

WHARTON COUNTY PERMIT DEPARTMENT

This office does not recommend any person over the other. Any person with the proper credentials may perform OSSF (on-site sewage facility) duties. This list is for your convenience only.

The following is a list of contractors known by this office to be approved or licensed by the TCEQ to design, install, or provide maintenance/repairs on an OSSF. Your system must be installed by someone who is a State licensed installer. You do not have to use someone from this list; however, the installer you use must be able to show proof of holding a current license. If you have an aerobic system, you are required to have a contract with a State licensed maintenance provider.
