protection districts, transit authorities, port authorities, and electric power authorities.

Special district bonds. Bonds issued by a special district.

Special funding situations. A term used in connection with pensions. A situation in which a governmental entity is legally responsible for contributions to pension or OPEB plans that cover the employees of another governmental entity or entities. For example, a state government may be legally responsible for the annual "employer" contributions to a pension plan that covers employees of school districts within the state.

Special items. Significant transactions or other events within the control of management that are either unusual in nature or infrequent in occurrence.

Special journal. A journal in which are entered all entries of a particular type (e.g. cash receipts journals, cash disbursement journals, and purchases journals). See Journal and General journal.

Special lien bonds. Special assessment bonds that are liens against particular pieces of property.

Special revenue fund. A governmental fund used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specific purposes other than debt service or capital projects. Special revenue funds should not be used to account for resources held in trust for individuals, private organizations, or other governments.

Special termination benefits. Benefits offered for a short period of time to employees in connection with their termination of employment. Special termination benefits serve as an inducement to take early retirement, and often are used to help alleviate near-term budgetary problems.

Stabilization arrangements. These represent formal arrangements to maintain amounts for budget or revenue stabilization, working capital needs, contingencies or emergencies, and other similarly titled purposes. The authority to set aside these amounts generally comes from statute, ordinance, resolution, charter, or constitution. Stabilization amounts may be expended only when certain specific circumstances exist and those circumstances should be such that they would not be expected to occur routinely. Stabilization funds can be classified as either restricted or committed fund balance if they meet the criteria; if the criteria is not met, then stabilization agreements should be reported as unassigned.

Standard cost. The predetermined cost of performing an operation or producing a product when labor, materials and equipment are utilized efficiently under reasonable and normal conditions. Normal conditions exist when there is an absence of special or extraordinary factors affecting the quality or quantity of the work performed or the time or method of performing it.

Standard costing. Method of estimating the historical cost of a capital asset by establishing the average cost of obtaining the same or similar asset at the time of acquisition.

State and local government series (SLGS, slugs). Direct obligations of the federal government that the U.S. Treasury issues specifically to provide state and local governments with required cash flows at yields that do not exceed Internal Revenue Service arbitrage limits.

State-assessed roll. Utility properties assessed by the State Board of Equalization that are comprised of both unitary and nonunitary value which is considered part of the secured roll.

State Controller. The elected state fiscal officer prescribed by the constitution with such additional powers, duties, and functions as the legislature may confer or impose upon the office.

Statement of cash receipts and disbursements. A financial presentation summarizing an entity's cash transactions in an accounting period. This statement is not currently required by GAAP.

Statistical section. The third of three essential components of any CAFR. The statistical section provides a broad range of trend data covering key financial indicators from the past 10 fiscal years (e.g., general government revenues and expenditures, property tax collections, debt burden). It also contains demographic and miscellaneous data useful in assessing a government's financial condition. The contents of the statistical section normally fall outside the scope of the independent audit of the financial statements.

Statistical tables. Presentations included in the statistical section of the CAFR/CUFR providing detailed data on the physical, economic, social and political characteristics of the reporting government.

Statute. A written law enacted by a duly organized and constituted legislative body. See Ordinance, Resolution, and Order.

Straight serial bonds. Serial bonds in which the annual installments of bond principal are equal or nearly equal.

Structured settlement. A term used in connection with risk financing. A means of satisfying a claim liability, consisting of an initial cash payment to meet specific present financial needs combined with a stream of future payments designed to meet future financial needs, generally funded by annuity contracts.

Subactivity. A special line of work performed in carrying out a governmental activity. (e.g., "cleaning luminaries" and "replacing defective street lamps" would be subactivities under the activity of "street light maintenance").

Subfunction. A grouping of related activities within a particular governmental function. (e.g., “police” is a subfunction of the function “public safety”).

Subobject. A subdivision within an expenditure object classification (e.g., “regular employees” is a possible subobject classification within the “personal services - salaries and wages” expenditure object classification). May be used in a similar context when revenues utilize object classifications.

Subsidiary account. One of a group of related accounts supporting in detail the debit and credit summaries recorded in a control account (e.g., the individual property taxpayers’ accounts for the taxes receivable control account in the general ledger). See Control account.

Subsidiary ledger. A group of subsidiary accounts, the sum of the balances of which should equal the balance of the related control account. See General ledger.

Subvention. Provision of aid, support, subsidy, grant, endowment, etc.

Summary of significant accounting policies (SSAP). A disclosure of accounting policies, required by GAAP, that should identify and describe the accounting principles followed by the reporting entity and the methods of applying those principles that materially affect the determination of financial position, cash flows or results of operations. In general, the disclosure should encompass important judgments as to the appropriateness of principles relating to the recognition of revenue and the allocation of asset costs to current and future periods; in particular, it should encompass those accounting principles and methods that involve any of the following: (1) a selection from existing acceptable alternatives, (2) principles and methods peculiar to government, and (3) unusual or innovative applications of accounting principles, including those peculiar to government.

Supplemental roll. The roll prepared or emended in accordance with the provisions of the Revenue and Taxation Code Section 75 et seq. and containing properties which have changed ownership or had new construction completed.

Supplementary information (SI). Financial information presented together with basic financial statements that is not included within the scope of the audit of those statements. When the presentation of certain supplementary information is mandated by the GASB, it is referred to as “required supplementary information.”

Supporting schedules. Financial presentations used: (1) to demonstrate compliance with finance-related legal and contractual provisions; (2) to aggregate and present in greater detail information spread throughout the financial statements (e.g., cash balances, investments, current and delinquent taxes); (3) to present in greater detail information reported in the financial statements (e.g., additional revenue sources detail, changes in general capital assets by function); and (4) to present information not disclosed in GAAP basic financial statements (e.g., cash receipts and disbursements, changes in Agency Fund assets and liabilities).

Surety bond. A written promise to pay damages or to indemnify against losses caused by the party or parties named in the document, through nonperformance or through defalcation (e.g., a surety bond might be required of an independent contractor). Surety bonds also include fidelity bonds covering government officials and employees.

Susceptible to accrual. A term used in connection with the application of the modified accrual basis of accounting. Revenues that are collected or collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period.

Suspense account. An account which carries charges or credits temporarily, pending the determination of the proper account or accounts to which they are to be posted.

System development fees. See Connection fees.

Tap fees. See Connection fees.

Tax anticipation note (TAN). Notes or warrants issued in anticipation of collection of taxes, usually retired only from tax collections, and frequently only from the proceeds of the tax levy whose collection they anticipate.

Tax anticipation warrants. See Tax anticipation notes.

Tax certificate. A certificate issued by a government as evidence of the conditional transfer of title to tax-delinquent property from the original owner to the holder of the certificate. If the owner does not pay the amount of the tax arrearage and other charges required by law during the specified period of redemption, the holder can foreclose to obtain title. Also called tax sale certificate and tax lien certificate in some jurisdictions. See Tax deed.

Tax deed. A written instrument by which title to property sold for taxes is transferred unconditionally to the purchaser. A tax deed is issued upon foreclosure of the tax lien and is obtained by the purchaser at the tax sale. The tax lien cannot be foreclosed until the expiration of the period during which the owner may redeem the property by paying the delinquent taxes and other charges. See Tax certificate.

Tax-defaulted property. See Defaulted taxes.

Tax-exempt bonds. State and local government securities whose interest is exempt from taxation by the federal government or within the jurisdiction issued.

Tax-increment financing. Financing secured by the anticipated incremental increase in tax revenues resulting from the redevelopment of an area.

Tax levy ordinance. An ordinance through which taxes are levied.

Tax liens. Claims governments have upon properties until the taxes levied against them have been paid. This term is sometimes limited to those delinquent taxes the government has taken legal action to collect through the filing of liens.

Tax liens receivable. Legal claims against property that have been exercised because of nonpayment of delinquent taxes, interest and penalties. Amounts accumulated in this account include delinquent taxes, interest and penalties receivable thereon, and costs of converting delinquent taxes into tax liens.

Tax notes. See Tax anticipation notes.

Tax rate. The amount of tax stated in terms of a unit of the tax base (e.g. 25 mills per dollar of assessed valuation of taxable property).

Tax rate area (TRA). A geographic area served by a unique combination of jurisdictions.

Tax-rate limit. The maximum rate at which a government may levy a tax. The limit may apply to taxes raised for a particular purpose or to taxes imposed for all purposes, and may apply to a single government or to a class of governments operating in a particular area. Overall tax-rate limits usually restrict levies for all purposes and of all governments, state and local, having jurisdiction in a given area.

Tax roll. The official list showing the amount of taxes levied against each taxpayer or property. Frequently, the tax roll and the assessment roll are combined, but even in these cases the two can be distinguished.

Tax supplement. A tax levied by a local government having the same base as a similar tax levied by a higher level of government, such as a state. The local tax supplement is frequently administered by the higher level of government along with its own tax (e.g. locally imposed, state-administered sales tax).

Tax title notes. Obligations secured by pledges of the government's interest in certain tax liens or tax titles.

Taxable assessed value. The total assessed value minus all exemptions other than the homeowner's exemption.

Taxable value. Means and includes the base year full cash value, adjusted for any given lien date as required by law, or the full cash value for the same date, whichever is less.

Taxes. Compulsory charges levied by a government to finance services performed for the common benefit. This term does not include specific charges made against particular persons or property for current or permanent benefits, such as special assessments. Neither does the term include charges for services rendered only to those paying such charges (e.g. sewer service charges).

Taxes collected in advance. A liability account reflecting taxes collected before they are formally levied.

Taxes levied for other governments. An asset account reflecting taxes that are levied by the reporting government for other governments that, when collected, are to be paid over to those governments.

Taxes Receivable - Current. Account for the uncollected portion of taxes which a government has levied, which are due within one year and which are not considered delinquent.

Taxes Receivable - Delinquent. Account for taxes remaining unpaid on and after the date on which a penalty for nonpayment attaches. Delinquent taxes receivable are classified as such until paid, abated, canceled, or converted into tax liens.

Taxing agency. Includes the State, county, city, and every district that assesses property for taxation purposes and levies taxes or assessments on the property so assessed.

Technical agenda. A term used in connection with GASB's due process procedure. A list of research projects formally undertaken by GASB as part of its development of authoritative standards of accounting and financial reporting.

Technical bulletin. A document issued by the staff of GASB to provide guidance for applying GASB statements and interpretations and resolving accounting issues not directly addressed by them. The Accounting Standards and Procedures Committee of the County Auditor's Association of Texas issues similar documents that relate to specific accounting issues and their related treatments that are unique to Texas counties.

Teeter plan. See Alternate method of tax apportionment.

Temporary loans. Short-term obligations representing amounts borrowed for short periods of time and usually evidenced by notes payable or warrants payable. They may be unsecured or secured by specific revenues to be collected. See Tax anticipation notes.

Ten percent criterion. The first of two tests used to determine whether a given governmental fund or enterprise fund must be reported as a major fund in the basic financial statements. For governmental funds, this test is applied to the total assets, liabilities, revenues, and expenditures of all governmental funds. For enterprise funds, this test is applied to the total assets, liabilities, revenues, and expenses of all enterprise funds. The test need be met for only one of these four items. See Five percent criterion.

Term bonds. Bonds that mature, in total, on one date.

Termination payments method. A method of calculating the liability for earned sick leave for which it is probable that the benefits will result in termination payments. Under this method, the amount of the liability is estimated based on a governmental entity's past experience of making termination payments for sick leave, adjusted for the effect of changes in its termination policy and other factors.

Timber Advisory Committee. A standing committee appointed by the board and composed of one representative of the Board of Equalization, one representative of the Board of Forestry, five assessors from the rate adjustment counties, one member representing small-scale timber owners, and one member representing large-scale timber owners.

Timberland. (Timber yield tax). Privately owned land, or land acquired for state forest purposes, which is devoted to and used for growing and harvesting timber and compatible uses, and which is capable of growing an average annual volume of wood fiber of at least 15 cubic feet per acre.

Timeliness. The principle that financial statements must be issued soon enough after the reported events to affect decisions.

Timing differences. Differences between the budgetary basis of accounting and GAAP that occur when the period used for budgeting differs from the period used for GAAP reporting (e.g., a special revenue fund that uses a grant-year budget rather than a fiscal-year budget).

Trade discount. An allowance, usually varying in percentage with the volume of transactions, made to those engaged in certain businesses and given without respect to when the account is paid. These discounts are commonly considered a reduction of the sales or purchase price, not earnings. The term is not to be confused with cash discount.

Traditional budget. A term sometimes applied to the budget of a government wherein expenditures are based entirely or primarily on objects of expenditure. See Program budget and Performance budget.

Transfers. See Interfund transfers and Intrafund transfers.

Trial balance. A list of the balances of the accounts in a ledger kept by double entry with the debit and credit balances shown in separate columns. If the totals of the debit and credit columns are equal or their net balance agrees with a control account, the ledger from which the figures are taken is said to be “in balance.”

Trust funds. See Fiduciary fund.

Trustee. A fiduciary holding property on behalf of another.

Type A program. A term used in connection with the determination of major programs for purposes of single audits. Type A programs are defined on the basis of the relationship between program expenditures and total federal awards expended.

Type B program. A term used in connection with the determination of major programs for purposes of single audits. A Type B program is any program with insufficient program expenditures to qualify as a Type A program.

Unallocated balance of appropriation. An appropriation balance available for allotment.

Unallocated claim adjustment expenses. A term used in connection with risk financing. Costs that cannot be associated with specific claims but are related to claims paid or in the process of settlement, such as salaries and other internal costs of the pool's claims department.

Unallocated depreciation. A term used in connection with the government-wide statement of activities. Depreciation not properly reported as a direct expense of a functional category.

Unamortized discounts on bonds sold. A contra-liability account used to reflect that portion of the face value of bonds exceeding the amount received from their sale (excluding amounts paid for accrued interest) which remains to be amortized over the remaining life of the bonds.

Unamortized premiums on bonds sold. A liability account used to reflect that portion of the excess of bond proceeds over exceeding par value and which remains to be amortized over the remaining life of such bonds.

Unamortized premiums on investments. An asset account used to reflect that portion of the excess of the amount paid for investments (excluding amounts paid for accrued interest) over their face value which remains to be amortized over the remaining life of such investments.

Unanticipated available financing. Material sums of available financing not included in the budget which may legally be made available for the financing requirements of the county.

Unassigned fund balance. This is the residual classification for the General Fund. This classification represents fund balance that has not been assigned to other funds and that has not been restricted, committed, or assigned to specific purposes within the General Fund. The General Fund should be the only fund that reports a positive unassigned fund balance amount. In other governmental funds, if expenditures incurred for specific purposes exceed the amounts restricted, committed, or assigned to those purposes, it may be necessary to report a negative unassigned fund balance.

Unavailable fund balance. That portion of the governmental-type fund balance which is unavailable for financing the budget requirements for the accounting period involved. This is a conventional term, which identifies the nonspendable, restricted, committed and assigned portion of the fund balance, and should not be used in a GAAP financial presentation.

Unbilled accounts receivable. An account designating the estimated amount of accounts receivable for service that have not yet been billed (e.g., if a utility bills its customers bimonthly but prepares monthly financial statements, the amount of goods sold or services rendered during the first month of the bimonthly period would be reflected in the balance sheet under this account title).

Uncommitted balance of appropriations. The portion of an appropriation remaining after the deduction of expenditures and encumbrances.

Underlying securities. Securities transferred in accordance with a repurchase/reverse repurchase agreement.

Understandability. The principle that information in financial reports should be expressed as simply as possible.

Underwriter. In the context of bonds, a dealer who purchases a new issue for resale.

Underwriting. The process of selecting, classifying, evaluating, rating and assuming risks.

Undivided interest. An arrangement (also known as a “joint operation”) that resembles a joint venture but no entity or organization is created by the participants. An undivided interest is an ownership arrangement in which two or more parties own property in which title is held individually to the extent of each party’s interest. Implied in that definition is that each participant is also liable for specific, identifiable obligations (if any) of the operation. Because an undivided interest is not a legal entity, borrowing to finance its operations often is done individually by each participant. An additional consequence of the absence of a formal organizational structure is that there is no entity with assets, liabilities, expenditures/expenses, and revenues—and thus, equity—to allocate to participants.

Unearned revenue. A type of deferred revenue account used in connection with resources that have not yet been earned.

Unencumbered allotment. That portion of an allotment not yet expended or encumbered.

Unencumbered appropriation. That portion of an appropriation not yet expended or encumbered.

Unexpended allotment. That portion of an allotment not yet expended.

Unexpended appropriation. That portion of an appropriation not yet expended.

Unfunded actuarial accrued liability. The excess of the actuarial accrued liability over the actuarial value of assets. This value may be negative, in which case it may be expressed as a negative unfunded actuarial accrued liability, the excess of the actuarial value of assets over the actuarial accrued liability, or the funding excess.

Unit cost. In the context of cost accounting, the cost of producing a unit of product or rendering a unit of service (e.g., the cost of treating and purifying 1,000 gallons of sewage).

Unitary property. A group of properties that operate as a unit as part of the primary function of the assessee.

Unliquidated encumbrances. Encumbrances outstanding. See Encumbrances.

