Fun Facts about July 4th

- * Did you know that the Liberty Bell, located in Philadelphia, is tapped (13) thirteen times every July 4th? It is a way to honor the original (13) thirteen colonies! It has not been rung since February 1846.
- * Massachusetts was the first state to make July 4th an official holiday, however, in 1870 it became a federal holiday.
- * Despite what you might have thought or known, but only (2) two men signed the Declaration of Independence on July 4 1776, John Hancock and Charles Thompson. The other delegates signed it with-in the next few weeks. So, that famous painting showing the signatures, well, it is a bit of an exaggeration!
- * (1) one President of the United States was born on July 4th, that was America's 30th President Calvin Coolidge.
- * The oldest Fourth of July parade is held in Bristol, Rhode Island. The town's festivities date back to 1785.
- * Americans spend over a \$1 billion on fireworks every 4th of July.
- * July 4th produces the highest beer and wine sales out of all the federal holidays.
- * Americans eat a lot of hot dogs on July 4th, approximately, 150 million pounds, which would stretch from Washington DC to Los Angeles more than (5) five times

Jolly Facts about July

- July was named after the famous Roman general Julius Caesar; it was selected by the Roman senate, based on his birth month.
- On July 16, 1945, a day with a dark period of world history, the first atomic bomb, called “Fat Boy”, was detonated in Alamogordo, New Mexico. The explosion caused a mushroom cloud that was 41,000 feet high!
- July was a significant time for the space race of the '60s. The Apollo 11 Mission, was launched on July 16, 1969. On July 20, 1969, Neil Armstrong made history by taking the first step on the moon while announcing, *“That’s one small step for man, one giant leap for mankind!”*.
- Even though, July, being the first month in the second half of the year, July 1st is not actually the middle of the year. In a regular non-leap year, the midpoint is actually on July 2nd at 1 pm.
- The full Moon in July is called the Buck Moon because the antlers of male deer (bucks) are in full-growth mode at this time.
- On July 10, 1913, the hottest temperature ever recorded in the US, was in Greenland Ranch CA, it soared to 134°. It was hot enough to fry an egg on a rock in a matter of seconds!
- The first bikini, a audacious two piece, debuted in Paris on July 5th, 1946 at the famous Piscine Militar swimming pool, unveiled by French designer, Louis Réard.
