NO RISE CERTIFICATION
(SFHA - AE – Floodway)

This is to certify that I am a duly qualified registered professional engineer licensed to practice in the State of Texas.

It is further to certify that the attached technical data supports the fact that the construction/development at (property legal description) _____ will cause **no rise** of the 100-year flood elevations, floodway elevations, or floodway width on published sections in the Flood Insurance Study for Llano County, Texas, dated _____ and will not impact the 100-year flood elevations, floodway elevations, or floodway width at unpublished cross-sections or to the surrounding properties of the proposed development.

- YES / NO (Circle One) - Site and design plan provided to engineer.
- Engineer's data must reflect exact amount of rise to determine permit/CLOMR requirements based on site and design specifications. Findings to be noted in the box provided below.

Attached are the following documents that support my findings:

Date: _____

Name: _____

[SEAL]

Title: _____

Signature: _____