Unqualified opinion. An opinion rendered without reservation by the independent auditor that financial statements are fairly presented.

Unrealized gains and losses. A term used in connection with the valuation of investments. Cumulative change in the market value of investments prior to their disposition.

Unrealized revenues. A term used in connection with budgeting. The difference between estimated revenues and actual revenues.

Unrestricted net assets. That portion of net assets that is neither restricted nor invested in capital assets (net of related debt).

Unsecured roll. The county assessor's certified assessment listing of properties which, in his opinion, do not constitute sufficient "permanence," either through immovability or other intrinsic qualities, to guarantee payment of taxes levied against them.

Value. As used in governmental accounting, (1) the act of describing anything in terms of money or (2) to measure in terms of money. The term should not be used without further qualification. See Book value and Face value.

Variable interest rate. A rate of interest subject to adjustment (e.g., the rate of interest specified may be a percentage of the prime rate on certain set dates).

Vessel. See Documented vessel.

Vesting method. A method of calculating the liability from earned sick leave for which it is probable that the benefits will result in termination payments. Under this method, the amount of the liability is estimated based on the sick leave accumulated at the date of the statement of position for those employees who currently are eligible to receive termination payments, as well as other employees who are expected to become eligible in the future to receive such payments. In calculating the liability, these accumulations are reduced to the maximum amount allowed as a termination payment. Accruals for those employees who are expected to become eligible in the future are based on assumptions concerning the probability that individual employees or classes or groups of employees will become eligible to receive termination payments.

Voucher. A written document that evidences the propriety of transactions and usually indicates the accounts in which they are to be recorded.

Voucher system. A system which calls for the preparation of vouchers for transactions involving payments and for the recording of such vouchers in a special book of original entry, known as a voucher register, in the order in which payment is approved.

Vouchers payable. Liabilities for goods and services, evidenced by vouchers that have been pre-audited and approved for payment but that have not been paid.

Voluntary nonexchange transactions. Transactions that result from legislative or contractual agreements, other than exchanges, entered into willingly by the parties to the agreement (for example, certain grants and private donations).

Voting majority. A term used in connection with defining the financial reporting entity. A situation in which the number of the primary government's appointees to a component unit's board is sufficient to control decisions of the component unit.

Vulnerability assessment. A term used in connection with evaluations of internal controls. The risk-based systematic prioritization of internal control evaluations.

Warrant. An order drawn by the legislative body or an officer of a government upon its treasurer, directing the latter to pay a specified amount to the person named or to the bearer. It may be payable upon demand, in which case it usually circulates the same as a bank check; or it may be payable only out of certain revenues when and if received, in which case it does not circulate as freely. See Registered warrant and Deposit warrant.

Warrants payable. The amount of warrants outstanding and unpaid.

Wasting assets. Mines, timberlands, quarries, oil fields and similar assets that diminish in value by the removal of their contents.

Welfare exemption. A tax exemption on property used exclusively for religious, hospital, scientific, or charitable purposes, owned and operated by community chests, funds, foundations, or corporations organized and operated for religious, hospital, scientific, or charitable purposes.

Widely recognized and prevalent practice. A term used in connections with the hierarchy of GAAP for state and local governments. The principal that accounting and financial reporting practice should itself serve as a source of GAAP in the absence of higher level guidance.

Williamson Act. See Open space land.

Work in process. The cost of partially completed products manufactured or processed, such as a partially completed printing job. Sometimes referred to as work in progress. See Construction in progress.

Work in progress. See Construction in progress and Work in process.

Work order. A written order authorizing and directing the performance of a certain task and issued to the person who is to direct the work. Among the items of information included on the order are the nature and location of the job, specifications of the work to be performed, and a job number, which is referred to in reporting the amount of labor, materials and equipment used.

Work program. A plan of work proposed to be done during a particular period by the administrative agency in carrying out its assigned activities.

Work unit. A fixed quantity that will consistently measure work effort expended in the performance of an activity or the production of a good.

Working capital fund. See Internal service fund.

Yellow book. Term commonly used to describe the General Accounting Office's publication, Government Auditing Standards, the source of GAGAS.

Yield. See Effective interest rate.

Yield-maintenance repurchase/reverse repurchase agreement. A type of dollar repurchase/reverse repurchase agreement in which the securities returned provide the seller-borrower with a yield specified in the agreement. see Repurchase agreement and Reverse repurchase agreement.

Zero-coupon debt. Deep discount debt issued with a stated interest rate of zero percent.

APPENDIX B BIBLIOGRAPHY

B.01 Introduction

Hierarchy of GAAP

The hierarchy of GAAP governs what constitutes GAAP for all state and local governmental entities. It lists the priority sequence of pronouncements that an activity should look to for accounting and reporting guidance. With regard to state and local governmental entities, the hierarchy is as follows:

GASB Statements and Interpretations: Also, AICPA and FASB pronouncement specifically made applicable to state and local governmental entities by GASB Statements or Interpretations.

GASB Technical Bulletins: Also, if specifically made applicable to state and local governmental entities by AICPA and cleared by GASB: AICPA Industry Audit and Accounting Guides and AICPA Statements of Position.

AcSEC Practice Bulletins: if specifically made applicable to state and local governmental entities and cleared by GASB. Also, consensus positions of a group of accounts organized by GASB that attempts to reach consensus positions on accounting issues applicable to state and local governmental entities.

Implementation Guides: (Q&A's) published by GASB staff. Also, practices widely recognized and prevalent in state and local government.

Other Accounting Literature: including GASB Concept Statements and AICPA and FASB pronouncements when not specifically made applicable to state and local governmental entities.

AICPA Publications The items listed below were available from the AICPA store at the time of publication of this manual; please contact the store for a current listing.

AICPA Professional Standards Includes standards on auditing, accounting and review services, ethics, bylaws, management advisory services, quality control, and tax practice.

FASB Accounting Standards Includes FASB pronouncements currently in effect: Statements of Financial Accounting Standards, Interpretations, Technical Bulletins, issues discussed by the Emerging Issues Task Force (EITF), FASB's Questions and Answers Special Reports, Opinions and Interpretations of the Accounting Principles Board, Accounting Research Bulletins, and AICPA Accounting Interpretations. Email: service@aicpa.org

Accounting Research Bulletins (ARB) AICPA Committee on Accounting Procedure (CAP) was organized in 1939 to develop generally accepted accounting principles (GAAP). It was superseded by the Accounting Principles Board (APB) in 1959 and the Financial Accounting Standards Board (FASB) in 1973. CAP issued 51 ARBs. ARB 43, issued in 1953, was a codification of the first 42 ARBs. ARBs are available in FASB Accounting Standards.

Accounting Principles Board (APB) Opinions and Statements The APB issued 31 opinions that are similar in scope to the predecessor ARBs. The APB also issued four APB statements that are advisory in nature, i.e., do not have the authoritative status of APB opinions. The opinions and statements are available in FASB Accounting Standards - Current Text.

Accounting Interpretations. AICPA Accounting Interpretations, which were issued by AICPA staff, provide guidance on APB opinions and statements and are contained in FASB Accounting.

AICPA Accounting and Auditing Guides. AICPA Accounting Guides are developed by committees of AICPA and address specialized accounting and reporting problems. These are available from AICPA Order Department.

AICPA Industry Audit Guides provide background information and guidelines for auditing and reporting on specific industries, types of business, or aspects of business activity. Each guide summarizes the practices presently being followed by a specific industry and describes relevant matters, conditions and procedures that are particularly pertinent or unique to that industry. By illustrating treatments of financial statement and formats of auditors' reports, the guides alert auditors to any unusual problems. The audit guides either incorporate any related AICPA Statements of Positions (SOPs) that have been issued or provide the SOPs at no additional cost. Audit guides of particular interest to CPAs in government include:

- Audits of State and Local Governmental Units, Including Audits of Federal Financial Assistance (5th Ed. 1989), No. 012051
- Audits of Employee Benefit Plans (3rd Ed. 1991), No. 012330
- Audits of Certain Non-Profit Organizations (2nd Edition 1988), No. 013161
- Audits of Colleges and Universities (2nd Edition 1975), No. 013320
- Audits of Federal Government Contractors (1990), No. 012430
- Audits of Providers of Health Care Services (2nd Edition 1990), No. 012423
- Audits of Voluntary Health and Welfare Organizations (2nd Ed. 1988), No. 012154
- Audit Sampling (1983), No. 013138
- Computer-Assisted Audit Techniques (1979), No. 062050
- Consideration of the
- Structure in a Financial Statement Audit (1990), No. 012450

Accounting Standards Division Statements of Position (SOP). SOPs are issued by AICPA Accounting Standards Division to influence the development of accounting and reporting standards. Of particular interest to CPAs in government are:

90-4: Auditor's Report Under U.S. Department of Housing and Urban Development's "Audit Guide for Mortgages Having HUD Insured or Secretary Held Multi-family Mortgages."
No.014831

92-7: Audits of State and Local Governmental Entities Receiving Federal Financial Assistance (Updates State and Local Governmental Units Audit Guide)

Codification of Statements on Auditing Standards (SAS) as of January 1, 1992. SASs are issued by AICPA Auditing Standards Board. They interpret generally accepted auditing standards (GAAS) per the institute's Code of Professional Ethics. The SASs have been incorporated into the GAO Standards for Audit of Governmental Organizations, Programs, Activities, and Functions and are included in AICPA Professional Standards. Includes SASs Nos. 1-64, with superseded portions deleted and superseding amendments, modifications and interpretations included. No. 059021.

Subsequent issued SASs include:

SAS No. 70: Reports on the Processing of Transactions by Service Organizations, issued April, 1992. Product No.060441

SAS No. 71: Interim Financial Information, issued May, 1992. Product No. 060440

Local Governmental Accounting Trends & Techniques The 1991 annual practice guide shows accounting and reporting techniques followed in recently published financial reports of local governmental entities. It surveys 500 local governmental reports and includes sections on entity type, balance sheets, operating statements, auditors' reports, and auditors' reports - single audit. No. 009717.

Disclosure Checklist and Illustrative Financial Statements These financial reporting practice aids are designed for use when preparing financial statements and reports. Developed as non-authoritative technical practice aids, these “working tools” show how to properly format financial statements.

- For State and Local Governmental Units (December 1990 Edition), No. 008502
- For Non-Profit Organizations (December 1990 Edition), No. 007991
- For Colleges and Universities (December 1990 Edition), No. 008576

Current Industry Developments - 1991 Issued by the Auditing Standards Division to advise auditors of current economic, industry, and professional developments that they should be aware of when performing year-end audits. The Audit Risk Alert may be purchased separately; however, it is included with all other updates.

- Audit Risk Alert, No. 022075
- State and Local Governments, No. 022079
- Non-Profit Organizations, No. 022074
- Employee Benefit Plans, No. 022078

Local Government Audit and Accounting Manual This 1991 manual gives specific advice and examples of local governmental financial reporting. Includes sample auditor’s reports and reports on internal control, local government audit program, disclosure checklist, illustrative financial statements, internal control structure questions, and partner’s engagement review program. No. 007302.

Illustrations of Compliance Findings in Single Audit Reports of Local Governmental Units. A survey of reporting under the Single Audit Act of 1984 and OMB Circular A-128. No. 037989.

Implementing the Expectation GAP Auditing Standards. The nine expectation gap SASs issued in April 1988 made significant changes in some fundamental and long-standing auditor responsibilities. This guide was developed to help understand the new standards and the steps to be taken to implement them. The articles, reprinted from the *Journal of Accountancy*, were written by Auditing Standards Board and Auditing Standards Division members directly involved in developing the standards. No. 060680.

The Independent Auditor’s Use of the Work of Internal Auditors. This study discusses the changes that have taken place in internal auditing and the impact of these changes on the effectiveness and efficiency of using an internal auditor’s work. No. 021051.

B.03 Financial Accounting Standards Board (FASB)

Financial Accounting Standards Board (FASB) offices and contact information:

401 Merritt 7
P. O. Box 5116
Norwalk, CT 06856-5116

Telephone: (203) 847-0700 ♦ Fax (203) 849-9714

Website: <http://www.FASB.org>

Publications department: (800) 748-0659; website: <http://www.FASB.org/store>

FASB Organization Formed in 1973 as the successor organization to AICPA’s Accounting Principles Board, FASB operates under the auspices of the Financial Accounting Foundation and under a 1984 jurisdictional agreement with GASB, which was reaffirmed in 1989. It has GAAP standards-setting authority over all entities except those specifically assigned to GASB.

The items listed below were available from the FASB store at the time of publication of this manual, please contact the store for a current listing.

- **Statements of Financial Accounting Standards (SFAS)** SFAS are issued to establish GAAP in new topic areas, or to amend or supersede existing SFAS.
- **Exposure Drafts (ED)** Before an SFAS is issued, FASB issues an ED of the proposed statement for public comment and occasionally as a basis for a public hearing.
- **Interpretations** Interpretations are issued to interpret existing SFAS.
- **Technical Bulletins (TB)** TBs are issued by the staff of FASB to provide timely guidance on specific accounting questions. TBs are not approved by FASB and are not considered promulgated GAAP.
- **Statements on Financial Accounting Concepts (SFAC)** SFACs are a series of pronouncements setting forth financial accounting and reporting objectives and concepts. SFACs are used by FASB to develop financial and reporting standards.
- **Discussion Memorandums/Invitation to Comment (DM)** In connection with many of its technical projects, FASB issues a DM, which may serve as a basis for a public hearing. It normally includes alternative accounting methods for the issues under consideration and the arguments and implications relative to each method.
- **Research or Special Reports** FASB occasionally publishes Research or Special Reports based on work undertaken by its staff or by others in cooperation with FASB.
- **Emerging Issues Task Force Abstracts** A softbound volume containing individual summaries of Emerging Issues Task Force issues and their resolutions. Each abstract comprises a summary of each issued discussed by the task force, the task force discussion and any consensus reached, the issue's status and subsequent developments, and a comprehensive topical index. The current edition is effective through September 7, 1990.

B.04 Federal Agencies

Administrative Regulations. The various federal agencies issue general administrative regulations that apply to their programs. These regulations provide general rules on how to apply for grants and contracts, how they are made, the general conditions that apply to grantees and contractors, their administrative responsibilities, and the compliance procedures used by the various agencies. These regulations are included in the Code of Federal Regulations.

In 1988, a revised OMB Circular A-102 was published. This was implemented by a "common rule" designed to establish consistency and uniformity among federal agencies in their administration of grants and cooperative agreements to state, local and federally recognized Indian tribal governments. The common rule has been codified in each federal agency's portion of the Code of Federal Regulations.

Federal agencies have also codified OMB Circular A-133, Audits of State and Local Governments, in each agency's portion of the Code of Federal Regulations. Although OMB's Circular A-133 Compliance Supplement provides the compliance requirements for programs contributing the greater majority of funding to state and local governments, federal agencies also develop specific compliance supplements for use in auditing programs not included in the OMB document. These can be obtained directly from the regional office of the appropriate federal agency.

B.05 General Accounting Office (GAO)

Government Accountability Office (formerly the General Accounting Office) contact information:

441 G Street, NW
Washington, D.C. 20548
Telephone: (202) 275-3000

Government Auditing Standards The Standards for Audit of Governmental Organizations, Programs, Activities, and Functions ("Yellow Book," 1988 Revision). The Yellow Book provides standards for financial and performance audits of government organizations, programs, activities, and functions, and of government funds received by contractors, non-profit organizations, and other non-government organizations. The standards incorporate AICPA Statements on Auditing Standards for fieldwork and reporting on financial audits and prescribe additional standards to meet the needs of government audit report users. The standards pertain to the auditor's professional qualifications, the quality of the audit effort, and the characteristics of professional and meaningful audit reports. These standards are for sale by the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20401. Stock No. 020-000-00243-3.

Interpretation of Continuing Education and Training Requirements The 1988 revision to the Government Auditing Standards (Yellow Book) established specific continuing professional education (CPE) requirements for auditors working on audits made in accordance with those standards. This interpretation guides audit organizations and individual auditors on implementing the CPE requirements by answering the most frequently asked questions from the audit community. This interpretation is effective for CPE reporting periods beginning on or after January 1, 1991. This interpretation is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20401. Stock No. 020-000-00250-6.

Assessing the Reliability of Computer Processed Data This audit guide was developed to help auditors meet the Yellow Book standards for ensuring that computer-based data are reliable. The guide also provides a helpful conceptual framework to expedite job performance and help auditors address standards for assessing internal controls and compliance with applicable laws and regulations. Guide No. GAO/OP-8.1.3.

Assessing Internal Controls in Performance Audits This guide states the need for renewed emphasis on assessing internal controls related to performance audit objectives. The guide describes how to assess internal controls when they are intended to provide reasonable assurance that: program goals and objectives are met; resources are adequately safeguarded and efficiently utilized; reliable data are obtained, maintained and fairly disclosed in reports; and laws and regulations are complied with. Guide No. GAO/OP-4.1.4.

How to Avoid a Substandard Audit: Suggestions for Procuring an Audit This handbook was prepared to help public entities that are planning an external audit ensure that they engage a qualified auditor and receive a quality audit.

B.06 Government Finance Officers Association of the United States and Canada (GFOA)

Government Finance Officers Association contact information:

♦Fax: (202) 393-0780

Order publications: <https://www.estoregfoa.org/source/Orders/index.cfm?section=OrdersBooks&activeSection=Orders>

GFOA Organization Founded in 1906, GFOA is a professional association dedicated to serving the interests of government finance practitioners. GFOA offers a variety of services and programs designed to improve the knowledge and practice of government finance and enhance the skills and performance of those responsible for government finance policy and management.

GFOA Publications GFOA publications include books, manuals guidelines, and periodicals covering a wide range of financial management topics such as: accounting, auditing and financial reporting; budgeting; capital finance and debt administration; cash management; financial management; public employee retirement administration; etc. Contact GFOA's order department for a free catalog describing all currently available products and services. Following are some of the most significant publications (the items listed below were available from the GAO at the time of publication of this manual, please visit the website for a current listing):

- Governmental Accounting Auditing and Financial Reporting (GAAFR) The 1988 GAAFR provides detailed professional guidance on the practical applications of generally accepted accounting principles for governments. It includes: implementation guidance on the latest pronouncements from the Governmental Accounting Standards Board; detailed journal entries and explanations that cover a multitude of common and/or complex transactions; a complete sample comprehensive annual financial report; discussion and illustration of single audit requirements; a glossary and chart of accounts; and a detailed index.
- 1988 GAAFR Study Guide This guide was developed to assist in applying the accounting and financial reporting concepts set forth in the 1988 GAAFR above. The study guide presents a summary of the 1988 GAAFR's chapters and poses related questions developed to reinforce issues introduced.
- Audit Management Handbook This 1989 handbook on audit management is intended for state and local governments and certified public accounting firms who are involved in obtaining or performing financial audits. It provides information on all aspects of the audit management process, including establishing the scope of the audit, audit procurement (including model requests for proposal), monitoring the audit, and resolving audit issues and findings.
- Financial Reporting Series This 10-volume set of books contains information and creative examples on how governments present specific financial reporting information:
 - Illustrations of Notes to the Financial Statements of State and Local Governments
 - Illustrations of Introductory Sections of Comprehensive Annual Financial Reports of State and Local Governments
 - Illustrations of Statistical Sections of Comprehensive Annual Financial Reports of State and Local Governments

- Illustrations of Supplementary Financial Data in Comprehensive Annual Financial Reports of State and Local Governments
- Illustrations of Interim Financial Statements of State and Local Governments
- How to Understand Local Government Financial Statements
- Illustrations of Combined, Combining and Individual Fund and Account Group Financial Statements of State and Local Governments
- Suggested Solutions to Governmental Accounting and Financial Reporting Practice Problems in Applying Authoritative Standards
- Illustrations of Popular Reports of State and Local Governments
- A Public Manager's Guide to Government Accounting and Financial Reporting

Accounting Topics Series This three-volume set of booklets provides detailed information on specific aspects of governmental accounting and financial reporting. Each booklet provides both practical samples and authoritative reference material.

- Enterprise Funds: Government Accounting and Financial Reporting.
- Internal Service Funds: Government Accounting and Financial Reporting.
- Fund Structure, Including Interfund Transactions: Government Accounting and Financial Reporting.

Disclosure Guidelines for State and Local Government Securities: The guidelines for disclosures related to municipal securities were completely revised, updated and expanded in this 1991 edition to reflect changes in the design and marketing of municipal securities and the information needs of investors in those securities.

GAAFR Review: This monthly eight-page newsletter covers major issues in governmental accounting and auditing and financial reporting and includes analyses of recent authoritative pronouncements in the field. In addition, it provides non-authoritative guidance related to technical inquiries and focuses on current areas of interest in governmental accounting.

Pension and Benefits Update: A bi-monthly newsletter that provides information to state and local government officials and pension and benefits professionals on current topics in the areas of public pension and benefits, including information on federal legislation and regulations, accounting standards, summaries of current research, and related topics.

Performance Auditing in Local Government: This book is an adaptable reference tool designed for initiating and managing the performance audit function. The text addresses relevant technical issues, including the data gathering process, analysis of data and management performance, performance audits, and sampling techniques. Operational issues, including audit techniques and reporting audit results, also are covered.

Local Government Finance: Concepts and Practices This book describes and develops the full range of disciplines that make up the local government finance profession. The book covers such core subjects as: revenue sources, budgeting, accounting, cash management, debt financing, purchasing, computers, retirement benefits and plans, risk management, and other topics. Each chapter is designed to survey the conceptual basis, historical developments, current practices, and emerging trends in the respective subject areas.

B.07 Governmental Accounting Standards Board (GASB)

Government Accounting Standards Board (GASB) contact information:

GASB
401 Merritt 7
P. O. Box 5116
Norwalk, CT 06856-5116
Telephone (203) 847-0700; ♦Fax (203) 849-9714
Website: <http://GASB.org>

Order GASB publications at <https://www.gasb.org/store>, or call (800) 748-0659, or email <mailto:gasbpubs@gasb.org>

GASB Organization Formed in 1984 as the successor organization to the National Council of Governmental Accounting (NCGA), GASB operates under the auspices of the Financial Accounting Foundation and under a 1984 jurisdictional agreement with FASB, which was reaffirmed in 1989. It has GAAP standard-setting authority over (1) state and local governmental entities, including cities, counties, public school districts, other special districts, and authorities, and (2) public benefit corporations and authorities, voluntary health and welfare organizations, public employee retirement systems, other non-profit organizations that are governmental entities or are a part of a governmental entity, and governmental utilities, hospitals, colleges and universities.

GASB publications available at time of publication of this manual, see website for current list:

- **Codification of Governmental Accounting and Financial Reporting Standards** The fourth edition of the codification provides an authoritative reference guide for standards identified as generally accepted accounting principles (GAAP). It includes all GASB pronouncements that are effective as of June 30, 1992, including Statement No. 11: Measurement Focus and Basis of Accounting—Governmental Fund Operating Statements, which is in an appendix rather than incorporated into the codification. The codification is organized into separate parts addressing concepts, general principles of accounting and financial reporting, specific balance sheet and operating statement reporting items, and stand-alone reporting for specialized units and activities.
- **Codification of Governmental Original Pronouncements** This codification contains all the original pronouncements that currently constitute the body of accounting and financial reporting standards for state and local governments. Specifically, this Codification incorporates SGASs, Interpretations, SCACs and TBs issued through June 30, 1992; statements and interpretations of the NCGA currently in force; and provisions of AICPA Audit Guide, Audits of State and Local Governmental Units (1974), as amended by subsequently issued SOPs continued in force when GASB began operations.
- **Statements of Governmental Accounting Standards (SGAS)** SGAS pronouncements are issued to establish GAAP in new topic areas, or to amend or supersede existing SGAS.
- **Exposure Drafts (ED)** Before an SGAS is issued, GASB issues an ED of the proposed statement for public comment and occasionally as a basis for a public hearing.
- **Interpretations** Interpretations are issued to clarify, explain, or elaborate on a SGAS as an aid to its understanding but do not establish GAAP.
- **Technical Bulletins (TB)** TBs are issued by the staff of GASB to provide timely guidance on certain financial accounting and reporting problems. TBs are not approved by GASB and are not considered promulgated GAAP.
- **Statements of Governmental Accounting Concepts (SGAC)** SGACs are intended to establish the objectives and concepts that GASB will use in developing standards of governmental accounting and reporting, provide guidance in resolving problems of governmental accounting

and reporting that are not addressed in authoritative pronouncements, and enhance the assessment by users of the content and limitations of information provided by governmental accounting and reporting and thereby further the ability to use that information effectively. SGACs do not establish GAAP.

- Discussion Memorandums/Invitation to Comment (DM) In connection with any of its technical projects, GASB issues a DM for comment which also may serve as a basis for a public hearing and normally includes alternative accounting methods for the issues under consideration
- Implementation Guides Implementation Guides are authored by GASB staff to explain how to implement a particular SGAS. They are written in question-and-answer format, organized based on the general topics in the SGAS.
- Research Reports or Special Reports GASB occasionally publishes Research Reports or Special Reports based on work undertaken by its staff or by others in cooperation with GASB. A listing of reports follows:

RESEARCH REPORTS			
Code No.	Title of Document	Author(s)	Date Issued
GR01	The Needs of Users of Governmental Financial Reports	Jones and Others	10/85
GR02	Infrastructure Assets: An Assessment of User and Recommendations for Financial Reporting	Van Daniker and Kwiatkowski	10/86
GR03	Financial Reporting Practices of Local Governments	Ingram and Robbins	4/87
GR04	An Empirical Study of Governmental Financial Reporting Entity Issues	Patton	10/87
GR05	A Study of the Usefulness of Disclosure Required by GASB Standards	Hays	8/88
GR06	Informational Needs of Colleges and University Financial Decision Makers	Engstrom	9/88
GR08	Other Postemployment Benefits in State and Local Governmental Units	Bokemeter, Van Daniker and Parrish	2/90
GR09	Financial Reporting by State and Local Governments: A Survey of Preferences Among Alternative Formats	Wilson	6/90
GR16	Popular Reporting: Local Government Financial Reports to the Citizenry Service Efforts and Accomplishments Series	Carpenter and Sharp	2/92
Service Efforts and Accomplishments Series			
GR10	Service Efforts and Accomplishments: It's Time Has Come - An Overview	Hatry, Fountain, Sullivan, and Kremer, eds.	9/90
GRS01	Executive Summary: Elementary and Secondary Education		11/89
GR07	Elementary and Secondary Education	Hatry, Alexander, and Fountain	11/89
GR11	Water and Wastewater Treatment	Bumaby and Herhold	12/90
GR12	Mass Transit	Wallace	1/91
GR13	Sanitation Collection and Disposal	Rubin	3/91
GR14	Fire Department Programs	Parry, Sharp, Vreeland, and Wallace	11/91
GR15	Public Health	Carpenter, Ruchala, and Waller	11/91

State-Local Fiscal Indicators (1990). This book provides insights about how and why the spending and taxes in each state differ from those of other states. It includes overviews of state-local revenues, state-local spending, local taxes, school finances, and employment and earnings. It addresses the balance between state and local tax systems, and discusses how state and local finances have changed over time.

B.09 National Intergovernmental Audit Forum (NIAF)

National Intergovernmental Audit Forum (NIAF) contact information:

NIAF Organization Congress formally recognized the need for an organized intergovernmental approach to auditing by passing the Intergovernmental Cooperation Act of 1968. The primary purpose of NIAF is to improve coordination and cooperation in intergovernmental auditing. NIAF is the umbrella organization for ten regional forums composed of representatives from federal, state and local audit organizations and independent certified public accountants, who meet to exchange ideas for improving governmental auditing.

B.10 Office of Management and Budget (OMB)

Office of Management and Budget (OMB) contact information:

The Office of Management and Budget
 725 17th Street, N.W.
 Washington, D.C. 20503
 Telephone: (202) 395-3080
 Website: <http://www.WhiteHouse.gov/omb>

Circulars The OMB, in consultation with federal grantor agencies, the Governmental Accountability Office, and representatives of grant recipients, developed a series of financial circulars, that establish uniform policies and rules to be observed by all executive branch agencies of the federal government. For copies of circulars go to: <http://www.whitehouse.gov/omb/circulars>.

Bulletins OMB Bulletins are used when the nature of the subject matter requires single or one-time action by the departments and establishments or is of a transitory nature. For copies of bulletins go to: http://www.whitehouse.gov/omb/bulletins_default

Other OMB Guidance Other documents issued by the OMB which have accounting and/or auditing applications are listed below:

- **Catalog of Federal Domestic Assistance** This is a government-wide compendium of federal programs, projects, services and activities that provide assistance or benefits to the American public. The General Services Administration (GSA) is responsible for the dissemination of federal domestic assistance information through the catalog and maintains the information data base from which program information is obtained. OMB serves as an intermediary between other federal agencies and the GSA, thus providing oversight relative to the collection of federal domestic assistance program data.

Program information provided by the catalog includes authorizing legislation and audit requirements. The catalog is online at: <https://www.cfda.gov/>

- **OMB Circular A-133, Compliance Supplement** This supplement has been issued by OMB and sets forth the major federal compliance requirements that should be considered in an organization-wide audit of local governments that receive federal assistance. Information regarding the compliance supplement may be obtained by contacting the OMB Financial Systems and Policy Branch at (202) 395-3993.
- **OMB Circular A-102 (revised 10/7/94), Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments (Common Rule)** This circular establishes consistency and uniformity among Federal agencies in the management of grants and cooperative agreements with State, local, and federally-recognized Indian tribal governments. This revision supersedes Office of Management and Budget (OMB) Circular No. A-102, dated March 3, 1988.
- **2 CFR Part 225 (also known as OMB Circular A-87), Cost Principles for State and Local Government** This document provides principles for determining allowable costs of programs administered by state and local governments under grants from and contracts with the federal government.

APPENDIX C

GASB 34 IMPLEMENTATION GUIDE

CG.01 Introduction

This document provides guidance to assist counties with implementing the changes necessary to transition the preparation and presentation of financial statements for Texas counties to generally accepted accounting principles (GAAP), as prescribed by the Governmental Accounting Standards Board (GASB) Statement No. 34: Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments. The major reporting aspects of GASB Statement No. 34 are described in this document to assist financial statement preparers in the application and implementation of the new reporting model. Readers should keep in mind that the information presented is non-authoritative and is not intended to interpret or prescribe the application of GASB Statement No. 34. This document is intended to supplement Appendix GR: GASB 34 Reporting Chapter – Financial Statements for Counties section of the Accounting Standards and Procedures for Counties Manual.

CG.0 Authoritative and Educational Resources

The following is a list of authoritative and educational resources that will assist you in preparing and presenting financial statements for counties as prescribed by GASB Statement No. 34.

- Existing codification/Governmental Accounting, Auditing, and Financial Reporting (GAAFR) <http://www.gfoa.org>
- Governmental Accounting Standards Board (GASB) Statements, Concepts Statements, Interpretations and Implementation Guides. The most current GASB Statements are listed in the Policies Chapter of this manual, chapter 2, section 2.01. <http://www.gasb.org>
- Financial Accounting Standards Board (FASB) Statements—for governments who had the option of implementing pre November 1989 FASB statements—Concept Statements, Interpretations and Implementation Guides. <http://www.fasb.org>
- American Institute of Certified Public Accountants (AICPA) <http://www.aicpa.org>
- The Accounting Standards and Procedures for Counties Manual <http://www.sco.ca.gov>

CG.03 Effective Dates of GASB Statement No. 34

As set forth in the following chart, the effective dates of GASB Statement No. 34 vary, depending on the financial size of the county and its fiscal year. The chart assumes a fiscal year beginning July 1 and ending June 30. Also, there are different effective dates for implementing the new model and prospective reporting of infrastructure (assets added or deleted from the effective date of the new model) versus retroactive reporting of infrastructure assets acquired after June 30, 1980.

Total Revenues	Basic Model	
	Prospective Infrastructure Reporting	Retroactive Infrastructure Reporting
Effective for Fiscal Year		
\$100 million or more	2001-02	2005-06
\$10 to \$100 million	2002-03	2006-07
Under \$10 million	2003-04	Not Required

CG.04 Key Implementation Issues

a. Strategy for Daily Accounting and How to Get to the Financial Statements

The auditor-controller's office needs to determine how it will identify the financial data needed to prepare GASB Statement No. 34 compliant financial statements. If the data is not readily identifiable using current practices, how it will do so when implementing. For many counties, small changes to existing accounting practices will achieve the goal. For others, more extensive system changes may be required.

b. Infrastructure Decisions

It is necessary to identify capital assets that qualify as infrastructure, as defined by GASB Statement No. 34. A decision needs to be made as to whether infrastructure assets will be capitalized and depreciated, or whether the modified approach will be used. If capitalization is used, valuation and useful lives decisions must be made. If the modified approach is used, condition assessments must be made. There is also a phase-in option for infrastructure, and it must be decided if the statements will include infrastructure costs/values in the initial year of implementation, or in a later year.

c. Cash Flow Using the Direct Method

The auditor-controller's office needs to become familiar with preparing a Statement of Cash Flows using the direct method, if it is not already using the direct method.

d. Capital Assets Accounting System

Depreciation of equipment and buildings (as well as infrastructure) will now be reflected in the financial statements, so modification of the capital assets accounting system to perform depreciation calculations may be required. Asset useful-life determinations will also need to be made.

e. Fund Classification (Trust and Agency Fund Matrix)

Some existing fund type definitions were changed by GASB Statement No. 34. In particular, fiduciary fund type definitions have been significantly changed, so a review of all current trust and agency funds is necessary to determine whether or not their classification should be changed.

f. Budgetary Impacts

Fund reclassifications may require that budgetary comparison schedules be created for funds that in the past had no budgets, e.g., if a trust fund is reclassified under the new definitions as a special revenue fund, the new special revenue fund could require a budget if it is considered a major fund. In addition, GASB Statement No. 34 requires reporting of the original adopted budget, as well as the final year-end adjusted budget, with material changes explained, which may lead to increased efforts to develop better budget estimates. Lastly, if a county needs to make accounting changes to comply with GASB Statement No. 34 requirements, it probably needs to determine if the changes will also need to be made in the budgetary accounting system.

g. Decision on Whether or Not to Allocate Indirect Cost (Government-Wide)

GASB Statement No. 34 requires inclusion of a new government-wide Statement of Activities which is intended to display the revenues, expenditures, and net costs of each major function/activity of the

government. When preparing the statement, the county is given the option of allocating the indirect costs amongst the activities directly on the statement.

h. Changes to Net Asset Classification

GASB Statement No. 34 compliant statements measure net assets rather than fund balance. This will require statement formatting changes and a review of classifications. GASB Statement No. 34 net asset classifications include: investments in capital assets (net of related debt), restricted net assets, and unrestricted net assets.

i. Restating Beginning Balances, Asset Values, and Asset Related Debt

Because GASB Statement No. 34 requires a Statement of Net Assets and a Statement of Activities, two new financial statements prepared on the accrual basis, proforma statements for the prior year must be prepared to correctly state beginning balances. Asset values, accumulated depreciation, and asset related debt will need to be identified to report in the new statements.

j. Financial Statement Contents

The table of contents and footnotes need to be modified to describe the new financial statements.

k. Major and Non-Major Funds

GASB Statement No. 34 requires fund basis statements that present only major funds in the basic financial statements, and optionally present non-major funds in a supplementary schedule. As a result, determining which funds are major and which are not is an important step in preparing GASB Statement No. 34 compliant fund basis statements. Major and non-major fund definitions are defined in GASB Statement No. 34.

l. Financial Statement Reconciliation

The new government-wide financial statements must be reconciled to the fund based statements.

m. Interfund Eliminations

GASB Statement No. 34 requires that certain interfund activity be eliminated. This includes elimination of the effects in both revenue and expenditure amounts and in internal balances at year-end; and it may require some changes to daily accounting procedures.

n. Staff Training

Many departments throughout the county may need to be familiarized with the impacts of GASB Statement No. 34. Training may take the form of written communications and/or live presentations, and it may vary from general information about the changes to very specific, detailed examples of accounting procedures in the new GASB Statement No. 34 environment.

o. Capital Assets Accounting System/Debt Accounting Records Instead of General Fixed Assets Account Group/General Long-Term Debt Account

A Capital Assets Accounting System (CAAS) and Debt Accounting Records (DAR) are needed to comply with GASB Statement No. 34 requirements. The CAAS will need to capture assets, valuations, and accumulated depreciation for each asset. The DAR needs to capture all debt obligations, and associate debts with capital assets where appropriate. The CAAS and DAR may be implemented by using existing systems, modifying existing systems, and/or establishing new systems.

p. Revenue Classification (Analysis of Program and General Revenue, Grants, etc.)

The new government-wide Statement of Activities requires revenues be captured by activity and reported in specific categories: Charges for Services, Operating Grants and Contributions, Capital Grants and Contributions, and General Revenues (which require further breakdown in the statement). Accounting systems must be able to capture revenues accordingly.

q. Management Discussion and Analysis (MD&A) Process

GASB Statement No. 34 requires the inclusion of Management's Discussion and Analysis in the financial statements. The MD&A must be objective and meaningful, and it must address material issues of which management is aware. Developing a process for the annual composition of the MD&A, and who is ultimately responsible for its contents, may be an issue requiring discussion between the county auditor, the county administrative officer, external auditors, and other county officials.

r. Footnote Review

Some disclosure requirements have changed. A review of the new requirements is necessary to determine if all of the information needed is readily available.

s. Coordination With Component Units

GASB Statement No. 34 implementation must be coordinated with component units included in the primary government statements so that all of the data are presented in accordance with the new standards.

CG.05 Major Reporting Elements

a. Dual Perspective in Presenting Financial Statements

There will be two distinct sets of financial statements—government-wide financial statements and fund financial statements. There will be significant differences between these two financial statements including major differences in the amounts displayed in the equity sections of the two statements. A detailed reconciliation between the two statements will be required on the fund statements.

Traditional fund reporting for tax-supported (governmental) activities has focused on near-term inflows, outflows, and balances of spendable financial resources. The new financial reporting model retains this short-term focus in the fund financial statements while providing a long-term perspective on the same activities in the government-wide financial statements.

b. Basic Financial Statements, Measurement Focus and Basis of Accounting

1. **Government-wide Statements.** For the first time, users of state and local governmental financial reports have access to government-wide financial statements that provide a clear picture of the government as a single, unified entity. The government-wide statements are to provide operational accountability with a long-term perspective. These new government-wide financial statements complement rather than replace traditional fund-based financial statements.

The government-wide financial statements are consolidated financial statements for all of the agencies' operations on a full accrual basis of accounting. They are not presented on a fund basis; instead, fiscal operations are organized into two major activities: governmental and business-type. Interfund transfers within the two types are eliminated. Internal service fund transactions are eliminated and net balances are included with the governmental display. Only county-controlled operations are to be displayed. Non-county fiduciary funds are not included.

Following are the primary financial statements:

- **The Statement of Net Assets:** (replaces the balance sheet) displays assets minus liabilities equals net assets. Instead of fund balance, retained earnings and contributed capital, the statement of net assets must identify its three components: invested in capital assets, net of related debt; restricted net assets; and unrestricted net assets.
 - **The Statement of Activities:** (replaces the statement of revenues and expenditures) displays costs by function, net of direct program revenues, such as fees and operating or capital grants, producing a net program cost. General revenues provided by taxpayers offset the net program costs.
2. **The Fund Statements:** In meeting stewardship and accountability concerns, there is another set of financial statements presented on a fund basis, similar to current fund reporting. The fund statements provide fiscal accountability with a short-term focus. The governmental funds continue to report on the modified accrual basis versus the full accrual reported on the government-wide statements. Proprietary funds are reported on the full accrual basis for both financial statements.

c. Management's Discussion and Analysis

The new governmental financial reporting model provides financial report users with a simple narrative introduction, overview, and required explanation and analysis of the basic financial statements in the form of Management's Discussion and Analysis (MD&A). For many local agencies that already prepare a Comprehensive Annual Financial Report (CAFR), this new requirement should not pose significant additional work. However, since the MD&A is now a required part of the "basic" financial statements, this may result in increased audit costs, although required supplementary information (RSI) requires a lower level of review by the auditors.

d. Changes in Fund Types and Classification

Old Model	New Model
Governmental Funds	Governmental Funds
General Fund	General Fund
Special Revenue	Special Revenue ¹
Debt Service	Debt Service
Capital Projects	Capital Projects
	Permanent Funds ²
Proprietary Funds	Proprietary Funds
Enterprise	Enterprise ³
Internal Service	Internal Service ⁴
Fiduciary Funds	Fiduciary Funds
Pension Trust	Pension (and Other Employee Benefit) Trust
Investment Trust	Investment Trust
Expendable Trust	
Non-Expendable Trust	
	Private Purpose Trust ⁵
Agency	Agency ⁶
Account Groups	Accounting Systems
General Fixed Asset Account Group (GFAAG)	Capital Assets Accounting System ⁷ (CAAS)
General Long-Term Debt Accounting Group (GLTDAG)	Debt Accounting Records ⁸ (DAR)

¹ Trust and agency fund analysis will result in additional special revenue funds.

² Should be used to report resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that support the reporting government's programs—that is, for the benefit of the government or its citizenry.

³ Three criteria, any one of which mandates the use of enterprise funds: (1) activity is financed with debt that is secured solely by a pledge of the net revenues from fees and charges of the activity; (2) laws and regulations require that the activity costs of providing services, including capital costs, be recovered with fees and charges, rather than with taxes or similar revenues; (3) pricing policies of the activity establish fees and charges designed to recover its costs, including capital costs.

⁴ May be used to report any activity that provides goods or services to other funds, departments, or agencies of the primary government and its component units, or to other governments on a cost-reimbursement basis. The reporting government is the predominate user of the services.

⁵ Used to report all other trust arrangements under which principal and income benefit individuals, private organizations, or other governments.

⁶ Used to report resources held by the reporting government in a purely custodial capacity (assets equal liabilities). "Non-county" temporary—remit to non-county entities (e.g., payroll tax withholding).

⁷ CAAS is no longer reported in fund financial statements, but is reported in government-wide financial statements.

⁸ DARs are no longer reported in fund financial statements, but are reported in government-wide financial statements.

e. Capital Assets

Capital assets, which were previously reported in a separate fund group, are now included in the government-wide statements as assets for both governmental and business-type activities. Capital assets (formerly fixed assets) include land, structures and improvements, equipment, intangibles, and infrastructure. Generally these assets are reported at their historical cost and depreciated over their estimated useful lives. In the government-wide statements these assets are reported net of accumulated depreciation.

Infrastructure assets are new to government reporting and include long-lived capital assets that are normally stationary in nature and can be preserved for a significantly greater number of years, such as roads, bridges, dams, and water and sewer systems. The new reporting model provides that infrastructure reporting include at least those assets acquired after June 30, 1980. The new model also provides for two methods of reporting infrastructure depreciation. Under either method, the infrastructure asset must be researched, inventoried, and capitalized at historical or estimated cost (at least at the level of networks and subsystems) on the county's fixed asset system.

f. Budgetary Comparison Schedules

In the past, budgetary comparisons were based solely on the final amended budget. Under the new governmental financial reporting model, information on the original budget is also presented. In addition, the new model eliminates aggregated budget presentations (e.g., totals for all budgeted special revenue funds) in favor of comparisons for the general fund and each individual major fund.

g. Major Fund Focus

The new governmental financial reporting model focus is on major funds. Major funds are defined as the general fund and other funds that (1) are at least 10% of the total assets, liabilities, revenues, and expenses for all the funds of that category type (total governmental or total enterprise funds), and (2) are at least 5% of the total assets, liabilities, revenues and expenses of the total for all governmental and enterprise funds combined. In addition to the funds that meet the major fund criteria, any other governmental or enterprise fund that the government believes is particularly important to financial statement users may be reported as a major fund.

h. Long-Term Debt

Long-term debt is no longer shown as a separate governmental account group but is reported in the government-wide statements as liabilities for both governmental and business-type reporting. The notes to the financial statements also require more detail about long-term liabilities, including identifying separate information on long-term debt (such as bonds, notes, loans, and leases payable) and other long-term liabilities (such as compensated absences, and claims and judgments).

i. Net (Expense)/Revenue By Function

Net (expense)/revenue by function is defined as the expenses of functions (or some lower classification level presented in the Statement of Activities), reduced by program revenues relating to those functions.

The Statement of Activities should present the operations of the reporting government in a format that reports the net (expense)/revenue of its individual functions. The governmental activities should be presented at least at the level of detail required in the governmental fund statement of revenues, expenditure, and changes in fund balances—at a minimum, by function. Governments should present business-type activities at least by segment.

j. Eliminations

Eliminations are adjustments that should be made in the government-wide financial statements to minimize the “grossing-up” and “doubling-up” effect caused by some internal transactions.

Eliminations are required in both the Statement of Net Assets and the Statement of Activities. There are several types of internal or interfund activities that should be considered for elimination. These activities are Internal Service Fund (ISF) activities, interfund activities similar to ISF charges, interfund services provided and used, allocations of overhead expenses, and transfers.

Eliminations should be made in the Statement of Activities to remove the doubling-up effect of ISF activity. The effect of similar internal events (such as allocations of accounting staff salaries) that are, in effect, allocations of overhead expenses from one function to another or within the same function should be eliminated, so that the allocated expenses are reported only by the function to which they were allocated.

Eliminations should be made in the Statement of Net Assets to minimize the grossing-up effect on assets and liabilities with the governmental and business-type activities columns of the primary government.

Amounts owed between the funds included in the governmental activities column are eliminated, as are amounts owed between funds included in the business-type activities column.

The only internal balances (receivables and payables) that remain in the statement are those owed by a fund included in the governmental activities column to a fund included in the business-type activities column. The net residual amount is presented as an “internal balance” and eliminated in the total primary government column.

k. Net Assets

Net Assets are defined as the difference between the government’s assets and its liabilities. This term is used in lieu of fund balance or equity.

The net assets are divided into three components: invested in capital assets, net of related debt; restricted net assets (distinguishing between major categories of restrictions); and unrestricted net assets.

1. Invested in Capital Assets, Net of Related Debt - This component is the capital asset balances, including restricted capital assets less both accumulated depreciation and outstanding balances of any capital-related debt.

NOTE: If capital assets do not have any related debt, the title should be “Invested in Capital Assets.” If a significant portion of related debt has not yet been expended on capital assets, that portion of the unspent debt should be included within the same net assets component as the unspent debt proceeds (e.g. restricted for capital projects).

2. Restricted Net Assets - Net assets should be reported as restricted when constraints placed on net assets are either:
 - Externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments; or
 - Imposed by law through constitutional provisions or enabling legislation.

NOTE: No category of restricted net assets can be negative. When the liabilities that relate to the restricted assets exceed those assets, no balance should be reported and the negative amount should be reported as a reduction of unrestricted net assets. Board designations are not considered “restricted assets” for the purpose of the Statement of Net Assets.

3. Unrestricted Net Assets - This is the default category. If any remaining assets do not fit into the other categories they are reported in this section.

I. Special and Extraordinary Items

Special Items are significant transactions or other events within the control of management that are either unusual in nature or infrequent in occurrence (e.g., sales of certain general government capital assets, significant forgiveness of debt).

Extraordinary items are those items that are both unusual in nature and infrequent in occurrence (e.g., costs incurred by natural disaster, terrorist act, environmental disaster).

Special and extraordinary items are to be reported separately on the bottom of the Statement of Activities, in the same manner as general revenue, with costs appropriately classified within the governmental and business-type activities.

m. Interfund Activity

Interfund activity is a resource flow between funds including resources between a primary government and its blended component units. This term is used in lieu of interfund transactions.

CG.0 Implementation Tools

a. Trust and Agency Analysis Matrix

Characteristics	Agency Fund*	Private Purpose Trust*	Investment Trust*	Pension Trust*	Special Revenue	Fund
Non-county	Y	Y	Y	Y	N	N
Temporary	Y	/	/	N	/	N
Custodial only	Y	Y	Y	/	N	N

b. Crosswalk: From old financial statements to new fund financial statements to government-wide financial statements

FUND CATEGORY	FUND BASIS FINANCIAL STATEMENT CHANGES From <i>CAFR</i> to new <i>Fund Statements</i> (Reference <i>GASB No. 34</i> ¶12-62)	Refer to GASB Statement
Governmental Funds	Major fund focus	No.34 ¶75,76 No.37 ¶15.b
	Added: Permanent Fund	No.54 ¶35
	Do not report GLTDAG or GFAAG	No.34 ¶63
	New requirement to report Special Items	No.34 ¶89
	Budget to actual can be statement or RSI	No.34 ¶130
	Original and final budget must be shown	No.34 ¶130
	Recommended combining statement for non-major funds (GFOA requirement for certificate)	No.34 illus. H-1,H-5 No.54 ¶22,exhib.2
	Display of fund balance classifications	No.54 ¶22,25
Proprietary Funds	Major fund focus for Enterprise Funds only (<i>not</i> Internal Service Fund)	No.34 ¶75,76,96 No.37 ¶15.b
	Special Items	No.34 ¶89
	Direct method Statement of Cash Flows	No.34 ¶105
	New definitions of Enterprise Funds and Internal Service Funds	No.34 ¶67,68
	Changed Titles (three components of Net Assets)	No.34 ¶98
	Net Assets or Balance Sheet format allowed	No.34 ¶91
	Classified Balance Sheet	No.34 ¶97
	Retained Earnings changes to Net Assets	
	Contributed Capital goes away	
Fiduciary Funds	County does not benefit; purely custodial	No.34 ¶69
	Expendable and Non-Expendable Trust Funds go away	No.34 ¶63
	Add Private-Purpose Trust Fund	No.34 ¶72
	All use economic resource measurement focus	No.34 ¶107 No.43 ¶24
	Changed financial statement titles	No.34 ¶106
Overall	Reconcile fund financial statements to government-wide financial statements	No.34 ¶77,85,104
	Changes in Intergovernmental Activity (Transfers)	No.34 ¶112

b. Crosswalk: From old financial statements to new fund financial statements to government-wide financial statements (continued)

FUND CATEGORY	CREATE GOVERNMENT-WIDE FINANCIAL STATEMENT From new <i>Fund Statements to Government-Wide Financial Statements</i> (Reference GASB No. 34 ¶12-62)	Refer to GASB Statement
Governmental Funds	Change measurement focus to economic resources and full accrual basis	No. 34 ¶12e
	Add capital assets	No. 34 ¶18-19 No. 37 ¶6
	Add depreciation	No. 34 ¶21-22
	Convert “Fund Balances” to “Net Assets”	No. 34 ¶32-37 No. 54 ¶10-16
	Add general long-term debt	No. 34 ¶12e
Proprietary Funds	“Business-type” activities column for Enterprise Funds only	No. 34 ¶12d
	ISF Activity is allocated to other activities	No. 34 ¶62
	Report “business-type” activities at least by segment	No. 37 ¶10, 17
Fiduciary Funds	Not shown in government-wide financial statements	No. 34 ¶12b
Overall	Report overall government without funds/fund types	No. 34 ¶12a, 13
	Distinguish component units activity	No. 34 ¶12c, 14
	Intra-entity activity reclassified	No. 34 ¶61, 112
	Decide on depreciation approach	No. 34 ¶23
	New financial statements: Statement of Net Assets	No. 34 ¶30
	New financial statements: Statement of Activities	No. 34 ¶38
	Classified Net Assets Statement recommended	No. 34 ¶31
	Three components of Net Assets	No. 34 ¶32
	Report by function “Net Cost”	No. 34 ¶38, 41, 48
	Decide appropriate level of detail	No. 34 ¶40
	Decide whether or not to allocate indirect expenses	No. 34 ¶42-46
	Classify revenues by program and general	No. 34 ¶47, 48, 50, 51, 52 No. 37 ¶13
	Segregate contributions special items and transfers on Statement of Net Assets	No. 34 ¶53-56
	Display general revenues after net cost by function	No. 34 ¶52, 54
	Eliminate internal balances for Statement of Net Assets	No. 34 ¶58
	Eliminate internal activities for Statement of Activities	No. 34 ¶59

APPENDIX C

GASB 34 REPORTING CHAPTER

FINANCIAL STATEMENTS FOR COUNTIES

R.01 Introduction

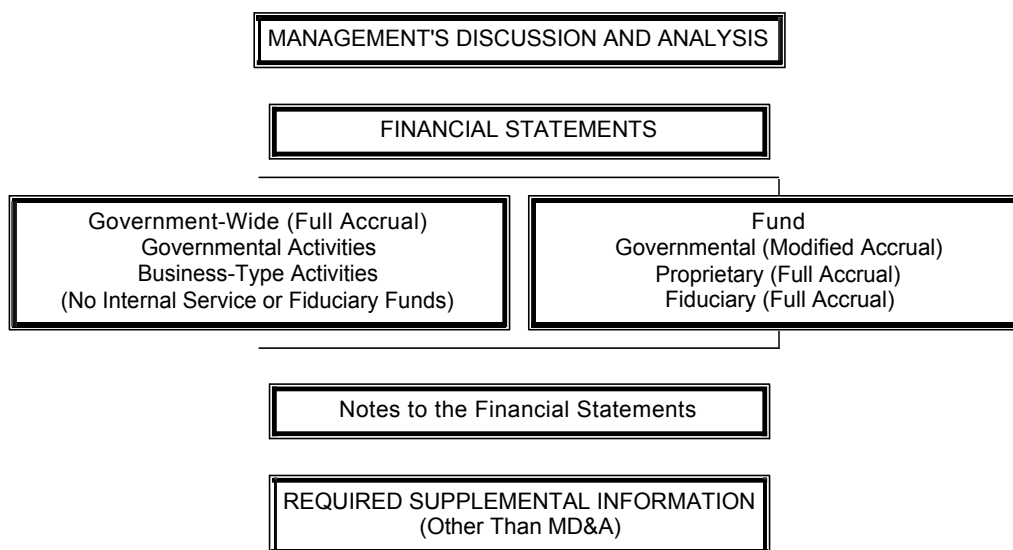

This chapter provides practical guidance to assist in the preparation and presentation of financial statements for Texas counties as prescribed by the Governmental Accounting Standards Board (GASB). Some of the major reporting aspects are described in this chapter to assist financial statement preparers in the application of the reporting model. Readers should keep in mind that the information presented is non-authoritative and is not intended to interpret or prescribe the application of GASB standards.

R.02 Effective Dates

The effective dates for this chapter coincide with the effective dates of GASB Statement No. 34, which varies for each individual county, depending on the financial size of the agency and its fiscal year, as set forth in the following chart. (The chart assumes a fiscal year beginning July 1 and ending June 30). Also, there are different effective dates for implementing prospective reporting of infrastructure (assets added or deleted from the effective date of the reporting model) versus retroactive reporting of infrastructure back to assets acquired after June 30, 1980.

Total Revenues	Basic Model	
	Prospective Infrastructure Reporting	Retroactive Infrastructure Reporting
	Effective for Fiscal Year

DESCRIPTION OF FINANCIAL STATEMENTS

R.03 Introduction

The purpose of this section is to provide the reader with a basic understanding of the minimum requirements for basic financial statements, which include: Management's Discussion and Analysis (MD&A); Government-Wide Financial Statements; Fund Financial Statements; Notes to the Financial Statements; and Required Supplementary Information (other than MD&A). This section is not intended to duplicate information included in Governmental Accounting Standards Board (GASB) pronouncements. The reader should look to the official GASB literature for more detailed guidance.

R.04 Management's Discussion and Analysis (MD&A)

The basic financial statements should be preceded by the MD&A, which is required supplementary information (RSI). The MD&A should provide an objective and easily readable analysis of the county's financial activities based on currently known facts, decisions, or conditions. The MD&A provides financial managers with the opportunity to present both a short-term and a long-term analysis of the county's activities.

R.05 Government-Wide Financial Statements

The government-wide financial statements consist of a Statement of Net Assets and a Statement of Activities. These statements should: include report information about the overall government (county) without displaying individual funds or fund types; exclude information about fiduciary activities, including component units that are fiduciary in nature (such as certain public employee retirement systems); distinguish between the primary government (county) and its discretely presented component units; distinguish between governmental activities and business-type activities of the primary government (county); and measure and report all assets (both financial and capital), liabilities, revenues, expenses, gains, and losses using the economic resources measurement focus and accrual basis of accounting.

The statement of net assets should report all financial and capital resources. Counties are encouraged to present the statement in a format that displays assets less liabilities equal net assets, although the traditional balance sheet format (assets equal liabilities plus net assets) may be used. Counties are encouraged to present assets and liabilities in order of their relative liquidity. The difference between a county's assets and liabilities is its net assets. Net assets should be displayed in three components: invested in capital assets, net of related debt; restricted net assets (distinguishing between major categories of restrictions); and unrestricted net assets.

The operations of the reporting government (county) should be presented in a format that reports the net (expense) revenue of its individual functions. This format identifies the extent to which each function of the government (county) draws from the general revenues of the government (county) or is self-financing through fees and intergovernmental aid. General revenues, contributions to term and permanent endowments, contributions to permanent fund principal, special and extraordinary items, and transfers should be reported separately after the total net expenses of the county's functions, ultimately arriving at the "change in net assets" for the period.

Counties are permitted but not required to allocate indirect expenses to other functions. If indirect expenses are allocated, direct and indirect expenses should be presented in separate columns to enhance comparability of direct expenses between governments that allocate indirect expenses and those that do not.

Depreciation expense for capital assets that can be specifically identified with a function should be included in its direct expenses, whereas depreciation expense for general infrastructure assets should not be allocated to the various functions. Rather, general infrastructure assets depreciation expense should be reported as a direct expense of the function used for related maintenance expenses associated with these assets. Interest on general long-term liabilities generally should be considered an indirect expense

except in those limited instances when borrowing is essential to the creation or continuing existence of a program and it would be misleading to exclude the interest from direct expenses of that program.

R.06 Fund Financial Statements

The fund financial statements should be used to report additional and detailed information about the primary government (county). Counties should report governmental, proprietary, and fiduciary funds to the extent that they have activities that meet the criteria for using those funds.

A. Governmental and Proprietary Fund Financial Statements

Separate financial statements should be presented for the primary government's (county's) governmental and proprietary funds. The focus of governmental and proprietary fund financial statements is on major funds. Fund statements should present the financial information of each major fund in a separate column. Non-major funds should be aggregated and displayed in a single column. Counties should present a summary reconciliation to the government-wide financial statements at the bottom of the fund financial statements or in an accompanying schedule.

B. Required Financial Statements for Governmental Funds

Governmental fund reporting focuses primarily on the sources, uses, and balances of current financial resources and often has a budgetary orientation. The governmental fund category includes the general fund, special revenue funds, capital projects funds, debt service funds, and permanent funds.

The financial statements required for governmental funds are the Balance Sheet and the Statement of Revenues, Expenditures, and Changes in Fund Balances.

Financial statements for governmental funds should be presented using the current financial resources measurement focus and the modified accrual basis of accounting.

General capital assets are capital assets of the county that are not specifically related to activities reported in proprietary or fiduciary funds. They should not be reported as assets in governmental funds, but should be reported in the governmental activities column in the government-wide statement of net assets. Similarly, general long-term liabilities should not be reported as liabilities in governmental funds, but should be reported in the governmental activities column in the government-wide statement of net assets.

The balance sheet should report information about the current financial resources (assets, liabilities, and fund balances) of each major governmental fund and for non-major governmental funds in the aggregate. A total column should be presented. Assets, liabilities, and fund balances of governmental funds should be displayed in a balance sheet format (assets equal liabilities plus fund balances). Governmental fund balances should be segregated into fund balance classification amounts. Encumbrance amounts should not be displayed on the face of the financial statements. Counties are required to present a summary reconciliation at the bottom of this statement or in an accompanying schedule.

The statement of revenues, expenditures, and changes in fund balances should report information about the inflows, outflows, and balances of current financial resources of each major governmental fund and for the non-major governmental funds in the aggregate. A total column should be presented. Revenues should be classified in this statement by major revenue source and expenditures should be classified at a minimum by function. This statement should present a separate subtotal for revenues, expenditures, and the excess (deficiency) of revenues over expenditures. Operating financing sources and uses, including detailed transfers and detailed special and extraordinary items should be reported separately after the excess (deficiency) of revenues over expenditures, ultimately arriving at the change in fund balances. The

fund balances at the beginning of the period are then combined with the change in fund balances to arrive at fund balances at the end of the period. Counties are required to present a summary reconciliation at the bottom of this statement or in an accompanying schedule.

C. Required Financial Statements for Proprietary Funds

Proprietary fund reporting focuses primarily on the determination of operating income, changes in net assets (or cost recovery), financial position, and cash flows. The proprietary fund category includes enterprise and internal service funds.

The financial statements required for proprietary funds: are the Statement of Net Assets; the Statement of Revenues, Expenses, and Changes in Fund Net Assets; and the Statement of Cash Flows. Financial statements for proprietary funds should be presented using the economic resources measurement focus and the accrual basis of accounting. Proprietary fund statements should present the financial information for each major enterprise fund in a separate column. Non-major enterprise funds should be aggregated and displayed in a single column, and a combined total column should be presented for all enterprise funds. Major fund reporting requirements do not apply to internal service funds. The combined totals for all internal service funds should be reported in separate column(s) on the face of the proprietary fund financial statements, to the right of the enterprise funds total column.

The statement of net assets should be presented in a classified format to distinguish between current and long-term assets and liabilities. Counties may use either a net assets format (assets less liabilities equal net assets) or a balance sheet format (assets equal liabilities plus net assets). Net assets should be displayed in three broad components: invested in capital assets, net of related debt; restricted net assets (distinguishing between major categories of restrictions); and unrestricted net assets.

The statement of revenues, expenses, and changes in fund net assets is the operating statement for proprietary funds. Revenues should be reported by major source and should identify revenues used as security for revenue bonds. This statement should also distinguish between operating and nonoperating revenues and expenses and should present a separate subtotal for operating revenues, operating expenses, and operating income. Nonoperating revenues and expenses should be reported after operating income. Revenues from capital contributions and additions to the principal of permanent and term endowments, special and extraordinary items, and transfers should be reported separately, after nonoperating revenues and expenses, ultimately arriving at the increase (decrease) in net assets. The net assets at the beginning of the period are then combined with the increase (decrease) in net assets to arrive at net assets at the end of the period.

Counties are required to prepare the statement of cash flows using the direct method of presenting cash flows from operating activities (including a reconciliation of operating cash flows to operating income).

D. Required Financial Statements for Fiduciary Funds and Component Units of a Fiduciary Nature

Fiduciary fund reporting focuses primarily on net assets and changes in net assets. Fiduciary funds should be used to report assets that are held in a trustee or agency capacity for others and therefore cannot be used to support the county's own programs. The fiduciary fund category includes pension (and other employee benefit) trust funds, investment trust funds, private-purpose trust funds, and agency funds.

The financial statements required for fiduciary funds are the Statement of Fiduciary Net Assets and the Statement of Changes in Fiduciary Net Assets. Fiduciary fund financial statements should include information about all fiduciary funds of the primary government, as well as component units that are fiduciary in nature. The statements should provide a separate column for each fund type, i.e., pension

(and other employee benefits) trust funds, investment trust funds, private-purpose trusts, and agency funds. Financial statements of fiduciary funds should be reported using the economic resources measurement focus and the accrual basis of accounting, except for the recognition of certain liabilities of defined benefit pension plans and certain postemployment healthcare plans.

The statement of fiduciary net assets should include information about the assets, liabilities, and net assets for each fiduciary fund type. The components of net assets are not required to be presented in the statement of fiduciary net assets. Agency fund assets equaling liabilities should be included in this statement.

The statement of changes in fiduciary net assets should include information the additions to, deductions from, and net increase (or decrease) for the year in net assets for each fiduciary fund type. The statement should provide information about significant year-to-year changes in net assets. Agency funds are not included in this statement.

R.07 Notes to the Financial Statements

The notes to the financial statements should communicate information essential for fair presentation of the financial statements that is not displayed on the face of the financial statements. As such, the notes are an integral part of the basic financial statements.

The notes should focus on the primary government (county); specifically, its governmental activities, business-type activities, major funds, and non-major funds in the aggregate. Information about the county's discretely presented component units should be presented. Guidance available to counties when considering the appropriate level of note disclosures necessary for adequate financial reporting can be found in GASB literature, including the following types of note disclosures:

- Significant accounting policies
- Details on capital assets of the primary government (county)
- Details on long-term liabilities of the primary government (county)
- Details on capital assets and long-term liabilities of the component units
- Collections not capitalized
- Donor-restricted endowments
- Segment information
- Component unit financial data

R.08 Required Supplementary Information Other Than MD&A

Guidance available to counties when considering the appropriate required supplementary information necessary for adequate financial reporting can be found in GASB literature, including the following types of required supplementary information:

- Budgetary comparison schedules
- Modified approach for reporting infrastructure

R.09 Optional Reporting

Generally accepted accounting principles (GAAP) provide some options in the preparation of financial statements and RSI. The following options should be carefully considered during the preparation of financial statements. The number in parenthesis refers to the applicable paragraph number found in GASB Statement No. 34.

A. Budgetary Comparisons - Required Supplementary Information or Basic Financial Statements (130)

Budgetary comparison schedules should be presented as RSI (required supplementary information) for the general fund and for each major special revenue fund that has a legally adopted annual budget. Counties may elect to report the budgetary comparison information in a budgetary comparison statement as part of the basic financial statements, rather than as RSI.

The auditor-controller should carefully consider whether the budgetary comparison should be prepared as a basic financial statement or displayed in a separate schedule as RSI. If the information is treated as a basic financial statement, then the document should be titled a "statement" and included with other financial statements. If the document is considered to be RSI, then it is a "schedule" and should be titled as such.

B. Determination of Major and Non-Major Funds (76)

In addition to reporting funds that meet the major fund criteria, any other governmental or enterprise fund that the county's officials believe is particularly important to financial statement users (for example, because of public interest or consistency) may be reported as a major fund.

C. Combining Statements for Non-Major Funds are Optional (Paragraph 36, Footnote No. 36)

Combining statements for non-major funds are not required, but may be presented as RSI.

D. Modified Approach to Depreciating Certain Infrastructure Assets (23)

Infrastructure assets that are part of a network or subsystem of a network are not required to be depreciated as long as two requirements are met: first, the county manages the eligible infrastructure assets using an asset management system as outlined by GASB; second, the county documents that the eligible infrastructure assets are being preserved approximately at (or above) a condition level established and disclosed by the county. Details of the requirements are included in the applicable GASB Codification section.

E. Statement of Net Assets Format (30)

Counties are encouraged to present the statement of net assets in a format that displays assets less liabilities equal net assets, although the traditional balance sheet format (assets equal liabilities plus net assets) may be used. Regardless of format used, the statement should report the difference between assets and liabilities as net assets, not fund balances or equity.

F. Allocation of Indirect Costs on the Statement of Activities (42)

Some functions, such as general government or administration, include expenses that are, in essence, indirect expenses of other functions. Counties are not required to allocate those indirect expenses to other functions. However, some counties may prefer to allocate some indirect expenses or use a full-cost allocation approach among functions.

G. Format and Terminology for Proprietary Fund Financial Statements (91)

Either a statement of net assets or a balance sheet format (where assets equal liabilities plus net assets) may be used for proprietary funds.

Either fund net assets or fund equity may be used as the label for the difference between proprietary fund assets and liabilities.

R.10 Major Reporting Elements

A. Dual Perspective in Presenting Financial Statements

There are two distinct sets of financial statements—government-wide financial statements and fund financial statements. There are significant differences between these two financial statements, including major differences in the amounts displayed in the equity sections of the two reports. A detailed reconciliation between the two statements is required on the fund statements.

Traditional fund reporting for tax-supported (governmental) activities has focused on near-term inflows, outflows and balances of spendable financial resources. This short-term focus is provided in the fund financial statements, while a long-term perspective on these same activities is provided in the government-wide financial statements.

B. Basic Financial Statements, Measurement Focus and Basis of Accounting

1. **Government-Wide Statements:** The government-wide financial statements provide a clear picture of the government as a single, unified entity. They provide operational accountability with a long-term perspective that complements traditional fund-based financial statements.

The government-wide financial statements are consolidated financial statements for all of the agencies' operations on a full accrual basis of accounting. They are not presented on a fund basis; instead, fiscal operations are organized into two major activities, governmental and business-type. Interfund transfers within the two types are eliminated. Internal service fund transactions are eliminated and net balances are included with the governmental display. Only county-controlled operations are displayed. Non-county fiduciary funds are not included.

Following are the primary financial statements:

- The Statement of Net Assets displays assets minus liabilities equals net assets. The equity section includes three components: invested in capital assets, net of related debt; restricted net assets; and unrestricted net assets.
- The Statement of Activities displays costs by function, net of direct program revenues, such as fees and operating or capital grants, producing a net program cost. General revenues, provided by taxpayers, then offset the net program costs.

2. **Fund Statements:** In meeting stewardship and accountability concerns, there is another set of financial statements presented on a fund basis. The fund statements provide fiscal accountability with a short-term focus. The governmental funds report on the modified accrual basis versus the full accrual basis reported on the government-wide statements. Proprietary funds are reported on the full accrual basis for both types of financial statements.

C. Management Discussion and Analysis

The governmental financial reporting model provides financial report users with a simple narrative introduction, overview, and required explanation and analysis of the basic financial statements in the form of management's discussion and analysis (MD&A). The MD&A is a required part of the "basic" financial statements as required supplementary information (RSI).

D. Fund Types

Fund financial statements report additional detailed information about the primary government. Counties should report governmental, proprietary, and fiduciary funds to the extent that they have activities that meet the criteria for using those funds. The following represents the required fund types:

Governmental Funds (Emphasizing Major Funds)

- General Fund
- Special Revenue Funds
- Capital Projects Funds
- Debt Service Funds
- Permanent Funds

Proprietary Funds

- Enterprise Funds (Emphasizing Major Funds)
- Internal Service Funds

Fiduciary Funds and Similar Component Units

- Pension (and Other Employee Benefit) Trust Funds
- Investment Trust Funds
- Private-Purpose Trust Funds
- Agency Funds

E. Capital Assets

Capital assets are accounted for in the county's Capital Assets Accounting System. They are included in the government-wide statements as assets for both governmental and business-type activities. Capital assets ('fixed assets') include land, structures and improvements, equipment, and infrastructure. Generally these assets are reported at their historical cost and depreciated over their estimated useful lives. These assets are reported in the government-wide statements, but not the fund financial statements. They are reported net of accumulated depreciation for both governmental and business-type activities.

Infrastructure assets include long-lived capital assets that are normally stationary in nature and can be preserved for a significantly greater number of years, such as roads, bridges, dams, and water and sewer systems. The reporting model provides that infrastructure reporting include at least those assets acquired after June 30, 1980. The model also provides for two methods of reporting infrastructure depreciation. Under either method, the infrastructure asset must be capitalized at historical or estimated cost (at least at the level of networks and subsystems) in the county's Capital Assets Accounting System.

F. Budgetary Comparison Schedules

Information on both the original and final amended budgets are presented on budgetary comparison schedules for the general fund and each individual major governmental fund.

G. Major Fund Focus

The governmental financial reporting model focus is on major funds. Major funds are defined as the general fund and other funds that are (1) at least 10% of the total assets, liabilities, revenues, and expenses for all the funds of that category type (total governmental or total enterprise funds), and (2) at least 5% of the total assets, liabilities, revenues and expenses of the total for all governmental and enterprise funds combined. In addition to the funds that meet the major fund criteria, any other governmental or enterprise fund that the government believes is particularly important to financial statement users may be reported as a major fund.

H. Long-Term Debt

Long-term debt is accounted for in the county's Debt Accounting Records. It is reported in the government-wide statements as liabilities, for both governmental and business-type reporting. The notes to the financial statements require more detail about long-term liabilities, including identifying separate information on long-term debt (such as bonds, notes, loans, and leases payable) and other long-term liabilities (such as compensated absences, and claims and judgments).

I. Net (Expense) Revenue "Cost" By Function

Net cost by function is defined as the expenses of functions (or some lower classification level presented in the statement of activities), reduced by program revenues relating to those functions.

The Statement of Activities presents the operations of the reporting government in a format that reports the net (expense) revenue of its individual functions. The governmental activities should be presented at least at the level of detail required in the governmental fund statement of revenues, expenditures, and changes in fund balances—at a minimum by function. Governments should present business-type activities at least by segment.

J. Eliminations

Eliminations are adjustments that are made in the government-wide financial statements to minimize the "grossing-up" and "doubling-up" effect caused by some internal transactions.

Eliminations are required in both the Statement of Net Assets and the Statement of Activities. There are several types of internal or interfund activities that should be considered for elimination. These activities are internal service fund (ISF) activities, interfund activities similar to ISF charges, interfund services provided and used, allocations of overhead expenses, and transfers.

Eliminations are made in the Statement of Activities to remove the “doubling-up” effect of ISF activity. The effect of similar internal events (such as allocations of accounting staff salaries) that are, in effect, allocations of overhead expenses from one function to another or within the same function should be eliminated, so that the allocated expenses are reported only by the function to which they were allocated.

Eliminations are made in the Statement of Net Assets to minimize the “grossing-up” effect on assets and liabilities with the governmental and business-type activities columns of the primary government.

Amounts owed between the funds included in the governmental activities column are eliminated, as are amounts owed between funds included in the business-type activities column.

The only internal balances (receivables and payables) that remain in the statement are those owed by a fund included in the governmental activities column to a fund included in the business-type activities column. The net residual amount is presented as an “internal balance” and eliminated in the total primary government column.

K. Net Assets

Net assets are defined as the difference between the county’s assets and its liabilities. This term is used in lieu of fund balance or equity.

The net assets are divided into three components: invested in capital assets, net of related debt; restricted net assets (distinguishing between major categories of restrictions); and unrestricted net assets.

1. Invested in capital assets, net of related debt - This component is the capital asset balances, including restricted capital assets less accumulated depreciation and outstanding balances of any capital related debt.

NOTE: If capital assets do not have any related debt, the title should be “Invested in capital assets.” If a significant portion of related debt has not yet been expended on capital assets, then that portion of the unspent debt should be included within the net assets restricted for capital projects.

2. Restricted assets - Net assets should be reported as restricted when constraints placed on net assets are either:
 - Externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments; or
 - Imposed by law through constitutional provisions or enabling legislation

NOTE: No category of restricted net assets can be negative. When the liabilities that relate to the restricted assets exceed those assets, no balance should be reported and the negative amount should be reported as a reduction of unrestricted net assets. Board designations are not considered “restricted assets” for the purpose of the Statement of Net Assets.

3. Unrestricted Assets - This is the default category. If any remaining assets do not fit into the other categories, it is reported in this section.

L. Special and Extraordinary Items

Special items are significant transactions or other events within the control of management that are either unusual in nature or infrequent in occurrence (e.g., sales of certain general government capital assets, significant forgiveness of debt, etc.). Extraordinary items are those items that are both unusual in nature and infrequent in occurrence (e.g., costs incurred by natural disaster, terrorist act, environmental disaster, etc.).

Special and extra ordinary items are to be reported separately on the bottom of the Statement of Activities, in the same manner as general revenue, with costs appropriately classified within the governmental and business-type activities.

M. Interfund Activity

Interfund activity is a resource flow between funds, including between a primary government and its blended component units. This term is used in lieu of interfund transactions.

Maverick County

General Purchasing Policies and Procedures

General purchasing procedures.

Any purchase must be authorized by the County Auditor's office before making an expense. Purchase orders must be presented to verify amount, budget funds, signatures, and proper quotes if needed. Once purchase orders are signed by the county auditor office, a number is assigned to each order, and then recorded in the accounting software.

Approved purchase orders are returned to the department in order to realize the purchase. The purchase order number needs to appear on the invoice and all documentation associated with this acquisition, except as provided below. Departments are responsible to submit all invoices to the Auditor Office in order to pay the vendors. No payment will be made for purchases done without proper purchase order authorization.

Once invoices are matched against the purchase orders already encumbered in the accounting system, they will be placed on Warrants Pending to be approved by the Commissioners Court in open court prior payment. The Auditor's office will prepare this list once invoices have been turned in. After approval, the list of Warrants Pending is sent to the Treasurer's Department where checks for payment will be processed.

Delegation

- **Purchases under \$ 500.00.** These purchases require the approval of the department head and signature from County Judge; and final approval by Auditor's Office. No quotes are required for these purchases.
- **Over \$ 500.00 but under \$ 5000.00.** These purchases required three verbal quotes and must include the quote sheet, attachment 1; except for specialty items. They must be signed by the department head and County Judge before approval from the Auditor's Office.
- **Over \$ 5,000.00 but under \$ 15,000.00.** These purchases required three (3) formal quotes on company letter head. If the expenses relate to construction projects, they must be approved by the Commissioners Court in open court. Auditor's office will ensure the companies meet the requirements listed on the section Vendor requirements of this document; Auditor's office will also make certain the companies **are not debarred** to do business in the State of Texas. Once approved, payment will be made according to the terms submitted on the proposal. Purchase orders must include all three (3) quotes and the minutes from the meeting where the expense was approved.
- **Over \$ 15,000.00 but under \$ 50, 000.00.** These expenses require 3 (three) written quotes on company letterhead; they will be obtained by the Auditor Office or the use of Qualified Information System Vendors (OISV), and Intergovernmental Contracts as stated under the Local Government **Code under Section 262**. Auditor Office will then prepare the tabulation for the selection of vendor. Recommendation will be sent to department head for approval, and to Commissioner's Court for selection/award.

- **Over \$ 50,000.00.** Require formal Invitation to Bid (ITB), Request for Qualifications (RFQ), or Request for Proposals (RFP) procedures by the Auditor Office. Requirements under **Chapter 262 of the Local Government Code** must be complied.
- **Information Technology.** Approval of specifications for technology equipment, such as telecommunications, computer systems and peripherals, must be coordinated and approved by the County Information Technology manager.
- **Inventory (Office/Warehouse).** Purchases for the County inventory in office and warehouse supplies will be done by the Auditor's Office.
- **Advertisement requirements.** Advertisement must be published at least once a week in a newspaper published five (5) days a week. The advertisement shall appear at least four-teen (14) business days prior to the last day set for the day of opening.
- **Maintenance agreements.** These expenses do not require quotes, but departments must fill out corresponding purchase orders with current invoice attached. Agreement number needs to be listed on purchase order.
- **Service calls.** These include requests to inspect malfunction equipment, such as A/C units, electrical failures. Payment on these calls will be made on an hourly basis. If the problem requires part replacements, the vendor must provide a proposal, and two (2) additional proposals must be obtained; except for emergencies purchases as defined below. The vendor will receive payment for the time spent inspecting the problem based on the vendor's hourly rate.
- **Purchase orders.** In order to process every payment, excluding utilities, the department must have a purchase order assigned.
- **Debarment.** The County of Maverick will utilize several agencies to confirm subcontracting availability to do business.

The debarment policy for federal grant monies

When making the procurement for the acquisition of goods and services using federal or state grant monies, the department must be sure the vendors are not debarred by using the Excluded Parties Listing Systems (EPLS), which is an electronic database of companies excluded from federal procurement and non-procurement programs.

Before entering into business or issuing a purchase order to vendors using Homeland Security funds, the Auditor's Office will verify the vendor status on the EPLS.

1. Auditor's office will go to the website www.epls.gov
2. The vendor will be searched in the EPLS
3. The screen shot will be printed to show the results of the search in order to indicate the vendor status and should be included in the procurement documentation
4. If the vendor is debarred the County must not engage into business with it

- **Professional services.** These services are defined under the **Local Government Code under Section 262** as those provided in connection with the professional employment or practice of a person who is licensed or registered as:
 - (i) Accounting (certified public accountant)

- (ii) Architecture (an architect)
- (iii) Landscape architecture
- (iv) Land surveying
- (v) Medicine (a physician, including a surgeon)
- (vi) Optometry
- (vii) Professional engineering
- (viii) Real estate appraising, or
- (ix) Professional nursing

Selection of these providers must be done on the basis of demonstrated competence and qualifications to perform services for a fair and reasonable price. It is generally done via Request for Qualifications (RFQ). Purchase order must be made for each invoice or payment to be made for these services.

- **Emergency purchases.** Emergency is a situation requiring the county to make the procurement more quickly to prevent a hazard to life, health, safety, welfare, or property or to avoid undue additional cost to the county. Departments have the sole responsibility to declare an emergency. Emergency purchases should have memorandum justifying the expense, and shall have the causes of the emergency, the impact on the county, and the estimated financial damage if proper procedures were to be followed.

Basic Purchase Process

1. Identify the need
2. Calculate the total for the expense
3. If less than \$500.00, prepare Purchase order, otherwise, obtain additional quotes, and prepare quote sheet
4. Fill out purchase order with vendor name, date, account, description of items, and totals
5. Have the purchase order sign by the department head and county judge
6. Take purchase order to the Auditor's office to be approved
7. Once approved by Auditor's office, a purchase order number is assigned
8. Use authorized purchase order to make purchase
9. Return invoice to accounts payable to process
10. Once purchase orders are matched against the invoices; warrants pending list will be submitted for approval
11. After list is approved, documentation will be sent to Treasurer's office for payment processing
12. After Purchases Order has been approved, it must be closed within 10 business days.

Department responsibilities

- Quotes must be obtained by department when needed.
- Purchase orders must include 3 (three) quotes when required.
- Purchase orders must have all signatures before submitting for approval to the Auditor's office.
- **Invoices with date previous to the one on the quotes or purchase order, and/or not containing an authorized signature from the Auditor's office will not be approved.**

- Purchase orders must have an expense account and the amount of the expense.
- Purchase orders with no budget will not be approved until a budget amendment is done.
Attachment 2.
- Departments must submit all invoices to accounts payable on a weekly basis.

Vendor requirements.

- The County of Maverick requires all vendors to have a current liability insurance and/or surety bond in place. This will release liability from the County to the vendor, particularly for workers compensation, and other incidents.
- Intergovernmental agreements. There are some agreements that can be used which will substitute the requirement for quotes. These agreements include the Houston Galveston Area Council, Texas Smart Buy, Buy Board, and Department of Information Resources (DIR) for information technology purchases.
- Vendors must have a valid purchase order before doing any business with Maverick County.

Attachment 1.

This sheet is to be completed by department requesting purchase and is to be attached to the Purchase Order. There must be at least three price quotes before the purchase order can be accepted and approved.

Maverick County, Texas

General Purchasing Procedures

General purchasing procedures

Purchases must be authorized by the County Auditor's office before incurring a County expense.

Purchase orders must be presented by each department to verify amount, budget funds, signatures, and proper quote(s). Once purchase orders are signed by the county auditor office, a number is assigned to each order, and then processed in the County's accounting software.

Approved purchase orders are returned to the department in order to realize the purchase. The purchase order number needs to appear on the invoice and all documentation associated with this acquisition, except as provided below. Departments are responsible to submit all invoices to the Auditor Office in order to pay the vendors. Invoices without purchase order authorization will not be paid until the department submits additional documentation.

Once invoices are matched against the authorized purchase orders processed in the accounting system, they will be placed on Warrants Pending to be approved by Commissioners Court in open court prior to payment. The Auditor's Office will prepare this list once invoices have been turned in. After approval, the list of Warrants Pending is sent to the Treasurer's Department for the processing of payment.

Delegation

- **Purchases under \$ 500.00.** These purchases require the approval of the department head and signature from County Judge; and final approval by Auditor's Office. Purchase order must include copy of the quote where purchase is going to be made, or a quote sheet. All backup documentation will stay at the Auditor's Office; therefore, it is suggested the departments make copies for their own records.
- **Over \$ 500.00 but under \$ 5,000.00.** These purchases require three written quotes and must include the quote sheet, see attachment 1; except for specialty items. They must be signed by the department head and County Judge before approval from the Auditor's Office.
- **Over \$ 5,000.00 but under \$ 15,000.00.** These purchases require three (3) formal quotes on company letter head. If the expenses relate to construction projects, they must be approved by the Commissioners Court in open court. Auditor's office will ensure the companies meet the requirements listed on the section Vendor requirements of this document; Auditor's office will also make certain the companies are not debarred to do business in the State of Texas. Once approved, payment will be made according to the terms submitted on the proposal. Purchase orders must include all three (3) quotes and the minutes from the meeting where the expense was approved.
- **Over \$ 15,000.00 but under \$ 50,000.00.** These expenses require 3 (three) written quotes on company letterhead; they will be obtained by the Auditor Office or the use of Qualified Information System Vendors (OISV), and Intergovernmental Contracts as stated under the Local Government Code under Section 262. Auditor Office will then prepare the tabulation for the selection of

vendor. Recommendation will be sent to department head for approval, and to Commissioner's Court for selection/award.

- **Over \$ 50,000.00.** Require formal Invitation to Bid (ITB), Request for Qualifications (RFQ), or Request for Proposals (RFP) procedures by the Auditor Office. State requirements under Chapter 262 of the Local Government Code must be complied.
- **Information Technology.** Approval of specifications for technology equipment, such as telecommunications, computer systems and peripherals, must be coordinated and approved by the County Information Technology manager.
- **Inventory (Office/Warehouse).** Purchases for the County inventory in office and warehouse supplies will be done by the Auditor's Office.
- **Advertisement requirements.** Advertisement must be published at least once a week in a newspaper published five (5) days a week. The advertisement shall appear at least four-teen (14) business days prior to the last day set for the day of opening.
- **Maintenance agreements.** These expenses do not require quotes, but departments must fill out corresponding purchase orders with current invoice attached. Agreement number needs to be listed on purchase order.
- **Service calls.** These include requests to inspect malfunctioning equipment, such as A/C units, electrical failures. Payment on these calls will be made on an hourly basis. If the problem requires part replacements, the vendor must provide a proposal, and two (2) additional proposals must be obtained; except for emergencies purchases as defined below. The vendor will receive payment for the time spent inspecting the problem based on the vendor's hourly rate.
- **Purchase orders.** In order to process every payment, excluding utilities, the department must have a purchase order assigned and submit an original signed invoice (no statements). If no purchase order is assigned but a purchase is made, the department will have to submit a memorandum explaining why the purchase was made without following the purchasing procedures.
- **Debarment.** The County of Maverick will utilize several agencies to confirm subcontracting availability to do business including Federal, State and other sources.

The debarment policy for federal grant monies

When making the procurement for the acquisition of goods and services using federal or state grant monies, the department, except as stated below, must ensure vendors have not been debarred by searching the "Excluded Parties Listing Systems" (EPLS), which is an electronic database of companies excluded from federal procurement and non-procurement programs.

Before entering into transactions or issuing a purchase order to vendors using Homeland Security funds, the Auditor's Office will verify the vendor status on the EPLS.

1. Auditor's office will go to the website www.epls.gov
2. Search for the vendor on the EPLS
3. The screen shot will be printed to show the results of the search in order to indicate the vendor status and should be included in the procurement documentation

4. If the vendor is debarred the County must not engage into business transactions with that vendor

- **Professional services.** These services are defined under the Government Code under Chapter 2254 as those provided in connection with the professional employment or practice of a person who is licensed or registered as:

- (i) Accounting (certified public accountant)
- (ii) Architecture (an architect)
- (iii) Landscape architecture
- (iv) Land surveying
- (v) Medicine (a physician, including a surgeon)
- (vi) Optometry
- (vii) Professional engineering
- (viii) Real estate appraising, or
- (ix) Professional nursing

Selection of these providers must be done on the basis of demonstrated competence and qualifications to perform services for a fair and reasonable price. It is generally done via Request for Qualifications (RFQ). Purchase order must be made for each invoice or payment to be made for these services.

- **Emergency purchases.** Emergency is a situation requiring the county to make the procurement more quickly to prevent a hazard to life, health, safety, welfare, or property or to avoid undue additional cost to the County. Departments have the sole responsibility to declare an emergency. Emergency purchases should have memorandum justifying the expense, and shall have the causes of the emergency, the impact on the county, and the estimated financial damage if proper procedures were to be followed.

Emergency purchases will be allowed based only on the causes mentioned on its definition above. Excessive use of this option will not be permitted.

- **Sole Source.** Sole source purchases are rare and will not be accepted unless appropriate backup and justification is provided.

Justification for a sole source purchase might include:

1. The requested product is an integral repair part or accessory compatible with existing equipment
2. Only a particular brand or "make" is compatible with existing equipment or inventory
3. Only one source is known for a specialized item of equipment or material
4. Only one contractor is capable of providing the required service

The **Sole Source Justification** must include a written explanation with the following:

1. A clear statement of the unique performance factors of the product or vendor specified
2. Why those unique factors are required
3. What other products or vendors were evaluated
4. The reason(s) for rejecting the other products or vendors (price and convenience is not a justification for a sole source award)

- **Salvage property** is personal property, other than items routinely discarded as waste, that because of use, time, accident, or any other cause is so worn, damaged, or obsolete that it has no value for the purpose for which it was originally intended (Texas Local Gov't Code 263.151)
- **Surplus Property.** Means personal property that:
 - (A) is not salvage property or items routinely discarded as waste;
 - (B) is not currently needed by the County ;
 - (C) is not required for the County's foreseeable needs; and
 - (D) possesses some usefulness for the purpose for which it was intended.
- **Disposition of Surplus and/or salvage property.** The Commissioners Court of a county may:
 1. Sell the county's surplus or salvage by competitive bidding or auction
 2. Order property to be destroyed or otherwise disposed of as worthless if Commissioners Court considers that is unable to sell because no bids are made;
 3. Donate the property to a civic or charitable organization within the County
- **Notice.** The Commissioners Court shall publish the sale in at least one newspaper of general circulation within the county. The notice must be published on or after the 30th day but before the 10th day before the date of the sale.
- **W-9 Form.** Each department must request from each vendor a W-9 Form "Request for Taxpayer Identification Number and Certification." This form is required by the IRS. Usually the form is submitted to the Auditor's office the first time a vendor transacts business with the County. If this form is not delivered to us no transactions will be processed. This requirement must be in order to avoid penalties to the County from the IRS. See Attachment 3.
- **Rewards.** Any returns from vendors on purchases made with Maverick County funds, shall be reported and turned in to the Auditor's office since they represent property of the County. These may include rebate cards, pre-paid debit cards, or any form of remuneration for a purchase.
- **Capital Assets.** These are tangible assets, property, plant, equipment or infrastructure (bridges, roads, fences, sewer lines, etc. that cannot be easily converted into cash. These are items the County has bought and will use for an extended period of time; such as land, buildings, motor vehicles, furniture, office equipment, computers, fixtures and fittings, and plant and machinery. Departments must notify receipt of these items in order to have them inventoried and tagged by the Auditor's office.
- **Affidavits.** In those circumstances where invoices, purchase orders, receiving reports, etc. cannot be produced for any reason; with the approval of the Auditor's office an affidavit may be submitted in order to make payments, this is the exception not the norm.
- **Purchase order approval.** The approval of purchase orders will be done as they come in. They will not be approved without delay, since each purchase order requires review. They will be reviewed the same day; and returned, either approved or with a request for additional information the next day. For purchase orders to be approved under emergencies, the decision will be made by the Auditor's office based on the emergency definition above.
- **Training/Seminars.** Departments are responsible for planning ahead of time when attending trainings, and or seminars. Purchase orders must be submitted with ample time in order to process all necessary checks to cover for all training related expenses. For same day travel or

trainings only mileage will be paid when using personal vehicle, meals or other expenses will not be reimbursed.

1. Purchase orders to pay for training must include proof of registration, and if available agenda of training/seminar.
 2. Purchase orders for employee's per-diem, and mileage must include travel vouchers with proof of registration, agenda if available, map for mileage confirmation, and lodging is to be included in travel voucher (See Attachment 4), the allowable travel rates approved by Commissioners Court of January 09, 2014 are as follows:
 - A. Per-diem. \$36.00 per day. Broke down as follows: Breakfast \$ 7.00; Lunch: \$ 15.00; Dinner: \$ 14.00.
 - B. Mileage. The rate per mile is of \$0.55 cents.
 - C. Lodging. The allowable amount is \$ 85.00 per night
 3. Travel voucher must be signed and dated by department head. If department head is the one attending, travel voucher must be dated and signed by County Judge or immediate supervisor.
 4. Purchase orders to cover for lodging, if not included on travel voucher, must include confirmation of hotel reservation, proof of training registration, W-9 form (Attachment 3), and agenda of training if available.
- **Dues and memberships.** A purchase order is needed with supporting documentation from the organization where the membership should be paid. Any subscriptions and book orders need a purchase order with order documentation including shipping and any additional costs. In order to process payment, departments must submit invoices. It is the department's responsibility to ensure purchase order is accepted by the company before proceeding with the order.

In General, the Basic Purchase Process is as follows:

1. Identify the need
2. Calculate the total for the expense
3. If less than \$500.00, prepare Purchase order and submit with either a copy of the quote or quote sheet
4. If more than \$500.00, obtain additional quotes, prepare quote sheet and prepare Purchase order
5. Fill out purchase order with vendor name, date, account to be charged, description of items, and totals
6. Have the purchase order sign by the department head and county judge
7. Take purchase order to the Auditor's office to be approved
8. Once approved by Auditor's office, a purchase order number is assigned
9. Use authorized purchase order to make purchase
10. Return signed invoice to accounts payable to process
11. Once purchase orders are matched against the invoices; warrants pending list will be submitted for approval
12. After list is approved, documentation will be sent to Treasurer's office for payment processing
13. After Purchases Order has been approved, it must be closed within 90 business days.

Department responsibilities

- Quotes must be obtained by department when needed.
- Purchase orders must include 3 (three) quotes when required.
- Purchase orders must have all signatures before submitting for approval to the Auditor's office.
- Invoices with date previous to the one on the quotes or purchase order, and/or not containing an authorized signature from the Auditor's office will not be approved.
- Purchase orders must have an expense account to be charged and the amount of the expense.
- Departments must submit all invoices to accounts payable on a weekly basis.
- All invoices must have printed name and signature of employee receiving goods and/or accepting services
- If the account on purchase order has no budget, the purchase will not be approved until a budget amendment is done. Attachment 2.
- The accounts use on the purchase orders must relate to the goods and services acquired. For example if a monthly payment is done, the account to be used should be maintenance agreement if account available in budget.
- Purchase orders for flat tires with Eagle Tire & Appliance (Goodyear) will be handled by Auditor's office for a total of 10 (ten) regular tires, and 4 (four) special trucks
- Purchase orders will be good for a period of 60 (sixty) days from their approval date. Otherwise, purchase order will be voided and purchase process must start from the beginning.

Vendor requirements.

- The County requires all vendors to have current liability insurance and/or surety bond in place. This will release liability from the County to the vendor, particularly for workers compensation, and other incidents.
- Intergovernmental agreements. There are some agreements that can be used which will substitute the requirement for quotes. These agreements include the Houston Galveston Area Council, Texas Smart Buy, Buy Board, and Department of Information Resources (DIR) for information technology purchases.
- Vendors must have a valid purchase order before doing any business with the County

This sheet is to be completed by department requesting purchase and is to be attached to the Purchase Order. There must be at least three price quotes before the purchase order can be accepted and approved.

**Request for Taxpayer
Identification Number and Certification**

Give Form to the
requester. Do not
send to the IRS.

Print or type See Specific Instructions on page 2.	Name (as shown on your income tax return)	
	Business name/disregarded entity name, if different from above	
	Check appropriate box for federal tax classification: <input type="checkbox"/> Individual/sole proprietor <input type="checkbox"/> C Corporation <input type="checkbox"/> S Corporation <input type="checkbox"/> Partnership <input type="checkbox"/> Trust/estate <input type="checkbox"/> Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=partnership) ▶ _____ <input type="checkbox"/> Other (see instructions) ▶ _____	
	<input type="checkbox"/> Exempt payee	
	Address (number, street, and apt. or suite no.)	Requester's name and address (optional)
City, state, and ZIP code		
List account number(s) here (optional)		

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on the "Name" line to avoid backup withholding. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I Instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

Note. If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

Social security number								
				-				
Employer identification number								
				-				

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. citizen or other U.S. person (defined below).

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions on page 4.

------------------	----------------------------	--------

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued).
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States,
- An estate (other than a foreign estate), or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

**Maverick County
Auditor's Office**

Memo

To: All Elected, Appointed Officials and Departments
 From: Maverick County Auditor
 CC:
 Date: 6/3/2014
 Re: Guidelines on Purchases of Materials & Equipment Effective Now

These guidelines are being implemented at the discretion of the County Auditor's Office under his duties authorized by state law. These procedures are being issued to all elected, appointed officials and departments (County Official) and are effective immediately. These guidelines will be made a part of the Revised Purchasing Policies in the near future. Any questions or clarifications maybe directed to the County Auditor's Office.

MATERIAL PURCHASES:

1. When any County official is issued a purchase order authorizing the ordering or purchase of any type of material for county use arrangements will be made prior to delivery to have a representative of the County Auditor's Office – Purchasing to be present to verify the material's delivery.
2. Each department that submits a request for a Purchase Order will pick up the "white" copy of the purchase order to deliver to the vendor. This will be their authorization to proceed with the purchase as indicated in the purchase order. Vendors are being informed not to accept verbal purchase order numbers. We are explaining to vendors that if any delivery is made without an approved purchase order payment will not be made. Arrangements are being made to have a pick-up station for all elected, appointed and department heads in the County Auditor's Office.
3. Elected Officials, Department Heads or Supervisors will sign for all deliveries.

EQUIPMENT PURCHASES:

1. When any County official is issued a purchase order authorizing the ordering or purchase of any type of equipment (cars, trucks, computers, tractors, etc.) for county use arrangements will be made prior to delivery to have a representative of the County Auditor's Office – Purchasing present to verify the equipment's delivery. Information such as serial number, model number, purchase order verification, pictures will be taken, equipment tags will be attached and other information will be obtained.
2. Each department that submits a request for a Purchase Order will pick up the "white" copy of the purchase order to deliver to the vendor. This will be their authorization to proceed with the purchase as indicated in the purchase order. Vendors are being informed not to accept verbal purchase order numbers. We are explaining to vendors that if any delivery is made without an

approved purchase order payment will not be made. Arrangements are being made to have a pick-up station for all elected, appointed and department heads in the County Auditor's Office.

Elected Officials, Department Heads or Supervisors will sign for all deliveries

1. INTRODUCTION

This manual is being issued under the County Auditor's authority granted under the Texas Local Government Code (LGC) to set accounting procedures for the County.

The purpose of this manual is to provide a better understanding of the importance of property management, inventory control, fixed asset responsibilities and controls for Maverick County, Texas (County). Therefore, by establishing standards for property management, inventory control and fixed asset control for the County property it will be made easier for all concerned. This manual will cover each phase of the County's property, inventory and fixed asset system.

In the County, the Assistant County Auditor assigned is responsible as the "Fixed Asset Manager" for the County. The Assistant County Auditor must inventory all County property on hand and belonging on the all departments. It must maintain a list of fixed assets purchases for each fiscal year before September 30th. This list must be filed with the County Auditor at the beginning of new fiscal year.

2. Definition of Inventory/ Fixed Assets

In order to explain the property accounting system for fixed assets, it is necessary to first define the types of fixed assets that will be included in the reporting system. Following is a list of assets to be included in the reporting system for the County.

All fixed assets in use by the various County departments including County owned buildings, land, and improvements made to County owned land.

Any asset that has a value or cost of \$5,000 or more and a useful life of at least one-year will be recorded on the County fixed asset inventory.

There are seven major asset classifications or more in a typical local government. All capital assets of the County will fall within one of the four major classifications. There classifications are:

1. Land
2. Buildings;
3. Improvements Other Than Buildings;
4. Furnishings and equipment;
5. Infrastructure;
6. Construction/development in progress and
7. Other capital assets

Definitions of each of the major and minor classifications of the County fixed assets are as follows:

A. LAND

Any land purchased or donated to the County will be placed on the capital asset inventory at the price paid for the land at the time of purchase of the appraised value of any land which is donated or traded to the County.

For land already owned by the County, the price of the land will be at actual cost of the land at the time the land was purchased, if it is possible to obtain the price of the land in the deed records of the County. If we are unable to obtain a price on the land, the appraised value of the land will be used and adjusted as needed to obtain a “close-to” original estimated cost of the land.

Land, which has been deeded to the county for the purpose of building County roads, or land purchased by the County for this purpose, will be placed on the capital asset records. If we are unable to obtain a price on the land, the appraised value of the land will be used and adjusted as needed to obtain a “close-to” original estimated cost of the land.

B. BUILDINGS

County buildings are permanent (non-moveable) structures and will be placed on the capital asset inventory at actual cost of the building if the actual cost is available. The amount reported should include any costs incurred to increase the service utility of a building or to extend its total estimated useful life (improvements and betterments). If actual cost is not available, the value of the building will be the appraised value plus or minus any necessary adjustments to determine the actual cost of the building at the time it was constructed or purchased by the County. If the building is donated or received in trade, it will be recorded at appraisal value.

Major renovation or Construction of additions to existing building will be recorded on fixed asset inventory at actual cost.

Only those items that will improve the long-term value of the buildings will be considered as additions to the value of the buildings.

C. IMPROVEMENTS OTHER THAN BUILDINGS

Local governments classify permanent (non-moveable) improvements to land that have a limited useful life as improvements other than buildings (or land improvements. Examples include fences, retaining walls, parking lots, and most landscaping.

D. FURNISHING AND EQUIPMENT

Machinery and Equipment including any moveable piece of property purchased, donated, or built by Maverick County or acquired from surplus property agencies. Maverick County in accordance with State Purchasing Laws and County Purchasing Procedures make purchases of all items of machinery and equipment. This Equipment is placed on the fixed asset inventory at cost or at estimated value if donated.

E. INFRASTRUCTURE

Infrastructure assets are defined as: long-lived capital assets that normally are stationary in nature and normally can be preserved for a significantly greater number of years than most capital assets. Examples of infrastructure assets include roads, bridges, tunnels, drainage systems, water and sewer systems, dams, and lighting systems. Infrastructure items normally are reported as networks or subsystems, rather than as individual assets in their own right.

F. CONSTRUCTION/DEVELOPMENT IN PROGRESS

Depreciation cannot begin until capital assets are substantially ready to be placed in service. Therefore, a special asset class is needed for capital assets that are still in the process of construction (tangible) or development (intangible).

G. OTHER CAPITAL ASSETS

Typically local governments report a separate category for capital assets that do not fit into any of the above asset classes. If specific items include both assets that are being depreciated or amortized (software) and those that are not (easement), two separate class should be used (assuming materiality).

H. DONATED PROPERTY

All assets received via donation or contribution, regardless of source, will be included in capital assets. These items must be reported to the Purchasing Department immediately upon receipt. For financial reporting these assets shall be recorded at fair market value on the date of receipt.

Proper recording of these assets is essential as some contributed assets, such as those received from the Federal Government, must be tracked at several levels and improper disposition of these assets could have penalties or serve negative impact upon the County's ability to participate in a program.

I. GRANT PROPERTY

Property purchased with grant funds shall comply with grant documents detailing purchase, cost and disposition of the property that conform with all applicable federal, state and local laws, rules and regulations. State Pass-through grants shall comply with the latest state of Texas Uniform Grant Management Standards issued by the Governor's Office of Budget and Planning.

3. PROTECTION OF PROPERTY

The protection of property is outlined in Section 31.11 (a) outlined in Section 31.11 (a) outlined in Section 31.11 (a) of the Penal Code of Texas. In accordance with this statute, a person commits an offense if he or she:

§ 31.11. TAMPERING WITH IDENTIFICATION NUMBERS.

a) A person commits an offense if the person:

(1) knowingly or intentionally removes, alters, or obliterates the serial number or other permanent identification marking on tangible personal property; or

(2) Possesses, sells, or offers for sale tangible personal property and:

A) the actor knows that the serial number or other permanent identification marking has been removed, altered, or obliterated; or

(B) a reasonable person in the position of the actor would have known that the serial number or other permanent identification marking has been removed, altered, or obliterated.

(b) It is an affirmative defense to prosecution under this section that the person was:

(1) The owner or acting with the effective consent of the owner of the property involved;

(2) A peace officer acting in the actual discharge of official duties; or

(3) Acting with respect to a number assigned to a vehicle by the Texas Department of Transportation and the person was:

(A) In the actual discharge of official duties as an employee or agent of the department; or

(B) In full compliance with the rules of the department as an applicant for an assigned number approved by the department.

(c) Property involved in a violation of this section may be treated as stolen for purposes of custody and disposition of the property.

(d) An offense under this section is a Class A misdemeanor.

(e) In this section, "vehicle" has the meaning given by Section 541.201, Transportation Code.

4. FIXED ASSET MANAGER ESPONSIBILITIES

- A. The Assistant County Auditor assigned as Capital Asset Manager. The manager is responsible for the maintenance of property records. All transaction having to do with assets of the county must flow through the Purchasing Coordinating Department and The Manager who is responsible for maintaining inventory records for all assets. The Manager assigned will supply department heads and County officials with all the necessary forms and information concerning the transfer and accountability of property assigned to each County department.
- B. Each year the Manager will provide a detail printed list of all assets assigned to each department in the County. The Manager will make corrections and adjustments to property records to reflect actual count. Inventory of all County's capital asset shall be schedule and conducted on a rotating basis so that all capital assets are verified.
- C. The Manager assigned will tag each asset that will identify the property as County-owned.
- D. Accumulation and disposal of surplus property of the County will take place under the supervision of the Purchasing Agent or designated employee, in accordance to the laws of the State of Texas and County polices already established.
- E. Warehouse Property- the Purchasing Department is responsible for warehousing all surplus, excess, or salvage property.

5. DEPARTMENTAL OFFICIALS' RESPONSIBILITIES

- A. User departments will be held responsible for proper accounting, maintenance and use of County assets. Any elected official or department head leaving the employment of the County or department must notify the Manager who will arrange for a detailed property inventory of all assets assigned to the department before the Elected Official or Department Head leaves office. The Elected Official or Department Head will be required to take an inventory of all property assigned to their department, or to have a member of their staff take the inventory. All items on the printout must be accounted for. After taking a physical inventory, the inventory printout must be signed upon the completion of the final inventory, including any discrepancies that will be reported to the Commissioners' Court.
- B. All County property should and will be used for County business purpose only.
- C. The Elected or Department Head shall report missing items immediately to the proper law enforcement agency. A copy of the report from the law enforcement agency must be provided to the Purchasing Department or designated employee. Commissioners' Court must approve all replacement of stolen items. Recovered items are similarly reported to Commissioners' Court.
- D. The Elected Official or Department Head shall report items lost immediately to the Manager designated. Commissioners' Court must approve all replacement of lost items. Recovered items are similarly reported to Commissioners' Court.
- E. Annually, an inventory of County property will be made under the supervision of the Purchasing Coordinator or designated employee. The purpose of the inventory is to verify the accuracy of the fixed asset records. Each Elected Official or Department Head will receive a printout of all equipment assigned to his or her department. All items on the printout must be accounted for in their department, the department head must sign, date and return one copy of the printout to the Purchasing Department denoting any differences in the printed list and actual inventory. The Purchasing Department will make all corrections and adjustments to the inventory records to reflect actual inventory count. Inventory of all County's capital assets shall be schedule and conducted on a rotating basis so that all capital assets are verified. In each department, an individual must be assigned the responsibility for coordinating and locating the annual inventory of capital assets assigned to the department. If there are items (with a value of \$500 or more) in the department, which are not listed on the printout, those items will be listed and turned in with the inventory so that the assets may be added to inventory records. The Elected Official or Department Head shall sign and date the fixed asset record on or before the required deadline.
 - (1) Any item not located in a department will require a letter from the Elected Official or Department Head to the Commissioners' Court detailing the search for the missing item. I.e. misplaced, stolen, used for parts, etc.
- F. An Elected Official or Department Head does not have the authority to transfer equipment from one department to another, destroy equipment, or throw away or discard equipment. Commissioners' Court must approve any transfer or disposal. Otherwise, the Elected Official or Department Head is responsible for all equipment assigned to his/her department. Any surplus inventory in any department in the County should be returned to the Purchasing Department for reassignment or auction. The Maverick County transmittal form must be completed by user department, signed and sent to the Purchasing Department (Fixed Asset Manager) for any equipment transfer.

G. Maverick County assumes no liability for employee's personal assets located on County property.

H. Repair to Fixed Assets:

Repairs to any County equipment must be monitored by the user department. If the original fixed asset equipment is replaced the Fixed Asset Manager assigned shall be notified immediately. The replaced fixed asset must be deleted by Commissioners' Court, and then re-assigned a new asset number reflecting the new part number and serial number.

6. ACCOUNTING SYSTEM FOR INVENTORY/FIXED ASSETS

The Manager has overall responsibility to maintain accurate asset records of Maverick County property.

The New Accounting system will include the following elements:

FIXED ASSET HANDHELD IMPLEMENTATION

- 1) Setup, implementation and training for the property handheld scanner and printer
- 2) Data logic Memory Mobile Computer
- 3) Tracer Plus Professional Software
- 4) Wasp WPL305 Printer

Handheld Implementation- barcodes will be used to tag all property, the scanner will be used to input information of each new asset and linked to our accounting system.

7. DISPOSITION OF FIXED ASSETS

Salvage and surplus property owned by the County may be disposed by sale, by competitive bid or auction, by trade-in for new property, or by being destroyed as worthless if it cannot be sold. The following procedures should be followed.

1. Salvage and surplus property owned by the County may be disposed by sale or competitive bid or auction, trade-in for new property, or by being destroyed as worthless if it cannot be sold, or donated to a tax exempt entity.

(See Texas Local Government Code- Ch.263-Sections 263.151 through 263.158.)

http://www.weblaws.org/texas/laws/tex. local_gov%27t_code_section_263.151_definitions

2. Disposition of abandoned or unclaimed property seized by a peace officer must be conducted in accordance with Article 18.17, TEXAS CODE OF CRIMINAL PROCEDURES.

<http://codes.lp.findlaw.com/txstatutes/CR/1/18/18.17>

3. Equipment which is broken or no longer needed in a department or which is to be traded-in, shall be transferred to surplus after approval by Commissioners' Court.
4. The Manager will periodically request that the Commissioners' Court declares property "surplus" (in excess of needs useful) or "salvage" (has no value-not useful). Competitive bid or auction will sell surplus and salvage property under the State laws on disposition of property.

8. COUNTY AUDITORS' RESPONSIBILITIES

1. The Auditors may at any time audit asset records held in the Purchasing Department and audit actual equipment held by various departments in the County to determine the accuracy of inventory records.
2. The auditor may verify that all equipment is charged to correct expenditure accounts.

MAVERICK COUNTY, TEXAS
ACCOUNTING PROCEDURES

MONTH-END CLOSING ENTRIES

GENERAL

1. Closings for the month will be based on the "Monthly County Closing Schedule" disseminated in our website the reader is directed to that site
2. Accounts payable will be accrued daily in the accounts payable and general ledger module through the end of the month
3. Verify or confirm with the Treasures' office that all bank reconciliations have been completed and any corrections/errors have been posted to the general ledger through the end of the month.
4. Verify that all journal entries for the month have been reviewed and approved per our monthly journal entry binder, both the County Auditor's and Treasurer's office
5. Verify or review all revenues and/or corrections/errors have been posted to the general ledger
6. Verify or determine that all deposits received have been posted to the general ledger through the end of the month
7. Verify that the trial balance for each fund is in balance by reviewing our accounting software for indication of out of balance funds.
8. Verify that Operating Transfers In equal Operating Transfers Out within all funds
9. Verify that interfund loans receivable equal interfund loans payable
10. If control accounts are in use, verify that the expenditure detail is equal to the expenditure control, and that the revenue detail is equal to the revenue control.
11. Review and determine that all grant revenue and expenditures are in balance for the month, if possible if not reconcile at termination of grant or year end.
12. If inventory of supplies is deemed material, establish or adjust inventory account and offset to reserve for inventory of supplies, otherwise this is done at year end.

ACCOUNTING PROCEDURES

MONTH-END CLOSING ENTRIES

GOVERNMENTAL FUNDS AND ACCOUNT GROUPS – CONT.

1. If inventory of supplies is deemed material, establish or adjust inventory account and offset to reserve for inventory of supplies.
2. Capital assets purchased by governmental funds, including infrastructure, should be added to the general fixed asset account group (GFAAG). Any assets traded-in or disposed of should be deleted. The balance in this account group should be reconciled with the fixed asset inventory. Depreciation is required to be recorded in the GFAAG for all assets other than land and construction in progress at the functional level if possible. **(Note: The GFAAG is no longer required to be reported under GASB #34 but is maintained to generate information for the government-wide statements)**
3. Prepare worksheet on (Treasure's Department) unused vacation, sick leave, compensatory time and employer's related payroll obligation. Adjust compensated absences payable account within the general long-term debt account group (GLTDAG). **(Note: The GLTDAG is no longer required to be reported under GASB #34 but is maintained to generate information for the government-wide statements)**
4. Adjust the appropriate long-term liability account (GLTDAG) for principal paid from governmental funds on contracts, loans, lease-purchase agreements, general obligation bonds and/or special improvement district (S.I.D.) bonds. Also for revenue bonds, if payments are made from governmental funds.
5. Adjust the appropriate amount available account in GLTDAG to the corresponding fund balance in the debt service fund types for general obligation bonds and special improvement district (S.I.D.) bonds, if any.
8. Adjust appropriate amount to be provided account for all long-term liability accounts within GLTDAG. This includes contracts, notes, lease purchases, compensated absences, G.O. bonds and S.I.D. bonds payable.
9. Close out revenue and expenditure accounts to fund balance for the month.

12. Close revenue and expense accounts to net assets.

MAVERICK COUNTY, TEXAS
ACCOUNTING PROCEDURES

YEAR-END CLOSING ENTRIES

GENERAL

1. Review year-end budget to actual expenditure report for budget overdrafts. Cover budget overdrafts by a budget amendment of the governing body authorizing the transfer of appropriations. However, total budget appropriations should remain the same within each fund.
2. Verify that Operating Transfers In equal Operating Transfers Out within all funds.
3. Verify that interfund loans receivable equal interfund loans payable.
4. Verify that the trial balance for each fund is in balance.
5. If control accounts are used verify that the expenditure detail is equal to the expenditure control, and that the revenue detail is equal to the revenue control in those systems where control accounts are used.
6. Taxes/Assessments Receivable
 - A. Reconcile all taxes/assessment receivable accounts with the County Treasurer's receivables, including protested taxes including penalties and interest accounts.
 - B. Adjust deferred revenue accounts to the corresponding receivable accounts for real, personal, protested and special assessments, and offset to the appropriate revenue accounts. (Do not defer taxes for proprietary funds.)
 - C. Reconcile the deferred assessment receivable account for each Fund with the future year's principal assessments. (Verify that all prepaid assessments have been deducted from the deferred assessment receivable account.)

GOVERNMENTAL FUNDS AND ACCOUNT GROUPS

1. Review payroll and claims expenditures for possible accruals, if deemed material. This would include any goods or services received prior to the end of the fiscal year. Also, review debt service funds for accruing any bond interest payable at year-end or for bond principal payable within the next fiscal year. (Reclassify principal from general long-term debt account group to short-term payable of debt service fund.)

MAVERICK COUNTY, TEXAS ACCOUNTING PROCEDURES

YEAR-END CLOSING ENTRIES

GOVERNMENTAL FUNDS AND ACCOUNT GROUPS – CONT.

2. Review revenue accounts for possible accruals, if deemed material. But, keep in mind that these revenues must meet the revenue recognition criteria of measurable and available. Revenue for federal and/or state grants that are reimbursed upon expenditure, should be recognized when the expenditure is made. (Some revenue susceptible to accrual may be interest on investments, state shared revenue, P & I on delinquent taxes, etc.)
3. If inventory of supplies is deemed material, establish or adjust inventory account and offset to reserve for inventory of supplies.
4. Capital assets purchased by governmental funds, including infrastructure, should be added to the general fixed asset account group (GFAAG). Any assets traded-in or disposed of should be deleted. YEAR-END CLOSING ENTRIES

10. If interest expense is to be capitalized for assets constructed with tax exempt borrowings, close appropriate interest earnings/interest expense on borrowings to the appropriate asset account. (Limited to construction period only.)
11. Adjust compensated absences payable per schedule and offset to payroll expense.
12. Close revenue and expense accounts to net assets by categories such as invested in capital assets, restricted and unassigned accounts

FIDUCIARY FUNDS – AGENCY FUNDS

1. Determine and account for all fiduciary and agency funds for both elected officials and county funds.
2. Verify all bank accounts are reconciled.
3. Verify the schedule of fiduciary and agency funds have been prepared detailing fund beginning balance from prior year, additions, deletions and ending balance that agree to bank accounts for all assets and liabilities.
4. Verify schedule year end balances are recorded in the general ledger.
5. Verify that assets equal liabilities, in balance.
6. Verify that there is no fund balance presented.

**Maverick County
Auditor's Office**

Memo

To: All Elected, Appointed Officials, Departments and Employees
From: Maverick County Auditor
CC:
Date: 6/3/2014
Re: Procedures on the Use of Card (Debit) of Maverick County, Texas

These procedures are developed and implemented at the discretion of the County Auditor's Office under duties authorized by state law.

These procedures are being issued to all elected, appointed officials, department heads and employees of the County and are effective immediately. Any questions or clarifications maybe directed to the County Auditor's Office.

From time to time authorized county personnel maybe in need of the use of a card (debit) therefore the following procedures apply:

1. The card issued is a debit card from the indicated bank with a limit of \$2,025;
2. The card can only be used by the authorized person that signed the acceptance for the card. In some instances the card may have a generic name such as: "Judge Maverick" "365th Judge", etc. in those cases the bank will accept the card when presented by a staff member, however, responsibility for any charges remains with the person that signed for the card;
3. Security of the card is of utmost importance since responsibility attaches to the person assigned the card;
4. The card maybe used only for lawful county expenses;
5. The card cannot be used for personal purposes this will result in cancellation of the card;
6. Each time the card is used the card holder must submit an expense report with a properly executed purchase order detailing the use of the card including receipts and the account number where the expenses are to be charged, once this is done the card account will be replenished with sufficient funds as requested on the purchase order. i.e. if the purchase order is for \$200 then the account will be replenished for \$200.

7. This is a regular debit card therefore any information needed can be obtained at any ATM machine, call the bank for inquiries, etc. cash funds are not permitted to be drawn from this account. If an emergency arises where cash funds are needed contact the County Auditors' office first.
8. If on travel status these cards cannot be used for payment of meals or hotels when per diem is advanced to the traveler. If more than one county employee is on travel status this card cannot be used to pay meals or hotels for other county employees advanced per diem funds.
